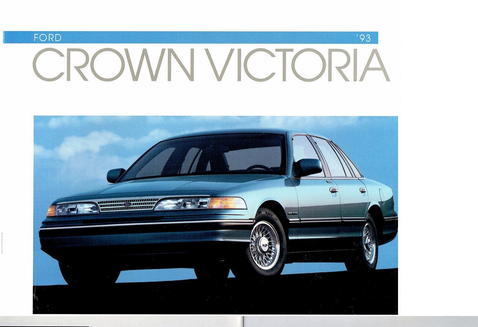
CROWN VICTORIA



1993 CROWN VICTORIA

Crown Victoria LX in White Clearcoat with optional Sport Appearance Package (standard equipment shown in optional).

Today's Crown Victoria is wholly in the tradition of its full-size predecessors, with its smooth-ride quality and outstanding comfort. Yet, in a number of important respects, it is quite unlike any Eisenhower Ford that has come before it.

This Crown Victoria bears the unmistakable signature of Ford design leadership: a distinctively Ford aerodynamic shape which not only gives this Crown Victoria its contemporary styling appeal, but also contributes to its full efficiency, handling capability and quietness.

In this Crown Victoria you have advanced engineering technology. A computer-controlled 4-liter overhead cam V-8 with state-of-the-art sequential electronic fuel injection is teamed with an electronically controlled 4-speed automatic overdrive transmission. The "speed-sensitive" steering system is also electronically governed.

A driver aid that is standard and unsurpassed on Ford equipment is an anti-lock braking system (ABS). And the entire chassis, from the front wheels to the rear wheels, is equipped with state-of-the-art suspension systems, including Ford's Automatic Ride Control, Quality Control, Assurance. Everything you could want in a car is in a full-size Crown Victoria.

LAYING ROOF RAIL COVERINGS

Crown Victoria's unsurpassed interior space design features an uncluttered, easy-to-use instrument panel.
