### BMW 535i Gran Turismo

STYLe. SPACE. SURPRISING VERSATILITY.

INTRODUCING THE 5 SERIES GRAN TURISMO.
As the first vehicle of its kind, the 5 Series Gran Turismo has its share of expectations to fulfill. A classic coupe roofline and dynamic front end both reveal its sporty personality—an attitude enhanced by the aggressive stance and large wheels. Yet unlike a sports car, the 5 Series Gran Turismo displays an impressive, elongated silhouette more in keeping with the finest luxury sedans. Then there is the extensive interior space and dual-access tailgate for improved storage capabilities and ease of loading. As a result, the exterior borrows from all three categories—coupe, sedan, SUV®—yet still defies classification. All of which make the 5 Series Gran Turismo the type of vehicle BMW has always created: an industry leader.
The measure of any BMW is its ability to inspire joy — not only for drivers but for passengers, as well. In this respect, the 5 Series Gran Turismo excels. With an elongated platform that hearkens to BMW’s most luxurious, class-leading sedans, you’ll find no shortage of legroom throughout the cabin. Likewise, headroom is generous, the comfort amplified by the two-piece Panoramic moonroof that opens up to offer an invigorating dose of fresh air and sunlight while driving. And for maximum traveling flexibility, multiple rear-seat folding and sliding combinations give you new levels of convenience when it comes to both passengers and cargo.
Exterior

The exterior of the 5 Series Gran Turismo is an outstanding interpretation of BMW styling, from its muscular contours to the freely interpreted L-shape rear taillight clusters. The phrase “gran turismo” denotes a high-performance vehicle with far more interior space than a pure-bred sports car. Adhering to this concept, the 5 Series Gran Turismo balances its impressive performance with an emphasis on passenger comfort — especially luxurious appointments, roominess and flexibility of space. When you enter the cabin, you encounter a world of choice leather upholstery, exquisite trims and the plentiful natural light of a Panoramic moonroof as well as large-frameless rear windows — a BMW design first.

AN OPEN INVITATION TO ESCAPE MEDIOCRITY.
The raised seating position makes for easy entry and exit. It also noticeably improves visibility, giving you an enhanced feeling of driving confidence.

A clear outward view is key to any BMW vehicle—and the 6 Series Gran Turismo offers one of the most stunning perspectives around. A “semi-command” seating position is a great way to start: slightly elevated, supported by power Multi-contour front seats, and surrounded by a wealth of elegant leather. All instrumentation is gently tilted towards you; touch the Start button, and the Black Panel technology on the dashboard awakens, illuminating driving data at just the right eye level. Also within easy view is BMW’s Drive and Navigation system display. A host of entertainment, communication and navigation menus can all be easily seen on the 10.25” Driver monitor screen. You can also add Head-up Display to your view—a feature that projects your speed and other information discreetly onto the windshield.

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”
With rear seats all the way back, passengers enjoy the generous legroom typical of BMW’s long-wheelbase luxury sedans, along with a 59 cu. ft. cargo capacity. The seats can also be moved forward by 3.9”, increasing cargo compartment volume to almost 71 cu. ft.

A world away from conventional rear-seat passenger space, the 5 Series Gran Turismo rear cabin brings unparalleled luxury to a place where it’s rarely seen. Split-folding rear seats fit three adults, or can be folded for a flexible combination of passengers and cargo. The backrests can recline as much as 41 degrees, and the already copious amount of legroom is further boosted by up to 3.9” of fore-to-aft adjustment. The Rear-seat entertainment features into passengers enjoy separate movies or games on two high-resolution screens built into the front-seat backrests. When you opt for the Luxury Rear Seating Package with two individual rear Comfort seats, ventilation and heating, your passengers will find a level of seating support and adjustment on par with the front seats. The center console extends from the front cabin through to the rear, offering rear passengers an armrest, storage space and cupholders; four-zone climate control allows specific, customizable levels of temperature settings. A removable partition separates the cargo area from the rear cabin, helping to keep out road noise; when opening the rear trunk lid, it helps protect rear passengers from outside wind, heat and cold. And when it’s time for increased cargo-carrying capacity, the rear seats can be folded down individually at the touch of a button, to create 60 cu. ft. of space.

Individual comfort seats are available in the rear. Adjustable in a myriad of different ways, these seats provide an even more relaxing ride for rear passengers – the backrests can even be reclined as much as 41 degrees. Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”

SECOND ROW. FIRST CLASS.

Rear seats can be individually folded all the way down at the touch of a button. With both seats folded, cargo capacity grows to a generous 60 cu. ft.

A separate partition wall behind the seats insulates passengers from the cargo compartment and any outside noise, cold or heat when the trunk lid is opened. When the partition wall is unlocked, its position readjusts to align with the position of the rear seats.

Tailor the configuration to suit your cargo- and passenger-carrying needs. Individual Comfort seats can be electrically controlled; the partition wall, backrests and seats themselves can be separately adjusted.
FLIGHTS OF FANCY ARE NO LONGER RESTRICTED TO THE SKIES.
MAKE EVERY DRIVE FEEL LIKE THE BEST TIME OF THE YEAR.

Take to the road like never before, with two dynamic engine-and-transmission combinations. Under the hood of the 550i and 550i xDrive Gran Turismo is our 4.4-liter, 400-hp TwinPower Turbo V-8 engine, with High Precision direct fuel injection technology. This impressive powerhouse sends you rocketing from 0-60 in just 5.4 exhilarating seconds. Or get behind the wheel of the 535i or 535i xDrive Gran Turismo and experience BMW’s TwinPower Turbo inline-six-cylinder engine, with 300 hp and 300 lb-ft of torque at the ready. In all models, an innovative 8-speed STEPTRONIC automatic transmission harnesses this power with more than 90 percent efficiency in all eight gears, for faster shifting and increased responsiveness.

BMW AG test results. 550i Gran Turismo: 0-60 in 4.5 seconds. BMW urges you to obey all posted speed laws and always wear safety belts.

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”
GOOD THINGS COME IN GROUNDBREAKING PACKAGES.

Judging by the 5 Series Gran Turismo’s stunning exterior, you’d expect nothing less than BMW’s most advanced engineering. One of our latest technologies to be found on board is Brake Energy Regeneration. To save energy and reduce fuel consumption, an electronically controlled clutch engages and disengages the alternator, allowing it to charge the battery only when the vehicle is decelerating or braking. Otherwise, it freewheels, drawing virtually no power from the engine. Other advances include a self-leveling rear suspension that automatically detects changes in ride height at the rear, and uses an electrically powered air compressor to rebalance the vehicle. And a multi-link front suspension keeps the handling light and sporty, letting you tackle each joyful mile with precision and grace.
THE 5 SERIES GRAN TURISMO PROVIDES CLOSURE TO THE SPACE-VERSUS-SPORTINESS DEBATE.
As a driver, your needs vary from day to day—especially when it comes to hauling varying amounts of passengers and cargo. You need to be ready for whatever the day brings. The 5 Series Gran Turismo was designed to accommodate both, with an innovative dual-access tailgate. In the trunk lid mode, access to the available trunk area is simplified at the touch of a button, while a rear partition keeps rear-seat passengers separated from any items in the trunk.

With maximum legroom and locked partition wall, the BMW 5 Series Grand Turismo has a storage capacity of 15.5 cu. ft. When the rear seats are moved forward and the partition wall is unlocked, the capacity increases to 20.8 cu. ft.
The striking contours of the BMW 5 Series Gran Turismo are equalled only by its impressive capacity. Under its elegant, slanted silhouette is a versatile interior space with variably adjustable rear seats and backrests, a movable partition wall between the luggage compartment and rear seats, and numerous fastening and storage options. When it's time to use the 5 Series Gran Turismo for its maximum hauling capacity, you're just the press of a button away: the dual-access tailgate opens up to the rear cargo area, which provides additional room when the rear seats are folded down. You can vary which seats fold, along with the partition; numerous fastening options make it easy to tuck away any object. The rear cargo area functions as both a trunk and a tailgate, addressing all your needs perfectly.

Never compromise on comfort—even with three passengers on board. Both the rear backrests and the partition wall can be folded forward in a 40:20:40 split.

Fold down the rear backrests to achieve a maximum storage area of 610 cu. ft.
PASSION CREATES ITS OWN ENERGY. WITH BRAKE ENERGY REGENERATION, SO DOES THE 5 SERIES GRAN TURISMO.
DISCOVER AN AUTOMOBILE THAT’S DRIVEN BY IDEAS AND INNOVATIONS.

An innovative class of vehicle created from seemingly disparate objectives, BMW’s 5 Series Gran Turismo does what few other vehicles can do. From under the hood to beneath the tailgate, it delivers many of BMW’s most inspired technologies. Yet with all its exciting features, every part of this vehicle is a product of the BMW EfficientDynamics philosophy. The idea is simple: combine maximum output with maximum efficiency. It’s respect for the driver—and responsibility to the environment. BMW’s execution of this concept has led to major advancements throughout the automotive industry. It’s the pursuit of this idea that serves as the catalyst for every vehicle we make. It’s how we fuel our passion. And yours.
BMW EFFICIENT DYNAMICS: VEHICLES THAT REQUIRE LITTLE AND GIVE A LOT.

BMW was one of the first automotive manufacturers to pursue efficient driving technologies – one part of our award-winning sustainability strategy. Our commitment to EfficientDynamics means we are continuously developing innovative systems that bring us closer to our long-term goal of emissions-free mobility. However, we remain equally committed to driving pleasure, which is being pursued in different ways. First, there is the continuous optimization of conventional diesel- and gasoline-powered models. Second, BMW hybrid vehicles are already on the road. Third, the first 100% electrically powered BMW – the BMW i3 – is being distributed in a field trial to customers. And fourth, the fleet of BMW Hydrogen 7 vehicles impressively demonstrated the potential for combining hydrogen drive with a combustion engine.

Since 1985 BMW has been able to reduce the CO₂ emissions of its entire fleet by approximately 20 percent. BMW has rolled out more than two million vehicles equipped with EfficientDynamics: 31 models already produce less than 150g of CO₂ per kilometer. And BMW intends to achieve a further 25 percent reduction by 2020. BMW EfficientDynamics represents the most comprehensive package of innovative technologies currently in production, for reducing fuel consumption and emissions while simultaneously creating the Ultimate Driving Machine.

Different paths to the same destinations: unmistakable BMW driving pleasure.

In early 2010 BMW launched its first production models with hybrid drive: the BMW ActiveHybrid 5 and the BMW ActiveHybrid X6. Both models offer an unparalleled combination of increased fuel efficiency, reduced emissions and thrilling performance. The BMW ActiveHybrid 5, with its innovative 184 kW/249 hp electric motor, is available with a variety of drive combinations. It will introduce a whole new form of dynamic performance, paving the way for the future of emissions-free mobility. Initially, a completely new vehicle concept targeted at meeting the need for sustainable mobility in fast-growing metropolitan areas will soon become reality: the BMW i3.

High Precision Injection

Turbocharging is traditionally known for boosting power at the expense of fuel efficiency. BMW TwinPower Turbo engines with piezo-direct fuel injection, however, inject gasoline at high pressure and with extreme precision into each cylinder. And, thanks to BMW’s fast and flexible electronic control system, both the timing and quantity of the fuel injections can be precisely adjusted to driving conditions. As a result, BMW vehicles achieve excellent fuel efficiency.

The BMW 5 SERIES GRAN TURISMO’S EFFICIENT DYNAMICS INITIATIVE AT A GLANCE.

BMW Vision EfficientDynamics: Vision becomes reality. By 2014 BMW plans to roll out the BMW Vision EfficientDynamics (motto: –30% improvement in fuel consumption) – breaking new ground in the quest to generate more power with less fuel. In the new NuS2W9V Series Gran Turismo engines, a compact combustion chamber, generated by a sophisticated piezo actuator, allows the direct-injection fuel injection system to achieve the potential of a new breed of high-performance engines.

The particularly smooth gear shifts of the new NuS2W9V-speed automatic transmission produce greater stability, quieter operation and greater fuel efficiency. A BMW’s integrated front spoilers reduce the amount of air flowing underneath, minimizing front-end lift. This allows a BMW to hug the road at higher speeds for excellent stability.

Drake Energy Regeneration

To supply a battery with electrical energy, the generator (alternator) usually need engine power, which requires fuel. With Brake Energy Regeneration, the generator produces electricity when the driver brakes or takes a foot off the accelerator. Previously unharnessed, kinetic energy is transformed into electrical energy then fed into the battery, generating electricity without using fuel.

Lightweight construction

Our engineers use lightweight aluminium throughout our vehicles – in the doors, for example, or for the suspension. BMW inline-six-cylinder and in-line TwinPower Turbo engines are all-aluminium. Taken together, these weight savings lead to lower fuel consumption and better axle load distribution for more agility – especially in curves.

BmwVisionEfficientDynamics.com
Both the BMW TwinPower Turbo inline six-cylinder and V-8 engine (shown) are harnessed to an 8-speed STEPTRONIC automatic transmission, for astonishingly smooth and rapid acceleration.

BMW EfficientDynamics
Less emissions. More driving pleasure.

High performance is the product of higher standards.

At BMW, just as there's no such thing as striving for second place, there's also no room for less-than-inspiring power. Take, for example, the powerplant under the hood of the 550i and 550i xDrive Gran Turismo. Designed for reliably smooth and quick acceleration, this TwinPower Turbo V-8 serves up 450 hp of pure exhilaration, with a wide powerband and truly inspiring top speed. The 550 ft-lb of maximum torque is available over an extremely broad range – from 1700 to 4500 rpm. With a standstill to 60 time of 4.7 seconds, it's just the kind of track-inspired muscle that built BMW's formidable reputation.

No less impressive is the 350-hp inline six-cylinder TwinPower Turbo engine in the 528i and 528i xDrive Gran Turismo. With 300 ft-lb of torque that kicks in at just 1300 rpm, hit the throttle and in just 6.7 seconds you're sailing past 60 mph. Yet, like the V-8 engine in the 550i and 550i xDrive Gran Turismo, it's also one of the most fuel-efficient turbocharged powerplants available.

What makes these engines so revolutionary is BMW's EfficientDynamics mandate. For all its daunting power, BMW's TwinPower Turbo V-8 is incredibly fuel efficient, owing to its unique turbocharger construction and placement. Another contributing factor: the High Precision direct injection regulates fuel usage so precisely that it actually lowers the vehicle's emissions by up to 20 percent, meeting U.S. Ultra Low Emission Vehicle (ULEV) limits.

Both engines are paired with a groundbreaking 8-speed STEPTRONIC automatic transmission. Smooth-shifting and sporty, this transmission features taller cruising gears and a unique gear arrangement for an unusually high efficiency of 95 percent in all eight gears. A faster shift time also improves fuel efficiency – that's BMW's EfficientDynamics in action.

The TwinPower Turbo V-8 engine in the 550i and 550i xDrive Gran Turismo develops breathtaking torque early on, and a power curve that grows all the way to 6400 rpm. Along with smooth and quiet running in any rev range, it delivers total comfort and control.

Both the BMW TwinPower Turbo inline six-cylinder and V-8 engine (shown) are harnessed to an 8-speed STEPTRONIC automatic transmission, for astonishingly smooth and rapid acceleration.

When you drive, xDrive is constantly assessing data provided by the vehicle sensors, such as wheel rotation speed, steering angle, yaw rate and engine torque. So the system always knows what to intervene and can instantly adjust the distribution of drive power between the front and rear axle to best suit the current driving situation.

BMW’s xDrive Intelligent All-Wheel Drive Helps You Stay in Confident Control.

Sudden showers, roads covered in wet leaves or snow – conditions that usually make driving difficult are easily overcome by 5 Series Gran Turismo models with xDrive intelligent all-wheel drive. This system combines the athletic handling of the 5 Series Gran Turismo with the benefits of lightweight front-wheel-drive system. The result: more impressive traction and road-holding capabilities, even in inclement weather or on challenging road surfaces. BMW’s xDrive intelligent all-wheel drive constantly evaluates the vehicle’s electronic data, such as wheel rotation speed, steering angle, yaw rate and engine torque, to determine whether the vehicle is accurately reproducing the directions provided by the steering wheel, or whether it is leaning to oversteer or understeer. Based on the data, xDrive seamlessly divides drive power between the front and rear axles. When cornering, if the front wheels slide towards the outside, xDrive seamlessly divides drive power to the rear wheels in the blink of an eye, thus preventing understeering before it even happens. You can enjoy the dynamic performance of the BMW 5 Series Gran Turismo to the fullest, in any situation.

Designed to Deliver One Overriding Sensation: Driving Pleasure.

When BMW engineers designing the suspension and steering systems of any new vehicle, they pursue two seemingly contradictory goals: the driver must be able to feel a direct contact with the road, while passengers are buffered from rough road surfaces. It’s this delicate balance that produces the unparalleled BMW driving feel, and why we use proven design concepts, such as rear-wheel drive and near-perfect 50/50 weight distribution. The advanced suspension technology in the 5 Series Gran Turismo adds to both its exceptional level of ride comfort and its uniquely agile handling for a luxury vehicle. In front, multi-link, double-pivot spring-strut technology reduces damaging longitudinal and lateral forces, while simultaneously increasing directional stability and agility. DDC, on the other hand, instantly adjusts shock absorbers from the softest to the firmest settings. The result is exceptional road comfort and fluid handling at all times – during changes in vehicle speed, load or road and driving conditions.

Integral Active Steering. With Integral Active Steering, at speeds up to 35 mph, a small turn of the steering wheel yields a greater turn of the front wheels for more direct responses. It also steers the rear wheels up to three degrees in the opposite direction, giving the effect of a shortened wheelbase for enhanced maneuverability. When changing lanes at speeds over 35 mph, both front and rear wheels turn in the same direction, giving the feel of an extended wheelbase. While you experience greater responsiveness and directional stability, your passengers enjoy greater ride comfort from reduced body roll.

Adaptive Drive. Adaptive Drive combines performance-elevating Active Roll Stabilization (ARS) and ride-enhancing Dynamic Chassis Control (DCC). The vehicle’s body tends to roll in corners, affecting handling. ARS’ twin-spring two-piece- and roll bar to generate stronger resistance to body roll, keeping the vehicle more level and providing maximum stability and agility. DCC, on the other hand, instantly adjusts shock absorbers from the softest to the firmest settings. The result is exceptional ride comfort and fluid handling at all times – during changes in vehicle speed, load or road and driving conditions.

Driving Dynamics Control. Given the 5 Series Gran Turismo’s handling and performance attitude adjustment at the push of a button on the console. Choose from four settings, comfort, sport, sport+ and smart+, to adjust engine-throttle response, transmission shifts characteristics and power steering assist. Intradition, the traction control feature can be disengaged when driving on sand, gravel, or deep packed snow.
Confidence is an integral ingredient in driving enjoyment. That's why BMW offers an impressive array of driving aids designed to keep you informed without distracting you from the job at hand. Active Cruise Control with Stop & Go uses radar measurements to automatically maintain a preset speed and distance between your vehicle and the one ahead – even in heavy traffic; the Forward Collision Warning feature sounds an alert if you are approaching the vehicle in front too quickly. Lane Departure Warning uses a camera near the rear view mirror to monitor lane markings. If you begin to change lanes without first using the turn signal – a possible indicator of drowsiness – the steering wheel discreetly vibrates as a reminder. Active Blind Spot Detection uses radar sensors at the rear to monitor traffic in adjacent lanes, covering an area from your blind spot rearward for nearly 200 feet. If you activate the turn signal when there is another vehicle in that lane, the LED blinks and the steering wheel vibrates as a warning not to change your blind spot rearward for nearly 200 feet. If you activate the turn signal when there is another vehicle in that lane, the LED blinks and the steering wheel vibrates as a warning not to change the lane. Head-up Display is designed to project important driving information – speed, Check Control warnings, directional arrows from the Navigation system, and cruise control information – onto the windshield in your line of sight.

In case of an accident, the 5 Series Gran Turismo is equipped with a comprehensive passive safety system. First and foremost is the passenger cell: a highly rigid hybrid construction of high-strength steel and aluminum. In a high-speed collision, it is designed to direct forces around the passenger cabin, while deforming in a predetermined pattern. In the event of a rear-end collision, a sophisticated network of sensors around the vehicle determines the type of accident, and is designed to trigger the appropriate safety features(s). These may include seat-belt pretensioners, front-seat Active Head Restraints, dual-stage front airbags, seat-mounted side-impact airbags, and curtain-type, front-to-rear Head Protection System.

BMW Night Vision with Pedestrian Detection uses an infrared camera in the front bumper to scan up to 200 feet ahead. It has increased margin of safety at night. An infrared camera in the front bumper scans up to 200 feet ahead. It has increased margin of safety at night. An infrared camera in the front bumper scans up to 200 feet ahead. It has increased margin of safety at night. An infrared camera in the front bumper scans up to 200 feet ahead. It has increased margin of safety at night. During tests, Night Vision worked in a variety of conditions, whether rainy, foggy, snowy, or through the use of a narrow tunnel. The system functions best in conditions of low light and minimal artificial light, such as in a garage or in the woods after sunset or before dawn. BMW Night Vision with Pedestrian Detection uses a camera near the rear-view mirror to monitor traffic in adjacent lanes, covering an area from your blind spot rearward for nearly 200 feet. If you activate the turn signal when there is another vehicle in that lane, the LED blinks and the steering wheel vibrates as a warning not to change your blind spot rearward for nearly 200 feet.
Whether you’re far from home or just in the next town, BMW Assist™ offers convenience and peace of mind. There are new ConnectedDrive features that extend BMW’s leadership in wireless communications. Marvel at an extensive array of new Mobile Office functions. Get a visual image of your callers. With BMW Assist, you enjoy all this – and more.

BMW Assist gives you peace of mind knowing that a friendly response specialist is there to help you 24/7, at the touch of a button. The Safety Plan includes Automatic Collision Notification, Emergency Request (DSS), TeleService, Enhanced Roadside Assistance, Door Unlock, Stolen Vehicle Recovery, Customer Relations and MyFacts. The Convenience Plan adds personalized Directions, Traffic and Weather reports, BMW Online and Concierge services for restaurant and hotel recommendations, with the destination address and phone number sent to your BMW. Make up to four operation-assisted calls per year with Critical Calling if your mobile phone is not available or its battery is discharged.

Use the time you spend in your vehicle even more effectively with BMW’s Mobile Office feature. For example, when your vehicle is paired with a selected Bluetooth® interface, text messages and emails are transferred to your Drive Display screen – and your system even reads them aloud to you. Thanks to Bluetooth audio streaming, you can enjoy wireless playback of your music files; your personal audio library can even be accessed via the iDrive Controller.

What's on today's agenda? Bring up the Calendar and To-Do List on your Display screen while on route, to help you stay on schedule. Need to call your Ti (c)lock appointment? Use the Drive Controller knob to dial on the phone number in the Calendar – and it's ringing. Meeting with several people? Conduct conference calls; the Drive Display screen keeps you informed of the status of incoming calls. Who's calling you? If you've uploaded photos to your onboard phonebook, you’ll see the caller’s picture. Even missed calls are listed on the Display screen. It's never been easier to stay in touch while in transit.

Enhanced functions for the iPod® and USB adapter add to the ease and pleasure of using your iPod or iPhone®. Want to know which CD that song comes from? The album cover is shown on your Display screen. Can’t purchase additional cables for your iPod or iPhone’s original USB cable connects to your BMW USB port. Another rare feature: with BMW Assist and BMW Online you can wirelessly play music through the BMW audio system from any Bluetooth compatible iPod or iPhone's original USB cable connects to your BMW’s USB port. Another rare feature: with BMW Assist and BMW Online you can wirelessly play music through the BMW audio system from any Bluetooth compatible iPod or iPhone’s original USB cable connects to your BMW’s USB port. Another rare feature: with BMW Assist and BMW Online you can wirelessly play music through the BMW audio system from any Bluetooth compatible iPod or iPhone’s original USB cable connects to your BMW’s USB port. Another rare feature: with BMW Assist and BMW Online you can wirelessly play music through the BMW audio system from any Bluetooth compatible iPod or iPhone’s original USB cable connects to your BMW’s USB port.

For the latest information on exterior paint colors, interior trim and upholstery materials, please visit bmwusa.com/byo.
The mysterious glint of Black Sapphire Metallic paint creates a striking backdrop for gleaming Double Spoke (Style 311) light alloy wheels. Open the doors to reveal a sumptuous interior filled with rich Cinnamon Brown Dakota Leather upholstery, harmoniously set against Ash Grain Wood trim.

DARK, RICH ELEGANCE.

Shown in elegant Orion Silver Metallic, the 550i Gran Turismo is set off by the Y-Spoke (Style 311) light alloy wheels that are included in the Sport Package. The interior is bathed in the beauty of Ivory White Dakota Leather and dramatic Ash Grain Wood trim.

DRAMATIC ATHLETICISM.
High-intensity, retractable headlight washers help keep headlights clean of dirt, salt and other coatings for maximum road illumination and enhanced driving safety.

Panoramic moonroof features extra large side glass panels in both the rear and front section in, whether it is open or closed. Easy-to-use features include a power slide and tilt function, a comfort opening/sliding function, a rain sensor deflector to help keep the wind out, and a power sunshade to shield passengers from excessive glare and heat.

Star Spoke (Style 271) 18 x 8.0 light alloy wheels with 245/50 run-flat® all-season tires.

Double Spoke (Style 234) 19 x 8.0 light alloy wheels with 245/40 run-flat® all-season tires.

V Spoke (Style 302) 19 x 8.5 light alloy wheels with 245/45 run-flat® all-season tires.

V Spoke (Style 302) 19 x 8.5 light alloy wheels with 245/45 run-flat® performance tires.

V Spoke (Style 302) 19 x 8.5 light alloy wheels with 245/45 run-flat® all-season tires. (Included in 535i Drive Gran Turismo M Sport Package.)

Double Spoke (Style 311) 20 x 8.5 light alloy wheels with 245/40 run-flat® all-season tires.

Double Spoke (Style 311) with 20 x 8.5 run-flat® all-season tires. (Included in 535i xDrive Gran Turismo M Sport Package.)

Please note: Driving over rough or damaged road surfaces, especially if your vehicle is equipped with low-profile tires. Be careful to avoid road hazards and reduce your speed, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Run-flat tires do not come equipped with a spare tire and may be particularly susceptible to damage.

For full technical information on BMW standard and optional features, packages and technical specifications, visit bmwusa.com, select your BMW model of choice, and click on “Features & Specs.”
A standard | Optional equipment
BMW Apps, an optional feature of the BMW ConnectedDrive interface, allows an iPhone® iOS 4.x to play apps specially modified for BMW and BMW approved third-party apps.

Smartphone integration, which provides connectivity for iPhone and similar devices, is included with BMW Apps. This allows access to stored music, call improve signal reception, and recharge the battery. (See your authorized BMW center for phone models compatible with this feature.)

Control Display shows the functions of the Drive Controller, vehicle settings and radio, as well as the Navigation system. The glare-free, high-resolution color monitor is located next to the instrument cluster, at an ideal viewing height and distance.

iPod® and USB adapter lets you scroll through and select the music you want by using the vehicle’s radio controls, the multifunction steering wheel buttons, or Drive Controller. Music titles are displayed on the radio or Control Display.

Hi-fidelity 12-speaker sound system features two subwoofers under the front seats and digital seven-channel amplifier with 205 watts of power.

Premium-high-fidelity 16-speaker sound system includes Digital Sound Processing (DSP), two subwoofers under the front seats, and digital nine-channel amplifier with 600 watts of power.

Heated front seats are a welcome feature in colder weather. With the touch of a button, the driver and front passenger can individually select from three heat settings.

Rear-seat entertainment includes two 46- adjustable, independently-operated 10.2” color screens integrated into the back of the front seats. The system includes a remote Controller and headphone jacks.

23-way power Multi-contour seats for the driver and front passenger provide optimum lateral support while remaining exceptionally comfortable when driving over long distances. In addition to Active Head Restraints, the seats offer individual power adjustment for headrest and seat bottom angle; fore-and-aft and upright positions; thigh, upper back and lumbar support; and adjustable side.

16-way power front seats offer driver and front passenger individual power adjustments for headrest, backrest and seat bottom angle; fore-and-aft and upright position. Power seat also includes seat and exterior mirror memory settings for two drivers.

10-way power front seats offer driver and passenger individual power adjustments for headrest, backrest and seat bottom angle; fore-and-aft and upright position. Power seat also includes seat and exterior mirror memory settings for two drivers.

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”
Rear Comfort seats offer power-adjustable bolsters for two rear-seat passengers. Passengers tailor their comfort with individually adjustable backrests that can be angled from 15 to 40 degrees. Or use the power feature to easily fold seats forward for additional cargo space. Move the seats back to increase the already ample legroom by 3.9". Headrests can also be adjusted up or down. A center console adds the convenience of cupholders and a storage compartment.

Rear seats are designed to support three adults in comfort. Created with a 35-20-40 split, each backrest can recline from 15 to 30 degrees, or fold forward individually to accommodate various amounts of cargo and passengers. Stretch out even more legroom by moving the seats 3.9" rearward – or expand the cargo space by moving them forward. The choice is yours.

Power rear-seat backrests can be individually adjusted with ease. Seat ventilation ensures increased comfort while traveling in summer. Air is gently blown through the micro-perforations in the leather seats to keep passengers comfortably dry in warm weather.

Make a sporty statement with Star Spoke (Style NuSQR1NuSQR1NuSQR1NuSQR1NuSQR1NuSQR1NuSQR1) light alloy wheels.

Sunshades can be easily installed in the rear and rear-side windows, giving quick relief from sun glare and radiant heat.

Infrared stereo headphones, designed to integrate with the rear DVD system, add greater enjoyment – and a quieter interior.

Gear selector lever with an Ash Grain Wood decorative strip further enhances the elegant interior.

MAKE IT UNIQUELY YOURS – WITH ORIGINAL BMW ACCESSORIES.

Few things enhance the BMW driving experience like Original BMW Accessories. Beautifully designed and expertly crafted, they are created to fit perfectly and last as long as your BMW itself. Complement your vehicle’s looks with bold or elegant wheel designs. Enhance its performance with BMW-approved winter tires. Protect the carpeting and trunk with custom mats. Keep the exterior gleaming with specially formulated car care products. BMW’s vast array of products for both the exterior and interior will personalize the pleasures of ownership. For additional information, or to pick up a catalog, please visit your authorized BMW center or visit our website at accessories.bmwusa.com.

For detailed information on ordering Original BMW Accessories, please contact your authorized BMW center. Some details shown in photographs may not be available in the United States.

GOING BEYOND ENGINEERING: THE HIGH-PERFORMANCE BMW OWNERSHIP EXPERIENCE.

BMW Ultimate Service? A BMW, we believe that a premium ownership experience should feature performance and luxury, as well as safety and convenience. The BMW Ultimate Service helps you achieve the idea behind BMW Ultimate Service: a suite of services and products that will ensure your BMW to its potential, while enjoying peace of mind and cost-efficient ownership. That’s the all-new BMW Ultimate Service—a comprehensive package of owner privileges, services, and components that are included with every new vehicle. The BMW Ultimate Service includes:

- Increased reliability through state-of-the-art preventive maintenance
- Access to the team of specially trained BMW technicians, often working at the BMW Performance Center, where a Product Specialist will give you an in-depth introduction to your new BMW
- The BMW Performance Driving School is about control and pushing a BMW to its limits – the unique experience of driving your new BMW on BMW’s private road courses and race tracks
- BMW’s unique TeleService, included in the BMW Assist® Safety Plan, continually monitors your vehicle’s telematics components and sends off messages to your Display Drive (not available in all markets). This allows us to contact you about scheduled service or to call your service provider if you’re in an accident. The system also includes a Calendar and To-Do list, can call your phone number on the phone number in the Calendar to call your appointed service provider. For a list of travel itineraries, visit bmwusa.com/teleservice.

- The BMW Assist® Safety Plan, Myrights allows you to set up additional locations to receive your personalized BMW Assist TeleService alerts.

- BMW Access Convenience Service. You’ll enjoy extended access to personalized Destination, Travel, and Weather reports, as well as our Concierge services and24/7 roadside and phone number, such as a restaurant or hotel, right to your BMW. The new concierge will help you with travel plans, hotel, and restaurant reservations or find out where the nearest BMW Service location is. You can also call for assistance if your vehicle requires minor repairs or maintenance. BMW allows us to service your vehicle as quickly as possible and return you to your vehicle as quickly as possible.

- For more details on BMW Ultimate Service, visit bmwusa.com/ultimateservice.

BMW Virtual Center. If you get the urge to test drive or even buy a BMW, try the BMW Virtual Center. It’s open seven days a week, 24 hours a day. See our website for more details on BMW Virtual Service, call 1-800-723-6307, or visit bmwusa.com. You can even send the specifications to your authorized BMW center for a quote – or request a test drive online now.

BMW Financial Services. Arranging to buy a car or lease a car is easier than you think it may be. For your authorized BMW center offers leasing and financing to suit your personal needs through BMW Financial Services. BMW Financial Services offers a variety of leasing and financing plans to suit your needs, from short-term to long-term. You can also use BMW Assist Safety Plan subscription. Services are subject to the terms and conditions of your subscriber agreement. Please go to bmwusa.com. See your authorized BMW center for details on these limited warranties.

BMW Web: The BMW (BMW) World Wide Web. You can find out about BMW’s latest news and developments on the BMW Web – a personalized process that is a highly efficient channel. Example: Through the Web, you can also receive substantial e-mails that may not pay visits to the dealership. In this way, you can make use of the BMW’s features tool for customers! The BMW World Wide Web is open 24 hours a day, 7 days a week. For more details, visit bmwusa.com. To learn more about the BMW World Wide Web, call 1-800-723-6307 or visit bmwusa.com/worldwide-web.

BMW Performance Driving School. Take your driving skills to the next level. Behind the wheel of our new BMWs and under the expert guidance of professional driving instructors, you’ll experience dynamic driving at our world-class driving center. BMW Performance Driving School programs are available in a variety of formats, including: the CBS-collected data is automatically transmitted to your authorized BMW center, which you can rely on expert fit and long-lasting BMW quality.

BMW and the environment.

BMW is a strong proponent of the environment and social responsibility. We launched BMW EfficientDynamics back in 2000 – the philosophy of providing greater power with increased efficiency and fewer emissions. This has resulted in significant benefits today – for our customers, the climate and the environment.

That year, ecological sustainability was also declared one of BMW's core strategic principles; it is now firmly anchored in our entire production chain. It starts with the development of fuel-saving and alternative vehicle concepts, continues with environmentally friendly production processes, and ends with innovative recycling methods. This effort has been recognized worldwide; in 1999, BMW AG – the parent company of BMW of North America and BMW Manufacturing Co. in Spartanburg, SC – was the first automotive company to be represented on the Dow Jones Sustainability Group Index. It has remained on the Index ever since; moreover, for the last six years, BMW has been voted the world’s most sustainable automobile manufacturer. At BMW, we strive for and achieve high performance in all we do.
