F. Porsche AG. All other trademarks are property of their respective owners. Some European models shown.
Wisdom isn’t given, it’s earned. Good thing the 2013 Audi A6 is a generous teacher. The lesson plan starts with access to the digital world through an available embedded Wi-Fi hotspot. From there it moves on to connecting faster using the handwriting-recognition technology of available Audi MMI® touch. Then the course is rounded off with the seemingly relentless grip of available Audi quattro® all-wheel drive, and an available supercharged 3.0-liter TFSI® V6 engine, which gives you the muscle of a V8 with the thirst of a V6. Now you have the uncompromising performance of a technologically advanced luxury sport sedan. In every stitch, it exudes class. On every road, it teaches.

Class is now in session.

1 Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hotspot functionality is intended for passenger use only. Please see the Kaufmann terms of service online for more information. 2 Based on brightness comparison to full LED headlights and full LED headlight technology. Class is now in session.

2013 Audi A6 3.0T Prestige shown in Stello Gray Metallic with available 20" Sport package and optional full LED headlight technology.
Some writers try to conceive one brilliant character and let the plot organically build and flow from there. We took a page from their book, so to speak, when designing the Audi A6. To create and define that brilliant character, we started with one great line. The Tornado line. Bisecting the body profile, it runs strongly through the middle of the vehicle to give it a bold, progressive stance that tells the world that there’s pedigree here, but not a predictable one. After that, the narrative becomes yours.
Progress starts with a point of view.

The trick is to be bold while acting cool. That’s our approach with the Audi A6. Crafted with precision, appointed luxuriously and built with performance in mind, it is engineered lighter than the previous-generation A6 for improved efficiency and connected like no car before. We built the A6 not for those concerned with looking up or down, but for those who look out to see all the possibilities.

1 Distracted driving can cause a loss of vehicle control. The features and technologies discussed herein are offered for convenience, and should be used only when it is safe and appropriate. The driver is always responsible for safely operating the vehicle. Always observe the road and traffic conditions when driving the vehicle. Wi-Fi connectivity and Google Earth™ imagery require an available subscription plan. Some features may require an additional subscription plan. See dealer for details.

2 25 city/33 highway mpg (2013 A6 2.0T, with Audi multitronic® continuously variable transmission with front-wheel drive). EPA estimates. Your mileage will vary.
This is luxury in its most athletic form.

The Audi S6 isn’t afraid to flash a little muscle. But you could have guessed that with just a glimpse of its commanding profile. Or by the roar of its 4.0-liter TFSI® V8 that produces an unrelenting 420 hp, while helping save fuel using Audi Cylinder on Demand™ engine efficiency technology. But what’s power without control? That’s where the legendary Audi quattro® all-wheel drive system comes into play, not to mention the sports differential and Audi adaptive air suspension. And, as a final show of its ability to mesh luxury and power, it offers signature sport seats with integrated head restraints.

S6

2013 Audi S6 shown in Ice Silver metallic with optional 20" 5-parallel-spoke-star design wheels.

There’s more information on the Audi Sport model line in the all-new 2013 Audi Sport brochure. See your dealer or go to audiusa.com for details.

ENGINE // 4.0-liter turbocharged TFSI® V8 developing 420 hp and 406 lb-ft of torque

DRIVETRAIN // Audi quattro® all-wheel drive with sports differential

TRANSMISSION // Seven-speed Audi S tronic® dual-clutch transmission

CHASSIS // S6 tuned Audi adaptive air suspension, Audi drive select

BRAKES // 15.7” ventilated front disc brakes with S6 logo, 14” ventilated rear disc brakes

PERFORMANCE // Top track speed of 155 mph, acceleration from 0 to 60 mph in 4.5 seconds

1 Top track speed is electronically limited in the U.S. Obey all speed and traffic laws.
Incorporating painstaking craftsmanship, the Audi approach to our wood and metal inlays is the same as it is to our engineering. Imperfection is not an option. So natural wood shines, and brushed aluminum glistens. We capture the right accent of your interior choice, and add a singular finish to its fit.

Our interior has no mirror image.

Passion doesn’t benefit from balance. Maybe that’s why nothing, from the gleaming aluminum-trim surrounds to the burnished decorative wood or brushed aluminum inlays, is symmetrical. We considered every component of the interior and found that the people interacting with it would have different needs. So the dashboard isn’t in balance—it’s in a proper perspective for the driver and the passengers, respectively. A uniquely Audi perspective. By incorporating luxury materials and top-flight craftsmanship, we stand apart. Designed with inspired abandon, the Audi A6 interior provides a welcome contrast to the same old symmetry.
We’re not the type to keep you at arm’s length.

It’s time to put yourself in the driver’s seat. Feel how the wraparound curve of the Audi A6 dashboard invites your exploration. See how it integrates intuitively with the overall driver-centric layout. Discover how the design centers around the available Audi MMI® Navigation plus with its 8” display deploying from and retracting into the instrument panel. Then admire the finely crafted decorative inlays displayed before you. Now spark the ignition. It’s your time to drive.

2013 Audi A6 3.0T Prestige shown in Velvet Beige leather with Dark Brown Walnut Wood inlays.
Rewriting the elements of style.

Why challenge conventions when you can make new ones? Our innovative design team changed the way you interact with interior appointments, and built style with purpose in mind. With luxurious materials, available twelve-way power front seats and four-zone automatic climate control in the Audi A6, you literally create a unique cabin environment to fit your own unique style. This is true for the smallest details too, like an available heated steering wheel, or heated and ventilated front seats that help keep you comfortable so you can focus on driving.
When driving during cold, rainy, snowy or icy weather conditions, ensure that your vehicle is equipped with appropriate all-season or winter-weather tires. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility and road conditions.

Confidence-inspiring
Under ideal conditions, power is 40:60 rear-wheel-biased to help maximize acceleration and cornering, but the instant conditions become more challenging, the ratio is optimized for superior grip and control.

Torque split
When accelerating out of a turn, up to 80% of the power is mechanically shifted to the rear wheels, where it’s best allocated to propel the vehicle to your desired speed and onto the straightaway. Once traveling in a straight line again, the 40:60 power distribution that quattro® delivers to the front and rear wheels, respectively, gives you maximum torque to push onward.

It’s a bond between your car and the road.

It’s true that while the available Audi quattro® all-wheel drive may have been engineered to help drive through inclement weather and in low-traction situations, the real magic of this advanced system is how it performs in the dry. Power is distributed to all four wheels working in concert to help grip every corner while giving you the optimal amount of power delivery where and when it’s needed. In other words, quattro® helps enhance performance by appropriately transferring power to the necessary wheels when accelerating and cornering, so you have confidence-inspiring performance when the road isn’t at its best. Inclement weather aside, the really gripping story about quattro® is how it performs overall, forging a sure bond between you, your Audi A6 and the road.

Torque vectoring
It’s a handling feature that seems to respond to your impulses before your steering input. An evolution of cross-axle lock, this system works within quattro®, while utilizing ESC and ABS to help sense traction loss from the inside cornering tire.
While the engineering on the Audi A6 helps to elevate the driving profile and performance characteristics, it’s not a totally refined sensibility we’re after. We are a performance company as much as an engineering or luxury one. The result is intensity that uses technology to its benefit, without taking away from the visceral thrill of driving.

Audi quattro® all-wheel drive is more than visionary engineering—it’s actually a response to the conditions around our Ingolstadt headquarters. With the weather and the terrain the way they are, all-wheel drive seemed like a smart solution for the problems presented. Since they design mountain roads with hairpin turns, it’s only natural that we wanted to turn the tables on the road. Here’s how it works:

Audi Drive Select

Our Drive is responsive, but we also demand that you respond to the drive. With Audi drive select, you choose Comfort, Dynamic, Auto, or Individual. You set up the steering and suspension, and the driving is adjusted to your mood or the conditions, or put to experiment with drive settings that range from outstandingly comfortable to intensely sporty.

- Comfort mode
  Perfect for less-than-perfect roads, this setting adds optimized steering and a closer shift pattern to help provide a more relaxed drive.
- Dynamic mode
  More precise steering and a more responsive throttle give this setting an aggressive feel and focused performance.
- Auto mode
  The best of both worlds, dialed to automatically adjust settings for a seamless combination of comfort and responsiveness based on your driving style and road conditions.
- Individual mode
  Take the turn your way—this mode allows you to adjust the steering, throttle, and transmission upshifts to your style.

Torque Vectoring

It’s a handling feature that seems to respond to your impulses before steering input. An evolution of cross-axle lock, this system works within quattro®, utilizing ESC and ABS to help sense traction loss on the inside wheel while sending power to the wheel that has traction.

40% - 60%

Asymmetric Torque Split

With an effective 40:60 rear-biased torque split, it’s ideal for rear-wheel-type power. But where traction is strongest, the bias can change for optimized handling and performance.

It’s time to throw the road a curve.

It might feel like we read your mind.
Realize your kinetic potential faster.

We’re not losing weight for looks, but because it makes us stronger and more agile. By lightening our static weight throughout our frame and our engine, we are able to harness more power more quickly—and, not incidentally, more efficiently. That means the Audi A6, when equipped with the available supercharged 3.0-liter engine, delivers the potent acceleration of a traditional V8 with the efficiency of a V6. Improved mpg and an increased heart rate. Great reasons for slimming down.

With this kind of response, you might not care how efficient you’ve become.

This is where German engineering finds a new gear. Not content with a heritage of performance, we’ve developed an even more responsive and efficient way of applying power. Our available revolutionary eight-speed Tiptronic automatic transmission with Dynamic Shift Program (DSP) helps to enhance performance while also allowing you to command upshifts or downshifts through the available steering-wheel-mounted shift paddles. A shift has been made and the choice is yours: choose what propels your A6.

1. 0-60 mph: 5.3 sec.
2. 2.0-liter TFSI four-cylinder engine utilizes either an optimized front-wheel-drive layout and Audi multitronic® continuously variable transmission, or available quattro® all-wheel drive system and eight-speed Tiptronic® transmission.
3. Start-Stop Engine Efficiency System
As an intelligent vehicle system, this available highly effective engine management program can lower fuel consumption as well as CO₂ emissions by automatically shutting off your engine while you wait at a red light or perhaps during certain stop and go driving. Once you are ready to resume, or if other critical vehicle systems require it, the engine will restart nearly instantaneously.

1. 25 city/33 highway mpg (2013 A6 2.0T, with Audi multitronic® continuously variable transmission with front-wheel drive). EPA estimates. 2013 A6 3.0T EPA estimates not available at time of printing. Your mileage will vary.
Focused on the other drivers' distractions.

The suite of available driver-assistance technologies takes into account the actions of other drivers—while helping make your drive a little easier. From seemingly sentient Audi adaptive cruise control with stop & go to Audi active lane assist, the Audi A6 has incorporated innovative, anticipatory technologies that don’t see your future so much as help change it.

- Audi Side Assist
  The available Audi side assist uses radar sensors and two different optical warnings to help keep the driver informed of what is approaching from hard-to-see angles behind and to the side of the vehicle.

- Audi Pre Sense Plus
  The available Audi pre sense plus offers comprehensive driving assistance with warnings in the front, side, and rear; after visual, physical and aural collision warnings, there are four distinct phases for automatic preparation for the unavoidable: an upsurge of brake pressure, safety belt pre-tensioning, partial braking, and sunroof and window preparation. In severe cases, Audi pre sense plus will engage full braking and deceleration.

- Audi Active Lane Assist
  Operating at speeds above 38 mph, this available system helps detect when the vehicle begins to leave the lane without signaling. Then, through gentle, corrective steering efforts, it helps the vehicle remain in the lane and vibrates the steering wheel as an additional warning. This way, Audi active lane assist complements the driver’s decision-making process to further solidify the bond between driver and machine.

- Audi Adaptive Cruise Control with Stop & Go
  Not only retains a preset distance from vehicles ahead, but ensures autonomous speed control when the vehicle is stopped, that is, as long as the vehicle is stationary. When the vehicle is stopped and the system is engaged, the available adaptive cruise control with stop & go adapts to traffic conditions and adjusts the speed, helping bring the vehicle to a full stop when necessary.

- Audi Pre Sense Plus
  The available Audi pre sense plus offers comprehensive driving assistance with warnings in the front, side, and rear; after visual, physical and aural collision warnings, there are four distinct phases for automatic preparation for the unavoidable: an upsurge of brake pressure, safety belt pre-tensioning, partial braking, and sunroof and window preparation. In severe cases, Audi pre sense plus will engage full braking and deceleration.

- Audi Adaptive Cruise Control
  With an infrared camera detecting what lies ahead, this available feature uses thermal-imaging technology to help you avoid trouble. Pedestrians can be detected over 300 feet in front of the vehicle, while objects can be detected over 900 feet ahead—shown on the 7" color driver information system.

- Audi A6 shown.
Being prepared means dressing the part.

You wouldn’t wear shorts and sandals to opening night at the opera, right? That’s why the innovative safety features of the Audi A6 come dressed for the occasion, so you can concentrate on better things, like the great performance of your A6. With up to ten airbags helping to protect nearly every inch of the cabin, an adaptive restraint system protecting its occupants, and Audi ultra® lightweight technology such as aluminum hybrid construction that reduces the static weight of your vehicle to help shorten stopping distances, Audi thinks of safety in a comprehensive way. Surrounding you with it. So your A6 will not only look the part, it’ll act the part.

1. Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children in the rear, using restraint systems appropriate for their size and age. 2. Optional feature.
Input as unique as your fingerprint.

What does your handwriting say about you? We aren’t really sure. We just know it speaks to us. A revolution in intelligent simplicity, the available Audi MMI® touch with handwriting recognition is a technology that gives you the ability to give commands and retrieve media simply by recognizing a few strokes of your finger. Access information such as music files, contact information, and destinations through the Audi MMI touch—or give input to the optional Audi connect®, an innovative media system with Google Earth™ mapping service. The world isn’t simply at your fingertips—your fingertips open up a new way to interact with the world.

1. Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only. Always pay careful attention to the road, and do not drive while distracted. Features may require an additional subscription plan. See dealer for details.
No one connects you the way we do.

We set out to change how people interact in and out of their automobiles. A suite of available technologies has made the Audi A6 a true champion of progress. And with Audi connect™ with Google Earth™ imagery and Wi-Fi connectivity for up to eight passenger devices, you have multiple ways to stay connected. With that kind of access, Audi helps build on your interactive life while helping enhance your ownership experience.

1 Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. Striking a deep note for a shared passion.

For years, while other sound-system engineers were obsessed with what they thought you should be hearing, Audi sound engineers thought about how we impact what people are feeling when they are enjoying music. We found a partner who shared our passion—Bang & Olufsen®—who has helped us conceive a new way of experiencing sounds in your Audi A6. We use speaker positioning, speaker design and precise sound calibration to work in concert with the ambient noise in your car. The results are crisper, more resonant—you might even say, more emotional. Because, if you are only listening, you’re not really feeling it.

1,300 watts
(Bang & Olufsen® acoustic lenses)
(2 of 15 speakers)

ICEpower® Amplifiers
This revolutionary acoustic technology from Bang & Olufsen® helps ensure a powerful sound base without taking up the amount of space or emitting the level of heat that conventional amplifiers do. No wonder Bang & Olufsen® and Audi complement each other so well.

2 Tires are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under those circumstances, you should replace your current tires with all-season tires, which offer superior traction under those conditions. We recommend that you consult your tire manufacturer’s recommendations for your specific vehicle. Please note that our tires are sold in sets of four. Please consult your tire manufacturer’s recommendations for your specific vehicle before changing your tire selection. Use your tire manufacturer’s recommended冬型轮胎，它们能提供更好的牵引力，在冷、雪、冰的情况下使用。请注意，我们的轮胎是成组销售的。请咨询您的轮胎制造商的推荐，再决定更换轮胎。

1. Airbags are supplemental restraints only and will not deploy unless all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age. 2. Audi Navigation plus depends on location and other factors such as external signals and existing wireless and satellite technologies. The optional vehicle-to-vehicle and vehicle-to-roadway communication features are additional. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes depend on signals from the worldwide Global Positioning Satellite network. The vehicle's electrical system and existing wireless and satellite technologies must be available and operating properly for the system to function. The system is designed to provide direction and guidance only and is subject to errors and failures. You are responsible for maintaining a safe driving speed and environment. The system is not designed to prevent collisions or accidents. Information not available at time of printing. Available at time of printing. Please rely on your individual judgment in determining whether or not to follow a suggested route. Periodically mapping updates will be available for purchase at an additional cost. Consult your dealer or call 1-800-FOR-AUDI for details. See Audi connect page for important information regarding Audi connect.
An even bolder way to make an entrance.

If the A6 makes a statement, the Audi A6 Prestige with S line® exterior appearance package is an outright declaration. First off, unique front and rear bumpers give the vehicle a wider, sportier appearance. With the addition of a Platinum Gray rear diffuser, this effect becomes even more pronounced. And with flared side sills adding a muscular, lowered look, the impression all those staring people will be left with will be a lasting one.

2013 Audi A6 3.0T Prestige shown in Dakota Gray metallic with available 19” sport package and optional full LED headlight technology.
Imagine a cherry on top of your sundae. Sweet, right? Now imagine a cherry that helps protect your A6 in the garage. Or carries your bikes for a serious weekend on the trails. Or makes heads turn as you drive by. Audi Genuine Accessories are the little extras that make your Audi even sweeter. Designed by the same visionaries who designed your vehicle, all accessories feature a tailored fit and the expert craftsmanship you’d expect from Audi. They are also backed by the 4-year/50,000-mile Audi New Vehicle Limited Warranty or the accessory’s 12-month/12,000-mile limited warranty, whichever extends longer from the accessory purchase date.1

Audi Genuine Alloy Wheels
Strike the perfect balance between breathtaking design and awe-inspiring performance with Audi Genuine Alloy Wheels. Audi experts have meticulously designed these wheels especially for each Audi model. They’re engineered to the highest standards and undergo rigorous testing to help ensure long-term quality. Experience eye-catching style that is yours and yours alone. Nothing enhances the bold, dynamic look of your Audi vehicle faster.

Audi Genuine Sport and Design Accessories
Your Audi vehicle features a bold, aggressive stance and strong, sculpting lines. Enhance it by adding Audi Genuine Sport and Design Accessories. All are carefully scrutinized in the design and development process in order to ensure a perfect fit and superior performance. Each accessory is designed by Audi that makes every ride more enjoyable and more yours.

Audi Genuine Alloy Wheels
Select the perfect balance between bold, taking design and awe-inspiring performance with Audi Genuine Alloy Wheels. Audi experts have meticulously designed these wheels especially for each Audi model. They’re engineered to the highest standards and endure rigorous testing to help ensure long-term quality. Experience eye-catching style that is yours and yours alone. Nothing enhances the bold, dynamic look of your Audi vehicle faster.

Audi Genuine Electronic Accessories
The illuminating technology that graces each Audi vehicle provides the inspiration for Audi Light and Electronics Accessories. All of these accessories are engineered, designed and assembled to Audi’s exacting standards. Our accessory options are designed to help provide reliable, user-friendly solutions that enhance your vehicle’s overall performance, style and safety. They are designed to work in perfect harmony with the vehicle’s original equipment, ensuring a seamless integration with Audi all-wheel drive, adaptive suspension and Advanced Key systems.

Audi Guard Comfort and Protection Accessories
Protect what you love. Audi Guard Comfort and Protection Accessories offer functional, practical items that help keep your Audi in pristine condition. Choose from such useful items as bright, hard-shell trunk bins that help keep your vehicle organized, or custom-fit splash protectors that help shield your vehicle’s finish. Or add a fitted trunk liner to your vehicle to keep the cargo area clean and organized.

1. See dealer for details. 2. All roof-rack system attachments require the base carrier bars. All attachments sold separately. 3. Recreational equipment, sporting equipment and luggage not included.
