**Editorial**

MUCH MORE THAN A SEDAN. NOTHING LESS THAN A BMW.

The BMW 5 Series Gran Turismo transforms traditional into modern. The name’s homage to classic Italian grand touring cars recalls those first cousins of high-performance sports cars – closed coupes that offered more room, comfort and refinement for making short work of long-distance drives. Since then, evolution in the Gran Turismo realm focused on increasing performance and front-seat comfort. It took until the BMW 5 Series Gran Turismo to make the next leap in GT design and capability.

The 5 Series Gran Turismo combines the elegance of a BMW Sedan with the performance and style of a Coupe and the versatility of a Sports Wagon. Up to five can share in the grand touring experience, with sumptuous accommodations further personalized with Luxury Line, Modern Line or M Sport, and cutting-edge infotainment.

The Coupe-inspired design gets a longer, lower look, with changes to the tailpipe design also adding to the generous trunk space. There’s growth under the long hood, too, where the 4.4-liter TwinPower Turbo V-8 in the 550i gets a boost to a staggering 440 horsepower. Both the V-8 and the 535i model’s 300-hp TwinPower Turbo six-cylinder come teamed to an 8-speed STEPTRONIC automatic transmission, and both models can be equipped with the innovative BMW xDrive intelligent all-wheel-drive system.

The BMW 5 Series Gran Turismo’s exhilarating handling will delight the driver through every curve. And it will delight all on-board with ride comfort well beyond that of “traditional” GTs. Credit goes to finely tuned suspension systems crafted largely from aluminum, along with available chassis technology exclusive to the segment, including Integral Active Steering, Active Roll Stabilization and Dynamic Damper Control.

Nor is there anything traditional about the connectivity and infotainment in both seating rows. In front, a new touchscreen Controller for the standard Drive4.2 Navigation system works like the personal technology you use every day. In the second row, an available DVD entertainment system will please passengers of all ages. BMW ConnectedDrive® caters to both business and personal needs with a suite of office apps and Internet-based services. And optional BMW Concierge Services can make travel arrangements and more, on the go. A vacation with the family, a ski trip with friends, impressive comfort for clients – life’s journeys are indeed grander when shared.
The concept is fresh, but the look of the 5 Series Gran Turismo remains unmistakably BMW. From the trademark kidney grille and taut bodylines to the famous Hofmeister kink defining the rear pillar, and LED taillights that create a distinctive nighttime signature, the 5 Series Gran Turismo leaves an unforgettable impression. It's an eye-catching design, yet elegant in its practicality.

RESHAPING THE LUXURY LANDSCAPE.
SPACE-EXPANDING VERSATILITY. TIME-COMPRRESSING DRIVE.

If a car can’t alter the laws of space and time, at least it can push them to their limits in superlative style. More compact than a full-size sedan and lower than an SUV, the BMW 5 Series Gran Turismo packages expansive cabin room and versatility to rival either. The roofline sweeps dramatically into the tailgate, yet preserves ample headroom for rear-seat passengers. BMW EfficientDynamics engineering, meanwhile, makes the 5 Series Gran Turismo a time-shrinking machine. The 550i xDrive can rocket from 0-60 in just 4.9 seconds; the 550i’s TwinPower Turbo inline six delivers 0-60 acceleration in 5.0 seconds with equally impressive efficiency.

BMW AG test results. Please see page 56 for detailed technical data.

BMW urges you to obey all posted speed laws and always wear safety belts.
The unique dual-access tailgate on the 5 Series Gran Turismo raises luggage handling to an art. With the rear seats in use, opening the lower lid below the rear window accesses the main trunk area, with a locking partition shielding passengers from the elements. The 40:20:40 split-folding rear seatbacks offer more flexibility than the more typical 60:40 split. And the rear seat can slide forward up to 28 inches to expand trunk space—and still leave more legroom than in most midsize sedans. With all rear seatbacks folded, open the full tailgate to load larger items into the cargo space.
Second-row passengers travel first-class in the 5 Series Gran Turismo. For a scenic view, they sit a bit higher than front-seat occupants. For a relaxing ride, they can stretch out with nearly 40 inches of legroom and recline the seatbacks by up to 33 degrees. Rear-seat passengers can set personal temperature preferences with the four-zone climate control, while power side-window shades shield them from sunlight and offer privacy. Add rear-seat entertainment with DVD players, dual 8-inch screens and wireless headphones, and then get accustomed to hearing, “Are we there already?”

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”
COMMANDING VIEW FOR A COMMAND PERFORMANCE.
A REVELATION IN GRAND TOURING EVOLUTION.
Wherever you go in your 5 Series Gran Turismo, your life goes with you. BMW ConnectedDrive® and Concierge Services remain at your service 24 hours a day. Use the Concierge to make travel arrangements, restaurant reservations and more. Paired with your compatible phone, BMW ConnectedDrive and its array of apps bring a world of entertainment and business services. Discover new music with TuneIn and Rhapsody®, customize your news with Stitcher™, or listen to a new book from audible.com. When you must take the office with you, view your calendar and save Navigation destinations from the car to the phone. Keep your hands on the wheel and never miss a beat by having text-to-speech read Facebook® and Twitter® feeds out loud.
WHEN THE DRIVE IS AS GRAND AS THE DESTINATION.
BMW ConnectedDrive

So connected, you’re free.

Every day, our world is becoming increasingly networked. Many BMW drivers, however, are better connected than the rest, obtaining information on the road, communicating by phone or email, and always being updated on the latest events. BMW ConnectedDrive encompasses all these services, including traffic features that allow BMW vehicles and their occupants to network with the outside world.

BMW ConnectedDrive services and apps provide versatile connections between the driver, vehicle and the outside world. BMW ConnectedDrive driver assistance systems enhance your convenience, active safety and peace of mind. BMW ConnectedDrive infotainment features make every mile even more enjoyable. And most all are easily accessed and controlled through the on-board iDrive system with touchpad Controller, literally putting the world at your fingertips.

For more information, please see: bmwusa.com/connecteddrive

BMW CONNECTED DRIVE®: CONVENIENCE, INFOTAINMENT AND SAFETY TECHNOLOGIES MEET IN ONE SUITE.

With BMW ConnectedDrive you stay in touch, no matter where you go. Its advanced communications and entertainment features create a network between driver, vehicle and environment, at any time and wherever you are. The following pages present special highlights in the areas of convenience, infotainment and safety. For a comprehensive overview, see bmwusa.com/connecteddrive.

BMW ASSIST eCALL™

Enjoy peace of mind knowing that a friendly response specialist is there to help you 24/7, at the touch of a button. BMW Assist eCall includes Automatic Collision Notification, Emergency Request (SOS button) and Customer Relations.

BMW TELESERVICE.

As you’re driving, the intelligent maintenance system, Condition Based Service, constantly monitors your vehicle’s service needs. BMW TeleService checks your vehicle’s operating fluids and wear items. When any need replacing, it automatically transmits this data and upcoming service needs to your preferred BMW center. Your BMW Service Advisor then contacts you to set up a convenient appointment, and orders parts beforehand, reducing your service and wait time.

BMW ONLINE.

BMW Online gives you a personalized internet portal, delivered on the Control Display. Get up-to-date fuel prices and gas station locations; the latest weather forecasts, advisories and warnings; Dow Jones, S&P and NASDAQ indices; and the powerful reach of the Google® database. Read or hear news headlines aloud via text-to-speech technology. “Send to Mail” pinpoints your current location and planned destination, and allows you to send the information to any email account. Split-screen functionality lets you use BMW Online in tandem with Navigation maps and instructions, entertainment details and other on-board content.

BMW TELESERVICE.

As you’re driving, the intelligent maintenance system, Condition Based Service, constantly monitors your vehicle’s service needs. BMW TeleService checks your vehicle’s operating fluids and wear items. When any need replacing, it automatically transmits this data and upcoming service needs to your preferred BMW center. Your BMW Service Advisor then contacts you to set up a convenient appointment, and orders parts beforehand, reducing your service and wait time.

BMW APPS.

Access Social Networks, on-demand music and location sharing through your iPhone® and see them on the Display screen. Tune in to Web radio and search for stations from around the globe by name, location or genre. You can also store your favorite stations, find similar stations, display station information, and change the quality of the audio. Your favorite entries are on your iPhone, so you can take them from one vehicle to another.

• Requires BMW Apps option and a compatible phone. Please note:
  • A broadband data link is required. The costs for this (e.g., data roaming) are regulated by the customer agreement with the mobile phone service provider.
  • Not all features available while vehicle is in motion; see dealer for details.
  • Web radio audio quality depends on the bit rate of the station, and data reception depends on your cell service. Data transfer comes over the mobile device.

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Spec.”

BMW ConnectedDrive

So connected, you’re free.
BMW CONNECTED DRIVE® SERVICES AND APPS: EVERYTHING YOU NEED, INTELLIGENTLY NETWORKED.

Want to find the quickest route around a traffic jam? Not a problem – if you have the BMW Navigation system with Advanced Real Time Traffic Information. Need to send a note to your client? Message Dictation lets you compose and send an email or text message while you concentrate on the road. Tired of driving a BMW isn't always the thrill of taking tight corners and accelerating onto a highway. There are the more mundane tasks of, say, finding a parking space, or exiting an indoor garage onto a busy street and avoiding pedestrians you cannot see. For those times, innovative BMW ConnectedDrive driver assistance features make every moment behind the wheel as effortless and enjoyable as possible.

REMOTE SERVICES.
You’re never far from your BMW when you have Remote Services. Locked out? Simply call the BMW Assist™ Response Center and provide your name and password, and they will unlock your driver-side door. If your BMW is stolen, file a police report, then call the BMW Assist Response Center; they will help the police locate your vehicle. (Check with your insurance company to see if this feature qualifies for a premium discount.) With the My BMW Remote app you can control your BMW from your smartphone. Lock your doors remotely; if you can’t find your BMW in a parking lot, your screen will pinpoint it on a map – and on some models, even flash its lights.

ADVANCED REAL TIME TRAFFIC INFORMATION (ARTTI).
This feature, included in the Driver 4.2 Navigation system for Model Year 2014, makes you aware of traffic congestion in most large cities before you encounter it. This feature displays and describes current local traffic information on your Control Display; in case of delays greater than five minutes, it suggests alternate routes. The latest-generation Navigation system offers numerous upgrades, such as presenting menus in virtual, 3-D spaces; adding functions in the split-screen Display; switching quickly from top view to perspective view; using superimposed layers for Advanced Real Time Traffic Information and weather icons; displaying points of interest, and more.

MOBILE OFFICE.
Use the time you spend in your vehicle even more effectively with BMW’s Mobile Office feature. For example, text messages and emails can be transferred from your Bluetooth® paired phone directly to the vehicle’s Mobile Office feature. For the complete list of compatible mobile phones and details regarding which Mobile Office functions are supported by each phone, please visit BMWUSA.com/bluetooth.

DYNAMIC BRAKE SUPPORT.
This feature, included in the Driver 4.2 Navigation system for Model Year 2014, helps you avoid potential dangers significantly earlier so you can react more quickly.

CONCIERGE SERVICES.
Whenever you travel, friendly Concierge Services representatives assist you with local restaurant and hotel recommendations, movie times and ticket information, flight arrival and departure gates and times, fuel prices and availability, and much more. You can also get the “Points of Interest” (POI) download, which allows the representative to send addresses and phone numbers to your vehicle. This information can also be transferred to your BMW Navigation system for route guidance. Then use your Bluetooth linked mobile phone to make a call.

MOBILE NIGHT VISION.
BMW NIGHT VISION WITH PEDESTRIAN DETECTION.
This feature can scan up to 900 feet ahead using an infrared camera in the front bumper. It can detect people, as well as the direction of their movement, up to approximately 300 feet away and displays their presence on the Driver screen and Head-up Display. The system gives a visual warning when pedestrians move toward the road, alerting you to potential dangers significantly earlier so you can react more quickly.

HEAD-UP DISPLAY.
The BMW Head-up Display uses a multi-color TFT to project the image toward the windshield more in your line of vision, so you can easily keep your eyes on the road while checking important travel information, such as your current speed, Check Control data and Navigation system directional arrows.

PARKING ASSISTANT.
This parking assistance system searches for suitable parking spots and then steers your vehicle into them. Simply press the “Park Assistant” button, then drive along potential parking spaces on either side of the road, staying below 22 mph and no more than five feet away. Using ultrasonic sensors integrated into the side indicators, the system searches for and measures parking spaces. When a space at least four feet longer than your vehicle is spotted, it is shown on your Control Display. Shift into reverse and Parking Assistant takes control of steering your vehicle into the selected space; you operate the accelerator and brake pedals. The acoustic and visual warnings of Park Distance Control provide assistance.

DRIVING ASSISTANCE FEATURES.
Numerous BMW ConnectedDrive features help enhance active safety. For example, when your vehicle crosses over lane markings without signaling, Lane Departure Warning, a component of Active Driving Assistant, warns you by sending a mild vibration through the steering wheel. Active Blind Spot Detection, activated when you use the turn-signal indicator before changing lanes, warns if a vehicle is in your blind spot or approaching at a high speed in the passing lane.

BMW CONNECTED DRIVE® SERVICES AND APPS: EVERYTHING YOU NEED, INTELLIGENTLY NETWORKED.

Robert C. Smith, BMW Group Vice President, Innovation

BMW Driving Assistant Features

Driver Assistance Features: Designed to Enhance Your BMW Driving Experience.

Driving a BMW isn’t always the thrill of taking tight corners and accelerating onto a highway. There are the more mundane tasks of, say, finding and maneuvering into a parking space, or exiting an indoor garage onto a busy street and avoiding pedestrians you cannot see. For those times, innovative BMW ConnectedDrive driver assistance features make every moment behind the wheel as effortless and enjoyable as possible.
BMW EfficientDynamics
Less emissions. More driving pleasure.

BMW EFFICIENT DYNAMICS: MAKING A LITTLE GO A LONG WAY.

Under the umbrella of the BMW EfficientDynamics project, BMW is continuously developing innovative systems that will bring us closer to the goal of emissions-free driving in the long term. However, we remain committed to driving pleasure, which is being pursued in different ways.

Eco-friendly technology. The development of more efficient vehicles powered by conventional gasoline and diesel engines are continuing challenges. A comprehensive technology directive enables the reduction of fuel consumption and emissions, while at the same time increasing power output and driving enjoyment. These advances are based on innovations such as BMW TwinPower Turbo technology, Brake Energy Regeneration, Air Curtain front apron design, and many others.

BMW ActiveHybrid. With the BMW ActiveHybrid 7, BMW ActiveHybrid 5 and BMW ActiveHybrid 3, BMW has impressive hybrid production models in its line. All combine outstanding efficiency with superlative dynamic ability.

BMW i. The all-new BMW i brand is launching two completely new vehicle concepts for sustainable mobility in an urban environment; both are an important part of BMW EfficientDynamics technologies. Key features of the BMW i3 and BMW i8 include the use of lightweight materials such as carbon-fiber-reinforced plastic (CFRP), electric drive systems, powerful battery technology and eco-friendly production methods.

Auto Start-Stop function.
Even when idling, such as at a stop sign, an engine burns fuel. BMW’s Auto Start-Stop function enhances fuel efficiency by switching off the engine. (The intelligent electronics system first checks the battery charge level and calculates if other electric systems, like the heated rear window, need more energy.) Once the brake pedal is released, the engine starts up again almost instantly. A Start-Stop signal in the Display indicates the function is active.

BMW TwinPower Turbo technology.
This innovative twin-scroll turbocharging technology efficiently reclaims the energy contained in exhaust gases, using a twin-scroll charger with a double-flow exhaust system.

High Precision Direct Injection.
In this latest-generation direct fuel injection system, the piezo injectors are positioned very close to the spark plugs. They inject fuel at high pressure, with extreme precision, for very efficient combustion.

Brake Energy Regeneration.
To supply a battery with electrical energy, the generator (alternator) is usually driven using engine power, which requires fuel. With Brake Energy Regeneration, the alternator generates electricity only when you take your foot off the accelerator. Kinetic energy that was previously unharvested is transformed into electrical energy, which is then fed into the battery. In this way, electricity is generated without consuming fuel.

Electric power steering.
Unlike conventional, hydraulic steering systems, electric power steering draws power only during actual steering movements. When the steering wheel position is constant, the electric motor is inactive.

ECO PRO mode.
Driving in ECO PRO mode helps customers achieve fuel savings of up to 20 percent, depending on their individual style of driving. This mode optimizes accelerator and transmission response as well as shift points, and intelligently adapts the heating/air conditioning strategy. ECO PRO tips help the driver drive even more efficiently. The bonus range shown by the on-board computer indicates how many additional miles the driver has gained thanks to the increased efficiency in ECO PRO mode since the last fill-up.

8-speed Sport Automatic transmission.
The close spacing of gear ratios in the 8-speed Sport Automatic transmission makes maximum use of the optimum rev range, reducing fuel consumption and allowing smoother shifts.

Optimized fuel efficiency.
BMW EfficientDynamics enables every BMW engine to provide maximum power while using a minimum of fuel. In the BMW 650i Gran Coupé’s TwinPower Turbo V-8 engine, two parallel turbochargers are positioned between the cylinder banks. This compact design with shorter intake paths provides power and performance at a previously unattainable level.

THE 5 SERIES GRAN TURISMO
EFFICIENT DYNAMICS INITIATIVE AT A GLANCE.

Not all BMW EfficientDynamics features are available on all models. Please see your authorized BMW center for details.
BMW ENGINE TECHNOLOGY: A HERITAGE OF INNOVATION.
A FUTURE OF SUSTAINABLE EXHILARATION.

From its inception almost a century ago as a manufacturer of aircraft engines, Bavarian Motor Works has been a world leader in engine design. In fact, the innovations shown below were so ahead of their time, BMW engineers still incorporate this technology into today’s award-winning powerplants. Over the decades, BMW engines have led to countless wins at the racetrack. Even more important, their smooth, powerful and efficient performance has won over generations of driving enthusiasts. Today, adhering to the EfficientDynamics philosophy, BMW engineers are setting even higher goals: creating an engine template that can be scaled in size and adapted to new fuel sources – all while maintaining legendary BMW performance and efficiency. It’s a revolutionary concept that is now becoming reality. Welcome to the exciting future of BMW power.

1936
ALL-ALUMINUM V-8 ENGINE.
The BMW 328 applied what is now called “intelligent lightweight engineering” to its then-awesome 160-hp V-8 engine.

1955
FUEL INJECTION.
The BMW 2002i’s featured fuel injection, a technology that would become a crucial building block in BMW EfficientDynamics advances.

1961
DIGITAL MOTOR ELECTRONICS (DME).

1981
MULTI-VALVE TECHNOLOGY.
In every BMW, four-valves per cylinder let in more air for greater power, and push out exhaust more easily for greater efficiency.

1992
ALUMINUM/MAGNESIUM COMPOSITE ENGINE BLOCK.
Technology from 1970s BMW racecar engines, this combines the strength to withstand high-revving performance with efficiency-enhancing light weight.

1996
BMW TWIN POWER TURBO ENGINES.
BMW twin-scroll turbocharging calls on high-precision direct injection and a host of other innovations for increased power and efficiency – without turbo lag.

2006
BMW ADVANCED DIESEL.

2008
BMW ACTIVE HYBRID.
BMW ActiveHybrid vehicles blend a TwinPower Turbo engine with an electric motor and high-performance lithium-ion battery. When compared to non-hybrid versions, BMW ActiveHybrid vehicles deliver greater fuel efficiency, fewer emissions and breathtaking acceleration.

2007
BMW i: BORN ELECTRIC.
BMW i makes its debut with the i3. Powered by an electric motor combined with an innovative lithium-ion battery, the i3 accelerates from 0–60 mph in approximately 7 seconds. The BMW i8, a plug-in hybrid electric vehicle, races from 0–60 mph in 4.4 seconds. Its 131-hp electric motor powers the front wheels, while a 231-hp three-cylinder gasoline engine turns the rear wheels. Capable of 22 miles of all-electric driving using its lithium-ion battery, it achieves a total average fuel consumption of 94 mpg and a top speed of 75 mph.

2009
THE EVOLUTION OF BMW EFFICIENT DYNAMICS TECHNOLOGY.
Smaller engines that generate greater power using less fuel.

1994 BMW 530i
3.0-liter V-6 engine with 5-speed automatic transmission
• 215 horsepower
• 16 city/25 highway mpg¹
• 0–60 mph: 8.0 seconds²

2014 BMW 528i
2.0-liter inline four-cylinder TwinPower Turbo engine with 8-speed automatic transmission
• 240 horsepower
• 23 city/34 highway mpg¹
• 0–60 mph: 6.1 seconds²

¹EPA-estimated figures are for comparison purposes only. Your actual mileage will vary, depending on speed, driving habits, trip length and driving conditions. Actual mileage may be lower.
²BMW AG test results. BMW urge you to obey all posted speed laws and always wear safety belts.
THE BEST FOUNDATION FOR DYNAMIC PERFORMANCE: A SUPERIOR CHASSIS.

The BMW 5 Series Gran Turismo can be equipped with a whole host of innovative technologies to help you get the most out of each drive. Many of these systems are intelligently networked with each other, maximizing your active safety quotient – and your driving pleasure.

Integral Active Steering, in rear-wheel-drive vehicles with Integral Active Steering, at speeds of up to 30 mph, a small turn of the steering wheel yields a greater turn of the front wheels for more direct response. This feature also steers the rear wheels up to 2.5 degrees in the opposite direction, giving the effect of a shortened wheelbase for enhanced maneuverability. When changing lanes at speeds over 50 mph, both front and rear wheels turn in the same direction, giving the feel of an extended wheelbase.

With Driving Dynamics Control including ECO PRO mode you can adjust the driving characteristics of the 5 Series Gran Turismo by simply pressing a button. To change engine-throttle response, transmission shift characteristics and power-steering assist, choose from four settings: COMFORT, SPORT, SPORT+ or ECO PRO mode. In addition, the traction control feature can be disengaged when driving on sand, gravel, or deep or packed snow.

Adaptive Drive combines two active chassis control systems, Active Roll Stabilization and Dynamic Damper Control. Adaptive Drive minimizes the tendency of the body to roll, enhancing passenger ride comfort and vehicle agility during sporty driving maneuvers. In constant operation while the vehicle is in motion, it includes Dynamic Drive, an active chassis control system that uses active stabilizers on front and rear axles to counteract body roll when cornering, especially at higher speeds. This helps ensure precise steering and balanced reactions to load changes. Ride-enhancing Dynamic Damper Control instantly adjusts shock absorbers from the softest to the firmest settings. The result is exceptional ride comfort and fluid handling at all times – during changes in vehicle speed, load, or road and driving conditions.

Dynamic Stability Control (DSC) helps to stabilize the BMW 5 Series Gran Turismo in just milliseconds when it senses an impending skid. Whenever the system senses over- or under steer, it modulates engine power and can apply brakes individually to each wheel to help keep the vehicle under control and going in the intended direction. For sportier driving or in deep snow, Dynamic Traction Control (DTC) allows increased wheelslip.

In the event of a collision, the 5 Series Gran Turismo’s passive safety system determines which of six airbags to deploy for optimal protection. An extremely rigid steel “safety cage” surrounds the cabin, with deformable crush tubes front and rear. In a severe crash, impact energy is routed around the cabin and absorbed by the safety cage. In a severe side impact, a reinforcing bar hooks the door to the body, locking them together to make a more rigid passenger cell. When the pressure is released, the system is then designed to snap back so that the doors can open.
HIGH-TECH BODYGUARDS: ACTIVE AND PASSIVE SAFETY.

The 5 Series Gran Turismo is designed with BMW’s full range of standard state-of-the-art active and passive safety technologies. Active safety features, such as Xenon Adaptive Headlights, powerful engines and large brakes, help you see and respond to potentially dangerous situations. Should an accident prove unavoidable, passive safety features, such as airbags and reinforcing bars that hook the doors to the body, are designed to help protect you and your passengers. After a severe impact, a host of features spring into action: the doors automatically unlock, headlights and taillights flash, the starter cable is disconnected from the battery and the fuel supply is cut off. Should any airbags deploy, BMW Assist eCall™ response specialists are automatically alerted and notified of your location.

Adaptive Headlights for low and high beams enhance illumination of the road ahead at night or in poor visibility. Four LED Cora headlights, which can be used as Daytime Running Lights, also serve as parking lights. Adaptive Headlights provide optimum illumination of the road ahead when the car enters a turn. Light distribution is automatically adapted to the road speed and steering angle. Cornering Lights, which are positioned in the two inner headlights, are automatically activated by using the turn indicator or changing the steering wheel angle, even when the vehicle is at rest.

xDrive intelligent all-wheel-drive system provides maximum traction, even in the most slippery conditions. The system monitors data such as engine speed, steering angle, wheel speeds and acceleration. On smooth, dry roads, more power is normally sent to the rear axle, giving vehicles with xDrive the feel of their rear-wheel-drive counterparts. But hit a wet uphill curve, for instance, and even before wheelspin can occur, the system immediately recognizes any need for a change in power distribution. Using a controlled clutch, it sends more torque to the front axle to enhance stability and achieve greater traction.

BMW restraint system for driver and front passenger combines three-point safety belts, automatic safety-belt pretensioners, and seat bolsters that help prevent occupants from sliding forward. Active Head Restraints in the front seats reduce the risk of whiplash or neck/vertebra injury. When sensors detect a rear-end collision, the headrests automatically and rapidly pivot forward, supporting the occupant’s heads.

Active Head Restraints in the front seats reduce the risk of whiplash or neck/vertebra injury. When sensors detect a rear-end collision, the headrests rapidly and automatically pivot forward, supporting the driver’s and front-seat occupant’s heads.

Airbags. In the event of a collision, BMW’s supplemental restraint system (SRS) determines which airbag(s) to deploy for optimal protection. When a safety belt is used, airbags deploy only at a higher crash severity; the force of the deployment depends upon the severity of the impact. Driver and front passenger airbags, the Curtain System with head airbags and front seatback-integrated side airbags provide effective protection for you and your passengers in the event of a collision.

Dynamic Stability Control (DSC) sensors constantly monitor driving status and, as necessary, modify directional stability and traction by intervening in the engine and brake management systems. This makes it easier to handle the vehicle, even in difficult road conditions, and actively enhances driving safety and therefore driving pleasure.

Run-flat tires. Thanks to reinforced sidewalls, run-flat tires maintain their shape and rim position even after suffering a complete loss of tire pressure. They allow you to continue driving at a reduced speed until you reach a safe area to change a tire or wait for Roadside Assistance. The Tire Pressure Monitor alerts you when there is a sudden and irregular drop in tire pressure. Should the target pressure of a tire fall below 25 percent, both a warning light and acoustic alarm are triggered.

Body stiffness. The intelligent use of high-strength multi-phase steel and aluminum provides a high degree of body stiffness and crash resistance. Components, such as the A-pillars and windshield frame, include special reinforcements to provide optimum occupant protection.

Notes:
- These pictures of airbags are for illustrative purposes only. Depending upon the type of accident, none, some or all airbags may deploy.
- The force of the deployment depends upon the severity of the impact.
- Driver and front passenger airbags, the Curtain System with head airbags and front seatback-integrated side airbags provide effective protection for you and your passengers in the event of a collision.

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”
The interior of the BMW 5 Series Gran Turismo is a tour de force of bespoke design, exquisite materials and expert craftsmanship. In the typical, driving-oriented BMW cockpit, the center console is inclined toward the driver, with all controls naturally falling to hand. Adding a gleaming touch, the 10.2-inch full-color monitor is bordered in high-quality chrome trim, beautifully setting off the Black Panel technology of the instrument cluster and climate system display. Orchestrate the full, rich sounds of the audio system through the iDrive system – or simpler yet, through the leather-wrapped multi-function steering wheel. Automatic climate control filters and warms or cools incoming air, further enhancing your total sense of well-being.

The BMW 5 Series Gran Turismo in Alpine White Non-metallic paint.

Black Dakota Leather upholstery is richly complemented by the Dark Wood trim. The BMW 5 Series Gran Turismo is equipped with Double Spoke (Style 234) 18 x 8.0 light alloy wheels on 535i and 535i xDrive models (pictured above), and Y-Spoke (Style 425) 18 x 8.0 light alloy wheels on 530i and 530i xDrive models.
THE NEW 5 SERIES GRAN TURISMO WITH MODERN LINE.

Interior equipment features:

- Choice of:
  - Black Dakota Leather upholstery with exclusive stitching
  - Ivory White Nappa Leather upholstery with Black Dashboard
  - Ivory White Nappa Leather upholstery with Oyster Dashboard
  (Note: not available with sport steering wheel)
- Leather-wrapped multi-function sport steering wheel
- Choice of:
  - Dark Pearl interior trim
  - Dark Wood interior trim
  - Fineline Light Wood interior trim
- Sill brushed door finishes in aluminum with "BMW Modern" lettering
- Signature key fob in Dark Oyster with Pearl Gloss Chrome trim

Leather upholstery: Leather on all seating surfaces; other components may be Leather or SensaTec.

Exterior equipment features:

- Choice of:
  - Turbine (Style 452) 19 x 8.5 light alloy wheels and 245/45 run-flat all-season tires
  - Turbine (Style 453) 20 x 8.5 front, 20 x 10.0 rear light alloy wheels and 245/40 front, 275/35 rear run-flat performance tires
  - LED foglights
  - Satin aluminum kidney grille
  - Satin aluminum front air intakes
  - Illuminated chrome door handles

Run-flat tires do not come equipped with a spare tire and wheel.

Due to low-profile tires, please note: Driving over rough or damaged road surfaces, as well as rocks and other obstacles, can cause serious damage to wheels, tires, and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful in areas near the road and reduce your speed, especially if your vehicle is equipped with low-profile tires.

Performance tires are not recommended for driving in ice and snow conditions.

Wheel and tire specifications are subject to change. For details on the availability of standard and optional wheels and tires, features, packages and optional specifications, please visit bmwusa.com, select the BMW model of your choice, and click on "Features & Specs."

The thick grip of the leather-wrapped sport steering wheel makes driving feel even more satisfying. Combining the light Ivory White Nappa Leather upholstery with the Fineline Light Wood trim and chrome accents creates an uplifting contemporary atmosphere.
THE NEW 5 SERIES GRAN TURISMO WITH LUXURY LINE.

Interior equipment features:

- Choice of:

  - Ivory White Nappa Leather upholstery with Black Dashboard
  - Mocha Nappa Leather upholstery with Black Dashboard
- Choice of:
  - Anthracite Wood interior trim
  - Dark Wood interior trim
- Illuminated door sill finishers in aluminum with “BMW Luxury” lettering
- Signature key fob in Black with chrome trim

Leather upholstery: Leather on all seating surfaces; other components may be Leather or SensaTec.

Exterior equipment features:

- Choice of:
  - Multi Spoke (Style 458) 19 x 8.5 light alloy wheels and 245/45 run-flat all-season tires
  - Multi Spoke (Style 459) 20 x 8.5 front, 20 x 10.0 rear light alloy wheels and 245/40 front, 275/35 rear run-flat performance tires
- LED foglights
- Chrome kidney grille
- Chrome front air intakes
- Illuminated chrome door handles

A beautiful interior swathed in Ivory White Dakota Leather showcases the BMW 5 Series Gran Turismo’s refined character.

1 Run-flat tires do not come equipped with a spare tire and wheel.
2 Due to low-profile tires, please note: Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.
3 Performance tires are not recommended for driving in ice and snow conditions.

Wheel and tire specifications are subject to change. For details on the availability of standard and optional wheels and tires, features, packages and technical specifications, please visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”

1 39 BMW Luxury Line

The BMW 5 Series Gran Turismo with Luxury Line in Damask Red Metallic paint.

Luxury Line signature key fob in Black with chrome trim.

Multi Spoke (Style 458) 19 x 8.5 light alloy wheels and 245/45 run-flat all-season tires.

Multi Spoke (Style 459) 20 x 8.5 front, 20 x 10.0 rear light alloy wheels and 245/40 front, 275/35 rear run-flat performance tires.
THE NEW 5 SERIES GRAN TURISMO WITH M SPORT.

The pages in this section of the brochure show available colors and materials for the BMW 5 Series Gran Turismo. Use these samples to compare paint, upholstery, trim colors and combinations. Please note that these samples are representations; they are not exact reproductions. To see the actual colors, visit your local BMW center. They will be happy to show you original samples and assist you with special requests.

Leather upholstery: Leather on all seating surfaces; other components may be Leather or Sensatec.

For details on the availability of standard and optional exterior paints and upholstery materials and colors, please visit bmwusa.com/byo.
**Equipment features and options.**

Retractable, high-intensity headlight washers help keep headlights clear of ice, mud, road salt and other coatings, for maximum road illumination and enhanced driving safety.

**Xenon low- and high-beam headlights** illuminate the road ahead and to the side with brilliant clarity. An auto-leveling feature adjusts for varying passenger and cargo loads. LED Corona headlight-rings that circle both headlights and high beams also act separately as Daytime Running Lights and parking lights.

Adaptive LED Headlights for both high and low beams project an intense white light that simulates daylight for excellent visibility. Convenient features that improve visibility include Automatic headlights, Adaptive turning, Cornering Lights, four Corona headlight-rings, and Automatic high beams.

Heated, power-adjustable, folding exterior mirrors feature a body-color upper section, black bottom, and LED turn indicators. Passenger-side mirror tilts down when parking. Automatic dimming cuts headlight glare from any following vehicles.

High-gloss shadowline trim replaces the front and rear side-window chrome frames and door sill trim strips with the more rugged, sporting look of a black high-glass finish.

Soft-close function automatically closes all four doors shut for the last quarter inch.

Rain sensor monitors the intensity of the rain and automatically regulates the windshield wiper interval. It also automatically turns on the low beams when needed.

**LED foglights** match the color of the LED or Xenon Headlights. Their bright white light helps when visibility is low.

Equipment features and options.

Three-spoke leather-wrapped multi-function steering wheel provides buttons on the left for cruise control functions, and buttons on the right for adjusting all audio-related functions, including a BMW-tested, Bluetooth® enabled mobile phone.

Head-up Display projects important travel information, such as current speed and Check Control data, on the windshield directly in your line of vision in full color. Also displayed are directional arrows from the Navigation system, Speed Limit Info and other driving warnings, if so equipped.

Driving Dynamics Control adjusts driving characteristics by pressing a button to select one of four settings. Choosing Comfort, Sport, Sport+ or Eco mode adjusts the engine-throttle response, shift characteristics and power-steering assist. Another button disengages the traction control feature when driving on sand, gravel, or deep or packed snow.

B-speed STEPTRONIC automatic transmission with Adaptive Transmission Control (ATC) provides extremely fast synchronized shifting in either the Sport or Manual shift mode. By increasing the number of gears to eight, the transmission provides a more efficient shifting sequence and improved fuel economy.

Three-spoke leather-wrapped multi-function sport steering wheel features power tilt/telescoping adjustments. Steering wheel heating warms up the rim in seconds at the touch of a button.

M leather-wrapped multi-function steering wheel includes larger thumb rests and a thicker rim for better grip and a more sporty look (gearshift paddles included with Sport automatic transmission).

Rear center armrest folds down to add the convenience of cupholders and a storage compartment, or can be raised to accommodate a third rear-seat passenger.

20-way power Multi-contour front seats conform to your body to provide optimum support and exceptional comfort over long distances. In addition to horizontal, vertical and angled adjustments, Multi-contour seats include an articulated upper backrest. Comfort headrests (two-way power, two-way manual “relax headrest”) and four-way power-adjustable lumbar support. Both driver’s and front passenger’s seats include memory function. Active front seats imperceptibly raise and lower the left and right halves of the seating surface. This movement keeps the spine in motion, exercising various support muscles to help reduce fatigue on longer trips.

10-way power-adjustable driver’s and front passenger’s seats with memory system for driver’s seat, steering wheel and outside mirrors. Heated front seats and heated rear seats are a welcome feature in cooler weather. With the touch of a button, left- and right-seat occupants can individually select their preferred level of warmth.

Rear seats support three adults in comfort. Created with a 40/20/40 split, each backrest can recline from 15 to 33 degrees, or fold forward individually for more cargo space. Move the seats 2.8” rearward for greater legroom.

Ambiance lighting adds the illumination of a white light or the drama of a warm reddish light that runs from front to rear beneath the inner door ledge. Interior lighting also includes soft white rear reading and footwell lights, the front center armrest storage compartment, indirect exit lights and proximity illumination in the outside door handles. Interior lighting also includes two visor mirror lights and illumination of the glove box and trunk.

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit bmwusa.com, select the BMW model of your choice, and click on “Features & Specs.”
Pedestrian Warning system is designed to help prevent or reduce the severity of an accident involving pedestrians. The system alerts drivers approximately one second before a possible collision with both visual and acoustic warnings, while pre-testing the brake calipers for quicker response. If the driver does not apply the brakes, the system begins braking automatically.

Driver Assistance Plus increases your active safety quotient in all types of traffic situations, with Active Blind Spot Detection, Side- and Top-view Cameras, and Speed Limit Info. It also includes the full collection of Active Driving Assistant Features: Lane Departure Warning, Frontal Collision Warning, Pedestrian Warning and City Collision Mitigation.

BMW Night Vision with Pedestrian Detection can scan up to 900 feet ahead using an infrared camera in the front bumper. It can detect people and animals, as well as the direction of their movement, up to approximately 300 feet away, and displays their presence on the iDrive screen and Head-up Display. The system gives a visual warning as soon as pedestrians or animals move toward the road, alerting you to potential dangers significantly earlier, so you can react more quickly.

Lane Departure Warning feature senses when your vehicle is crossing over roadway lane markings or is changing lanes without signaling, and warns you by sending a mild vibration through the steering wheel.

Speed Limit Info detects local speed limit signs and shows them in the Info Display and Head-up Display.

ECO PRO mode can reduce fuel consumption by up to 20 percent, depending on your driving style, by modulating throttle responses, shift points and electrical consumption. The additional miles you gain are then displayed as a Bonus Range in the information display. When ECO PRO mode is active, ECO PRO tips use graphics to encourage a more efficient driving style.

Black Panel Display shows a matte black surface when the ignition is off, and the graphics display lights up, showing the trip computer and Check Control information; below the four analog dials is a high-res, wide-format Info Display that shows Navigation instructions, music tracks, etc.

8

Side- and Top-view Cameras display video images on the Control Display of the front of the vehicle from the sides, such as when exiting a garage or parking space, by using cameras positioned in the front bumpers. The Top-view Camera provides video images of the road alongside doors, taken by cameras positioned in the exterior mirrors.

Parking Assistant makes parking a breeze by searching for suitable parking spots and then steering your vehicle into them. Simply press the “Park Assistant” button, then drive along potential parking spaces on the left or right side of the road, staying below 22 mph and no more than five feet away. Using ultrasonic sensors integrated into the side indicators, the system searches for and measures parking spaces. When a space at least four feet longer than your vehicle is spotted, it is shown on your Control Display. Shift into reverse and Parking Assistant takes control of steering your vehicle into the selected space; you operate the accelerator and brake pedals. The acoustic and visual warnings of Park Distance Control (PDC) provide assistance.

SiriusXM® Satellite Radio delivers over 140 channels of the most innovative satellite radio music, news, sports, talk, and entertainment. All music channels are commercial-free, delivered coast-to-coast in crystal-clear digital sound, 24 hours a day. Equipment features and options.

**Bang & Olufsen® High-End Surround Sound System** offers superior acoustics, thanks to innovative Dirac Dimensions™ signal processing and 15 speakers with a total output of 1200 watts, including a retractable center speaker. This houses the midrange speaker and the Acoustic Lens Technology (ALT) that ensures consistent sound quality at all seats. You have a choice of two sound settings: “Studio” for particularly crisp sound and “Expanded” for a more open sound space. The speakers’ lighting completes this audiovisual experience.

**Rear-seat entertainment** includes two 10.2-inch color screens integrated into the back of the front seats. The system includes remote control and headphone jacks.

**Dual-access tailgate** opens up to the rear cargo area. To load larger items, raise the entire tailgate. Smaller items can be quickly and easily stowed without letting in drafts, via a separate section below the rear window.

Get the latest information on BMW standard and optional features, packages and technical specifications. Visit [bmwusa.com](http://bmwusa.com), select the BMW model of your choice, and click on **“Features & Specs.”**

**Sunblinds for the rear side windows** can be electrically raised and lowered. They protect against intense sunlight while also providing effective privacy.

GOING BEYOND ENGINEERING: THE HIGH-PERFORMANCE BMW OWNERSHIP EXPERIENCE.

BMW Maintenance Program: A comprehensive maintenance program for up to the first four years or 50,000 miles, whichever comes first. This includes scheduled service inspections. Also covered is the replacement of items that are subject to normal wear and tear, such as brake pads, wiper blades, and engine drive belts. And, thanks to BMW’s advanced engineering, most owner-visit intervals are shorter; with flexible routine service intervals that can last as long as 10,000 miles. If your vehicle requires routine maintenance, it is always best to have your BMW serviced by a trained technician. Original BMW parts, you can rely on expert fit and long-lasting BMW quality.

BMW roadside Assistance is available for up to four years, with no mileage limit. Call 1-800-32-11224 (4286) for a friendly on-road help, 24/7, anywhere in the United States, Canada and Puerto Rico. This includes everything from tire replacements, emergency gas delivery, and lock-out service, to towing, alternative transportation, and trip interruption benefits. This service also provides valuable trip-planning advice.

BMW Online: provides up to date service information and special promotions, as well as current weather reports. BMW digerit includes MyDrive, which allows you to store business locations and street addresses with their associated phone numbers from the Google Maps™ website directly into your BMW. The destination can be sent to your navigation system for turn-by-turn directions.

Enhanced USB and Bluetooth® with Smartphone Integration offers a variety of Mobile Information functions with BMW Navigation system and your mobile phone line via Bluetooth technology. Mobile Office features text messages and your Drive Displays screen and then reads them aloud to you. While on route, a calendar and to-do list can also appear on your Display screen. Running late? Click the phone number on the calendar to call your appointment. For a list of tested mobile devices, go to bmw.com/bluetooth.

Remote Services includes Remote Door Locks, Remote Window Lenses and access to the My BMW Remote app, which allows you to control Your BMW from your mobile device. For the ultimate in convenience, add the optional Concierge Services.** You’ll enjoy unlimited access to personalized directions and reservations for restaurant and hotel recommendations, with the navigation address and phone number not only sent right to your BMW, but also transferred to your Navigation system for route guidance. Another useful Concierge feature: Critical Calling. This lets you connect up to four pre-assigned calls per year, up to five minutes per call, if your mobile phone is not available, or if the battery is discharged.

ON-BOARD SERVICE ALERTS.

We monitor your BMW’s needs - so you don’t have to. The BMW Maintenance Program ensures that your car is in optimal condition at all times and that you’re never caught by surprise. A 100% accurate condition of your vehicle will help you think about the state of your brake pads. Thanks to BMW’s Integrated on-board diagnostic system, you’ll always know exactly when the next service is due and what work will be required. Condition Control Indicator (CCI) measures the condition of key parts that are subject to wear and tear. If it also tracks fluid levels and monitors your BMW’s tire, time, and mileage-dependent service requirements. Using this table, the brake pads in the cockpit automatically alert you in advance whenever any part of your vehicle will require servicing - so there are no surprises ahead.

EXPERIENCE MORE WITH BMW.

BMW and the environment.

BMW is a strong proponent of the environment and social responsibility. We launched BMW EfficientDynamics back in 2000 – the philosophy of providing greater power with increased efficiency and fewer emissions. This has resulted in significant benefits today – for our customers, the climate and the environment.

That year, ecological sustainability was also declared one of BMW's core strategic principles; it is now firmly anchored in our entire production chain. It starts with the development of fuel-saving and alternative vehicle concepts, continues with environmentally friendly production processes, and ends with innovative recycling methods. This effort has been recognized worldwide; in 1999, BMW AG – the parent company of BMW of North America and BMW Manufacturing Co. in Spartanburg, SC – was the first automotive company to be represented on the Dow Jones Sustainability Group Index. It has remained on the Index ever since; moreover, since 2005, BMW has been voted the world's most sustainable automobile manufacturer. At BMW, we strive for and achieve high performance in all we do.
