Note: A word about this brochure. Audi of America, Inc., believes the specifications in this brochure to be correct at the time of printing. However, specifications, standard equipment, options, fabrics, and colors are subject to change without notice. Some equipment may be unavailable when your vehicle is built. Please see your dealer for details concerning current availability and standard equipment options. If your dealer does not have the options you desire, check with Audi of America, Inc. This brochure is subject to change at any time without notice. Audi of America, Inc., reserves the right to issue modifications on this brochure. This brochure contains information and descriptions which are applicable in the United States only. Models shown may or may not represent the current state of the art. The brochure indicates the current state of the art in the release month. Standard equipment is subject to change, even within the release month. The vehicle description may or may not be applicable in your area. Vehicles in this brochure are shown with optional equipment. See your dealer for complete details on the New Vehicle Limited Warranty, twelve-year limited warranty against corrosion perforation, and Audi 24/7 Roadside Assistance. (Roadside assistance coverage provided by Road America in the U.S. Certain conditions apply: see your dealer for details.) Tires supplied by various manufacturers. “Audi,” all model names, “ASF,” “e-tron,” “FrontTrak,” “FSI,” “MMI,” “multitronic,” “quattro,” “S line,” “S tronic,” “TFSI,” “Truth in Engineering” and the four rings logo are registered trademarks of AUDI AG. “TDI” is a registered trademark of Volkswagen AG. “Alcantara” is a registered trademark of Alcantara S.p.A. “Bang & Olufsen” is a registered trademark of Bang & Olufsen. The BLUETOOTH word mark and logos are owned by the Bluetooth SIG, Inc., and any use of such marks by AUDI AG is under license. “BOSE” and “AudioPilot” are registered trademarks of the Bose Corporation. “Fender” and “Stratocaster” are registered trademarks of Fender Musical Instruments Corporation. “Google” is a registered trademark of Google Inc. “HD Radio” and the HD Radio logo are proprietary trademarks of iBiquity Digital Corporation. “HomeLink” is a registered trademark of Johnson Controls Technology Company. “iPod” is a registered trademark of Apple, Inc. “SiriusXM” and all related marks and logos are trademarks of Sirius XM Radio Inc. and its subsidiaries. “Tiptronic” is a registered trademark of Dr. Ing. h.c. F. Porsche AG. All other trademarks are the property of their respective owners. Some European models shown.

Audi connect and Wi-Fi features require a data subscription plan. Distracted driving can cause a loss of vehicle control. Audi connect and Wi-Fi features and technologies discussed in this brochure are offered for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only. Always pay careful attention to the road, and do not drive while distracted.

Audi MMI® Navigation plus depends on signals from the worldwide Global Positioning Satellite system. The vehicle's electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The system is designed to provide you with navigational routes to a location. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible; therefore you may experience discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested route. Periodically, the mapping is updated, and new DVD’s will be required in order to maintain the latest navigation information available to us. These will be available for purchase from time to time at an additional cost. Consult your dealer or call 1-800-FOR-AUDI for details.

SiriusXM Satellite Radio and Traffic subscriptions sold separately or as a package after trial expires. SiriusXM Traffic service available in select markets. Subscriptions are governed by SiriusXM Customer Agreement (see www.siriusxm.com) and are continuous until you call SiriusXM to cancel. Sirius U.S. Satellite Service available only to those 18 and older in the 48 contiguous U.S.A., D.C. and Puerto Rico (with coverage limitations).

Summer performance tires are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, rainy, or in snow-covered conditions. If you drive under these circumstances, you should change your vehicle's tire configuration to another tire, which offers better traction under these conditions. Tires are prone to wear extremely rapidly in conditions that generate high heat. Water on the road surface, including accumulating snow, can affect tire wear. High heat reduces tire lifespan. Any tire can fail in any driving condition, including excessive speed, carryover, overloading, or tire misuse, and is not an inherent characteristic of your vehicle's tires. These tires are not designed for winter driving. Most vehicles do not have winter tires. Periodically, it is advisable to have your tires rotated, especially in those driving conditions which may cause tires to wear unevenly. Consult your dealer for details on tire rotation.

Truth starts at birth

Taste Rhône reds. Italian leather. Vermont cheddar. Like those, Audi is very much a product of where it came from. It’s called terroir, and we’ve translated it to automobiles. It helps explain our take on luxury and why we challenge convention, actually. Figuring out how the climate, the soil and the topography create a singular truth, an intrinsic authenticity that can be found nowhere else, and how all these physical influences shape the progressive inspiration of our engineers, designers and thinkers.

We certainly have our own terroir. One shaped by the mountains, forests and extreme weather of Germany. Inspired by the autobahn, hairpin turns and early twilight. And, of course, by our home in Ingolstadt, along with the passions and personality of the people who live there. And like a fine wine, its heritage helps articulate how it came to be, to deepen the connection between the product and the person. As always, the real joy is in the discovery you feel experiencing it. It’s the truth from which the Truth in Engineering® was born.

We change the way people look at things. Germany has long been an epicenter of change. Of seeing the world differently. Of adapting to new standards. Of breaking new ground. This is an Audi cornerstone. By continually challenging the existing belief system, Audi provocation leads the way to new conventions.

Germans prefer to make order from chaos. We are precise and orderly because we think it’s important to mean what you say, and to be clear in what you do. Audi reflects that through visionary engineering. It is deceptively simple—organization is having the right thing in the right place, for the right moment.

Think of it this way—the Alps help you corner. The long, flat plains make you accelerate. The forest spurs driver-assistance technology. Who knew that the varied terrain of Germany would influence how you experience the road in the U.S.?

Provocation
We change the way people look at things. Germany has long been an epicenter of change. Of seeing the world differently. Of adapting to new standards. Of breaking new ground. This is an Audi cornerstone. By continually challenging the existing belief system, Audi provocation leads the way to new conventions.

Climate
The weather keeps Germans inside quite a bit. Where others might become stir-crazy, for us it becomes time to explore our thoughts. Audi engineers use this time to think about the elements outside, and how to overcome them through progressive thinking. We may think indoors, but our thoughts are far from insular.

Organization
Germans prefer to make order from chaos. We are precise and orderly because we think it’s important to mean what you say, and to be clear in what you do. Audi reflects that through visionary engineering. It is deceptively simple—organization is having the right thing in the right place, for the right moment.

Landscape
Think of it this way—the Alps help you corner. The long, flat plains make you accelerate. The forest spurs driver-assistance technology. Who knew that the varied terrain of Germany would influence how you experience the road in the U.S.?

Psychology
What do you see in cars? Economy of form. Efficiency of thought that translates into precise actions. The psychology of Audi engineers is modern and uncluttered. It’s not abstract that interests us, but addressing desires in a way that makes people nod and say, ‘Yes, that is Truth in Engineering.’

The difference between strength and flexibility is perspective.

If rigid thinking is the status quo, Audi is ultraflexible. For instance, where others assumed the need for steel, Audi saw how steel alone made a vehicle heavier, less efficient and harder to stop quickly. So with our “Audi ultra” initiative, we thought in terms of materials to help make our vehicles lighter, helping enhance fuel efficiency and improve braking response. It’s a matter of perspective. Positioned one way, aluminum materials can be flexible. Positioned another, they are strong and rigid. Positioned in an Audi and working with steel and, soon, carbon-fiber elements, they are a provocation to everyone else: you’ve been thinking about strength in the wrong way. Lighten up.

Weight savings and uncompromised strength

German Beer Purity Law

In a clever way to assert brewing primacy while challenging everyone else to get into line, the city of Ingolstadt was the first to define what could go into beer—water, barley, and hops—and the first to pass the famous German Beer Purity Law in 1516.
What happens when everyone is expected to carry the load.

In traditional luxury, the typical reaction is “more.” More is better, right? Not always. Audi built an entire Lightweight Design Center in Neckarsulm, Germany, where engineers worked together to create a radically different idea—that true luxury can be found in less. The group effort first paid off with our legendary ASF lightweight aluminum space frame technology. By placing the right material where it is most needed, we shed the sluggish excess of old luxury, and made our lightweight ASF technology part of a better performing, more efficient and entirely different luxury brand.

ASF

What happens when everyone is expected to carry the load.

Engineering defines our models, and built our company.

Striving for A’s, even on the B-pillar.

Lightweight design
The need to satisfy increased safety demands has led to increases in vehicle curb weights, dramatically compromising overall performance and efficiency. Of course, we saw that as an engineering challenge to overcome. Our progressive solution was integrative, geometrical and technological lightweight design. It’s an approach that balances the functional requirements of individual parts with the overall composition of the vehicle. In other words, through an innovative use of lighter materials, improved design and visionary engineering, we can help reduce the static weight, improve handling, maintain strength and provide greater fuel efficiency for our vehicles.

Tailor-made blanks
Using tailor-made blanks helps us counter the convention that solid steel is a better choice. We use them to save weight for better braking performance and increased overall rigidity and strength. It’s an innovation that helps provide structural support where it’s most needed while allowing for flexibility elsewhere. Joining sheet metals of varying tensile strengths prior to bonding and welding, tailor-made blanks allow us to build a superior frame.

It’s not exactly right to say we like to be graded, but Germans are encouraged from an early age to go into precise disciplines. Not just engineering, but mechanical engineering. And even there, we strive to be as precise as we can be. Take this B-pillar. It is the only steel used in this aluminum frame. It consists of ultra-high-strength steel on the outer ridge and advanced high-strength steel on the interior, helping provide strength where it’s needed most. It helps protect the cabin in side collisions, while reinforcing the frame in rollovers, helping protect those in the cabin. It was complex to conceive, difficult to execute and a perfectly understandable choice for a company that believes in Truth in Engineering® first. A truth that deserves an A+.

Lighter is better. Take a pound off, and you might not notice how much more efficient you have become. Take 75 or more off, and you might be cornering like you never have before. We’re talking about your Audi, of course. By taking significant weight off a traditional steel frame, we save hundreds of gallons of gas over the driving life of your car, compared to heavier vehicles. But it’s not all about efficiency. We also build aluminum hybrid and steel frames for rigidity and sharper handling. Audi ultra is a comprehensive approach that helps improve braking distance and fuel efficiency while enhancing performance. By challenging ourselves, we’ve built vehicles that show you how much more you can do, and enjoy, with less.

1 Based on 150,000 miles driven and EPA estimates of 21 mpg (combined city/highway) for 2011 A6 3.0T quattro® with Tiptronic® automatic transmission and 22 mpg (combined city/highway) for 2012 A6 3.0T quattro® with Tiptronic® automatic transmission. Your mileage will vary.

Why we’re obsessed with your weight.

78 lb
324 gal

mass reduction

over 150,000 miles

Lighter is better.

Lower center of gravity

Better handling

Better weight distribution between axles

Helps reduce CO₂ emissions

Helps reduce kinetic energy in a collision

Helps improve braking distance

Helps improve acceleration

Helps preserve roads
Conceived for the weather. Built for the road.

The evolutionary quattro®

We knew that for the question “How can we tame German roads?” Audi quattro® all-wheel drive was the answer. Since 1980, we’ve produced an expanding vision of what progressive all-wheel technology can deliver. We didn’t simply look at it as something to use in poor conditions, but rather as a performance technology that’s built to handle roads from the Alps to the autobahn—and points beyond. You’ve seen Audi quattro® capabilities in the way we dominated the world road rally circuit for years, and in the grip you have in poor conditions and the variable rear-wheel-biased power you enjoy in good ones. For more than 30 years, we have continued to refine the technology, adding an Audi quattro® with sports differential to help maximize performance, and torque vectoring to assist with cornering traction while improving handling. We progressed while the world was trying to catch up, staying on top by building on an impressive heritage of performance.  

Torque vectoring

You’ll find truth in your corner. Torque vectoring is a handling feature that seems to respond to your impulses before your steering input. An evolution of cross-axle lock, this system works within the Audi quattro® all-wheel drive system while utilizing Electronic Stability Control (ESC) and the Anti-lock Braking System (ABS) to help sense reduced load or wheel-spin on the inner cornering tire, making turns smoother and more responsive.  

European model shown with optional equipment. 1 Torque split ratio will vary from model to model. 2 Features listed may not be available on all models.

Driving that demands a response from you too.

Audi drive select

Germans are pretty direct. Some might say provocative. And they expect a response in return. You see it in our customizable Audi drive select. We’ve provided some great driving dynamics in our vehicles: world-class handling, thrilling power, and grip-defying Audi quattro® all-wheel drive. All for driving that connects the road, so you feel connected to the drive. With Audi drive select, you choose from Individual, Comfort, Dynamic or Auto settings that configure the throttle, transmission, steering, suspension and, if available, the sport differential, to respond to your desires, or the conditions. Or maybe you just want to experiment with drive settings that can take you down hard uptown roads in comfort or out of town in a thrilling blur.

Steering and suspension

The premise is simple: When you turn the steering wheel, you expect the car to react accordingly. Audi drive select gives you more input on how that will feel. But, depending on the mode you choose, we take it further. For stiffer suspension and a sportier ride, select Dynamic mode. Or go for Comfort mode, which helps soften the suspension for more comfortable and forgiving handling over difficult roads. In any mode, Audi handling reflects the style you choose, sensitive or relaxed, making steering an extension of your mood.

Transmission

With 27 possible Audi drive select configurations taking the suspension, throttle and steering into account, the transmission concentrates on how you shift. Various settings allow you to enjoy more torque at higher rpms for a more thrilling drive, or choose a more luxurious, comfortable one. It’s a progressive way to engage finely tuned technology, making it work the way you want it to.

ESC

Beyond the mode you choose, driving, in the end, is all about getting where you intend to go. Electronic Stability Control (ESC) is along with Audi quattro® all-wheel drive, another key to help ensure it. And the quattro® is as much of a handling feature as it is a means of control. It helps you correct a skid, while also acting as an active assistant that helps you react to oversteer or understeer. By activating the right brakes at the right time, ESC helps detect and minimize skids. So you stay on your intended course and get where you want to go.

Features listed may not be available on all models.

Without looking at the numbers, you might look at the panel seam on the opposite page and see a perfectly aligned contour. But our engineers and assembly-line workers would know it was off. They would note, correctly, that in some places, the weld or seam is clearly less than a millimeter off. Such is the case for intolerance. Anything less than perfect makes your vehicle more susceptible to wear. Precise, safer engineering requires a rigid disdain for allowances. Anything less means your Audi has a slight flaw. And that would make us generous to a fault.

The case for intolerance.

Precise construction and seamless laser welding

Anything less than perfect makes your vehicle more susceptible to wear. Precise, safer engineering requires a rigid disdain for allowances. Anything less means your Audi has a slight flaw. And that would make us generous to a fault.
Unafraid to stare back.

Naturally, given the trait and the field, it was a German who brought introspection into psychology. The man’s name was Wilhelm Wundt, and in Leipzig, in 1879, he saw introspection as a way to figure out the workings of the human mind. In other words, looking inside yourself and talking about what you see and feel can be a way to illuminate the process of thought. Suitably inspired, Audi designers took it further and turned Wundt’s thesis inside out—thinking of a better way to showcase the process and psychology of illumination. You might even say our iconic, signature LED headlight technology is an expressive, extroverted response to introspection.

We crafted our LED lights not only to illuminate, but to see and be seen. To come as close as we could to re-creating daylight, while doing it as stylishly as possible. Immediately recognizable from a distance and supremely attractive up close, each LED light lasts around 10,000 hours, while LED taillights illuminate faster than conventional brake lights to help give the drivers behind you more time to respond. But these lights reflect something deeper and more compelling. Maybe it’s the iconic shape. Maybe it’s how when you look inside for inspiration, you manage to express yourself to the world.

1 Based on brightness comparison to the sun and 5,500 K color temperature. Full LED headlights are an optional upgrade. 2 Features listed may not be available on all models.

A symphony of sound engineering

It’s like your very own ode to joy. Audi sound engineers don’t simply make the cabin acoustics sound perfect for your music, they make the drivetrain sing. Or, if not sing, then put it in harmony with every other element of the driving experience. From the sound of a shutting door, to the click of a knob being turned, to the full integration of Bang & Olufsen® or BOSE® sound systems, there’s an orchestra of engineering. Emphasizing the drama in sound is something Beethoven knew well. It’s no surprise that we’ve picked up on it.

You might hear a little Beethoven in your drivetrain.

1. Features listed may not be available on all models.
At first glance, it’s the kind of thing a guy in a black turtleneck might be ruminating over at a Berlin gallery. But then, he might not fully appreciate the sublime design and surprising engineering of the ventilation system in an Audi. In other words, those curves don’t just look arresting, they actually help the air to flow more effortlessly and easily around the cabin. That makes the climate control system more responsive, quieter and more effective. You don’t need an Art History degree to fully appreciate the impact this sculpture can have on you.

Taking a recommendation a little too far.

Everyone knows there is no speed limit on vast stretches of the autobahn. But there is a recommended one—130 km/h (around 80 mph). That inspired us to build performance vehicles that not only could reach that easily, but push past it effortlessly to the upper reaches of the gauges, as the road demanded. At the same time, we anticipated a different challenge, the American interstate highway system. How do you build progressive luxury performance vehicles for such vastly different kinds of highways? Our response: Plan for power. And anticipate a need for efficiency.

Our engineers crafted an innovative solution with lighter, forced induction engines designed for better response, enhanced fuel economy and quick, torque-driven acceleration! With FSI and TFSI engines that produce more power from smaller displacement, we take full advantage of the opportunities afforded by the autobahn. But with those same engines and vehicles, we’ve also designed a luxury vehicle for the open road of America, with improved mpg to take you farther on a single tank of fuel.

By taking a German recommendation to heart, we put progressive luxury on the American highways.

Autobahn performance on American roads

FSI®
Conventional thinking isn’t part of the Audi DNA. Which is why the Audi FSI direct injection fuel management and delivery system directly injects fuel into the combustion chambers at precisely managed times and depths. What that means for drivers is that a fully homogenized intake charge helps increase power while also reducing fuel consumption. Making efficiency more powerful.

TFSI®
At Audi, TFSI represents a combination of two of the brand’s core areas of expertise—direct injection and forced induction. By adding forced induction (turbocharging or supercharging) to Audi FSI direct injection, the pressurized intake charge is cooled by directly injected fuel, thus achieving efficiency and performance combined with higher compression ratios—previously only attainable by naturally aspirated engines.

1. Always obey local speed and traffic laws. 2. See www.fueleconomy.gov for EPA estimates. Your mileage will vary. 3. Vehicle range is based on EPA mpg (highway) estimates and the size of the vehicle’s fuel tank.

Our engineers crafted an innovative solution with lighter, forced induction engines designed for better response, enhanced fuel economy and quick, torque-driven acceleration. With FSI and TFSI engines that produce more power from smaller displacement, we take full advantage of the opportunities afforded by the autobahn. But with those same engines and vehicles, we’ve also designed a luxury vehicle for the open road of America, with improved mpg to take you farther on a single tank of fuel.

By taking a German recommendation to heart, we put progressive luxury on the American highways.
What you see:

- Storm clouds
- Fog
- Grass
- Rock side zone
- Puddle
- Road curve
- Poorly maintained road
- Sharp turn
- Cliff
- Rock wall
- Is that a jogger?
- Head-up display
- Rock slide zone
- Puddle

What Audi sees:

- Weather information
- Wi-Fi hotspot
- Thermal imaging
- Side-impact airbags
- Example zone
- Mounted camera
- ASP® Aluminum space frame
- ESP® ESC
- ABS
- Audi drive select
- LED daytime running light technology

Designing innovation depends on how you see the world.

Where some might look at a country road and see a tough drive, we see innovation, just waiting to be developed, because we see things from a different perspective. Maybe it’s from those days of endless rain and snow we get in Ingolstadt. But where others see a twisty mountain pass, we see solutions such as Audi quattro® or LED daytime running lights. To engineer technologies others haven’t thought of yet. To see beyond the curve in order to help keep you comfortably ahead of it. To help you see the Truth in Engineering®.

1. Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children only in the rear, using appropriate child restraints for their size and age. 2. Features listed may not be available on all models.
Designing innovation depends on how you see the world.

Where some might look at a country road and see a tough drive, we see innovation, just waiting to be developed, because we see things from a different perspective. Maybe it’s from those days of endless rain and snow we get in Ingolstadt. But where others see a wet road, or a twisty mountain pass, we see solutions such as Audi quattro® or LED daytime running lights. To engineer technologies others haven’t thought of yet. To see beyond the curve in order to help keep you comfortably ahead of it. To help you see the Truth in Engineering®.

1 Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children only in the rear, using appropriate restraint systems for their size and age. 2 Features listed may not be available on all models.
From a certain perspective, we’ve come full circle. Germany was the home to the first moveable type printing press, a technological advancement that standardized text and led to a global revolution in how people accessed information. Audi wanted to bring back a little of the personal touch, while giving you even more communicative capabilities. With handwriting-recognition technology, MMI touch helps deliver the information, entertainment or media you want, when you want it. More than intuitive, you can access the right phone number or the right song with just a few quick strokes of your finger on the touchpad. It connects you to your car in an entirely new way, allowing you to easily and immediately communicate with your vehicle and its systems.

Communication is further enhanced with the innovative Audi connect, which features the industry’s first Google Earth™-enabled infotainment system and Wi-Fi hotspot capabilities. Audi connect helps you get up-to-the-minute information with a few quick, easy cues—allowing you connection to everything from local fuel prices to traffic and points of interest. If the printing press helped democratize knowledge, Audi MMI gives you a personalized nerve center for you to receive customized information through Audi connect that was made just for you, making for a truly individualistic informational experience.

1 Features listed may not be available on all models.
2 Requires a data subscription plan. Distracted driving can cause a loss of vehicle control. The features and technologies discussed above are offered for convenience, and should be used only when it is safe and appropriate. The MMI output features are intended for passenger use only. Always pay careful attention to the road, and do not drive while distracted.

The most historic plug-in since Newport ’65.

In music, everything changed when a certain Fender® Stratocaster® was plugged in at the Newport Folk Festival in 1965. Sure, rock and roll had been part of the culture, but that Fender® transformed how people experienced it. Audi looks to do the same with plug-in electric vehicles. Called e-tron, we’re going beyond the existing technology and making it the kind of showcase of progressive engineering, lightweight construction, and innovative thinking that will make it unmistakably Audi. Power, speed and range will be expressed in a primal, performance-oriented way. We will also maintain the deep luxury of our interiors, with envelope-pushing design that emphasizes aerodynamics along with stunning lines. And the technology is illuminating too. Our engineers know that zero-emissions do not mean zero emotion. It’s not enough to have the basic technology, it’s how far past convention you are willing to go. We plan to set the new standard for electric plug-ins.

Sometimes higher calories can be a good thing.

Like it or not, it’s long been true that one of the differences between Germans and Americans is their approach to beer. Germans are generally unconcerned with calories or cost, as long as the beer tastes good. Americans have, for a long time, gone with lighter, cheaper beers. But as the microbrew revolution in America has shown, Americans’ tastes are changing. As with beer, so goes diesel. America is increasingly consuming Audi TDI® clean diesel technology. Maybe it’s the efficiency. Calories are, after all, only a measure of potential energy. They may not cause German beer to taste better than their mass-brewed American counterparts, but calories certainly make diesel fuel more powerful than gasoline. Which means that a gallon of diesel fuel has about 30% more energy than a comparable amount of gas and combusts more efficiently in the engine. Maybe it’s because the Audi TDI® clean diesel engine has achieved ultra-low emissions vehicle (Bm5-ULEV) status in all 50 states while producing 20 percent less CO₂ emissions than traditional gasoline. Maybe it’s the way that Audi has dominated the 24 Hours of Le Mans over the years with Audi TDI® clean diesel vehicles. Or maybe, in the end, it’s the calories that have changed minds. Which goes to show that all fuels are not created equal—but some should be an acquired taste.
Psychology

Sometimes higher calories can be a good thing.

Like it or not, it’s long been true that one of the differences between Germans and Americans is their approach to beer. Germans are generally unconcerned with calories or cost, as long as the beer tastes good. Americans have, for a long time, gone with lighter, cheaper beers. But as the microbrew revolution in America has shown, Americans’ tastes are changing. As with beer, so goes diesel. America is increasingly consuming Audi TDI® clean diesel technology. Maybe it’s the efficiency. Calories are, after all, only a measure of potential energy. They may not cause German beer to taste better than their mass-brewed American counterparts, but calories certainly make diesel fuel more powerful than gasoline. Which means that a gallon of diesel fuel has about 30% more energy than a comparable amount of gas and combusts more efficiently in the engine. Maybe it’s because the Audi TDI® clean diesel engine has achieved ultra-low emissions vehicle (Bkn-5/ULEV) status in all 50 states while producing 20 percent less CO₂ emissions than traditional gasoline. Maybe it’s the way that Audi has dominated the 24 Hours of Le Mans over the years with Audi TDI® clean diesel vehicles. Or maybe, in the end, it’s the calories that have changed minds. Which goes to show that all fuels are not created equal—but some should be an acquired taste.

The case for truth.

Audi makes a powerful one. One where engineering takes center stage and visionary technologies like ASF® aluminum space frames, Audi Haldex® touch and Audi quattro® all-wheel drive make the driver's experience a more rewarding one. From weight savings to exciting innovations to unparalleled handling, when we say Luxury has Progressed, this is what we mean. Audi takes all the innovative and intrinsic influences of Germany to create an endlessly potent truth. And the truth is, we can back it up. Audi incorporated diesel engines into our lineup more than 20 years ago, and we've only improved on their grandeur, their fuel mileage and their emission to the point where Audi TDI has a Le Mans championship pedigree—and is a leader in clean diesel technology. Then there are our innovations in Audi FSI® and TFSI® engines and our use of stylish and functional LED lighting technologies that help set us apart. To say nothing of revolutionary handwriting-recognition technology in the available MMI touch and next-generation navigation with Audi connect, the world's first in-vehicle navigation system to be integrated with Google Earth™.

These are the cars that contain this truth. These inspirations. These innovations. They are the proof behind the Truth in Engineering®.

Engineering defines the Audi A3 by elevating performance while enhancing efficiency. Whether you choose the efficient 2.0T, which gets an estimated 30 mpg on the highway, or the ultra-efficient Audi TDI clean diesel with an impressive 42 mpg highway estimate, you might overlook how ripped and responsive the A3 is when you get out driving. With its exhilarating combination of power and efficiency, it's a luxury car that engages the mind as much as it thrills the soul.

Audi A4 / A4 Avant Standard Feature Highlights

A4 Standard Feature Highlights

– Dual-zone automatic climate control
–  Concert radio with ten speakers and SiriusXM Satellite Radio
– Split folding 60/40 rear seatbacks
– Leather seating surfaces
– Audi S line® exterior appearance
– 17” 5-split-spoke design alloy wheels with all-season tires

A4 Premium

– 1.8T FSI® engine with new Aluminum Cylinder Head technology
– Leather covered, three-spoke multifunction steering wheel with shift paddles (Audi S tronic® transmissions only)
– Eight-way power driver’s seat (includes four-way power lumbar adjustment)
– Xenon plus headlights with LED daytime running light technology
– 17” 10-spoke design alloy wheels with all-season tires

A4 Premium Plus

– Parking system with rear sensors
– Audi side assist
– Audi advanced key
– BLUETOOTH® wireless technology preparation for mobile phone
– 18” 10-spoke design alloy wheels with summer performance tires

A4 Prestige

– Three-zone automatic climate control
– Driver seat memory
– Heated front seats
– Leather seating surfaces
– Panoramic sunroof (Avant only)
– Adaptive xenon plus headlights with LED daytime running light technology
– 19” 5-segment-spoke design alloy wheels with summer performance tires

S4 Standard Feature Highlights

– 3.0 TFSI® engine
– Bang & Olufsen® Sound System to enhance an already stylish drive. Its finely tuned S4 variant delivers potent performance, with a supercharged 333-hp 3.0T V6 that can go from 0 to 60 mph in as little as 4.9 seconds.

S4 Premium

– 1.8T FSI® engine with new Aluminum Cylinder Head technology
– Leather covered, three-spoke multifunction steering wheel with shift paddles (Audi S tronic® transmissions only)
– Eight-way power driver’s seat (includes four-way power lumbar adjustment)
– Xenon plus headlights with LED daytime running light technology
– 17” 10-spoke design alloy wheels with all-season tires

S4 Premium Plus

– Park assist
– Parking system plus headlights with LED light technology
– Audi MMI Navigation plus with voice control system
– Bang & Olufsen® Sound System with 14 speakers
– 19” 5-segment-spoke design alloy wheels with summer performance tires

S4 Prestige

– Three-zone automatic climate control
– Driver seat memory
– Heated front seats
– Leather seating surfaces
– Panoramic sunroof (Avant only)

Bang & Olufsen® Sound System to enhance an already stylish drive. Its finely tuned S4 variant delivers potent performance, with a supercharged 333-hp 3.0T V6 that can go from 0 to 60 mph in as little as 4.9 seconds.

The Audi A5 is a prime example of passionate, expressionist style and finely tuned performance. In either its Coupe or Cabriolet identity, the A5 is a showcase of personality—as it should be—with its assured handling, smart interior and devilish stance. It’s technologically advanced, fully stocked with available advanced technologies like Audi MMI® and a Bang and Olufsen® Sound System, and incearly powerful whenever you hit the throttle, with a potent 2.0T, or especially in the S5 with a 3.0T (Cabriolet only) or 4.2 FSI® (Coupe only)—engines that offer athleticism, but with a smile instead of a scowl.

A5

A5 Premium
- 18" 10-spoke-V design alloy wheels with all-season tires (Coupe)
- Panoramic tilting sunroof (Coupe only)
- Eight-way power front seats (includes four-way power lumbar adjustment for driver)
- Audi premium sound system with ten speakers and SiriusXM Satellite Radio

A5 Coupe / A5 Cabriolet Standard Feature Highlights

A5 Premium Plus
- Xenon plus headlights with LED daytime running light technology
- Heated front seats
- Driver seat memory
- Three-zone automatic climate control
- Audi music interface with iPod® integration
- BLUETOOTH® wireless technology preparation for mobile phone
- HomeLink® remote transmitter

A5 Prestige
- Adaptive xenon plus headlights with LED daytime running light technology
- Color driver information system
- Bang & Olufsen® Sound System
- HD Radio™ technology
- Audi side assist
- Parking system with rear sensors

S5 Premium Plus
- 19" 5-parallel-spoke-star design alloy wheels with summer performance tires
- S5 sport suspension calibration
- S exterior appearance
- Xenon plus headlights with LED daytime running light technology
- Silk Nappa leather seating surfaces and trim

S5 Coupe / S5 Cabriolet Standard Feature Highlights

S5 Premium Plus
- Twelve-way power front S5 sport seats (includes four-way power lumbar adjustment)
- Heated front seats
- Audi music interface with iPod® integration
- BLUETOOTH® wireless technology preparation for mobile phone
- HomeLink® remote transmitter

The Audi A6 makes the road more intelligent. With innovative Audi connect with Google Earth™ capabilities, Audi MMI® touch with advanced handwriting-recognition technology and Wi-Fi connectivity all available, you can see why. And with a suite of available driver assistance technologies that monitor and help you react to the traffic environment around you, it becomes a celebration of automobile technology. It’s also a celebration of what progressive luxury can be when engineered to be a lighter, agile and supremely confident performance vehicle.

**A6 Standard Feature Highlights**

**A6 Premium**
- Aluminum hybrid construction—aluminum exterior body panels and steel frame
- 17" 10-spoke design alloy wheels with all-season tires
- Three-zone automatic climate control
- Audi MMI® with six-speed Tiptronic automatic transmission
- Standard equipment exclusive on Audi 3.0T models

**A6 Premium Plus**
- 18" 5-arm design alloy wheels with all-season tires
- Xenon plus daytime running light technology
- Audi MMI® Navigation plus with voice control system and Audi MMI® touch
- Audi connect with Google Earth™ and Google™ Local Search, traffic information, news feeds, and Wi-Fi hotspot
- 7" color driver information system
- HD Radio™ technology
- SiriusXM Traffic

**A6 Prestige (3.0T only)**
- 18" 5-V-spoke design alloy wheels with all-season tires
- Adaptive xenon plus headlights with LED daytime running light technology
- BOSE® sound system with 14 speakers and AudioPilot® noise compensation
- Audi advanced key

**A6 Prestige (3.0T only)**
- Audi S line® exterior appearance

**A7 Standard Feature Highlights**

**A7 Premium**
- Aluminum hybrid construction—aluminum exterior body panels and steel frame
- 18" 7-spoke design alloy wheels with all-season tires
- Xenon plus daytime running light technology
- Three-zone automatic climate control
- Audi MMI® with six-speed Tiptronic automatic transmission
- Standard equipment exclusive on Audi 3.0T models
- Standard equipment exclusive on Audi S line® models

**A7 Premium Plus**
- 19" 10-spoke design alloy wheels with all-season tires
- Audi MMI® Navigation plus with voice control system and Audi MMI® touch

- 7" color driver information system
- HD Radio™ technology
- SiriusXM Traffic
- Parking system with front and rear sensors

Design something no one has ever seen before. And make it an ultrastylish, high-performance luxury vehicle so bold it wants to transform the world around it. We’re now in the rarified air of the Audi A7, a five-door luxury performance coupe that’s a beacon of unconventional thinking. It gives power a lot of style. It gives design some serious technology. And it gives people something to think about when they think they have seen it all.
The Audi A6 makes the road more intelligent. With innovative Audi connect with Google Earth™ capabilities, Audi MMI® touch with advanced handwriting-recognition technology and Wi-Fi connectivity all available, you can see why. And with a suite of available driver assistance technologies that monitor and help you react to the traffic environment around you, it becomes a celebration of automobile technology. It’s also a celebration of what progressive luxury can be when engineered to be a light-years, agile and supremely confident performance vehicle.

### A7 Standard Feature Highlights

**A7 Premium**
- Aluminum hybrid construction—aluminum exterior body panels and steel frame
- 18” 7-spoke design alloy wheels with all-season tires
- Three-zone automatic climate control
- Audi Drive Select
- Audi music interface with iPod® integration
- BLUETOOTH® wireless technology preparation for mobile phone
- Audi MMI® Radio plus with ten speakers and SiriusXM Satellite Radio

**A7 Standard Feature Highlights**

**A7 Premium Plus**
- 19” 10-spoke design alloy wheels with all-season tires
- Audi MMI® Navigation plus with voice control system and Audi MMI® touch
- Audi connect and Google Earth™ with 3D satellite maps, Google™ Local Search, news feed, and Wi-Fi hotspot
- 7” color driver information system
- HD Radio™ technology
- SiriusXM Traffic
- Parking system with front and rear sensors

Design something no one has ever seen before. And make it an ultrastylish, high-performance luxury vehicle so bold it wants to transform the world around it. We’re now in the rarified air of the Audi A7, a five-door luxury performance coupe that’s a beacon of unconventional thinking. It gives power a lot of style. It gives design some serious technology. And it gives people something to think about when they think they have seen it all.
The Audi TT is a sports car designed to accelerate and elevate. Start with the impressive engineering, inspired design and gripping performance of the TT. Raise the game with advanced driving dynamics and powerfully efficient Audi TFSI® engines in the TTs. Reach the pinnacle with the finely tuned 360-hp TT RS. Coupe or Roadster, with Audi quattro® and A8® aluminum space frame standard throughout the line, Audi builds on the belief that this is the car for drivers who enjoy unrivaled design and true performance while they enjoy the view.

The Audi A8 represents the pinnacle of prestige. Exuding style and performance, it is luxury undaunted from traditional expectations. Which is why, along with Audi engineering and design expertise, the A8 offers new technological possibilities, to better connect the driver to the drive while others seem to stand still. It is comfort, innovation and power wrapped in an indescribable package of progressive luxury.
A8

A8 Standard Feature Highlights

- 4.0 TFSI® aluminum space frame
- A8 quattro® all-wheel drive with self-sealing tires
- Audi advanced key
- Front and rear seatback cushions with LED daytime running light technology
- Audi MMI® Navigation plus with voice control system and Audi MMI® touch
- Audi MMI® Advanced plus with 12.3” touchscreen
- Adaptive cruise control
- Audi adaptive air suspension
- 19” 10-Y-spoke design alloy wheels with all-season tires
- ASF® aluminum space frame
- A8

A8 L

A8 L Standard Feature Highlights

- 4.0 TFSI® aluminum space frame
- A8 quattro® all-wheel drive with self-sealing tires
- Audi advanced key
- Front and rear seatback cushions with LED daytime running light technology
- Audi MMI® Navigation plus with voice control system and Audi MMI® touch
- Audi MMI® Advanced plus with 12.3” touchscreen

Always obey local speed and traffic laws. See back cover for important information about summer performance tires, required infotainment subscriptions, Audi MMI® Navigation plus, and distracted driving. Limited availability.

R8 4.2
- 4.2-liter 430-hp V8 with Audi FSI®
- Audi quattro® all-wheel drive
- 19" 5-arm double-spoke design forged alloy wheels with summer performance tires
- Audi magnetic ride
- Xenon plus headlights with LED daytime running light technology
- Three-spoke multifunction, magnesium, flat-bottom, sport steering wheel (with shift paddles on models with Audi R tronic® six-speed sequential transmission)
- Leather/Alcantara® seating surfaces
- Ten-way power front sport seats (includes four-way lumbar adjustment)
- LED interior lighting technology
- Concert radio with seven speakers and SiriusXM Satellite Radio
- BLUETOOTH® wireless technology preparation for mobile phone with safety-belt microphone
- HomeLink® remote transmitter

R8 5.2
- 5.2-liter 525-hp V10 with Audi FSI®
- Carbon fiber Sigma engine compartment inlays (Coupe only)
- Audi quattro® all-wheel drive
- 19" 10-spoke-Y design forged alloy wheels with summer performance tires
- Audi magnetic ride
- Full LED headlight technology
- Audi MMI® Navigation plus and six-disc CD changer
- Bang & Olufsen® Sound System with twelve speakers

R8 GT
- 5.2-liter 560-hp V10 with Audi FSI®
- Audi quattro® all-wheel drive and Audi R tronic® six-speed sequential transmission
- 19" 5-twin-spoke-Y design alloy wheels with titanium finish and summer performance tires
- R8 GT sport suspension calibration
- R8 GT front and rear bumpers
- R8 GT Audi sideblades in carbon fiber matte
- R8 GT side mirrors in carbon fiber matte

R8 GT Standard Feature Highlights
- R8 GT fixed rear wing in carbon fiber matte
- R8 GT carbon fiber rear spoiler
- R8 GT front and rear bumpers
- R8 GT Audi sideblades in carbon fiber matte
- R8 GT three-spoke multifunction, magnesium, flat-bottom, sport steering wheel with shift paddles
- R8 GT aluminum gear knob with vehicle production number
- R8 GT leather/Alcantara® seating surfaces
- Ten-way power front sport seats (includes four-way lumbar adjustment)
- R8 GT carbon fiber rear spoiler
- Audi MMI® Navigation plus
- R8 GT side mirrors in carbon fiber matte

The blur. Yeah, that blur with the sharp yet fluid profile you noticed out of the corner of your eye as it blasted past you in milliseconds. Not Italian, you know that. No, this is something else. Muscular. Resonant. Stylish. The Audi R8. A supercar, yes, but it’s not unapproachable, if you can find one in captivity. When still, it’s an eye-catching, design-forward sculpture. When unleashed, its 430-hp V8 or 525-hp V10 makes hearts beat harder with just a single rev. But it’s the blur on the road that will make the most lasting impression.1

It may seem like you can’t have the Audi R8 GT. You might want to try and control the stunning 560 hp and 398 lb-ft of torque its modified V10 naturally aspirated 5.2-liter direct-injection engine delivers to your adrenal glands. But it is elusive. Can you handle its carbon fiber matte fixed rear wing? Its optional Audi carbon ceramic brakes? Its total expression of Audi engineering and performance design? It’s up to you. That is, it’s up to you if you take advantage of the ultimate opportunity: being someone who will buy one of the 333 being produced globally.3

---

A design detail, captured in miniature, can define the character of a piece. So that’s one way to think of the Audi Q7: a collection of stylish details that add up to one impressively large canvas. Maybe you’ll fall in love with the grain of the burled wood, the room that seats seven, or the touch of the leather seating surfaces. Or maybe you want to look at the available TDI® clean diesel model that can achieve a combined 22 mpg. Whatever is in the details, you are looking at the Q7 for the room, style and stature of a premium SUV that takes performance as seriously as its sizable comforts.

---
