

A5 S5

Audi A5 Coupe | A5 Cabriolet
Audi S5 Coupe | S5 Cabriolet

Audi
Truth in Engineering

Declaring war on the Windsor knot.

From the first rev, it's unmistakable—this is open-collared driving for those who think standing out is better than blending in. The substance is there, of course, with an intense combination of available powertrains, including the controlled power distribution of Audi quattro® all-wheel drive, an eight-speed Tiptronic® or a six-speed manual transmission that helps deliver dynamic handling and response, and FSI® and TFSI® engines that provide punch with surprising efficiency.¹ But this isn't a static blueprint, this is a driver's car. Coupe or Cabriolet, both the A5 and S5 were engineered by, and for, those who prefer experience to formality. Take the wheel. Leave the tie.

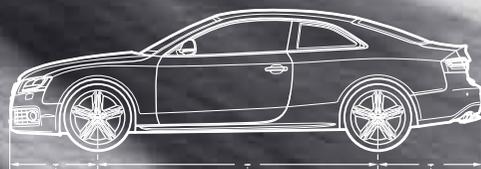

In a sidekick world, embrace alpha style.

.01 - Perfect Proportions

Nothing feels out of place in an A5, and that's by design. Its streamlined $\frac{2}{3}$ body, $\frac{1}{3}$ greenhouse design allows its sleek roof to flow seamlessly from its long hood. This is contrasted elegantly by short overhangs at front and rear, giving this sports car its signature aesthetic.

~ fig. 01

short overhang

optimum wheelbase

short overhang

When even commuter cars are trying to look like something more than a box on wheels, the A5 takes a slightly different approach to style. Think of it as the difference between a marketing gimmick and designed sophistication. Our style isn't simply to provoke, but to articulate a confident vision. In either Coupe or Cabriolet body styles, the A5 has the capacity to charm as well as energize. From its driver-centric cabin to the signature flow of its roofline, the A5 is an uncompromised expression of pure style.

~ fig. 02

.02 - LED Daytime Running Light Technology

Stylish and iconic, available LED daytime running lights enhance the unmistakable look and design of the Audi A5, as well as its visibility to other drivers, especially during the dawn and dusk hours.

Sometimes it's
as much about
SPF as RPM.

When dynamic curves are designed expressly for the interplay of light and shadow across the cabin when the top is down, you know you are in a visionary kind of cabriolet. That's if you want to notice. Otherwise, you can enjoy the more direct pleasures of a top-performing cabriolet—potent acceleration, poised handling and smiling with abandon, wondering how you ever drove without sunscreen.

0. seconds

4. seconds

14. seconds

17. seconds

top up¹

The top of the Audi A5 and S5 Cabriolet invites you to take advantage of clear skies for as long as the sun is out. If clouds do come, it takes approximately 17 seconds for drivers to fully deploy its roof (even at speeds up to 31 mph), so you can practically beat the first drop you see.

¹ Timeline shown does not accurately reflect soft-top operation and is for explanatory purposes only.

This is where you picture yourself behind the wheel.

If the cockpit feels like home, it's because it was designed that way. Built-in comforts like simple, intuitive controls help you streamline your driving experience, while the available Audi MMI® Navigation plus with voice control system helps bring convenience and innovation to the instrument panel.¹ By the time you reach out and touch the wraparound curve of the instrument panel or interact with the controls on the steering wheel, you'll see how seamlessly you and this driver-centric layout fit together.

¹ See Audi MMI® Navigation plus page for important information regarding the Audi MMI® Navigation plus system.

~ fig. 03

.03 - Audi Singleframe® Grille

Emulating the iconic front grille that's become a part of the Audi legacy, this steering wheel centerpiece, emblazoned by its four-ring hallmark, presents itself as the fulcrum of the well-appointed A5 interior.

Where luxury makes itself felt. Caressed, even.

Classic Audi fit, finish and materials add more than a little sophistication to an impressive, athletic profile. Rich inlays like Burnished Wood and Cinnamon Brown Milano leather seating surfaces add a visual warmth to the cabin, or you can go bold with available color leather seating surfaces and Brushed Aluminum inlays. Either way, with thoughtful appointments like standard power front seats, automatic climate control, and available heated front seats, comfort takes center stage.

.04 - Ventilated and Heated Seats

Available on Cabriolet models, the head-level heating system offers luxurious and therapeutic temperature control, allowing both driver and passenger to enjoy the splendor of a convertible, even in cooler climates.

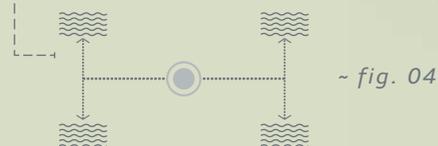

quattro

A particularly German take on performance art.

Despite what rear-wheel-drive aficionados like to brag about, the loss of traction is not performance. That's why the A5 delivers its impressive performance through its available road-gripping Audi quattro® all-wheel drive system. More than a new toy to show your friends, its dynamic handling and performance shines through in all seasons and in a wide range of weather. And with available technologies like Audi drive select and sports differential with torque vectoring on the S5, we've created a more dynamic all-wheel drive system that has set the new standard for the industry for the foreseeable future.

.05 - Audi quattro®

Audi quattro® all-wheel drive is based around a torque-sensing, self-locking, center differential that assists in shifting torque to where it's needed most. For the driver, that means Audi quattro® adjusts power between front and rear axles to help optimize control and performance.

The drive is responsive, but we also demand that you respond to the drive. Available Audi drive select gives you Comfort, Auto and Dynamic settings that cater to both your mood and the surrounding conditions.

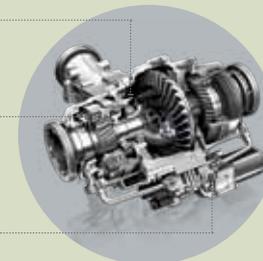

.06 - Torque Vectoring

It's a handling feature that seems to respond to your impulses before your steering input. An evolution of cross-axle lock, this available system works within Audi quattro®, while utilizing ESC and ABS to help sense traction loss from the inside cornering tire.

overdrive speed difference
via internal step gear

clutch in power flow

hydraulic actuation

Sophisticated Handling

Lightweight Aluminum Suspension Parts

The use of weight-saving aluminum for critical components helps the suspension to respond rapidly during decisive, split-second situations on the road.

Five-link Front Suspension

With the finely tuned front-suspension components secured to the subframe, the five-link front suspension increases ride quality by helping isolate road harshness and vibration to the cabin.

Rear Suspension

By helping to maximize friction between the vehicle's rear tires and the road, the Audi A5 and S5 offer a stable base from which their power and torque can be extrapolated throughout.

Dampers and Springs

Properly absorbing bumps on the road means more than just a comfortable ride. Our system of dampers and springs helps the driver gain control during adverse driving situations.

Real power is proving four is greater than six.

It's time to change the equation when it comes to engine performance. The first thought is that six cylinders are automatically better, and sometimes, that's true. But in a field of performers, the Audi A5 holds its own with four. That's because it features the Audi 2.0 TFSI®—a pioneering engine that combines the direct injection of gasoline with efficient and powerful turbocharging technology. Producing 211 hp and 258 lb-ft of torque, the 2.0 TFSI has been the engine of choice for more than 1.3 million Audi drivers worldwide.

.07 – 2.0 Turbocharged Four-cylinder

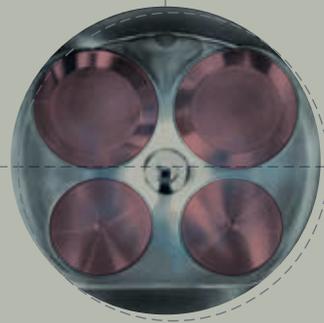

Years ahead of the competition, this 2.0-liter turbocharged DOHC engine combines the Audi valvelift system, variable valve timing, TFSI direct injection and turbocharging for more power and greater efficiency.¹

Compressing the air flow to the engine allows more air into the cylinder and ultimately more power from each ignition, significantly improving the engine's power-to-displacement ratio.

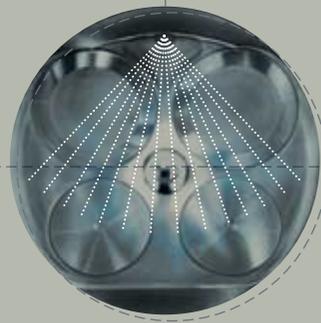

Audi FSI® direct injection helps cut down on waste and increases power by delivering a precise amount of fuel directly into the engine cylinder, helping ensure a more complete combustion.

With higher compression ratios and cylinder pressure, the TFSI engine fully atomizes fuel and helps optimize boost response.

The combination of these advanced technologies allows Audi to use a smaller, more efficient engine that still achieves excellent power and performance results.

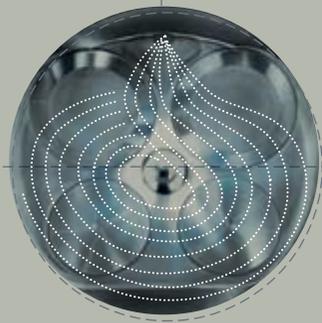

Four valves per cylinder

211 hp / 258 lb-ft of torque

22 city / 30 hwy mpg¹

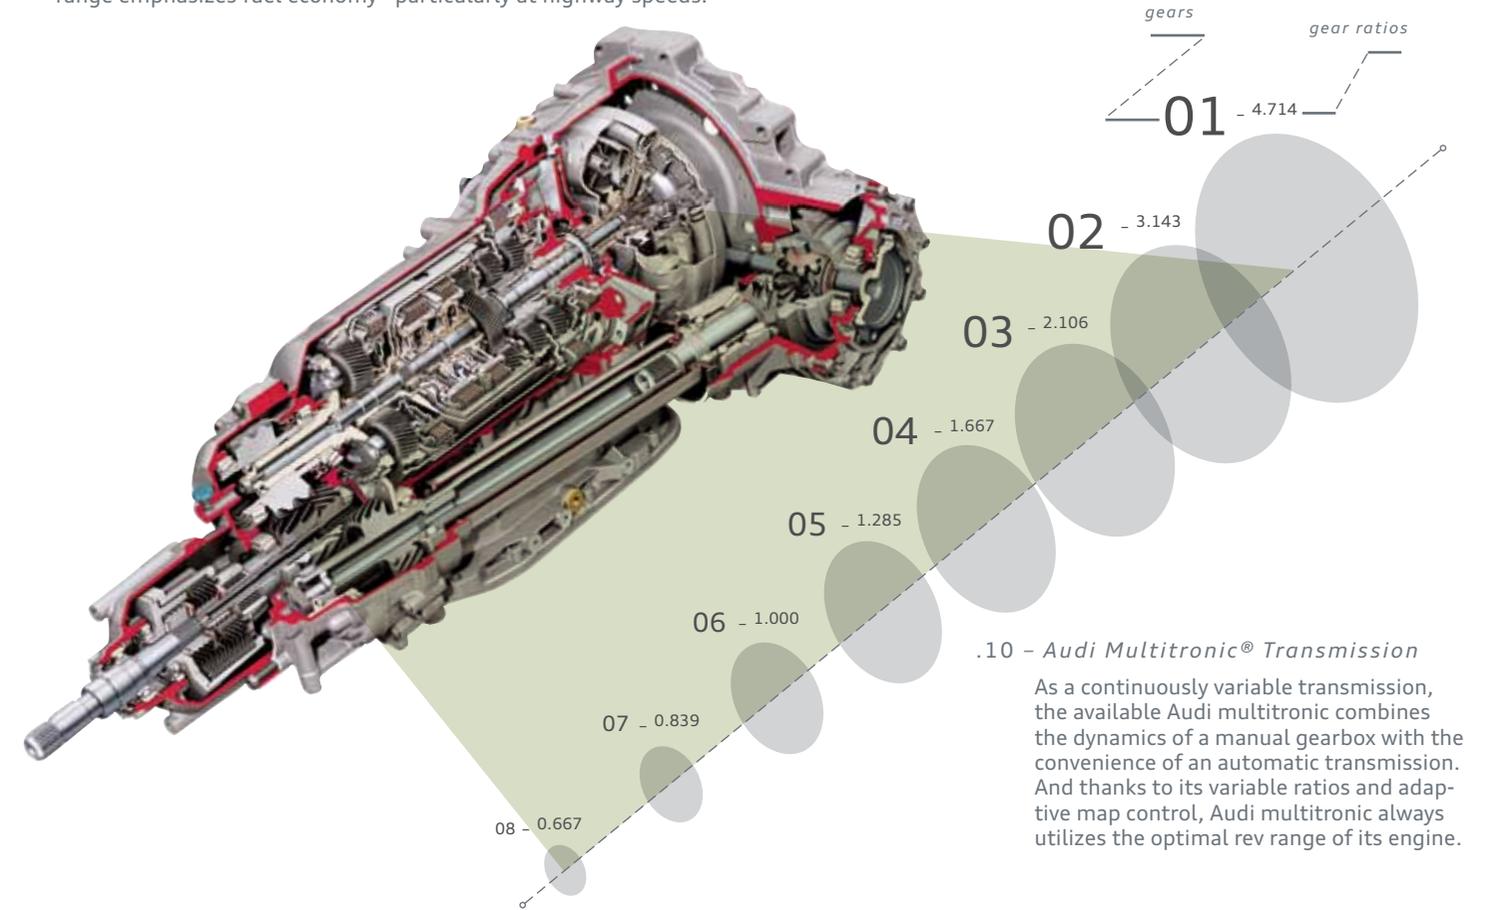

0 – 60 mph 6.2 seconds²

.08 – Eight-speed Tiptronic® Automatic Transmission

As the perfect compromise between a dedicated manual and an automatic gearbox, the available eight-speed Tiptronic® automatic transmission in the Audi A5 offers eight optimized, carefully chosen ratios. Selected via its console-mounted shifter or steering wheel with optional shift paddles, precision shifts are delivered without sacrificing the smooth action of the Tiptronic® automatic. A wide final drive ratio allows optimization of lower gears, yet its upper range emphasizes fuel economy—particularly at highway speeds.¹

.09 – Six-speed Manual Transmission

For drivers who crave engaging and dynamic response, both the Audi A5 and S5 Coupes present an available six-speed manual gearbox which delivers power with vintage Audi finesse. Its short throw and precise ratios add a contemporary element for confident performance on the road.

.10 – Audi Multitronic® Transmission

As a continuously variable transmission, the available Audi multitronic combines the dynamics of a manual gearbox with the convenience of an automatic transmission. And thanks to its variable ratios and adaptive map control, Audi multitronic always utilizes the optimal rev range of its engine.

With these kinds of performances, you might not care how efficient you've become.

¹ EPA estimates. Your mileage will vary. See www.fueleconomy.gov for details. ² 0-60-mph times will vary from model to model. Always obey local speed and traffic laws.

S

The performance coupe's performance coupe.

The S5 doesn't take anything away from the A5—it only adds. The S5 Coupe, for example, adds a potent 4.2 FSI® V8 that features 354 hp, while the S5 Cabriolet adds a supercharged 3.0 TFSI® with 333 hp. It brings an agile, aggressive stance to an already powerful profile. And with a stiffer suspension, it helps to enhance its already dynamic handling. But most of all, the S5 is sleekly styled, propulsive energy for those who want to take performance to a more progressive level.

S5

S5 Coupe

Engine

We give you the freedom to rev away with the Audi 4.2 FSI V8 in the S5 Coupe. Delivering a robust 354 hp and 325 lb-ft of torque to an impressive performance portfolio, it's muscle, yes, but stylishly applied, so you look athletic, not bulked up. In addition, a sports differential can be added to Audi quattro® all-wheel drive, helping to give you more handling ability by actively controlling the torque distribution to the rear wheels, making for tighter cornering and sure-footed driving.¹

Transmissions

The six-speed manual and the optional six-speed Tiptronic® both offer smoother and more precise shifting through the gearbox, emphasizing a fast, energetic response. The manual puts you at center stage while the Tiptronic® adds automatic/manual flexibility and efficiency to your transmission.^{1,2}

S5 Cabriolet

Engine

Top-down driving with true power, the supercharged 3.0 TFSI V6 in the S5 Cabriolet brings efficiency to a formidable mix of 333 hp and 325 lb-ft of torque. With the top down, the performance engine puts a little kick into your cruising. Top up, it's an unmistakable sports car feel, with the power augmented by the superior handling afforded by Audi quattro® all-wheel drive with available sports differential to help cornering and provide dynamic handling.^{1,2}

Transmissions

The innovative S tronic® comes standard on the S5 Cabriolet. A dual-clutch gearbox capable of delivering incredibly quick shifts—as fast as 0.2 seconds, in fact—the S tronic transmission has dual input shafts and two clutch packs that help the system “predict” the driver's acceleration or braking input, pre-select the next appropriate gear, and greatly reduce the shifting time.

¹ Always obey local speed and traffic laws. ² EPA estimates. Your mileage will vary. See www.fueleconomy.gov for details.

Control that rewards life's arbitrary impulses.

.11 - Audi MMI® Navigation Plus¹

Judge your environment, see buildings and anticipate your next turn with available 3D-navigation that helps put a little more depth in any journey.

.12 - Personal Car Setup

Your car should adjust to you, not the other way around. Experiment with a variety of settings to help you develop one-click controls and personalized settings on your A5.

.13 - SiriusXM Satellite Radio

Match your driving mood with a variety of stations throughout the nation.

.14 - Audi Music Interface

Simple to use, easy to see. The available Audi music interface allows you to enjoy a variety of playlists and stations while maintaining focus on the road.²

.15 - Telephone

Your life doesn't stop once you enter the A5. That's why we've designed an available specific hub for your compatible BLUETOOTH® mobile phone, so you can confidently interface with your A5 while keeping your eyes squarely on the road ahead.

.16 - 10 GB Audio Storage

The Audi A5 provides enough available music storage to take a cross-country trip without repeating a single song.

Pick a song. Pick a person to talk to. Pick a destination. It's your whim, delivered through the available Audi MMI Navigation plus¹. Intuitive controls and settings allow the A5 to understand a world of commands with a simple push of a button, an easy voice command or a click of a knob, letting you focus on the drive. From SiriusXM Satellite Radio² to personalized commands, MMI helps deliver your desires. And its next-generation interface with an NVIDIA® processor allows you faster and easier access to the interactive features of MMI.

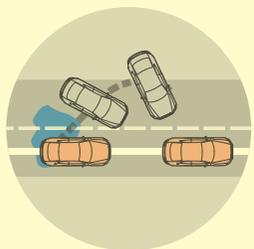

¹ Audi Navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle's electrical system and existing wireless and satellite technologies must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes,

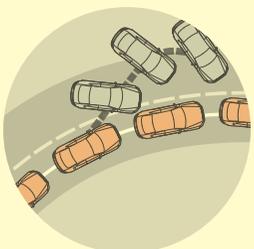

roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgement in determining whether or not to follow a suggested Audi Navigation plus route. For mapping updates please see your Audi dealer or call 1-800-FOR-AUDI for details. ² See back cover for important information regarding required SiriusXM subscriptions.

Anticipating needs you didn't know you had.

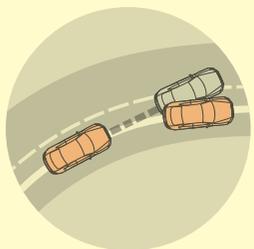

With innovative standard active and passive safety features and an impressive variety of available driver assist features to showcase Audi progressive thinking, the A5 isn't afraid to show a prudent side. With eight standard airbags¹ (Coupe only) helping to protect the driver and passengers, and driver assistance technologies that help you stay in control, Audi thinks of your security in a comprehensive way, so you can concentrate on better things—like the great performance of your A5.

Low Traction

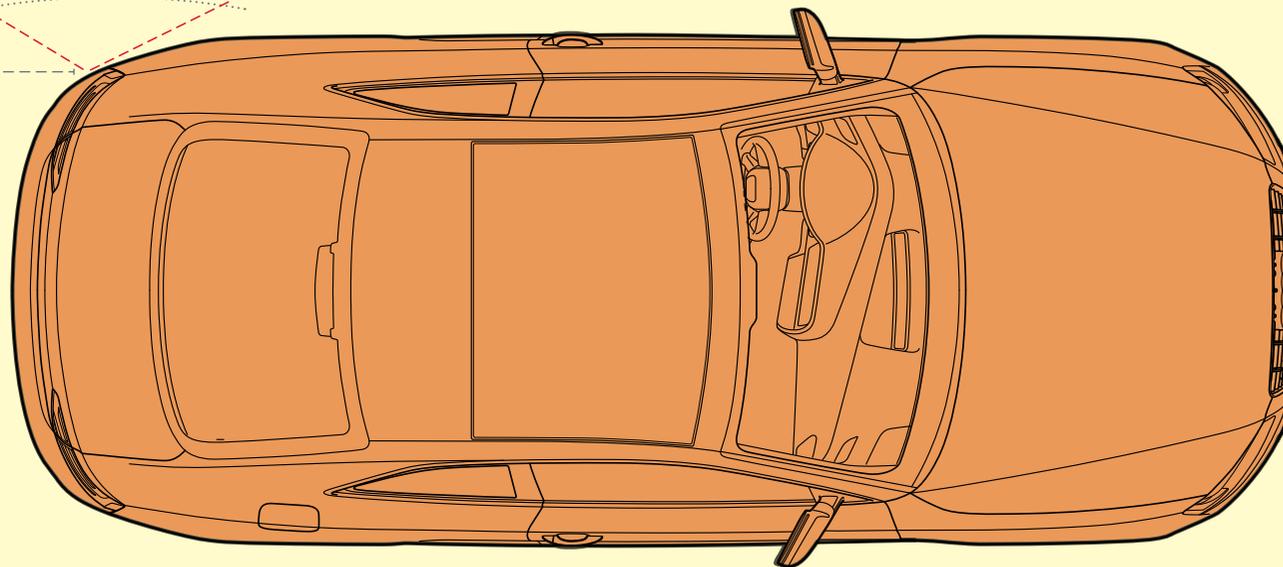

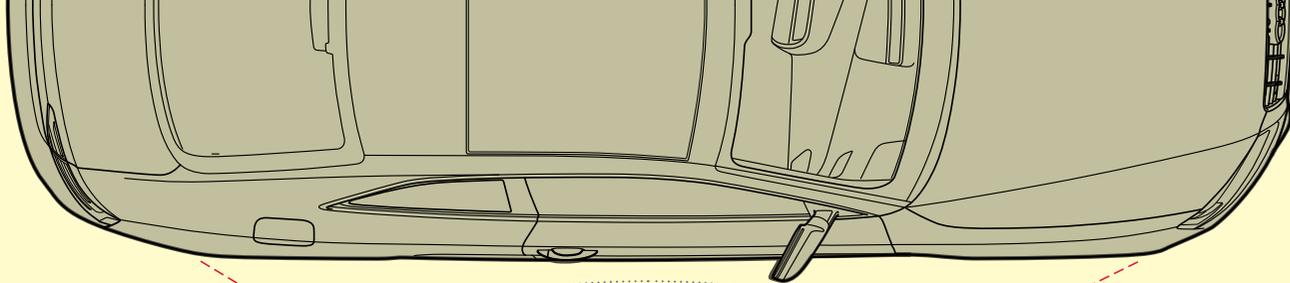

Oversteer

Understeer

.17 - Electronic Stability Control (ESC)

ESC is automatically applied to each wheel: at the outside front wheel to help mitigate oversteer, or the inside rear wheel to help reduce understeer. In this way, ESC helps prevent the vehicle from entering a tail-spin and reduces engine power until you regain control of the vehicle.

.18 - Audi Side Assist

Available radar sensors with optical warnings help keep the driver informed, in two different warning stages, about what is approaching from hard-to-see angles behind and to the side of the vehicle.

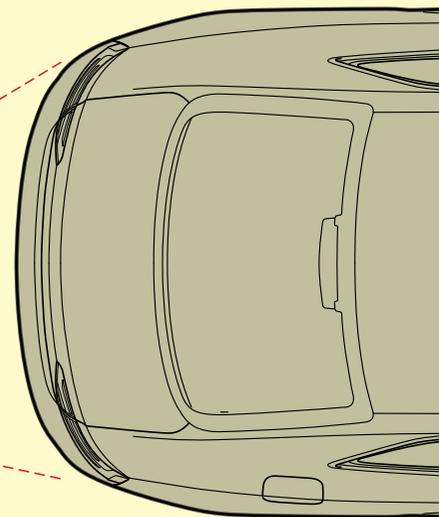

Dramatization²

.19 - Airbags

The A5 Coupe model's eight and Cabriolet model's six standard, second-generation airbags include front-impact airbags for both driver and passenger and are designed specifically to help protect the head during impact.¹

.20 - Audi Adaptive Cruise Control

Available Audi adaptive cruise control on the A5 helps the driver take command over even more of the driving experience, as its long-range radar measures the distance to the vehicle ahead, sends its data to a computer that weighs the information against velocity and other road variables, and applies the brakes as necessary. Once the road is safe to cruise, the A5 effortlessly accelerates back to its desired speed.

¹ Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age. ² This is a dramatization and does not depict what will happen in a collision. All bags will not inflate in real-world collisions, and if multiple bags do deploy they will be in various stages of inflating/deflating and will never all be inflated at the same time.

Accessories

Imagine a cherry on top of your sundae. Sweet, right? Now imagine a cherry that helps protect your A5 or S5 in the garage. Or carries your bikes for a serious weekend on the trails. Or makes heads turn as you drive by. Audi Genuine Accessories are the little extras that make your Audi even sweeter. Designed by the same visionaries who designed your vehicle,

all accessories feature a tailored fit and the expert craftsmanship you'd expect from Audi. They are also backed by the 4-year/50,000-mile Audi New Vehicle Limited Warranty, or the accessory's 12-month/12,000-mile limited warranty, whichever extends longer from the accessory purchase date.¹

19" Cortada Alloy Wheels

This 19" Cortada alloy wheel offers a 5-spoke design consisting of machined triangular panels on each spoke. Its unique Cortada styling benefits from hollow spokes that help keep the A5 light and versatile.

Full Body Kit

With front and rear valances with blade inserts complementing its side skirts, the full body kit on the Audi A5 accents your personality on the open road. (Not available on S line® and S models.)

A5 All-weather Floor Mats

Deep-ribbed, channeled design helps protect the floor and carpeting from water, mud, sand and snow. Rubber mats feature vehicle logo. Set of four mats.

19" Candela Alloy Wheels

Providing an extra element of confidence to your Audi A5, this impressive drop-center, deep-dish design makes this 15-spoke wheel stand out in any environment.

Base Carrier Bars

Attached to strong side brackets, these are the durable foundation of the Audi roof-rack system. (All roof-rack system attachments require the base carrier bars. All attachments sold separately.)

Ski/Snowboard Rack

These holders and tie-downs adapt to almost any equipment shape to help you securely transport your gear to the slopes.

Rear Deck Spoiler

Body modifications aren't usually this refined. The lines of this spoiler integrate perfectly into the stock body panels of the A5 so that this enhancement meets the eye organically. The result is an inherently different look and feel to your Audi A5.

S5 All-weather Floor Mats

As a stain barrier for your S5 model's carpet, these mats withstand practically anything, from caked mud to toppled coffees and fumbled gazpacho.

S5 Cabriolet Alu-optic Kit

This set of eye-catching badges and stone guards communicate to the world the pride and passion you have for your Audi S5.

Other accessories not shown

Various Transport Solutions

The open road is calling—so bring all the right gear to enjoy the ride. The Audi line of storage accessories helps protect your possessions with a variety of intelligent and innovative solutions. Choose from bike racks, ski racks and a variety of cargo carriers.

Comfort and Protection Solutions

Audi Genuine Accessories offer a wealth of practical aids for more space, tidiness and safety on board with functional items to help keep your Audi in pristine condition. Use them all to reduce wear and tear on your Audi and help keep it looking like new—inside and out.

Car Care

Use the only car care line specifically designed with your Audi vehicle in mind. Audi Guard car care products provide gentle cleansing formulas and special tools to help give interior and exterior surfaces the finest in cleaning and protection.

License Plate Frames

Choose from "Audi Sport" in carbon fiber, black powder-coat, polished and brushed finishes, or "Truth in Engineering®" in polished and carbon fiber finishes. (Check local laws and regulations regarding use.)

Electronic Accessories

The many electronic accessories in your Audi are renowned for design that emphasizes user experience. All products are tested for compatibility with your vehicle's electrical systems so that you can easily enjoy what Audi technology has to offer.

¹ Tires are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tire specified for your car or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at optimum levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. ² 0–60-mph times will vary from model to model. Always obey local speed and traffic laws.

1 Tires are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tire specified for your car or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however,

Gray Birch Wood inlays

Stainless Steel Mesh inlays

Carbon Atlas inlays

Power rear sunshade

Sports differential

in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at optimum levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices.
