POWER. BEAUTY. SOUL.
The Aston Martin DB9 GT is the most elegant expression of a sports grand tourer. Its DNA echoes the iconic DB GT models of its lineage. Enhanced power and a new twin turbo highlight its famously seductive styling, making the DB9 GT the ultimate incarnation of the DB9. It is the embodiment of laudable form and formidable function, the beating heart of Aston Martin.
BORN OF LEGENDS

Endless quest for victory amid the dramatic twists and turns of motorsport. The pursuit of perfection, the passion to perform. Racing pulses through every fibre of Aston Martin, sealed by the legacy of the fabled Aston Martin DBR1, winner of the 24 hours of Le Mans and World Sports Car Championship in 1959.

As the most focused and powerful DB9 to date, the new GT is the successor to this legacy. Born of legends, it has the same spirit of speed and desire for driving purity resonating within its core.
DB9: THE HEART OF ASTON MARTIN

Inspirational from inception, iconic in realization, and impressive in execution, the DB9 is the essence of Aston Martin. The inaugural production model of Aston Martin’s Gaydon headquarters in 2003, the DB9 is the foundation of the Aston Martin range, its ethos defining the craft and soul invested in each model.
The famous ‘DB’ initials evoke the history and passion of Aston Martin. Over time, the revered moniker has been proudly associated with many of Aston Martin’s most cherished models. They carry with them a legacy of charisma and understated presence expected of the world’s most timeless sports grand tourers. The GT badge is reserved for the highest power iterations, an honor now bestowed upon the DB9 GT. The ultimate incarnation of DB9.
DESIGNED FOR THE JOURNEY

From every angle, the DB9 GT is conceived to portray beauty. Ergonomically balanced, the flowing aerodynamics and muscular wheel arches create a purposeful stance; a subtle suggestion to the power that lies within. Visually arresting, dark accents across the sculpted body give a rather hint to the sporting intent of the DB9 GT, a motif continued with the Black detailing on the headlamps and around the borders of the tail lamps.
The expertly honed skill and scrupulous eye of master craftsmen; this is what sets Aston Martin apart. From sculpting clay models to forging the iconic Aston Martin wings badge, our team of experts ensure excellence at every step. Timeless crafts, and the intrinsic quality they bring, are the foundation, the soul that breathe life into the power and beauty of Aston Martin.
ELEGANTLY SOPHISTICATED, DANGEROUSLY SEDUCTIVE

Fuelled by the exquisite design, an engraved GT fuel cap adds a tactile detail alluding to the prowess within. Step across the unique DB9 GT sill plaque and take your place in the GT-embossed, luxuriously fluid, micro-perforated carbon seat, a design detail that harks back to the legendary DB models of old.

Let instinct guide your grip of the impeccably finished steering wheel. Survey the meticulously crafted dials. Every journey becomes an adventure. The iconic Aston Martin grille and Gloss Black splitter charge forward, tamed air escaping the GT’s Black rear diffuser. Each mile covered, another moment to revel in.
UNSPoken
QUALITY

Beneath the sublime surface of the DB9 GT is an unparalleled attention to detail, steeped in a long heritage of hand-made luxury and bespoke craftsmanship. At Aston Martin, the beauty of the finished car is made possible only by the dedication and perfection applied at every stage of its creation.
EXQUISITE DETAILING

Take your seat and feel the unspoken quality. Every precise cut of Bridge of Weir leather is used to indulge the perfectly appointed interior, meticulously checked by master upholsterers, who only sign the reverse of each piece once satisfied with its quality. The interior is stitched together with a labour-intensive technique needed to create pinstripe welts. More than 50 man-hours are spent on the paintwork of each DB9 GT to ensure Aston Martin’s world-renowned glass-like finish.

Only through experiencing it for yourself do you feel the quality and sense the soul within each car. That is the Aston Martin way; the reassuring sensation that when you sit inside the DB9 GT you are part of something truly special.
Launching with a thunderous overture from its 12 cylinders, the DB9 GT’s 540 brake horsepower engine will stir your soul. Explore the versatility of the 6.0-litre V12, a powerhouse capable of accelerating you to 60 mph in just 4.4 seconds. Be thrilled by the sensations of the all-alloy, quad-overhead-cam engine as you drive on continents. Feel the power surge up to a top speed of 183 mph, the 457 lb ft of torque driving you forward. Make every journey a reward.
EXHILARATING PACE, EFFORTLESS GRACE

An alloy chassis-enhancing torque tube houses the carbon propeller shaft that sends drive to the rear wheels through a rear mid-mounted Touchtronic II six-speed transmission. In this configuration the DB9 GT maintains a near-perfect 50/50 weight distribution.

Cutting-edge Carbon Ceramic Matrix (CCM) brake discs sit within the 20-inch alloy wheels, each lighter than traditional metal discs by 12.5kg. Large six-piston and four-piston monobloc calipers, supplied by renowned braking specialists Brembo, ensure stopping performance is capable of harnessing the phenomenal power.

Whether cruising across the continent or pushing the DB9 GT to the limits on the most challenging racetrack, the three-stage Adaptive Damping System (ADS) keeps you in control. With Normal, Sports and Track mode, the system tailors the suspension settings to your preference, making instant adjustments according to condition, road surface and speed.
Innovative Technology, Intuitive Touch

In the DB9 GT, traditional craft marries with latest technologies – a seamless blend of classic form and modern function. The cascading waterfall fascia flows towards you. Touch-sensitive controls respond tactically to every command. Instruction in its use, you are in command of the new AMi II infotainment system, which seamlessly brings audio, hands-free calling and vehicle status technologies to your fingertips.

Opt for the Bang & Olufsen audio system, driven by 1000 watts of amplification through 15 optimally positioned speakers. Patented Acoustic Lens Technology (ALT) enables 180-degree horizontal dispersion of high-frequency sound, setting the stage for a concert of incredible clarity and rousing energy.
Choosing the DB9 GT is only the beginning. Aston Martin's personalisation options help you to create a car to cherish, to define a style that you can call your own. Handbuilt in the Aston Martin factory, almost every element of the DB9 GT is crafted to know, an endless scope to find a combination to enthral.

FOLLOW YOUR INSTINCT
Which ever exquisite paint you choose, you will benefit from the legendary Aston Martin finish: myriad layers applied with unfaltering precision by master technicians to show off every perfectly sculptured line of the DB9 GT.

Primary
Confident, understated and elegant, the Primary palette ranges from solids through to metallics.

Contemporary
Paint technology and trends merge to create eye-catching and subtle visual effects. Stylish, sleek and bold metallics, pearl effects and xyrallics blend to create a stunning palette.

Special
An intimate palette of specialist technologies including true pearls, chromaflair pigments, xyrallics and tinted clear-coats. The impact of these individual technologies pushes the boundaries of paint to create truly striking exteriors.
EXTERIOR OPTIONS

Standard 20-inch 10-spoke Silver diamond-turned wheels sit perfectly within the DB9 GT’s muscular arches. Elect for an optional 5-spoke design, or either variant with a Gloss Black diamond-turned finish. Complete the look with a perfectly complementing brake caliper finish in Dark Anodised, or optional Grey, Red, Yellow or Black.

At Aston Martin there is no imitation. If it looks like glass, it is immaculately sculpted glass. If it looks like high-quality wood, it is the highest quality wood. When it comes to the carbon fibre options, it is exactly the same. Only the most perfect weaves of race-bred material are chosen, lightweight, strong and genuinely beautiful. Exterior carbon fibre options include the front splitter and rear diffuser, the rear lamp inlets, the side strakes, the wing mirror arms and cape, and door handles.
For the DB9 GT Volante, Aston Martin offers you the choice to complement your body colour or to add some dynamic contrast with a selection of finely crafted hoods.

HOOD COLOUR OPTIONS

- Westminster
- Green
- Black Sandstorm
- Atlantic Blue
- Burgundy
- Bitter Chocolate
- Titan Grey
- Grenadine Red

LEATHER PALETTE

Each DB9 GT is trimmed with the finest-grade Bridge of Weir leather as standard, hand cut and stitched together by Aston Martin’s team of artisan upholsterers. A broad choice is available across Primary, Contemporary and Special ranges; you can select the perfect colour to accompany your every memorable journey.

Primary (in Strathmore or Caithness leather)
These classic hues are intrinsically linked with Aston Martin’s rich heritage. The embossed Strathmore leather comes as standard and gives absolute consistency. Primary colours are also available in Caithness leather for a luxurious ambience.

Contemporary (in Caithness leather)
Cool and contemporary, bold and exciting, deep and indulgent, the Contemporary colour palette takes its scope to satisfy a palate. A dry-drumming process gives the Caithness leather a natural and highly tactile soft finish.

Special (in Caithness leather)
The new Bronze Metallic features a special metallic effect applied to the leather’s top coat, creating a unique offering unlike any other leather in the Aston Martin range.

Bridge of Weir has been at the forefront of innovation and quality for more than a century, its famous Scottish leather a natural choice for icons from Concorde to the Charles Eames Lounge Chair. Bridge of Weir uses only the finest hides sourced from the best heritage breeds, the pure water – the same as used to boil malt whiskies – and generations of hand-finished craftsmanship creating a unique alchemy that results in the finest Scottish leather.
Interior
Experience a different sensation on the headlining and sun visors of your DB9 GT with the tactile texture of Alcantara® – a suede-like material that embodies a perfect balance of technology and tradition. An Italian product of excellence, it is durable and stain-resistant, with a highly tactile and luxurious feel.

Duotone Pack
For the ultimate in leather detailing, duotone gives an extra dimension to your DB9 GT interior. The edges of each perforation of the leather are given contrasting colours, delivering an understated and elegant standout feature on your seat inserts, door inserts and headlining.

Carpets and Seat Belts
For the ultimate in individual tailoring of the DB9 GT interior, a range of carpet and seat belt colours can be explored.
INTERIOR TRIM PACKS

Aston Martin’s signature trim packs offer drivers a versatile way to give elements of the interior enhanced character, adding striking and personalized features from paddleshifts to speaker grilles. The perfect way to set your interior apart and highlight your own sense of style.

1. Lower Centre Console Plate
2. Air Vent Bezels
3. Door Pads and Handles
4. Steering Wheel Airbag Ring
5. Paddleshifts
6. Speaker Grilles
7. Window Lift Switches

FASCIA OPTIONS

Make a strong interior statement with a selection of hand-crafted fascia trims available for the DB9 GT. These range from the smooth and sophisticated line of the Piano Black and Piano Ice Mocha finishes, to the sleek and soft finishes of the Ashburl Light and the race-inspired Carbon and Satin Cuprum Copper Carbon finishes.

Piano Black (standard)
Carbon Fibre (2x2 Twill) (option)
Satin Cuprum Copper Carbon (option)
Piano Ice Mocha (option)
Ashburl Light (option)
Carbon Fibre (option)
Piano Black (option)
ACCESSORIES

Protect your DB9 GT with premium quality embroidered seat covers, or a fully tailored car cover made in soft cotton mix, with a protective fleece lining, its breathability material allowing moisture to evaporate. Even your glass ECU can be carefully guarded with a high-quality leather pouch, in a choice of six distinct leather colours.

Make the most of your DB9 GT’s rear-lidded boot space, even in the most conditions, with a set of weather window complete with rear wipers, scientifically proved to improve traction and handling when the temperature drops below -1°C. A battery conditioner engineered to the exacting style of your Aston Martin, can also monitor the car’s battery, to maintain 100 per cent efficiency in those rare times your DB9 GT is not being used.

For the ultimate in luxury, choose a two-piece or four-piece luggage set tailored to make the best use of boot space, handmade in England by master craftsmen. You can even treat yourselves to the matching gold-plated Aston Martin spare hoods.

Updates
Aston Martin Lagonda Limited is constantly seeking ways to improve the specification, design and production of its cars and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current products, options, accessories or specifications, nor does it constitute any offer for sale of any particular car, product, option, accessory or service in consideration of the matter.

Performance results
Performance results, fuel consumption figures and CO2 emissions data quoted in this brochure are obtained under controlled test conditions (in accordance with applicable regulations) and may vary depending on the specification of the particular car, road and environmental conditions and driving style. Tyre choice may also influence performance results, fuel consumption, CO2 emissions, ride comfort and handling.

Published figures should be used for comparison purposes only and do not represent the expected performance of an individual car. The performance of a car will influence the level of CO2 emitted and as a result, cars with higher levels of specification, options or accessories may emit higher levels of CO2. However, disbursed vehicle taxes are determined according to the weight of the car and CO2 emissions of the standard car, as published in this brochure.

All petrol engines are fitted with a catalytic converter.
