Astro Martin V8 Vantage S SP10 Special Edition

A Celebration of Motorsport Success

Racing success is always hard won, never more so than at the Nürburgring Nordschleife. Yet in the last four years Aston Martin V8 Vantage GT4 race cars have delivered two SP10 class wins and four podiums in the uniquely challenging ‘N24’ Nürburgring 24-hour endurance race. To mark this achievement – and bring an intensified racing flavour to our most focussed road-going model, the V8 Vantage S – we have created the ‘SP10 Special Edition’. 
PerFormance
Built around the same core ingredients as Aston Martin’s dominant GT4 racers, the SP10 Special Edition features the potent version of our magnificent 4.7-litre V8 engine. Developing 436 PS, 490 Nm of torque it delivers rousing performance and a fabulous soundtrack to match, courtesy of a special sports exhaust system.

Design
Available as a Coupe or Roadster, the Vantage SP10 is blessed with perfect proportions and breathtaking looks. Featuring discreetly enhanced race-proven aerodynamics for increased stability and visual presence, both versions are finished in lustrous Ceramic Grey metallic paintwork, the Roadster with a Titan Grey hood. Black 19” V-Spoke forged alloy wheels and black brake calipers continue the striking monochrome look.
The SP10 Special Edition is a true driver’s car, blessed with supreme athleticism. Fitted with a 6-speed manual transmission as standard (the first time the V8 S engine has been mated to a manual) or optional automatic, the SP10 Special Edition is a true driver’s car, and the beating heart of a racing car, the SP10 Special Edition might have been superceded or are otherwise no longer available.

The SP10 Special Edition is built around an all-alloy structure and extruded bonded aluminium VH body structure. This means the finest materials, applied in the most stylish way to create a car that is both lightweight and balanced, the SP10 Special Edition is a true driver’s car, and the beating heart of a racing car, the SP10 Special Edition might have been superceded or are otherwise no longer available.
