THE CROWD APPLAUDS.
From its initial design, right down to its intricately tuned mechanics, this 6-speed automatic transmission is one half of Enclave’s high-tech powertrain. The other is a 288-hp 3.6L VVT V-6 engine with direct fuel injection. Together, they maximize performance and efficiency, producing better highway fuel economy than any other eight-passenger crossover or SUV.

The gearbox was specifically engineered for Enclave’s front-wheel- and all-wheel-drive applications. It’s so sophisticated, a 32-bit control module monitors its operation and compensates for normal wear in components such as clutch plates so performance remains consistent for the life of the transmission.

Because it’s a Buick, Enclave is backed by a comprehensive 4-year/50,000-mile Bumper-to-Bumper Limited Warranty. Add to that a transferable 5-year/100,000-mile Powertrain Limited Warranty plus 24/7 Roadside Assistance and Courtesy Transportation. Now you’ve got the best coverage in America.
STAY IN TOUCH. Make a lasting connection with the road. For most climates and driving conditions, Enclave’s front-wheel drive presents a capable solution. Should the road or the environment call for more traction, the available on-demand all-wheel-drive system doesn’t ask you to push buttons. It constantly monitors traction at all four wheels, delivering power to the wheels with the best grip by working in tandem with anti-lock brakes and StabiliTrak’s electronic stability control system with rollover mitigation. Its four-wheel independent suspension provides a premium ride with stable cornering.

To help navigate safely, optional articulating high-intensity discharge xenon headlamps extend your vision to see around curves and beyond corners. And available Ultrasonic Rear Parking Assist alerts you to objects while in reverse with audible cues. Speaking of safety, Enclave has earned an impressive five-star crash rating for both front and side impacts.1 And to help your Enclave live up to its performance promise, Goodwrench service—found exclusively at your Buick dealer—is there. With all the technology in Enclave, GM-trained Goodwrench technicians have the expertise to care for all of it.

1Five-star rating is for the driver and front passenger seating positions in the frontal crash test and for the front and rear seating positions in the side-impact crash test. Government star ratings are part of the National Highway Traffic Safety Administration’s (NHTSA) New Car Assessment Program (safercar.gov).

**Note:** General Motors recommends using high-quality, brand-name tire shops with experienced technicians who are trained in the latest tire-fitting practices and who use quality tools and equipment. Always have your tire dealer check and balance your tires at least once a year. This includes checking for proper tire pressure. Additionally, make sure that you always consult with your local dealership for specific tire recommendations based on your vehicle’s specifications and intended use. For optimal performance and maximum tire life, it is crucial to maintain proper tire inflation. Properly inflated tires improve fuel economy, handling, and braking performance. Always check tire pressure regularly, especially before long trips, as under- or over-inflated tires can significantly affect your vehicle’s stability and overall performance. For more information, please refer to your owner's manual or contact your local dealership.**
