Want the inside scoop on BMW? You can find us on Facebook® at facebook.com/truebmw.

The silhouette of a sleek, muscular coupe. The dynamic traction of an SUV. The lightning-quick cornering of Dynamic Performance Control. The availability of advanced ActiveHybrid power. The BMW X6 is the world’s first true Sports Activity Coupé—a concept where TwinPower Turbocharging, sophisticated luxury, and flexible storage and seating all support your driving ambitions.

BMW X6 with the following equipment:

- 3.0-liter TwinPower Turbo
- 4x4 drive
- Adaptive Hid Xenon Lighting
- Interior har./hi-fi sound system
- Tyre Pressure Monitor
- Active Distronic Cruise Control
- Damage Warning System
- Drive Select
- Surround View
- BMW Head-Up Display
- BMW ConnectedDrive
- BMW Sports Seats
- Power Side Mirrors
- BMW Individual Trim
- BMW Individual Leather
- BMW Individual Exterior M Performance Package
- BMW Individual Interior M Performance Package

For details and optional equipment visit www.bmwusa.com/x6.
THE ALLURE OF THOUGHTFUL DESIGN.

BMW’s engineers and designers have created an exciting and practical class of all-wheel-drive vehicles: a Sports Activity Coupé®. Equal parts sensual and sensible, its sure-footed athleticism and striking appearance are matched by the practicality of four doors and a usable cargo area. It’s a vehicle that makes no compromises in performance — on the road or in your daily life.
BREAKING NEW GROUND.
SETTING NEW STANDARDS.
The BMW X6’s innovative, sporty look reflects the components that give it a sports car-like driving feel that’s not usually associated with SUVs. In addition to a powerful engine and taut suspension, BMW’s revolutionary Dynamic Performance Control technology can transfer power between the rear wheels for quick high-performance cornering. Adaptive Drive adds Active Roll Stabilization (ARS) and Dynamic Damping Control (DDC) to the mix. ARS helps eliminate body roll, keeping the vehicle level, stable and agile; DDC continuously adjusts the shock absorbers from the softest to the firmest settings for outstanding compliance and body control. In the BMW X6, it all comes together in a unique driving experience.

ADAPTABLE GRIP AND SMART BRAKES
TO CONQUER ANY ROAD, IN ANY WEATHER.

Not all roads are dry and level. That’s good news for the BMW X6. It welcomes challenges, easily tackling rough surfaces, tight corners, steep climbs and steep downhills. On steep downhill grades, press the Hill Descent Control button to help keep the BMW X6 to a steady crawl without even touching the brakes. Speaking of brakes, Dynamic Stability Control includes four innovative brake-optimizing features. When stopped on a hill, Start-off Assistant helps keep the BMW X6 from rolling after you take your foot off the brake pedal. When you quickly take your foot off the accelerator, Brake Stand-by anticipates the need for a short stop, and pre-tenses the calipers. Whenever moisture is detected, Brake Drying periodically, discreetly brings the brake pads into contact with the rotors to help dry them. And on long, gradual downhill slopes, BMW’s Brake Fade Compensation helps keep your brake pedal action even, so you don’t have to keep increasing brake pressure.
In addition to inventing its own class, the BMW X6 brings with it a host of innovative technologies. For example, power distribution is nominally 40% front axle, 60% rear for balanced handling. However, BMW’s xDrive intelligent all-wheel-drive technology continuously and undetectably transfers power forward and back between both axles, depending upon which has greater traction. Dynamic Performance Control adds a secondary functionality of shifting power between the rear wheels. This helps maintain the sportier driving dynamics associated with rear-wheel-drive vehicles, so you get the best of both worlds: sporty road feel combined with pavement-hugging traction. It’s an idea that perfectly fits the BMW X6.
The BMW X6 may be difficult to classify at first glance. But from behind the wheel, it looks exactly like a BMW. The leather-wrapped multi-function sport steering wheel swiftly transmits your every driving input. Shifting-wheel-mounted paddle shifters deliver a motorsport-inspired experience. Every gauge and instrument is easy to read, every control is conveniently placed within arm’s length. Standard appointments include iDrive, which offers a variety of entertainment and communications options, six programmable memory buttons, and a hard drive with 12 GB of space that can store up to 2,000 songs. A unique touch: kneepads that give your legs a better grip in tight turns. And the commanding seat position reminds you that once you’re in the BMW X6, you’re in charge of the road.
360 DEGREES OF PURE BMW LUXURY.

You have to hand it to the BMW designers; they truly understand the concept of comfort. The BMW X6 offers a spacious interior, with a surprising amount of leg- and headroom for both the front and back seats. And while some all-wheel-drive vehicles may sacrifice luxury for utility, the BMW X6 impresses with a wealth of premium interior features, such as supple Nevada Leather upholstery and luxurious Dark Bamboo Wood trim. So no matter what the scenery outside offers, the view of the cabin is always first-rate.

BMW EfficientDynamics: Vehicles that require little and give a lot.

BMW was one of the first automotive manufacturers to pursue efficient driving technologies— one part of our award-winning sustainability strategy. Our commitment to EfficientDynamics means we are continuously developing innovative systems targeting all aspects of our long-term goal of emissions-free mobility. However, we remain equally committed to driving pleasure, which is being pursued in different ways. First, there is the continued optimization of conventional diesel- and gasoline-powered models. Second, BMW (hybrid) vehicles are already on the road. Third, the first 100% electrically powered BMW—the BMW ActiveE—is being distributed in a field trial to customers. And fourth, the fuel cell BMW氢7 vehicles impressively demonstrated the potential for combining hydrogen drive with a combustion engine.

Since 1995, BMW has been able to reduce the CO₂ emissions of its entire fleet by approximately 30 percent. BMW has rolled out more than two million vehicles equipped with EfficientDynamics: 31 models already produce less than 225g of CO₂ per mile, and BMW intends to achieve a further 25 percent reduction by 2020. BMW EfficientDynamics represents the most comprehensive package of innovative technologies currently in production, for reducing fuel consumption and emissions while simultaneously creating The Ultimate Driving Machine.

In early 2010, BMW launched its first production models with hybrid drive: the BMW ActiveHybrid 7 and the BMW ActiveHybrid X6. Both models offer an unparalleled combination of increased fuel efficiency, reduced emissions and thrilling performance. The BMW ActiveHybrid 7, with its innovative 7-speed electric drive system, introduces a whole new form of dynamic performance, paving the way for the future of emissions-free mobility. Finally, a completely new vehicle concept targeted at meeting the need for sustainable mobility in fast-growing metropolitan areas will soon become reality: the BMW i.

Different paths to the same destination: unbreakable BMW driving pleasure.

BMW’s vision of EfficientDynamics: Vision becomes reality. In 2014, BMW plans to debut the BMW Vision EfficientDynamics low-emissions 1+2 sport coupe featuring groundbreaking plug-in hybrid technology that combines sports car performance with compact-class consumption. Positioned by the next generation of fuel-efficient vehicles, a compact form—generator size of 256 ft² through a 165 ft² front—three-cylinder turbo diesel engine with 295 lb-ft of torque, an advanced high-voltage battery and fully hybrid drive systems on the rear axle. With a range of up to 64 miles, its ratio of performance to fuel consumption is already impressive, providing BMW with the anchor in leading manufacture of environmentally friendly, sporty luxury.

Not all BMW EfficientDynamics features are available on all models. Please ask your authorized BMW center for details.
A TURBOCHARGED DRIVING EXPERIENCE IS PAR FOR THE COURSE.

Dynamic driving requires an engine that can keep up. These engine options for the BMW X6 offer plenty of muscle to go from smooth highway driving to exhilarating uphill charges, all with BMW’s signature crisp acceleration and responsive powerband. You’ll find the BMW X6 is capable of handling even the most challenging drives with ease.

“Turbo lag” is virtually a thing of the past, thanks to BMW’s innovative use of turbocharging technology, direct injection, Double-VANOS and clean engine management software. These features also help make BMW turbocharged engines remarkably fuel-efficient.

THREE ADVANCED ENGINES. ONE GREAT VEHICLE. THE BMW X6.

How do you like your power? With the BMW X6, you have your choice of two combustion engines and an advanced ActiveHybrid BMW X6 xDrive40e(i) BMW's award-winning 1.0-liter TurboPower Turbo offers a potent 300 hp and 300 lb-ft of torque. In addition to High Precision Direct injection, it is equipped with both turbocharging and BMW's Valvetronic throttle-less intake technology. This combination delivers improved throttle response from idle to redline, as well as reduced fuel consumption and substantially reduced emissions.

BMW X6 xDrive35i: For this commanding powerhouse, BMW engineers developed a V-8 that features a cutting-edge TurboPower Turbo for reliable, virtually lag-free performance and acceleration in any situation. Brawny and efficient, this 400-hp engine generates 450 lb-ft of torque to propel the BMW X6 xDrive50i from 0-60 in a scant 5.2 seconds.

Both of these BMW X6 models channel power through an innovative 8-speed Sport Automatic transmission that delivers quick shifts, silken smoothness and enhanced efficiency. Use the sleek, ergonomically designed electronic shift knob to select Automatic with Adaptive Transmission Control, Sport, or Intermediary Manual shift modes. And when the urge for racing-inspired driving excitement strikes, steering wheel-mounted paddle shifters offer quick control.

An engineering masterpiece, the BMW X6 xDrive35i TurboPower Turbo engine produces 300 hp at 5800 rpm and quickly develops 300 lb-ft of torque at 1300 rpm, which continues without fading through to the 5000 rpm range. With such a broad range of powerful torque, you can enjoy smooth, robust acceleration in any gear, at any speed.

BMW EfficientDynamics

Less emissions. More driving pleasure.
A FORM OF HYBRID POWER THAT’S NOTHING SHORT OF ELECTRIFYING.

Forget everything you previously thought about hybrids: that they are slow, unexciting vehicles that sacrifice fun in the name of frugality. Just as the BMW X6 is the world’s first Sports Activity Coupé, the BMW ActiveHybrid X6 features an advanced form of power that’s revolutionizing the industry. This “full hybrid” combines the awe-inspiring muscle and acceleration of a BMW V8 gasoline engine with the super efficiency of two electric motors, harnessed by a two-mode transmission. No other hybrid can surpass the BMW ActiveHybrid X6’s combination of acceleration, top speed and distance. Under 10 mph, and for 0.5 miles, the electric motors can be used alone – silently and smoothly generating maximum torque from a standing start. Over 40 mph, the combustion engine takes over. Running on a combination of electric and gasoline power, the BMW ActiveHybrid X6 makes the trip from 0 to 60 in 5.6 seconds. Yet even though it is heavier than its combustion-powered, 400-hp sibling, it achieves 20 percent greater efficiency. This is truly the “Best of Hybrid” – BMW-style.  

BMW AG test results. BMW urges you to obey all posted speed limits and always wear safety belts.
Streamlined (Style 267) to a 1,103 front, 20 x 11 rear high alloy wheels with 275/40, 30 x 10, run-flat performance tires! come to increase uphill weight for increased performance.

Experience Stillness without Stirring Still. At speeds of up to 60 mph, the BMW ActiveHybrid X6 is able to run on electric power alone for brief periods. This occurs automatically and allows you to drive almost silently – and, above all, totally emissions-free. You can hardly experience more serene driving pleasure than that.

ARGUBLY THE BEST BRAKING POWER GENERATOR. Brake Energy Regeneration – the principle of regenerating braking energy – is as simple as in intelligent. Each time you apply the brakes or take your foot off the accelerator pedal, kinetic energy is released. Light braking boosts this energy generation further – which, in the BMW ActiveHybrid X6, is made available to the high-performance braking system. This can then be re-used once the energy is no longer required. The brake pedal feels more comfortable, and the brake distances are significantly shorter. This is because the engine switches off when the vehicle is stationary. This cuts fuel consumption and emissions, especially in city traffic, so you are doing a favor to both your wallet and the environment.

Accelerating the exhilaration. The BMW ActiveHybrid boost function is proof that enhanced efficiency can go hand-in-hand with maximum driving pleasure. With this feature, the electric motor gives a temporary – but potent – boost to the combustion engine's output. A key advantage in that it provides instantaneous, powerful output, especially from a standing start, as well as during acceleration and when passing. As a result, the BMW ActiveHybrid X6's performance is significantly enhanced without sacrificing more gasoline. Learn to BMW to increase driving enjoyment while reducing consumption and emissions.

Intelligent Energy Management Starts Before You Do. Every time you come to a stop or take your foot off the accelerator pedal, the engine switches off. This is possible without degrading performance, especially in city traffic, so you are doing a favor to both your wallet and the environment.
In a right-hand curve, Dynamic Performance Control applies additional power to the left rear wheel, enabling the vehicle to “turn in” faster. Because of the reduced understeer, the vehicle corners with greater control and precision.

Previously, cornering technologies minimized understeer by applying the brakes to the inside rear wheel, slowing the vehicle down. And unlike other manufacturers’ cornering technologies, BMW’s Dynamic Performance Control works all the time— even when you take your foot off the accelerator in corners. The result is constant control, experiencing quicker turns and improved handling for optimum performance.

Dynamic Performance Control also works in tandem with Dynamic Stability Control (DSC), to keep intervention to a minimum when accelerating out of a bend. With Dynamic Performance Control, you fully appreciate the power and performance of the BMW X6 in virtually any driving situation.

The goal of BMW suspension engineers is to combine sporty handling with optimum body control and ride comfort. In addition to a meticulously tuned chassis, xDrive intelligent all-wheel drive and Dynamic Performance Control, the BMW X6 offers two features that take driving response even further: Active Steering delivers greater driving enjoyment with even more direct steering when cornering, and greater agility on twisty sections of road. At low and moderate speeds, it takes just two turns of the steering wheel to move the front wheels from far left to far right. When the steering wheel is turned the same amount at higher speeds, the steering ratio gradually changes, providing greater directional stability and more comfortable cruising.

Dynamic Performance Control also works in tandem with Dynamic Stability Control (DSC), to keep intervention to a minimum when accelerating out of a bend. With Dynamic Performance Control, you fully appreciate the power and performance of the BMW X6 in virtually any driving situation. All-wheel-drive technology takes an innovative new turn.

Active Drive offers performance-elevating Active Roll Stabilization (ARS) and ride-enhancing Dynamic Damping Control (DDC). In corners, the vehicle’s body tends to roll, affecting handling characteristics. ARS vastly designed two-piece anti-roll bars to generate stronger resistance to body roll, keeping the vehicle more level and providing maximum stability and agility. DDC, on the other hand, instantly and continuously adjusts the shock absorbers from the softest to the firmest settings. The result is exceptional riding comfort and fluid handling at all times, during changes in vehicle speed, load or driving conditions.

Adaptive Drive offers performance-elevating Active Roll Stabilization (ARS) and ride-enhancing Dynamic Damping Control (DDC). In corners, the vehicle’s body tends to roll, affecting handling characteristics. ARS vastly designed two-piece anti-roll bars to generate stronger resistance to body roll, keeping the vehicle more level and providing maximum stability and agility. DDC, on the other hand, instantly and continuously adjusts the shock absorbers from the softest to the firmest settings. The result is exceptional riding comfort and fluid handling at all times, during changes in vehicle speed, load or driving conditions.

PREVIOUSLY, CORNERING TECHNOLOGIES MINIMIZED UNDERSTEER BY APPLYING THE BRAKES TO THE INSIDE REAR WHEEL, SLOWING THE VEHICLE DOWN. AND UNLIKE OTHER MANUFACTURERS’ CORNERING TECHNOLOGIES, BMW’S DYNAMIC PERFORMANCE CONTROL WORKS ALL THE TIME—even when you take your foot off the accelerator in corners. THE RESULT IS CONSTANT CONTROL, EXPERIENCING QUICKER TOUGHS AND IMPROVED HANDLING FOR OPTIMUM PERFORMANCE.

Dynamic Performance Control integrates seamlessly with Dynamic Stability Control (DSC) to keep intervention to a minimum when accelerating out of a bend. With Dynamic Performance Control, you fully appreciate the power and performance of the BMW X6 in virtually any driving situation.

In a left-hand curve, Dynamic Performance Control allocates more driving torque to the right rear wheel, enabling the vehicle to “turn in” with less understeer.

Dynamic Performance Control lets you hug corners more tightly and take them more quickly. In addition to precise control, its seamless distribution of power between the two rear wheels adds greater agility and sportiness for a thrilling driving experience.

Greater agility at low and medium speeds: With Active Steering, a small turn of the steering wheel translates into a big turn of the front wheels.

At higher speeds, greater stability and precision: A bigger turn of the steering wheel is needed to turn the front wheels.

BMW X6 active safety features continues – as does your driving peace of mind. Slopes with ease, keeping you at a low, steady speed without riding the brake. The list goes on.

When it comes to active and passive safety, the BMW X6 is an overachiever. As would expect from a company committed to innovative ideas, the BMW X6 is filled with state-of-the-art safety features. “Active” safety features help you avoid getting involved in an accident. Like all BMWs, the X6 responds to your evasive maneuvers with quick acceleration, nimble handling and fade-resistant braking. During normal driving, if you slam on the brakes, the X6’s Dynamic Brake Control applies the maximum available stopping power. At the same time, the Adaptive Brakelights feature automatically activates additional brake light surfaces, signaling the intensity of your stopping action to those following you. The BMW X6 also includes a wealth of other intelligent active safety features. At night or in poor lighting conditions, Xenon Adaptive Headlights automatically swivel in the direction you are turning, keeping the road ahead illuminated – even around bends.

In a severe impact, the BMW X6’s extremely rigid steel structure is designed to route impact forces around the passenger cell, and deform in a predetermined way. The BMW Advanced Safety System coordinates the activation of airbags, head restraints, safety-belt pretensioners and more, all helping to protect you and your passengers.

Adaptive Headlights automatically swivel in the direction you are turning, keeping the road ahead illuminated – even around bends.

BMW Assist gives you peace of mind knowing that a friendly response specialist is there to help you 24/7, at the touch of a button. The Safety Plan includes Automatic Collision Notification, Emergency Request (SOS), TelServices, Enhanced Roadside Assistance, Door Unlock, Stolen Vehicle Recovery, Customer Relations and MyFacts. The Convenience Plan adds personalized Directions, Traffic and Weather reports, BMW Online and Concorso services for restaurant and hotel recommendations, with the destination address and phone number sent to your BMW. Make-up to four operation-assisted calls per year with Critical Calling if your mobile phone is not available or its battery is discharged.

BMW Online allows online access to up-to-date traffic and gas station locations; the latest weather forecasts, watches and warnings; Dow Jones, S&P 100 and NASDAQ indices; and the powerful reach of the Google Maps database – all delivered on the Control Panel inside your vehicle. Access maps headway and have them read aloud via Text-to-speech technology. “Send to Me!” projects your current location and planned destination, and allows you to send the information to any smartphone or email account. Then it’s just a quick hyperlink to Google Maps for your friends and family to see where you are and where you’re going.

BMW Apps lets you access Social Networks, music PlugIn and Video Playback through your iPhone, and see them on the Display screen. Tune into Web radio and search for stations from around the globe by name, location or genre. You can also store your favorite stations, find similar stations, display station information, and change the quality of the audio. Four favorite entries are stored on your iPhone, so you can take them with you from one vehicle to another. Please note: • Available in models manufactured as of April 2013. • Websites, applications and availability depend on the country and region. • Not all features available while vehicle is in motion; see dealer for details.

BMW Assist allows you to send business locations and street addresses to your BMW from Google Maps™; Destinations and phone numbers can be accessed and exported to your navigation system for immediate route guidance, while you can call the destination with your Bluetooth linked phone.

Use the time you spend in your vehicle even more effectively with BMW’s Mobile Office feature! For example, when your vehicle is paired with a selected Bluetooth® interface, text messages and emails are transferred to your Drive Display screen – and our system even reads them aloud to you. Thanks to Bluetooth audio streaming, you can enjoy seamless playback of your music files; your personal audio library can even be accessed via the Drive Controller. Whether you’re far from home or just in the next town, BMW Assist™ offers convenience and peace of mind. There are now ConnectedDrive features that extend BMW’s leadership in wireless communications, Marvel at an extensive array of new Mobile Office functions. Get a visual image of your callers. With BMW Assist, you enjoy all this – and more.

Whether you’re far from home or just in the next town, BMW Assist™ offers convenience and peace of mind. There are now ConnectedDrive features that extend BMW’s leadership in wireless communications, Marvel at an extensive array of new Mobile Office functions. Get a visual image of your callers. The pages in this section of the brochure show available colors and materials for the BMW X6. Use these samples to compare paint, upholstery, trim colors and combinations. Please note that these samples are representations; they are not exact reproductions. To see the actual colors, visit your authorized BMW center. They will be happy to show you original samples and assist you with special requests.

**Paints.**

- 309 Alpine White Non-metallic
- 430 Jet Black Non-metallic
- 354 Titanium Silver Metallic
- 469 Black Sapphire Metallic
- 468 Space Gray Metallic
- 402 Oyster Black Metallic
- 394 Khaki Black Metallic
- 399 Pearl Silver Metallic

**Upholsteries.**

- LUSW Black Nevada Leather
- LUB4 Sand Beige Nevada Leather
- LUCX Oyster Nevada Leather
- LUD3 Saddle Brown Nevada Leather
- LUSW Black Perforated Nevada Leather
- LUB4 Sand Beige Perforated Nevada Leather
- LVSW Black Nappa Leather
- LUCX Oyster Nappa Leather
- LUCX Champagne Full Merino Leather
- LUCX Platinum Full Merino Leather
- LUCX Champagne Full Merino Leather
- LUCX Platinum Full Merino Leather

Please refer to the Recommended color combinations chart on page 35 for complete limitations and exclusions when selecting upholstery materials and colors.

HEART OF FIRE.

Outside: timeless Jet Black paint and 20-inch Y Spoke (Style 214) wheels. Inside: the glow of red Chateau Nevada Leather against the black dash and carpeting. Like the fire within the coal, the BMW X6 visually smolders, ready to ignite the passion of anyone who comes near.

The flexible cargo space of the BMW X6, with 60/40 split-folding rear seats and available pass-through, maximizes your hauling possibilities. With both rear seats lowered, the BMW X6 provides almost 50 cu. ft. of usable storage space. The storage package adds two lashing rails with four sliding lashing eyes, as well as additional lighting, making it easy to see and secure cargo safely and quickly.
Xenon Adaptive Headlights help enhance nighttime road visibility. Sensors continuously monitor the steering wheel to determine the vehicle's direction. Entering a turn or changes, the outer headlights swivel up to 15 degrees left or right. Xenon low- and high-beam headlights illuminate the road ahead and to the side with brilliant clarity. Coron a headlight-reflective ring system increases visibility and recognition of people and objects.

Recessed, high-intensity headlight washers help keep the lights clean. for maximum road lighting and enhanced driving visibility.

The Kidney grille on the BMW X6's exterior is part of the special BMW X6 Design package. It is available as an option. The kidney grille on the BMW X6 xDrive35i sits over the special BMW X6 Design package. The kidney grille on the BMW X6 xDrive50i and ActiveHybrid X6.

Automatic Brakelights increase vehicle visibility and alert the intensity of your braking action, thereby warning following drivers to brake quickly.

Running boards, designed to add to the BMW X6's overall visual appeal, make it easier for passengers to comfortably enter and exit.

Dual rectangular-shape chrome exhaust tips, integrated into the BMW X6 xDrive50i and ActiveHybrid X6.

Dual circular-shape chrome exhaust tips, integrated into the BMW X6 xDrive35i.

Cornering Lights automatically dim when entering a turn or corner. When the system senses you are making a turn – based on your steering angle and speed – a reflector mechanism in the foglight housing casts additional lighting up to 90 degrees in the direction of the turn. This enhances visibility and recognition of people and objects.

Star Spoke (Style 230) 19 x 8.0 light alloy wheels with 255/50 run-flat all-season tires.

Star Spoke (Style 237) 19 x 9.0 light alloy wheels with 255/50 run-flat all-season tires.

Star Spoke (Style 215) 19 x 8.0 light alloy wheels with 255/50 run-flat all-season tires.

Star Spoke (Style 257) 19 x 9.0 light alloy wheels with 255/50 run-flat all-season tires.

Star Spoke (Style 230) 19 x 8.0 light alloy wheels with 255/50 run-flat all-season tires.

Star Spoke (Style 215) 19 x 8.0 light alloy wheels with 255/50 run-flat all-season tires.
Three-spoke leather-wrapped multi-function sport steering wheel, featuring power tilt/telescoping adjustments, lets you keep both hands on the steering wheel while adjusting both the audio and the steering wheel. Equipped with multifunction buttons, the menu-control element for the iDrive system is conveniently located on the center console. The central command element for the Drive system and can be rotated, pushed and tilted to operate various functions via the Control Display. Additionally, four frequently selected menus – CD, radio, Navigation system and telephone – can be called up using direct menu-control buttons.

Six programmable memory buttons offer convenient storage of your most frequently accessed Drive settings, such as favorite radio stations, Navigation system addresses, phone numbers (when equipped with a BMW-approved Bluetooth enabled mobile phone), and more.

Engine Start/Stop button and remote key control the engine. Twist the remote key into the starter switch slot. After the electronic identification system confirms that it is the correct remote, you can start (or, later, turn off) the engine by pressing the Start/Stop button. (First, make sure the brake is in order to start.)

Navigation system features high-resolution graphic icons and crisp SRS squiggles in conjunction with data stored on an internal hard drive. Includes 3-D day/night and night-time maps, scenic, travel planner and an Assistance Window. The system provides Real Time Traffic Information on potential traffic problems and solutions. The hard drive offers 12 GB of space that can hold up to 2,000 of your favorite songs.

8-speed Sport Automatic transmission provides extremely fast synchronized shifting, whether performed by the Automatic-shift mode or by the race-inspired steering wheel-mounted paddle shifters.

Active Cruise Control (ACC) with Stop & Go feature automatically maintains your set speed and following distance. When ACC recognizes a slower vehicle ahead, it reduces your speed to maintain the preset distance. When the brake must be applied, ACC immediately brings your vehicle to a complete stop. When you press the accelerator, ACC resumes speed according to your presets.

The Drive control is a rounded pad for the driver’s palm. It is responsible for adjusting speed (not direction) and braking. ACC works best when the vehicle is on a straight road. If the vehicle is not moving, such as at the stoplight, ACC does not operate.

In conjunction with data stored on an internal hard drive, the navigation system also provides Real Time Traffic Information on potential traffic problems and solutions. The Nav module offers 12 GB of space that can hold up to 2,000 of your favorite songs.

Electronically controlled steering makes the vehicle extremely responsive and provides instant feedback for the driver.

During a maneuver, ACC supports the driver by automatically maintaining the set speed and distance from the vehicle ahead. When a slower vehicle is recognized, ACC automatically reduces your speed to maintain the preset distance. If you press the accelerator, ACC immediately resumes speed. When the brake pedal is pressed, ACC keeps the vehicle stationary. The system is designed to automatically maintain a safe following distance and speed under the most conditions. The driver must actively monitor the road and be ready to intervene when necessary.
Head-up Display projects important travel information, such as current speed, on the windshield directly in the driver’s line of vision. Directional arrows from the Navigation system and Check Control data can also be displayed.

BMW anti-theft AM/FM stereo CD/MP3 player includes Radio Data System, AutoStore, and 3-Channel FM diversity antenna; reads/displays song title.

HD Radio™ receives free, digital AM/FM broadcasts in clear, static-free sound; multichannel FM stations, and innovative data services.

Storage space abounds throughout the cabin – in the front center console, in door storage pockets and in the rear cabin.

Active driver’s seat helps decrease off-road fatigue or muscle strain. When activated, the driver’s seat surface is continuously and imperceptibly raised and lowered from side to side, keeping your spine in motion and exercising various support muscles.

Heat and air can be adjusted from the multi-zone climate control – both front and rear, select individual temperature and fan settings.

Heat can be applied through the seats, steering wheel, and door panels. Thanks to specially padded, highly contoured side bolsters, sport seats provide optimum lateral support during tight cornering, while remaining exceptionally comfortable when driving over long distances. The seats have power adjustments for seat height, backrest angle, seat bottom angle, forward/backward position and lumbar support. Both driver’s and front passenger’s seats include memory function.

Front-seat ventilation gently blows warm or cool air through the microperforations in the leather to help keep driver and front passenger comfortably dry in hot weather, and warm in colder weather.

Storage in the rear cabin includes overhead bins, a glove box, and floor-mounted cup holders. The rear center console includes a storage compartment and a dual cup holder.
Rain sensor uses infrared light to measure the amount of rain. When the wipers are in the “intermittent” mode, the rain sensor automatically adjusts the windshield-wiping interval as needed.

Automatic headlight control, included with rain sensor, activates headlights by means of a sensor that responds to darkness.

Privacy glass in the rear and rear side windows enhances passenger privacy, while it reduces sun glare and interior heat.

Rear side sunshades keep the sun’s heat and glare away from the rear cabin while maintaining privacy. When not in use, these manually adjustable sunshades conveniently disappear into the side doors.

Ambiance lighting package includes lights in the exterior door handles that radiate downward whenever the doors are unlocked. They illuminate the area outside the doors for approximately 20 seconds to enable safe vehicle access in the dark. Also included are rear reading lights, rear footwell illumination, and Ambiance interior lighting.

BMW INDIVIDUAL: THE MOST EXCLUSIVE WAY TO DRIVE A BMW.

For those who dream of a vehicle that reflects their own unique personality, there is BMW Individual. This collection of combination parts, sumptuous leathers and exquisite trims takes the BMW Individual.

BMW Individual paint finishes: a shade more brilliant. Several thousand shades, in fact. BMW Individual exterior colors are reminiscent of brilliant, iridescent effects. One dramatic example is the Ruby Black Metallic paint finish. Under the light, it develops a deep red luminosity that seems to emanate from countless ruby pigments. Watching a BMW Individual X5 in Arctic Black Metallic move through light and shadow is reminiscent of floating at sea, as the deep blue waves reflect and hide the sun. Citrin Black Metallic combines black tie elegance with the warmth of golden light. And Post Silver Metallic evokes the shimmering, luminous beauty of pearls.

BMW Individual Full Merino Leather: true exclusivity is a tangible phenomenon. BMW Individual Full Merino Leather looks astonishingly soft and velvety, and feels sumptuous. Its secret lies in a painstaking selection process: only absolutely flawless hides are approved for use. As a result, these premium leathers do not require surface treatment. By leasing the leather in its natural state, it retains its breathability, porous structure, remaining soft and supple. All the available Full Merino Leather colors in the BMW Individual X5 – Platinum, Champagne, and Criollo Brown – are designed to complement автомобили BMW Individual paint finishes.

BMW Individual interior trims: top-class craftsmanship for the finishing touch. BMW Individual trims have a magic all their own. Whether you choose Carbon Leather Wrapped, Eucalyptus Red Brown Wood or Piano Black trim, our strict selection process and perfect finishing techniques ensure excellent quality. In creating the Piano Black interior trim, for example, superior craftsmanship is an essential ingredient. In fact, its brilliant, high-gloss surface is the result of a special process usually applied only by the world’s leading piano makers.

Tire Pressure Monitor is an electronic control system designed to warn the driver if there is a sudden and irregular loss of tire pressure. Should the target pressure of a tire fall below 25%, a warning light alerts the driver.

Hill Descent Control (HDC) helps the BMW X6 drive down steep hills without having to "ride the brake." By pressing the HDC button, the system keeps the vehicle's speed under control automatically.

Start-off Assistant keeps the BMW X6 from rolling either backward or forward when you're stopped on an incline. The system momentarily holds the vehicle's position as you take your foot off the brake pedal and start driving.

Dynamic Stability Control provides remarkable traction on slippery road surfaces. If the system senses over- or understeer, it modulates engine power and can apply brakes individually to keep the vehicle under control and going in the intended direction.

Dynamic Brake Control senses "panic" braking maneuvers, and immediately builds up maximum brake pressure. This cuts down the overall braking distances significantly. When Dynamic Brake Control is activated, the system also deploys Adaptive Brakelights. These increase vehicle visibility and signal the intensity of your braking action, thereby warning following drivers to brake quickly.

Run-flat tires allow speeds of up to 50 mph and travel from 30 to 150 miles after a loss of air pressure, depending on the passenger load and weight of articles being transported. In situations that would normally result in a flat tire, reinforced sidewalls help prevent the tire from collapsing or becoming a dangerous hazard. In the event of a decline in tire pressure, the driver is warned by the Tire Pressure Monitor.

Telescoping steering column system allows a collision or accident to absorb a portion of the impact force and collapses, helping to protect the driver.

In the event of a collision, only the airbags that are needed are deployed. This includes front airbags with advanced deployment technology, front side-impact airbags, and front-and-rear HPS (Head Protection System).

Impact-absorbing bumpers and compressible "crush tubes" front and rear help absorb the force of impact to collisions up to nine mph, minimizing damage to the vehicle's body and simplifying repairs. Only at higher impact speeds do structural supports begin to deform, dissipating impact energy to help protect occupants.

Extrremely rigid body creates a protective safety cell that directs severe impact forces around the passenger compartment. Thanks to BMW's intelligent lightweight design and the use of high-strength steels, the interior passenger compartment is surrounded by a remarkably strong shell.

Rollover sensor, linked with the Dynamic Stability Control system, quickly detects when the BMW X6 is at risk of rolling over and assists the driver in maintaining control of the vehicle. If a rollover is imminent, the airbags and the safety-belt pretensioners are immediately triggered to provide additional occupant protection.

Actively Head Restraints in the front seats reduce the risk of whiplash or head/neck/spine injury. When sensors detect a rear-end collision, the headrests rapidly and automatically pivot forward, supporting the driver's and front-seat occupant's heads.

Xenon Adaptive Headlights with Corona headlight-rings automatically swivel to follow the curves of the road. The system uses data from on-board sensors and the steering wheel angle to detect the vehicle's direction, then adjusts the headlights accordingly, for excellent nighttime vision.

Cornering Lights, integrated into each of the foglight housings and activated whenever the BMW X6's turn-signal indicators are used, project additional lighting and increased illumination in the direction of the turn.
**CRAFT YOUR OWN BMW – AT BMWUSA.COM/BYO.**

At BMW, we want you to create your own Ultimate Driving Machine®. That’s why BMW offers one of the widest model ranges of any luxury automotive manufacturer. And each BMW model offers its own universe of personalizing possibilities.

It’s easy to get the latest information on your favorite BMW model. Simply visit [bmwusa.com](http://bmwusa.com) and click on the BMW model of your choice. Select “Features & Specs” to see all the standard features and available options and packages, as well as technical specifications.

Then create the exact BMW model that fulfills your needs by clicking on “Build Your Own” – or just visit [bmwusa.com/byo](http://bmwusa.com/byo). Here you’ll be able to select from among the many interior and exterior colors and trims, personalizing options and value-added packages. Build a BMW model that reflects your style, then view it in 360° detail. At the press of a button, personalize your ultimate driving dreams come true, at [bmwusa.com](http://bmwusa.com).

To top speed limited electronically.

**BMW 3-series rear. Actual acceleration results may vary, depending on the specification of vehicle, road and environmental conditions; testing procedures and driving style. These results should be used for comparison only and verification should be attempted on public roads. BMW urges you to obey all posted speed limits and always wear safety belts.**

**Run-flat tires do not come equipped with a spare tire and wheel. However, a spare tire and wheel can be ordered as an option.**

**Performance tires are not recommended for driving in snow and ice.**

**WARNING:** Driving even very slight defects in road surfaces, as well as delays, curves and other obstacles, can cause serious damage to tires, wheels and vehicle parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires. Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.

**WARNING:** Performance tires are not recommended for driving in snow and ice.

DRIVING A BMW IS ALWAYS A SPECIAL EXPERIENCE – AND IT CAN BE ENHANCED EVEN FURTHER WITH ORIGINAL BMW ACCESSORIES. BENEFIT FROM INNOVATIVE SOLUTIONS THAT COMBINE UNIQUE IDEAS, STUNNING DESIGN AND SMART FUNCTIONALITY. DISCOVER A WIDE RANGE OF ORIGINAL BMW ACCESSORIES THAT CUSTOMIZE, ENHANCE AND PROTECT YOUR BMW X5’s EXTERIOR, INTERIOR, TECHNOLOGY AND TRANSPORTERS. FROM LOAD CARRIERS TO CARGO MATS, SHEEPSKIN SEAT COVERS AND MORE, EVERY ORIGINAL BMW ACCESSORY adheres to BMW’s HIGHEST QUALITY STANDARDS. EACH IS DESIGNED TO FIT THE BMW X5 PERFECTLY AND LAST JUST AS LONG. FOR ADDITIONAL INFORMATION ON BMW ACCESSORIES, PLEASE SEE YOUR AUTHORIZED BMW CENTER OR VISIT ONLINE AT SHOPBMWUSA.COM.

NOTES: SOME DETAILS SHOWN IN PHOTOGRAPHS MAY NOT BE AVAILABLE IN THE UNITED STATES.

BMW Roof Box comes in Silver or Black, or paint to match your BMW X5. The innovative design lets you load from either side and includes anti-slip strips to aid in securing loads. BMW recommends that only BMW Roof Boxes be used. BMW is not responsible for any damage when non-BMW accessories are used.

Snap-in-Adapter for iPhone® lets you control music and make hands-free calls through the steering wheel or iDrive.

Non-slip dual-sided cargo mat tailored to fit the BMW X5 helps keep the cargo area carpet clean.

EQUIPPED WITH THE BEST IDEAS. ORIGINAL BMW ACCESSORIES.

Add the convenience of a rear-deck bicycle holder, and the bold gleam of 20-inch Star Spoke (Style 362) chrome wheels.
