You’ve just discovered the New, the Modern, the Intelligent. This is not another "been there, done that" moment.
WORLD-CLASS VALEDICTORIAN.

We created Enclave and the world quickly took notice. Sure it’s stylish, spacious and well appointed. But what really earns it top marks is that it’s premium without being pretentious, and smart without being stuffy. Three rows of first-class seating in a quiet tuned interior, an ingenious navigation and entertainment system, an active approach to safety and intelligent all-wheel drive are just a few of the qualities that make it the new class of world class.
SUDDENLY, THE CLOUDS PARTED.

Once in a great while something comes along that disrupts (in a good way) our vision. That's exactly the design philosophy behind Enclave. And why it was crafted to never blend—but rather to stand far apart. Curves sweep from one end to the other. Up front, wraparound high-intensity discharge xenon headlamps provide a brighter light than halogen to help you see road signs better. From there, the signature waterfall grille, chrome portholes and sculpted lines flow undisturbed into three-dimensional, multi-lens taillamps. They're all hallmarks of Buick design introduced by Enclave.

Clearly, a new day in design has dawned.
GET LOST IN SPACE

Discovering new places on your own is great; sharing them with seven of your closest friends is even better. We did the numbers and gave Enclave three rows of first-class seating for up to eight—something not found on any luxury crossover. And with SmartSlide, getting to the third row is simple thanks to second-row seats that easily slide forward using only one hand.

Plenty of storage space also comes along for the ride. Fold down the second- and third-row seats to create a level load floor, freeing up 115 cubic feet (that’s room for enough food to fill five full-size refrigerators for your next dinner party). With the third row down, you have 65.9 cubic feet, plenty of luggage space for a family of four. And with both rows up, you still have 23.3 cubic feet behind the third row for that end table you just have to have.

1 cargo and load capacity limited by weight and distribution.

SKY. WHAT LIMITS?

On top of plenty of leg room, there’s lots of wide-open space up above. Bring the outside in to illuminate the spacious interior with an available power sunroof and companion 3-foot by 4-foot skylight. The sunroof tilts up or slides open while the skylight offers a sunshade to control all those rays. You’ll thrill to the joy of open-air driving.
Take the driver’s, for instance. Beyond its warm camphor wood tones and brushed aluminum at-a-glance gauges, the driver’s seat in Enclave is command central. Responding to you from its genuine mahogany-inlaid steering wheel—placing buttons for cruise control, speaker volume and Bluetooth® at your fingertips. Passengers can enjoy the comforts that result from 1,400 hours of real-world evaluation.

French-stitched seams highlight available leather seating surfaces infused with silk and perforated for breathing and sound deadening. The driver and front-passenger seats may be heated and cooled, with the driver’s power adjustable up to eight directions including lumbar, when you choose these options.

Every one is a reserved seat.
Don’t let the art-deco-inspired analog quartz clock fool you. We gave Enclave all the latest technologies you need to find whatever you’re searching for. To help guide you, the available voice- and touch-screen activated DVD NAVIGATION SYSTEM charts over 6 million miles of North American roads.

To navigate those roads, optional XM NAVTRAFFIC® incorporates real-time road conditions right into your NAV screen, directing you around trouble spots and toward the most efficient route. And while you’re on the road, keep your hands on the wheel thanks to BLUETOOTH® connectivity. So get ready, the adventure is about to begin.

1 Map coverage available in the United States, U.S. Virgin Islands, Puerto Rico and Canada.
2 Required XM Radio and XM NavTraffic monthly subscriptions sold separately by XM after trial period. XM NavTraffic only available in select markets. Certain real-time traffic data provided by NAVTEQ. ©2010 NAVTEQ. For more information, see xmradio.com/navtraffic.
3 Go to gm.com/bluetooth to find out which Bluetooth phones are compatible with the vehicle.
Since music is recorded in an acoustically tuned room, we think you should hear it in a similar environment. That’s why Buick pioneered the QUIETUNING process to reduce, block and absorb noise and vibration. Leaving outside noises outside, so you’re left with quiet solitude.

Nothing stands between your ears and the Bose 10-speaker 5.1 surround sound system. This available technology was engineered specifically for the Enclave cabin. The system reproduces instrumental nuances and vocal inflections captured during live recordings so you won’t miss a single note.

Plug your iPod® into the available USB port1 and your tunes travel everywhere you do. Rear-seat passengers aren’t left out; they will enjoy the optional overhead DVD ENTERTAINMENT SYSTEM with an 8-inch screen and two pairs of wireless headphones.

DOING MORE WITH MORE.

In Enclave, it’s all about the power of teamwork. Intricately tuned shift points make the 6-speed automatic transmission one half of a high-tech powertrain. The other is a 288-hp 3.6L V-6 engine with direct fuel injection and Variable Valve Timing (VVT). Together, they maximize performance and efficiency, producing better highway fuel economy than any other eight-passenger crossover.

The gearbox is specifically engineered for either Enclave’s front-wheel- or all-wheel-drive configurations. A sophisticated 32-bit control module monitors its operation and enables smooth shifts even at high speeds to help minimize vibrations. And because we realize sometimes you can’t wait, you can start Enclave and activate climate controls (based on previous settings) from nearly 200 feet away with a handy optional remote starter system.

Based on EPA-est. 24 mpg hwy (FWD).
THE ART OF TRACTION.

In challenging situations, handling becomes utterly priceless. That’s where Enclave’s available ALL-WHEEL DRIVE (AWD) comes in. When conditions demand more traction, the intelligent AWD system doesn’t ask you to push buttons. It’s activated automatically when you need it most. It constantly monitors traction at all four wheels, and when it detects slip, it delivers power to the wheels with the best grip.

Unlike passive systems that merely react to wheel slippage, Enclave’s AWD reads a wide variety of vehicle conditions to continuously monitor and provide optimal power distribution between all wheels. This proactive system optimizes both handling and traction independently and simultaneously. Providing both slippery-surface traction and dry-road performance benefits.
From its curved lines to the ones in the road, Enclave happily marries form with function. It may be called a crossover, but when it comes to how it looks and acts, Enclave is anything but.

Underneath its unique bodylines, Enclave packs a four-wheel independent suspension with spring rates and stabilizer bars engineered to deliver a premium ride with stable cornering.

All four wheels work in tandem with anti-lock brakes and STABILITRAK’s electronic stability control system with rollover mitigation. StabiliTrak has the uncanny ability to constantly monitor Enclave to help retain traction and assist you in maintaining your steering path for optimal control. The technology shines when traveling over ice, snow, gravel, or uneven roads.

HOLD THAT LINE.
A holistically designed structure strategically positions high-strength steel to create a protective safety cage for occupant protection. This includes building in crush zones in the front and rear, and giving drivers the reassurance of steel-reinforcing beams to help preserve occupant space in impacts.

Inside, all rows have head curtain side-impact air bags with rollover protection, along with driver and front passenger side-impact and dual-stage frontal air bags. Technology includes pretensioners (tighten belts to prevent you and your passenger from jerking forward during sudden braking) for front safety belts and side-impact door beams.

Enclave’s approach to safety also includes available high-intensity discharge articulating XENON HEADLAMPS to help you see around curves and beyond corners. A quick glance in the rearview mirror allows you to see objects behind you with the available BACKUP CAMERA.

And with ONSTAR—standard for 6 months—Automatic Crash Response 2 can get you help fast even if you can’t ask for it. In the event of a crash, built-in sensors can automatically send an alert to OnStar.

1 Always use safety belts and have your child rear seated. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Always place a rear-facing infant restraint in the rear seat of any vehicle via a child seat. See the Owner’s Manual and child safety seat instructions for more safety information.

2 OnStar acts as a link to existing emergency service providers. Visit onstar.com for details and system limitations.

WE START FROM A POSITION OF STRENGTH.

At its core, Enclave’s approach to safety helps you and your passengers feel safe and secure. Enclave’s wide track, long wheelbase and low ride height help provide a stable structure for safe, confident handling. It starts with an optimized Body Frame Integral (BFI) structure that helps protect everyone in impact situations.
ACCESSORIES1
from top to bottom:
ROOF-MOUNTED HARD CARGO CARRIER® This lockable carrier, co-developed by Thule, is made of durable materials to provide many years of use.

DUAL-PLAYER HEAD-RESTRAINT DVD SYSTEM A 7-inch diagonal LCD flatscreen monitor and a top-loading DVD/CD/MP3 player are integrated into the back of the front head restraints, so two passengers each have their own screen. A pair of wireless two-channel headphones and a remote control are included.

ASSIST STEPS These 6-inch, high-strength aluminum steps topped with full-length traction pads make getting in and out of your Enclave easier.

ALL-WEATHER FLOOR MATS Front and rear premium floor mats, custom-designed to conform to Enclave, have deep patterned grids to collect rain, mud, snow and debris. Nibs on back help hold mats in place.

ROOF RACK CROSS RAILS: Carry a load on the roof of your Enclave with these rails. They are designed to provide both function and style. For use along with the factory rails.

19- AND 20-INCH WHEELS3 Add a new level of dimension to your Enclave with impressive 19-inch wheel choices and stunning 20-inch styles. These wheels are cast from high-strength aluminum, then given a long-lasting, brilliant chrome finish.
