Less emissions. More driving pleasure.
A 360-horsepower pleasure:
The BMW 6 Series for 2010.

Since 1995, the name BMW Motorsport – BMW M – has been synonymous with top-winning performance. Every vehicle that bears the distinctive blue and white roundel is the product of generations of talented engineers and designers who have strived to achieve the top-of-the-line driving. A reward above all others: the BMW 6 Series.

When BMW designers and engineers created the 6 Series Coupe and Convertible, they struck a perfect balance of luxury, sophistication and breathtaking performance. The automotive press took notice, lavishing praise on these extraordinary vehicles. And now, the 6 Series for 2010 builds on its success, with enhanced design and performance features. A powerful expression of technological innovation, premium quality and individual style, the BMW 6 Series is a shining example of the quest for excellence.
The 6 Series: Created to celebrate the joy of driving.

BMW is, and always will be, the marque of inventive engineers who love to drive. Witness the 6 Series’ efficient 360-horsepower, 32-valve, 4.8-liter V-8 that concentrates the perfect amount of power and torque at every mark along the tachometer. At cruising speed, the engine sings beautifully. Pin the accelerator to the floor and it roars to life with a thrilling growl. Through even the tightest turns, the 650i is confident and composed, sinking its teeth into the asphalt and exiting the turn with a perfect transfer of power. The steering is direct and communicative, telling you precisely what the road is doing, translating your every command directly to the wheels.
It's not the altitude that leaves you breathless.
The most beautiful scenery isn't always snow-covered.

It's hard to take your eyes off the 650i to look at anything else. A modern and innovative interpretation of the classic Grand Touring Coupe, its lines display perfect harmony and balance. Flowing back from the striking front end, they continue around the vehicle to the sporty rear. Those aerodynamic contours were carefully honed in the wind tunnel to reduce wind resistance and noise, exhibit enhanced stability, traction, acceleration and fuel efficiency. At BMW, beauty begins at skin-deep.
Before you decide what to drive, first discover what drives you.

The 6 Series Convertible is the perfect blend of thrilling BMW performance and rewarding luxury. With the top up, it cuts the same impressive silhouette as the Coupe. But drop the top, and suddenly you're open to a world of exciting new sensations. With V-8 power, room for four, and enough trunk space for two golf bags, the 6 Series Convertible fulfills the dreams of those who yearn for a life of open-air freedom.
Ablaze to the pleasures of the senses.

In the 6 Series Convertible, driving under the sun and stars is just one of many delightful sensations. Relax in orthopedically supportive seats upholstered in beautiful, supple leather that’s specially treated to stay cooler to the touch, even when the top is left down. Feast your eyes on the artfully designed cabin, filled with the highest quality materials. Rediscover your favorite songs, clarified through the Logic7 sound system. From top to bottom, inside and out, the 6 Series Convertible is a never-ending treat.

Sometimes high performance is measured by a different yardstick.

Few things are as exhilarating as rocketing from 0 to 60 in 5.3 seconds on an empty highway. But when the freeway is clogged, you'll appreciate the capabilities of Active Cruise Control with Stop & Go feature, which can bring your BMW to a complete stop, provided the traffic permits and it is safe to do so and if activated. In today's busy urban environment, Active Cruise Control provides quick acceleration, while the Active Steering option enhances the 6 Series' nimble handling, making quick lane changes and navigating tight situations smoother. Surrounding pedestrians, cyclists and other distractions? Head-up Display helps you keep your eyes on the road while giving you important driving information.

In the obstacle course that is urban driving, the 6 Series still proves it's a winner.

6 Series 650i Coupe with manual transmission: 5.4 seconds; with Sport Automatic: 5.6 seconds. 6 Series 650i Convertible: 5.5 seconds with manual transmission; 5.7 seconds with Sport Automatic. BMW test results. BMW urges you to obey all posted speed laws and always wear safety belts.

Active Cruise Control is not a substitute for the driver's own responsibility in adjusting speed and otherwise controlling the vehicle. After evaluating road, traffic and visibility conditions, the driver must decide whether and how the system is used. For details on the availability of standard and optional features, please refer to the Standard equipment | Optional equipment charts at the back of this brochure.
Even at night, it's the star of the show.

The interplay of light and shadow sets the stage for high drama. As the 650i streaks through the night, the leading edge of streetlights hide, then reveal the finely formed curves and creases. The muscular shoulder lines, the attention-getting silhouette. It's the riveting effect of a taut, beautiful body in motion.
One of the wonders of the modern world. The 650i Convertible is a marvel of engineering. Case in point: the design and convenience of its fully automatic softtop. The top can be opened and closed in a matter of seconds simply by pressing a button on the dash or on the key fob. When closed, it gives the Convertible the sleek, sculpted silhouette of the Coupe. Thanks to an advanced three-layer construction and plastic core, it provides insulation from heat, cold and wind noise. In fact, BMW’s acoustic insulation sets the standard for quiet convertible cabins. The heated glass rear window operates completely independently of the top. You can keep it up when the top is down, to act as a windscreen, or put all five windows down with the top up for draft-free ventilation. A lesser car could easily be overshadowed by a top this advanced.
The 650i’s alluring exterior is complemented by an elegant, well-appointed interior. Seating for four is lavished in supple Dakota Leather or Pearl Leather, which, in the Convertible, includes BMW’s unique Sun-Reflective Technology. This process incorporates mirror-like pigments into the leather dye to reflect the sun’s infrared rays, helping to keep seats and other upholstered surfaces cooler to the touch, even when the top is left down. The interior is enriched with a choice of three trim genuine Maple or Cork Birch Wood, or Brushed Aluminum; control knobs are appealingly accented in Chrome Pearl Gray. Fill the cabin with 360 degrees of digitally adjusted surround sound with the Premium Sound Package that includes the Logic7 audio system, a six-disc CD player, and iPod® and USB adapters. Then add HD Radio™ to receive free, digital broadcasts with CD-quality sound, “multicast” FM stations, and innovative data services.

For details on the availability of standard and optional features, please refer to the Standard equipment | Optional equipment charts at the back of this brochure.

Although its beauty invites inspection of every detail, the 6 Series cockpit is designed so your eyes remain on the road and your hands on the wheel. All primary driving controls are ergonomically placed, and gauges can be read at a glance, while the Head-up Display feature puts critical driving information directly in your line of vision. To fully enjoy every moment while traveling, you can access the most frequently used secondary functions—audio, cruise control and (accessory) phone via the multi-function steering wheel, the iDrive Controller, or the six programmable buttons above the center console. And if your 650i is upholstered in Pearl Leather, your passengers will feast their eyes on the rich Black Nappa Leather that adds a distinctive touch to the dashboard and center console.

It takes years of practice to achieve a seemingly effortless grace. Just ask any dancer— or car manufacturer.

For over nine decades, BMW has been an automotive leader, creating vehicles that are prized worldwide for their smooth power, responsive handling and masterful performance. These are vehicles that turn driving into an intimate dance between man and machine.

The joy of motion can also be conveyed by a vehicle’s style. In the mid-Fifties, one of the great BMW visionaries was design chief Wilhelm Hofmeister. Working closely with Italian designer Giovanni Michelotti, he crafted cars with lines and proportions unlike anything ever seen before. In 1961, the new 1500 model included a design element that was to become a distinctive BMW signature. Up until then, the C-pillar—the rear roof support—was usually curved or straight. However, on the 1500, its shape was uniquely angled. Nicknamed the “Hofmeister kink,” it became—and remains—one of BMW’s enduring symbols.

However, it takes more than just a distinctive roundel, kidney grille or C-pillar design to define world-class performance. It takes generations of driving enthusiasts building cars for other enthusiasts in order to create The Ultimate Driving Machine.

Perfection in motion, with signature style.
At BMW, we create dynamic vehicles that thrill you with quick acceleration, predictable handling and unshakable control. We are also busy finding ways to sustain this level of performance while incorporating innovative fuels and technologies to help preserve the environment. This is what we refer to as “EfficientDynamics.” This goal has led to the visionary CleanEnergy hydrogen-powered engine, which is currently used in the BMW Hydrogen 7 Sedan. BMW Advanced Diesel with BluePerformance, which offers diesel power with quick acceleration, increased fuel efficiency and reduced emissions, was introduced to the U.S. in early 2009 in select models. In fact, every BMW on the road today comes standard with technology that boosts performance while simultaneously reducing fuel consumption and CO₂ emissions.

Valvetronic
Instead of using a traditional throttle, Valvetronic technology lets the engine breathe more easily by varying the lift height of the valves to regulate air intake. The result: improved cold starts, smoother running, and a significant drop in fuel consumption. Using revolutionary technology such as this, BMW has improved its overall average fuel economy more than any other manufacturer.

Double-VANOS
VANOS is BMW’s valve timing system that can “steplessly” vary the points in the combustion cycle when valves open and close. Double-VANOS refers to the fact that it operates on both the intake and exhaust camshafts. Electronically controlled in response to engine speed, load and temperature, VANOS reduces emissions, and enhances low- to medium-speed torque, as well as fuel efficiency.

Efficient transmissions
The E-Series offers two 6-speed transmissions with Dynamic Driving Control (Sport button): a smooth-shifting manual, and an even more fuel-efficient Sport Automatic with steering wheel-mounted paddle shifters.

Lightweight construction
BMW engineers use durable, lightweight construction throughout the 6 Series. Lighter weight leads to lower fuel consumption and better axle load distribution for more agility – especially in curves. The structure, hood and doors are aluminum; the front side panels are freemolded plastic. The trunk lid is sheet-formed composite, or SMCC. This innovative lightweight material is extra resistant to bending – an important feature in a large-area component. The E-Serie’s aluminum outer and inner skins are bonded together with an adhesive that not only saves weight, but gives it longitudinal strength for absorbing crash energy, as well as a resistance to vibrations.

BMW models have low CO₂ emissions today. But that’s just for starters. We’re carrying on our research in the quest to bring you greater driving pleasure, with fewer emissions and decreased fuel consumption.

EfficientDynamics
Less emissions. More driving pleasure.
The 650i’s mighty V-8 engine
is the result of generations of inspired engineers.

For generations, BMWs have been developed by engineers who are passionate about driving. The advanced technology in today’s BMWs is a product of that passion. And, as the name “BMWer Motor Works” implies, in a BMW, the engine takes center stage.

In striving to make automobiles that are ever more satisfying to drive, BMW has endowed the 650i with one of the most powerful engines in its current lineup. This 4.8-liter V-8 commands 390 horsepower at 6200 rpm, and 365 lb-ft of torque at 2400 rpm. Thanks to unique BMW technology, it delivers ultra-refined power and unrivaled performance without sacrificing efficiency.

One of these remarkable technologies is Valvetronic. Rather than regulating engine performance by using throttle butterflies, which reduce fuel efficiency, this innovative system allows the engine to “breathe” more easily via continuously variable valve lift control. This increases overall fuel efficiency, especially at “low road” operation (driving conservatively and idling). Every BMW engine also incorporates Double-VANOS, an engine management system that allows the engine to “expirably” choose the valve timings for both intake and exhaust camshafts. Double-VANOS controls the four camshafts in the V-8 to deliver more low- to medium-speed torque for strong acceleration, added flexibility for better highway performance, and a quieter, smoother engine at idle. Another power-increasing feature found in the 650i is a two-stage intake manifold, providing two different intake lengths—one for low to medium speeds, and the other for high engine speeds (tours).

The full power of this exceptional V-8 is harnessed through a choice of two 6-speed transmissions. Choose either the smooth-shifting manual or a Sport Automatic transmission with a steering-wheel-mounted paddle shifters and a shift lever; for even more dynamic performance press the Sport button to experience faster shift times, higher revs before shifting, and quicker engine response at a touch of the accelerator pedal.

The 650i is a true athlete that loves to perform. Both its sport-tuned suspension and 18" wheels are included as standard—so is BMW’s intelligent lightweight construction that integrates aluminum and advanced plastics. Combined with the 650i’s potent engine and massive, fade-resistant brakes—13.7" front, 13.6" rear—they inject thrilling performance into every mile. You will enjoy lightning-quick acceleration, awe-inspiring stopping power, and precise handling with reassuring road grip. Active Roll Stabilization (ARS) reduces body roll to a minimum when taking tight corners, increasing the car’s ability to turn. Dynamic Stability Control (DSC) measures vehicle speed, wheel rotation, steering angle, lateral acceleration, vehicle rotation (or “yaw”) and brake pressure. When wheelspin is detected, or over- or understeer occurs, it applies brakes individually to help keep the vehicle under control and going in the intended direction. DSC enhances the 6 Series’ braking capabilities with four practical features: Brake Stand-by, which pre-tenses the brake calipers in anticipation of a quick stop; Brake Drying, which periodically brings the brake pads into contact with the rotors when the system senses it’s raining; Start-off Assistant, which helps keep the 650i from rolling backwards when stopped on a hill; and Brake Fade Compensation, which reinforces your braking action when it senses brake fade. BMW’s innovative, Active Steering feature varies the steering ratio based on vehicle speed, so everything from highway-speed lane changes to parking maneuvers are made easier. No matter where or how you drive the 650i Coupe or Convertible, it rewards you with an exhilarating, world-class driving experience.

Like a professional athlete, the 650i delivers rewarding performance.

Looking out into the darkness, we had a bright idea.

BMW’s Night Vision feature is an amazing system that helps you detect pedestrians or animals in the dark, at a distance of up to 1640 feet. A camera mounted in the front of the vehicle uses long-distance infrared technology. This allows you to see potential road hazards displayed on the navigation system monitor, and avoid them well before they are visible to the naked eye.

If you drive along poorly lit roads, this feature will make night driving more pleasurable and worry-free.

There’s no mistaking the approaching face of a 6 Series. By day, there is the signature double-headlight configuration and kidney grille. When the sun sets, four distinctive halogen Corona/Headlight-rings reveal its presence. At dusk, they function as parking lights; at night, they surround the headlights for added visibility.

Xenon low- and high-beam Adaptive Headlights also give a unique look to the road ahead. Xenon headlights provide optimal visibility over long distances. Adaptive Headlights automatically swivel to follow the curves of the road ahead. By using data from on-board sensors and the steering wheel angle, this function determines the vehicle’s direction, then electromechanically tilts the lights for optimum illumination in bends. High-beam Assistant automatically turns the high-beams on when needed, then turns them off when the system senses an approaching vehicle, or when they are no longer necessary. Controlled by means of a sensor located on the front of the inside mirror, the system allows intervention by the driver at any time to manually switch the high-beam headlights on or off as desired.

Under optimal road conditions, Night Vision performance is also affected by fog, humidity and other weather conditions.

iDrive: control over your driving comfort.

Whether you’re commuting or touring, you want to be totally comfortable, informed, and entertained by your favorite songs. Welcome to the next-generation iDrive, a new benchmark in automotive technology. Included with the Navigation system in the BMW 6 Series, this new iDrive offers intuitive, ergonomic control within easy reach on the center console.

The system places a wide variety of entertainment and communication options at your fingertips. Using the iDrive Controller, simply tilt, rotate, push and click your way through any series of commands. New buttons, located above the Controller wheel, let you directly access the four main menu choices: CD Player, Radio, Telephone and Navigation. Six programmable memory keys on the dash allow you to store the settings of your choice, from preferred radio stations to frequently dialed phone numbers (if so equipped).

The system also features a high-resolution 8.8" monitor, located next to the instrument cluster at an ideal viewing height and distance. All menu items are rendered in a clear, readily understandable graphic form, for quick comprehension at a glance.

From finding your favorite songs, to finding your way to any destination, the iDrive is the perfect travel companion.
Navigation: BMW’s Navigation system uses Global Positioning System (GPS) satellites and data stored on an internal hard drive to guide you to your destination. A variety of detailed maps show — and tell — the directions. Enhancements include 3-D daytime and nighttime maps, zoom, travel planner, an Assistance Window, and Real Time Traffic Information. The Navigation system also offers Voice Recognition, for convenient, hands-free operation.

Radio/CD/MP3: Get quick, convenient access to your ideal driving soundtrack. The Entertainment menu controls all audio system functions, including radio tuning and station presets, tone, CD/MP3 selection and more. Or hook up your MP3 player to the iPod® and USB adapter to scroll through your favorite playlists via the iDrive Controller. HD Radio™ and SIRIUS Satellite Radio add even more choices to the audio landscape.

SIRIUS Satellite Radio: Enjoy more than 130 channels of the most innovative satellite radio music, news, sports, talk, comedy and entertainment. All 69 music channels are commercial-free — and it’s delivered coast-to-coast in crystal-clear digital sound, 24 hours a day. The Best of XM offers additional premium programs, like Oprah & Friends®' 10 channels of XM Pay-by-Play sports and more. You can also select SIRIUS channels through the Drive system or Voice Command, and enter them into the programmable memory buttons.

Telephone/Address Book: Make hands-free phone calls with ease, using the Bluetooth® interface. Convenient wireless technology allows you to make calls without removing your phone from your pocket or purse. Use the Voice Command system to operate various entertainment and Navigation functions, as well. The phonebook downloading feature lets you access all your mobile phone numbers, all readily available via spoken command, iDrive or preprogrammed memory key.

Real Time Traffic Information: Whether you select the short route, the fast route, or the scenic route, you never want to get stuck in traffic. In many large cities, Real Time Traffic Information, included with the Navigation system, displays and describes current local traffic information on your monitor. This service notifies you of congestion on your planned route, as well as alternate routes, so you can change course and possibly avoid delays.

BMW Assist™ Safety Plan is included for four years at no additional cost. You’ll enjoy peace of mind knowing a response specialist is there to help you, 24/7, at the push of a button, with Automatic Collision Notification, Roadside Assistance, Teleservice, Door Unlock, Stolen Vehicle Recovery, and more. With the Navigation system, MyFavs allows you to send business and street addresses to your BMW from your computer, for route guidance. Add the Concierge Plan for Concurance service, personalized Directions, Traffic and Weather reports, and four operator-assisted calls if your cell phone is not available or if its battery is discharged.

See page 78 for details on standard and optional services available with BMW Assist.

Two reasons why BMW is a smart choice:
Intelligent lightweight design. BMW’s Advanced Safety System.

One of the 6 Series’ most significant technological innovations is its intelligent lightweight construction. Wherever appropriate, BMW makes use of a range of durable, lightweight materials. For example, in addition to much of the front and rear suspension, the doors and front section are made of aluminum; the front fenders are thermoplastic; and the trunk lid is fiberglass-reinforced plastic composite. The lowered vehicle weight offers many benefits: increased fuel efficiency, enhanced roadholding, for greater driving pleasure; and a greater ability to avoid accidents, otherwise known as “active safety.”

Add the 6 Series’ rear-seat-friendly 55/45 weight distribution between the front and rear axles, and you enjoy an unparalleled driving experience.

A vehicle that offers this degree of high performance also requires the highest levels of protective safety features. The 6 Series is equipped with BMW’s Advanced Safety System—a comprehensive passive safety system that is designed to enhance the restraint systems’ response to real-world accidents. In the event of a severe accident, this system can decide the most effective deployment of the 6 Series’s safety belts. The 6 Series also includes Active Head Restraints, a feature that helps reduce front-seat occupants’ risk of neck injury in the event of a rear-end collision. All 6 Series passive safety systems are activated in a fraction of a second—safety belt pretensioners are triggered, the fuel pump is switched off; central locking unlocks the doors, and interior and hazard warning lights are switched on. In low-speed collisions, crash tubes in the front and rear bumpers help prevent body damage. In accidents at higher speeds, the 6 Series body—designed with outstanding torsional and bending stiffness—directs crash forces around the passenger cabin, while deforming in a predetermined pattern. And the 6 Series Convertible adds the reassurance of a reinforced windscreen frame positioned for maximum strength, as well as BMW’s Rollbar Protection System, enhancing all occupants’ margin of safety.

Depending upon the type of accident, some of the devices may deploy.

Relaxed.
Monaco Blue Metallic – the deep blue of the sea – meets the light sand of Cream Beige Pearl Leather, with Maple Wood trim. If summer is your season, then this combination will evoke an endless vacation.

Smooth.
A Titanium Silver Metallic exterior, with Black Pearl Leather upholstery and Brushed Aluminum trim: the cool jazz of a monochromatic palette, enlivened by the gleam of metal.
White LED turn indicators are an attractive functional detail that add to the BMW 6 Series’ sporty style.

Side indicator lights add to the 6 Series’ distinctive individuality.

Adaptive Brake Lights help following drivers judge your braking intensity. Under light braking, the lower three rows of long-life LEDs in the rear brake-light unit illuminate. During panic braking, Dynamic Brake Control (DBC) signals for the two upper rows of LEDs to illuminate.

Halogen free-form foglights, built into the front air dam, enhance your margin of safety in bad visibility. Ellipsoid free-form technology provides for even light distribution on the road.

Xenon Adaptive Headlights are incorporated into the redesigned headlight cluster with all-clear lenses. The Adaptive Headlights function provides optimum road illumination around corners, thanks to an electronic/telematic control system that directs the headlight into and through the bend as soon as the vehicle begins cornering. Xenon headlights provide brilliant clarity of the road ahead and to the side, both at night and in conditions with poor visibility.

The dynamic auto-leveling feature adjusts for varying passenger and cargo loads, helping to keep headlight glare out of the eyes of oncoming drivers. The Corona headlight rings that circle both the headlights and high beams also act separately as Daytime Running Lights and parking lights.

High-pressure headlight cleaning system keeps your headlights clear of ice, mud, road salt and other coatings, for maximum road illumination and enhanced driving safety.

Door handles in body color combine sleek design and comfortable use.

Comfort Access system offers convenient keyless access to your car. Simply carrying the remote key in a pocket or purse allows you to unlock the doors by touching the door handle. You can also turn the engine on or off by pressing the Start/Stop button without inserting the remote key.

Heated glass rear window in the 6 Series Convertible can be raised independently of the softtop to reduce air turbulence and create a quieter cabin when driving at higher speeds. When driving in slower traffic, or when the softtop is raised, the window can also be lowered out of sight. (650i Convertible only)

Tilting glass panel roof gives the interior an even brighter, more spacious feel. For greater ventilation, it tilts up; an electric sliding interior roofliner keeps the hot sun out. (650i Coupe only)

Automatic fin roof Convertible softtop is triple-lined and fully automatic. Simply press a button at the front of the center console to raise or lower. The top automatically unlatches from the header and folds down neatly. An interior lining helps reduce wind noise and enhances insulation. The heated glass rear window can be raised or lowered independently of the softtop. Available in Black or Gray. (650i Convertible only)

Star Spoke (Style 249) forged alloy wheels, 19 x 8.5 front, 19 x 9.0 rear; and 245/40 front, 275/35 rear run-flat all-season tires. (not available with Sport Package)

Due to low-profile tires, please note: wheels, tires and suspension parts are more susceptible to road hazard and consequential damages. Performance tires are not recommended for driving in snow and icy road conditions. Run-flat tires do not come equipped with a spare wheel and tire.
**3-spoke leather-wrapped multi-function sport steering wheel** offers controls for audio system, cruise control and (accessory) phone. Cruise control is deactivated (activated via the left-hand side steering column switch). Cruise control is deactivated when the vehicle comes to a complete stop if traffic calls for it. When you press the accelerator, ACC can bring you to a complete stop if traffic calls for it. When you press the accelerator, ACC can bring you to a complete stop if traffic calls for it.

**Head-Up Display** projects important travel information, such as current speed, on the windshield directly in the driver’s line of vision. Directions areas from the Navigation system. Check Control data and Active Cruise Control functions can also be displayed. (Note: Head-Up Display not available with green band windshield.)

**Lane Departure Warning feature** alerts the driver by discreetly vibrating the steering wheel if the vehicle crosses lane markings. It is not a substitute for the driver’s own responsibility in maintaining safe control of the vehicle. After evaluating road, traffic and visibility conditions, the driver must decide whether and how the system is used. Requires a digital zoom that increases in intensity as your vehicle approaches an obstacle. Turn signals aid the driver when the distance closes to 12 inches. A visual representation is also projected on the Drive Control display.

**Dynamic Driving Control** delivers a precise, athletic feel that’s responsive to your personal driving style. This is due, in part, to the enhanced synchronization of shifts from neutral to each gear. The gearbox adds to the sporty feel, with a shortened shift lever and throw.

**Park Distance Control (PDC),** front and rear, helps parking and maneuvering in tight spaces. The distance between your vehicle and an obstacle is indicated by an acoustic signal that increases in intensity as your vehicle approaches the object. A variety of detailed maps show – and tell – the directions. Enhancements include 3-D daytime and nighttime maps, zoom, travel planner, an Assistance Window, and Real Time Traffic Information. The Navigation system also offers Voice-Recognition, for convenient, hands-free operation. 

**Night Vision** is BMW’s amazing system that helps you detect pedestrians or animals in the dark – up to 1640 feet ahead. Using an infrared camera built into the front of the vehicle, you will be able to see potential road hazards displayed on your Navigation system monitor, and avoid them well before they are visible to the naked eye. At higher speeds, a digital zoom provides an enlarged image of more distant objects on the screen.

Lights package includes: vicinity lighting in the outside mirrors; illuminated door sills with glowing BMW letters; glove compartment lighting; and “puddle lights” – door handles that light up the ground as the door is opened.

Standard equipment:
- Automatic-dimming interior and exterior mirrors respond to the brightness of following headlights to minimize their reflection in the eyes of the driver.
- Rain sensor uses infrared light to measure the amount of rain. When the wipers are in the "Intermittent" mode, the rain sensor automatically adjusts the windshield wiper interval as needed.
- Automatic headlight control, included with rain sensor, activates headlights by means of a sensor that responds to darkness.

Optional equipment:
- BMW Universal garage-door opener takes the place of up to three remote-control devices. It can activate remote functions outside the vehicle, such as garage-door openers or home-lighting systems.
- Comfort Access system offers an even greater degree of convenience: keyless access to your car. Simply carrying the remote key in a pocket allows you to lock/unlock the doors and trunk by touching the door handle or trunk button. You can also turn the engine on or off by pressing the Start/Stop button without inserting the remote key.
  "Comfort access" only applies with special equipment and describes the function in used in text.
iPod and USB adapter with cable connector lets you integrate the iPod, iPhone™ and other MP3 players into the audio system, and control various audio functions through the iDrive Controller or the multi-function buttons on the steering wheel.

Six-disc CD changer is included with the Premium Sound Package. Conveniently located in the glovebox, it lets you enjoy over six continuous hours of your favorite music and is capable of MP3 playback.

Logic7 premium audio system with 13 upgraded speakers™ and state-of-the-art audio technology. For more information, visit www.loudness.com/Logic7.

Cold Weather Package lets you enjoy winter to the fullest. There’s nothing like the feel of a quick-warming seat and a heated steering wheel on a cold morning or stormy night – and the reassurance that your skis and other items are secured inside.

Ski bag allows clean and secure transport of up to four pairs of skis and ski poles. When not extended for use, the ski bag is stored out of sight behind the center armrest.

Heated steering wheel makes gloves unnecessary for cold-weather driving. A flick of the switch quickly warms the steering wheel to the perfect temperature.

650i Sport Package adds to the dynamic look, performance and even sound of the 6 Series Coupe and Convertible. Larger, more aggressive forged alloy wheels reduce unsprung weight for more precise steering feel. Their sporty styling complements the run-flat performance tires. In front, there’s a contoured hood; at the rear, a sportier-sounding exhaust is played through chromed exhaust tips. The Sport Package also offers two additional, exclusive exterior paint choices, as well as the supple look of Black High-Gloss finish shadowline trim. Inside, power front seats provide comfortable support, while an Anthracite Alcantara headliner on the Coupe – Anthracite on the Convertible – complements the high-performance look and feel.

As you take off, those left behind are treated to the sight of muscular run-flat performance tires and the triumphant roar of the specially tuned exhaust, blowing through dual chrome tips. Eight-way power front sport seats offer four-way power lumbar support and adjustable headrests with Active Head Restraints. Thanks to specially padded, highly contoured side bolsters, sport seats provide optimum side support during tight cornering, while remaining exceptionally comfortable when driving over long distances. The seats have power adjustments for seat height, backrest angle, seat bottom angle and forward/backward position; includes manual adjustments for high-support and headrest (available only with Sport Package, power headrest adjust-ment in 650i Convertible sport seats);

**Tire Pressure Monitor** is an electronic control system designed to warn the driver if there is a sudden and irregular loss of tire pressure. Should the target pressure of a tire fall below 25%, a warning light alerts the driver. This system senses even in underinflated tires to provide optimum restraint in the case of severe side impact. (530i Coupe only)

**Bumper system** features replaceable deformation units in the front that can absorb impacts at speeds of up to 2.5 mph. Replaceable deformation zones in the front and rear absorb impacts at speeds up to nine mph, reducing damage to the vehicle structure. (650i Coupe shown)

**Dynamic Stability Control (DSC), including Dynamic Traction Control (DTC),** provides remarkable tenacity on slippery road surfaces. If the system senses over- or understeer, it modulates engine power and can apply brakes individually to help stabilize the vehicle and regain control.

**Xenon Adaptive Headlights**: The Adaptive Headlights function provides optimum road illumination around corners, thanks to an electromechanical control system that directs the headlights into and through the bend as soon as the vehicle begins cornering. **Battery Safety Terminal**, in a serious collision, disconnects the starter cable from the battery in milliseconds, minimizing the risk of an electrical fire. Additionally, the fuel supply is automatically cut off, however, warning flashers, interior lights and power window remote control.

**BMW Assist™** with Bluetooth® system offers hands-free calling through your BMW-approved Bluetooth phone. The BMW Assist Safety Plan is included for four years, providing Automatic Collision Notification, Emergency Request, Roadside Assistance, Door Unlock, Stolen Vehicle Recovery, TeleService and more. The optional Convenience Plan offers Directions, Traffic, Weather, Critical Calling and Concierge services. See page 78 for details of standard and optional services available with BMW Assist.

### BMW and the Environment

BMW is a strong proponent of environmental and social responsibility. It is important to manage the earth's resources responsibly, and not to jeopardize the needs of future generations. That is why BMW vehicles are manufactured with maximum environmental impact in mind. BMW processes and manufacturing facilities as a charter member of the voluntary National Environmental Performance Agreement. BMW has been rewarded with the first automotive partnership formed under the banner of the Drive Stamp Donor Group. The stamp has been issued to BMW for high performance in everything BMW does.

If you have ever wanted to drive a BMW as unique as it is elegant, BMW Individual can turn this dream into a thrilling reality. Special paints offer greater color intensity and more dramatic effects than traditional metallic paints; an innovative five-coat paint process generates a two-tone iridescence. The interior is fitted with the highest quality full leather upholstery and interior trims, transformed by master craftsmen into a truly stunning customized vehicle. Choose from a palette of exclusive colors and materials to create a vehicle that reflects your personal style. For example, combine Ruby Black Metallic paint with an interior of warm Rust Brown Merino Leather and Walnut Amarone trim. Or pair an Azurite Black Metallic exterior with Platinum Merino Leather upholstery, offset by Piano Black trim. All include illuminated BMW Individual signature door sills, 19" BMW Individual light alloy wheels with performance tires, and High-Gloss shadowline exterior trim. The Coupe features an Alcantara headliner; the Convertible, a Black softtop with cloth Anthracite headliner and seats cooled by Sun-Reflective Technology. To learn more about the BMW Individual 6 Series, and see the rich colors and exquisite materials firsthand, visit your local authorized BMW center.
