The Audi A6 offers full LED headlights. With an approximate lifespan of 10,000 hours, these lights are the closest recreation of daylight yet. Bright and stylish, they offer signature brilliance from Audi.

Think of it this way, an Audi A6 luxury sport sedan is proof you like to take the intelligent approach. In fact, with a suite of available technologies, you can make an intense connection with your A6, and the road. Connect faster with the industry-first handwriting-recognition technology of Audi MMI® touch. Or access the world with Audi Connect, featuring the class-first Google Earth™ navigational assistance, and an embedded Wi-Fi hotspot right in your car. Add in BLUETOOTH® wireless technology, voice recognition, real-time traffic updates, and more, and you have the uncompromised performance of a technologically advanced luxury sport sedan. So advanced, it not only gives you the world, it seems to anticipate the world’s response.

The road is now an intelligent place.

1 Not recommended for use while driving. 2 Based on brightness comparison to the sun and 5,600K color temperature. Full LED headlights are an optional upgrade.

Some writers try and conceive one brilliant character and let the plot organically build and flow from there. We took a page from their book, so to speak, when designing the all-new A6. To create and define that brilliant character, we started with one great line. The Tornado line, actually. Bisecting the body profile, it runs strongly through the middle of the vehicle to give it a bold, progressive stance that tells the world that there’s pedigree here, but not a predictable one. After that, the narrative becomes yours.

Building a more dramatic story, line by line.

See how the A6 model’s Dynamic line defines the lighting surfaces as it brings the vehicle closer to the road. The Tornado line provides its visual muscle, along with the Roof line, which creates a sporty coupe-like silhouette.

~ fig. 02

The trick is to be bold while acting cool. That’s our approach with the A6. Crafted with precision, appointed luxuriously and built with performance in mind, it is engineered lighter than the previous generation A6 for better efficiency, and connected like no car before. We built the A6 not for those concerned with looking up or down, but for those who look out to see all the possibilities.

Progress starts with a point of view.

In addition to Wi-Fi connectivity and Google Earth™-assisted navigation, Audi Connect provides weather information, fuel prices, news, and Google Earth™ points of interest such as landmarks or other attractions.

The results of painstaking craftsmanship, the Audi approach to our wood and metal inlays is the same as it is to our engineering. Imperfection is not an option. Nothing is an imitation, so natural wood shines. Nothing is faked, so polished and brushed aluminum glisten. We capture the right accent of your interior choice, and add a singular finish to its fit.

Our interior has no mirror image. Passion doesn’t benefit from balance. Maybe that’s why nothing, from the gleaming aluminum-trim surrounds to the burnished decorative wood or brushed aluminum inlays, is symmetrical. We considered every component of the interior and found that the people interacting with it would have different needs. So the dash isn’t in balance—it’s in a proper perspective for the driver and the passengers, respectively. A uniquely Audi perspective. By incorporating luxury materials and top-flight craftsmanship, we stand apart. By designing with inspired abandon, the A6 interior provides a welcome contrast to the same old symmetry.

From here, it's all in front of you.

It's time to put yourself in the driver's seat. Feel how the wraparound curve of the A6 instrument panel invites your exploration. See how it integrates intuitively with the overall driver-centric layout. Discover how the design centers around the available Audi MMI® Navigation plus with its 8" display deploying from and retracting into the instrument panel. Adjust the eight-way power-adjustable seats, grab the leather-wrapped, multifunction steering wheel and spark the ignition. It's your time to drive.

What does your handwriting say about you? We aren’t really sure. We just know it speaks to us. A revolution in intelligent simplicity, the optional Audi MMI® touch with handwriting-recognition is a class-first technology that gives you the ability to give commands and retrieve media simply by recognizing a few strokes of your finger. Access information such as songs, phone numbers, and destinations through the Audi MMI® touch—or give input to the optional Audi Connect, the world’s first media system with Google Earth™-enabled maps. The world isn’t simply at your fingertips—your fingertips open up a new way to interact with the world.

- letter and number entries for destinations and contacts
- radio preset selection
- album-cover scrolling
- map scrolling
- sound distribution adjustment

Developed by the Audi HMI (Human Machine Interface) team, Audi MMI® touch defines why simple can be so complex. Not to use, but to design. The HMI team built a system so advanced, it can read almost anyone’s handwriting—even if you choose to write it with your off hand.
Input as unique as your fingerprint. What does your handwriting say about you? We aren’t really sure. We just know it speaks to us. Rewriting the elements of style.

Challenging conventions is easier when you make new ones. With that in mind, our innovative design team changed the way you interact with interior appointments. It’s style put to the touch. With luxurious materials, eight-way power front seats and available four-zone automatic climate control in the A6, you literally create a unique cabin environment to fit your own unique style. This is true for the smallest details too, like an optional heated steering wheel, stunning inlays, or available heated and/or ventilated front seats that help keep you comfortable so you can focus on driving.
Rewriting the elements of style.

Challenging conventions is easier when you make new ones. With that in mind, our innovative design team changed the way you interact with interior appointments. It's style put to the touch. With luxurious materials, eight-way power front seats and available four-zone automatic climate control in the A6, you literally create a unique cabin environment to fit your own unique style. This is true for the smallest details too, like an optional heated steering wheel, stunning inlays, or available heated and/or ventilated front seats that help keep you comfortable so you can focus on driving.

Designed specifically for Audi, leather envelops the vehicle's seating surfaces, to add the right touch to your luxury interior.
Calm even when the elements aren’t.

Despite what others might have you believe, it’s not about power or control, it’s about power and control. That’s why the A6 3.0T delivers its impressive 310 hp and smooth 325 ft-lb of torque through our legendary Audi quattro® all-wheel drive system that helps grip the road. More than a bad weather security blanket, its dynamic handling and performance shine through in all seasons.

For more than 30 years, we’ve delivered a more gripping overall driving experience with Audi quattro® all-wheel drive, which instantly optimizes performance and works with torque vectoring to enhance traction and improve handling. Our latest iteration has created a more dynamic all-wheel drive system that will set the new standard for the industry for the next 30 years.

~ fig. 04

For more than 30 years, we’ve delivered a more gripping overall driving experience with Audi quattro® all-wheel drive, which instantly optimizes performance and works with torque vectoring to enhance traction and improve handling. We’ve created a more dynamic all-wheel drive system that will set the new standard for the industry for the next 30 years.
It’s time to throw the road a curve.

Audi quattro® all-wheel drive is more than visionary engineering—it’s actually a response to the conditions around our Ingolstadt headquarters. With the weather and the terrain the way they are, all-wheel drive seemed like a smart solution for the problems presented. Since they design mountain roads with hairpin turns, it’s only natural that we wanted to turn the tables on the road. Here’s how it works:

While the engineering on the A6 helps to elevate the driving profile and performance characteristics, it’s not a totally refined sensibility we’re after. We are a performance company as much as an engineering or luxury one. Performance characteristics, it’s not a totally refined sensibility we’re after.

With an effective 40:60 rear-wheel bias, it’s ideal for rear-wheel-type power. But where traction is stringent, the ideal bias can change for optimized performance.

The best of both worlds dialed to your style.

Audi drive select

You choose Comfort, Auto or Dynamic settings that you respond to the drive. With Audi drive select, configure the engine, transmission and steering to respond to your mood or the conditions, or just to experiment with drive settings that range from outstandingly comfortable to intensely sporty.

- individual mode (individualized)
- dynamic mode (fun)
- auto mode (balanced)
- comfort mode (peaceful)

Our drive is responsive, but we also demand that you respond to it. With Audi drive select, you can fine-tune the response of the steering, engine, transmission and brakes.

Audi drive select

Take the turn your way—this mode allows you to adjust the steering, engine, transmission and brakes to your style. Your response to the drive and the conditions around you are what dictate the settings for Audi drive select.

- engine
- transmission
- steering
- brakes
- ride height
- suspension
- braking
- traction
- power distribution
- control modes
- drive settings
- performance modes
- individual mode
- dynamic mode
- auto mode
- comfort mode

With this kind of response, you might not care how efficient you’ve become.

This is where German engineering finds a new gear. Not content with a heritage of performance, we’ve developed an even more responsive and efficient way of applying power. Our revolutionary eight-speed Tiptronic® automatic transmission with Dynamic Shift Program (DSP) helps to enhance performance while also allowing you to command upshifts or downshifts through the available steering-wheel-mounted shift paddles.

Replacing our six-speed Tiptronic® transmission from previous generations, this new generation of shifting allows you in control, while increasing the fuel efficiency and responsiveness of your A6 3.0T. With this kind of response, you might not care how efficient you’ve become.

We’re not losing weight for looks, but because it makes us stronger and more agile. By lightening our static weight throughout our frame and our engine, we are able to harness more power more quickly—and, not incidentally, more efficiently. That means the A6 3.0T has a supercharged 3.0-liter engine that delivers the potent acceleration of a traditional V8 with the efficiency of a V6. Better mpg and an increased heart rate. Great reasons for slimming down.

Realize your kinetic potential faster.

Destined not to become a museum piece.

Yes, we talk about beauty, taste and style, but Audi doesn’t build static art—we build automobiles. As much as the A6 is designed to enthral, it is made to drive, and drive with abandon. So it doesn’t make sense to us to put it on a pedestal—we encourage people to get in it and get out there and drive. Let others worry about heritage—we have the road to enjoy.

We set out to change how people interact in and out of their automobiles. A suite of available class-leading technologies has made the A6 a true champion for progress. Audi MMI® touch with handwriting-recognition technology, Audi Connect with Google Earth™, and Wi-Fi connectivity for up to eight devices ensure that no other luxury automotive company offers this level of connectivity in the U.S. And with them, Audi amplifies your interactive life while simultaneously enhancing your driving experience.

No one connects you the way we do.
No one connects you the way we do.

1. Requires a data subscription plan. Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only; always pay careful attention to the road, and do not drive while distracted.
For years, while other sound-system engineers were obsessed with what they thought you should be hearing, Audi sound engineers thought about how we impact what people are feeling when they are enjoying music. We found a partner who shared our passion—Bang & Olufsen®—who has helped us conceive a new way of experiencing sounds in your A6 3.0T. We use speaker positioning and precise sound calibration to work in concert with the ambient noise in your car. The results are crisper, more resonant—you might even say, more emotional. Because, if you are only listening, you're not really feeling it.

5.1 surround sound
1,300 watts
(Bang & Olufsen® acoustic lenses)
(2 of 15 speakers)

Striking a deep note for a shared passion.

The passion of Bang & Olufsen® is a perfect match with Audi. By focusing on design and performance, we bring out the best in outstanding acoustics. Bang & Olufsen® engineers help to sculpt perfectly rendered sound through two innovative retractable aluminum lenses. The results are crispier, more resonant—you might even say, more emotional. Because, if you are only listening, you're not really feeling it.

ICEpower® Amplifiers
About the size of a matchbox, this revolutionary acoustic technology from Bang & Olufsen® ensures a powerful sound base...

Because, if you are only listening, you’re not really feeling it.1

1 Bang & Olufsen® Advanced Sound System available on A6 3.0T models.
Focused on the other drivers’ distractions.

With something like one in five people on the road checking their e-mail, driving distracted, in cars they don’t maintain, Audi engineers had to come up with something that anticipates the arbitrary impulses of this unruly mob. So they developed a suite of available driver-assistance technologies in the A6 that is thoughtfully comprehensive, side to side and back to front. From seemingly sentient Audi adaptive cruise control to Audi pre sense plus active collision warning and preparation, to the literally visionary night vision assistant with pedestrian detection, Audi has incorporated innovative, anticipatory technologies that don’t see your future so much as help others avoid changing it.

17 – Audi side assist
Active at speeds over 19 mph, available Audi side assist monitors blind spots and fast-approaching vehicles at a range of 150 ft from the rear. When a vehicle is detected, a yellow light on the exterior mirrors warns you via LED lights in the exterior mirrors.

18 – Head-up display
Easy-to-view, accurate visual information right at eye level, displaying important driving information and even pedestrian-detection warnings.

19 – Night vision assistant
With an infrared camera detecting what lies ahead, the A6 uses thermal-imaging technology to help you avoid trouble. Pedestrians can be detected 300 feet in front of the vehicle, while objects can be detected up to 1,000 feet ahead—all shown on the 7” color driver information system.

20 – Audi adaptive cruise control with Stop and Go
Not only retains a preset distance from vehicles ahead, but resumes acceleration when you’re ready. Using long-range radar and a camera, the system maintains your set-following distance and switches between accelerating and braking according to the situations that arise on the road.

21 – Audi pre sense plus
Offers comprehensive driving assistance with sensors in the front, side, and rear. After visual, physical, and aural collision warnings, there are four distinct phases for automatic collision protection: an upsurge of brake pressure, seatbelt pre-tensioning, partial braking and sunroof and window preparation. In severe cases, Audi pre sense plus will engage full braking and deceleration.

1 Optional feature.

Pedestrians can be detected 300 feet in front of the vehicle, while objects can be detected up to 1,000 feet ahead—all shown on the 7” color driver information system.

Audi pre sense plus offers comprehensive collisionavoidance with full braking and deceleration when necessary. After visual, physical and aural collision warnings, there are four distinct phases for automatic preparation for the unavoidable: an upsurge of brake pressure, seatbelt pre-tensioning, partial braking and sunroof and window preparation. In severe cases, Audi pre sense plus will engage full braking and deceleration.

Focused on the other drivers’ distractions.
Face it—you’re surrounded.

The A6 might not be the car for you if you don’t want peace of mind. Innovative safety features lead the way in Audi progressive thinking, so you can concentrate on better things, like the great performance of your A6. With up to ten airbags helping to protect nearly every inch of the cabin, an adaptive restraint system protecting its occupants, and aluminum hybrid construction that lightens the static weight of your car to enable enhanced stopping power, Audi thinks of safety in a comprehensive way. Surrounding you with it. So you know you’re not alone out there.

Ten Airbags

Strategically placed around the occupants, the ten available airbags in the Audi A6 offer passive safety in the event of a collision, helping to protect the driver and passengers on all sides.1

Tailor-made Blanks

Developed to make the best possible use of the body’s potential, tailor-made blanks use the special manufacuring process that helps strengthen the upper zone of a B-pillar while the lower zone is designed to mitigate the impact in the event of a side collision.

1 Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children in the rear, using restraint systems appropriate for their size and age. 2 Optional feature.
ESC and ABS

Computerized technology that works in perfect sync with the Anti-lock Brake System (ABS), Electronic Stability Control (ESC) helps maintain your line of stability, applying the correct pressure to individual wheels and reducing throttle input to counter oversteer or understeer when the vehicle needs it.

Face it—you’re surrounded.

The only time you’d want this to pass you by.

Poets may someday capture the sorrow of watching an A6 pass you by when you aren’t sitting in the driver’s seat. But, every once in a while, it’s good to emphasize the positive—at least you got to enjoy seeing its stunning LED taillights. Known for our stylish, signature headlights, Audi also takes pride in how we say goodbye to others.

25 – LED Taillight Technology

Light-emitting diodes (LEDs) are more efficient than halogen lights. Better yet, they last much longer. As advanced technology, they react faster than traditional bulbs, going on brighter and quicker—helping give the driver behind you more reaction time.

Light-emitting diodes (LEDs) are more efficient than halogen lights. Better still, they last much longer. As advanced technology, they react faster than traditional bulbs, going on brighter and quicker—helping give the driver behind you more reaction time.
Imagine a cherry on top of your sundae. Sweet, right? Now imagine a cherry that helps protect your A6 in the garage. Or carries your bikes for a serious weekend on the trails. Or makes heads turn as you drive by. Audi Genuine Accessories are the little extras that make your Audi even sweeter. Designed by the same visionaries who designed your vehicle, all accessories feature a tailored fit and the expert craftsmanship you’d expect from Audi. They are also backed by the 4-year/50,000-mile Audi New Vehicle limited warranty, or a 12-month/12,000-mile limited warranty, whichever is greater.1

**Compact Cargo Carrier**
A sleek, aerodynamic design that offers a generous 16.95-cu-ft capacity. Size: 81” long, 30” wide, 15” high.

**Storage Cover**
A lightweight, easy-to-use Stormshield® cover helps protect your Audi from the elements. Includes a storage bag.

**Textile Floor Mats**
These precision-fit mats are made of long-life fabric to help protect the carpets of your Audi from the elements. Skid-resistant. Available in black, tan, or your color.

**20” Diversas Alloy Wheels**
Add to the already striking look of your A6 with the addition of the boldly designed 20” Diversas alloy wheels.

**Various Transport Solutions**
The Audi line of storage accessories helps protect your possessions with a variety of intelligent and innovative solutions. Choose from bike racks, ski racks and a variety of cargo carriers.

**Other accessories not shown**

**Splash Protectors**
Help protect your exterior finish with custom-fit front and rear splash protectors. Made of long-life, crack-resistant rubber. Available in sets of two for front or rear (not available on A6 3.0T Prestige models).

**A6 Base Carrier Bars**
Attached to strong side brackets, these are the durable foundation of the Audi roof-rack system. (All roof-rack system attachments require special tools to help give interior and exterior surfaces the finest in cleaning and protection.

**Audi Guard Car Care**
Use the only car care line specifically designed with your Audi vehicle in mind. Audi Guard car-care products provide gentle cleansing formulas and special tools to help give interior and exterior surfaces the finest in cleaning and protection.

**Various Electronic Accessories**
The many electronic accessories in your Audi are renowned for design that emphasizes user experience. All products are tested to help ensure compatibility with your vehicle’s electrical systems so that you can easily enjoy what Audi technology has to offer.
