The next generation Escalade. Is the arrival of the most anticipated generation of Cadillac’s crown jewel worthy merely of an introduction or should it be more of a celebration? We would argue the latter considering the level of design, craftsmanship and detail that transformed it into the epitome of luxury. The charge of taking an American icon and elevating it to extraordinary new heights, which previously existed solely in the hearts and imagination of the world’s finest designers and artisans, was as exhilarating and monumental as the vehicle itself. Welcome to the Cadillac of Escalades.
Some people look at an automobile and all they see is metal and glass. But the Escalade sculptors, designers and craftsmen are true artists with a real passion for the automotive form. They immerse themselves in everything about the vehicle and infuse their spirit into everything the vehicle becomes. They feel, and we agree, that it’s truly amazing to bring something handcrafted into the world.
A personal touch will always be of the utmost importance. And the only way we know how to accomplish that is by simply using our hands. The truest luxury can only be achieved when we find the smallest details and give them our highest level of attention.
Finding the perfect elements to create a uniquely Escalade interior required searching the world over, so we did just that. With the finest materials in hand, 11 interior artisans endeavored to capture the essence of absolute luxury by dramatically layering fabrics and textures specifically chosen to complement one another. The hand-wrapped and cross-stitched heated steering wheel, dressed in leather, adds a personal touch. Exceptionally comfortable and supportive leather seating surfaces create a new level of Escalade sophistication. Even the center console, armrest and instrument panel trim are taut, cut-and-sewn masterpieces.

Escalade Premium Collection / Shale with Cocoa Accents and American Walnut Trim
Our artisans work in leather, wood and microchips. If artists are defined by their work, then the engineers who designed and implemented the electronics in the next-generation Escalade deserve a place among the greats. Consider this a time when modern technology meets modern art.

1. Full functionality requires compatible Bluetooth® and smartphone. Some devices require USB connectivity. 2. Map coverage available in the United States, U.S. Virgin Islands, Puerto Rico and Canada. 3. All SiriusXM services require a subscription, sold separately by SiriusXM after trial period. Fees and taxes apply. All fees and programming subject to change. Sirius, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. See Customer Agreement for complete terms and more information at siriusxm.com. For more information about NavTraffic, visit siriusxm.com/navtraffic. 4. Devices must be WPA2-compliant with active OnStar service and data plan. Wi-Fi devices manufactured prior to 2006 may not be compatible. Please consult your device manufacturer for information regarding the WPA2 security protocol and Wi-Fi device compatibility. Visit onstar.com for details and system limitations. 5. The system wirelessly charges one PMA- or Qi-compatible mobile device. To check for phone or other device compatibility, go to gmtotalconnect.com.

HEAD-UP DISPLAY The available reconfigurable Head-Up Display offers a full-color interface that conveniently projects desired information – such as speed, engine rpm, navigation and more – on the windshield in your natural line of sight. RECONFIGURABLE DISPLAY Customize your 12.3” diagonal LCD gauge display to one of four personas that mixes traditional vehicle data with navigation, entertainment and detailed 3-D vehicle images.

BOSE® CENTERPOINT® SURROUND SOUND SYSTEM This 16-speaker system features Advanced Staging Technology, an innovation that creates an immersive sound that brings you the feeling of being front row, center stage. CADILLAC CUE Displayed on an intuitive screen, CUE – Cadillac User Experience – functions like a tablet with touch features, device synchronization and the ability to recognize your natural voice. NAVIGATION/

NAVTRAFFIC Standard navigation brings constantly updated maps to your 8” diagonal CUE touch screen, while NavTraffic included for three trial months, keeps you informed of the latest traffic conditions. REAR-SEAT ENTERTAINMENT SYSTEM Standard on the Premium and Platinum Collections and available on the Luxury Collection, our entertainment system features a large 9” screen (two screens in ESV), along with first-in-class Blu-ray™ playback. Available ONSTAR WITH 4G LTE and built-in Wi-Fi hotspot provides a high-speed, highly reliable 4G LTE connection that delivers an enhancement to current OnStar services and is capable of connecting up to seven mobile devices for streaming customized content. WIRELESS CHARGING With this station conveniently located on the center console, you can inductively charge your compatible phone and certain other mobile devices.
EVEN THE SECOND AND THIRD ROWS ARE FIRST CLASS.

POWER-FOLDING THIRD-ROW SEATS All it takes is mere seconds for these seats to fold flat, letting you go from passenger space to cargo space and back in no time.

HEATED SECOND-ROW SEATS Our second-row seats make a great first impression, providing warmth, comfort and luxury in abundance. POWER-RELEASE FOLD-AND-TUMBLE SECOND-ROW SEATS In the Luxury, Premium and Platinum Collections, a simple touch of a button sends the second row in motion, making it infinitely more convenient for rear passengers to enter the spacious third row.

SPACE FOR EVERYTHING With the third-row seats folded flat, the Escalade ESV offers 120.9 cubic feet of cargo space and more storage compartments than ever before.

CARGO MANAGEMENT SYSTEM More storage means you can bring more of what matters to you. The system located behind the third row provides additional underfloor space. Simply lift the hinged door to find a compartment that’s hidden from view yet easy to access.

CENTER CONSOLE STORAGE A smartphone deserves a smart console. That’s why we created one with multiple USB ports and a layered soft-touch tray. It has an intelligently designed section for your electronic devices and overall room to accommodate a tablet or small laptop. And because not all things run on USB, there’s a 110-volt power outlet.

1. Cargo and load capacity limited by weight and distribution. 2. Not compatible with all devices.
INTRODUCING ESCALADE PLATINUM—INDULGENCE ON A MUCH GRANDER SCALE.
AIMED SQUARELY AT THE HIGHEST COMMON DENOMINATOR.
Because there must be a best of the best, we created the Escalade Platinum. The finest leather envelops the interior in unprecedented amounts, from the cut-and-sewn instrument panel, top pad and center console to the upper door trim and every seat – including Nappa semi-aniline leather for the front two rows. The sueded microfiber headliner and door pillar trim elevate the definition of luxury. Two wood trims make an exclusive statement – Natural Finish Crème Laurel paired with Tuscan Brown leather and Sumi Black Tamo Ash matched with Jet Black leather. DVD screens in the front head restraints, as well as one overhead (two in ESV), announce that we considered every passenger equally. And a center console cooler keeps beverages and snacks chilled when you travel.
THE UNMISTAKABLE LINES OF ESCALADE BEGIN WITH AN IDEA. OUR ARTISANS THEN USE THEIR HANDS TO BRING TO LIFE WHAT’S IN THE DESIGNER’S HEAD.

UNCOVERING OUR LATEST ICON TOOK THE STROKES OF GENIUSES. This is not a computer model. This is not a concept 3-D drawing. This is literally a mobile work of art, sculpted by dedicated hands. Every line, every bevel and every curve has been painstakingly rendered by artisans who live and love their craft.
FUNCTIONALITY AND BEAUTY WERE TWO SIDES OF THE SAME COIN FOR THE ESCALADE, WITH EACH AS CRUCIAL TO SUCCESS AS THE OTHER.

THE ICONIC CADILLAC TAILLAMP SIGNATURE RECEIVED A MODERN INTERPRETATION AND, IN THE PROCESS, BECAME AN INSTANT CLASSIC.
EVERY ESCALADE MAKES A STATEMENT.
As with every aspect of this icon, the additional 20 inches of **ESCALADE ESV** aren’t just for show. The extra room provides generous luxury for up to eight passengers — including nearly 10 more inches of third-row legroom. There’s 120.9 cubic feet of cargo capacity with all seats folded — that’s almost 27 cubic feet more than the standard wheelbase Escalade — not to mention 39.3 cubic feet behind the third row. And the ESV was designed with larger rear doors that open wide to allow easy entry or exit, proving we’ll go to great lengths to make sure you’re fully accommodated.
The 6.2L V8 engine, paired with a smooth-shifting 8-speed automatic transmission, is the beast inside the beauty, featuring both best-in-class standard horsepower and better V8 fuel economy than any competitor.

**Increased HP and Torque** Our engineers took the challenge: leverage advanced technology to get more out of an already legendary powerplant. The end result is 420 hp and 460 lb.-ft. of torque – impressive leaps over the previous generation.

**Spark Ignition Direct** injects gasoline directly into the combustion chamber of each cylinder, enabling improvements in horsepower, torque and fuel efficiency. **Variable Valve Timing** controls the valves during intake and exhaust, allowing the engine to operate more efficiently and, at the same time, helps improve low-rpm torque and high-rpm horsepower. Escalade achieves **Better V8 Fuel Economy Than Any Other Large Luxury SUV**, thanks in part to **Active Fuel Management**, which deactivates four cylinders when added power is not needed, such as at cruising speed.

IN THIS CASE, "OVERPROTECTIVE" IS A COMPLIMENT.

Safety starts with a strong foundation. And every Escalade has one, including a safety cage constructed using ultra-high-strength steel alloys. Safety is further enhanced with crumple zones (shown in red) designed to help protect you and your passengers when the unexpected happens. And since there’s safety in numbers, the Escalade is equipped with seven strategically located airbags, including the first-ever luxury SUV Front Center Airbag designed to help reduce the risk of injury to the driver and passenger in a side-impact situation. Vehicle protection is serious business. So we’ve equipped the Luxury, Premium and Platinum Collections with the seriously protective Theft-Deterrent Package, including glass breakage, interior motion and inclination sensors, door lock shields, and a self-powered horn.

1. Always use safety belts and the correct child restraints for your child’s age and size. Even in vehicles equipped with air bags and the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal air bag. Air bag inflation can cause severe injury or death to anyone too close to the bag when it deploys. Be sure every occupant is properly restrained. See the Owner’s Manual and child safety seat instructions for more safety information.
The Luxury, Premium and Platinum Collections include a Driver Awareness Package with a class-exclusive Safety Alert Seat that sends pulses through the seat cushion on the left or right or simultaneously, alerting you to a variety of potential hazards, as well as the direction they’re coming from. Forward Collision Alert that uses a forward-facing front camera to detect and warn you when an impact may be imminent; and Lane Departure Warning that monitors road lines and alerts you when the vehicle begins to drift into another lane without the use of a turn signal. A Driver Assist Package included on the Premium and Platinum Collections features Adaptive Cruise Control, which uses forward-looking radar and camera technology to naturally maintain a driver-selected following distance from the vehicle ahead, even in stop-and-go traffic. Front and Rear Automatic Braking detects when a frontal or rear collision is imminent and automatically applies braking to lessen impact severity or perhaps avoid certain low-speed situations altogether. Also included in the Driver Assist Package is Automatic Safety Belt Tightening to help keep your belt precisely where it needs to be included on Luxury, Premium and Platinum Collections. Rear Cross-Traffic Alert, which uses sensors to sweep the left and right areas to the sides of your Escalade when you back out of parking spots and alerts you to approaching vehicles; Side Blind Zone Alert, which alerts you with a side-mirror warning icon if a vehicle is in your blind spot before you merge or make a lane change; and Lane Change Alert, which surveys the areas well beyond the side blind zones and flashes the side-mirror warning icon to alert you of rapidly approaching vehicles.

Safety features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times.

OWNER BENEFITS

We have created the most comprehensive suite of owner benefits offered by any luxury automotive brand in the world, providing everything our Cadillac owners need and everything they deserve.

PREMIUM CARE MAINTENANCE

The Cadillac Premium Care Maintenance program1 covers routine oil changes, tire rotations, certain air filter replacements and a thorough multipoint vehicle inspection for 4 years or 50,000 miles.2

WARRANTY PROTECTION

This program provides alternative transportation and/or reimbursement of certain transportation expenses if your Cadillac requires warranty repairs for 6 years or 70,000 miles.4 That is more years of service standard than any leading luxury automaker.

ROADSIDE ASSISTANCE

Cadillac offers more years of standard Roadside Assistance than any leading luxury automaker, with services for 6 years or 70,000 miles.4 This 24/7 program provides lockout, towing, refueling, Dealer Technician Roadside services and more.

SECURITY BY ONSTAR

If you’ve reported your Cadillac stolen, OnStar can use GPS technology to help authorities quickly locate and recover it. An OnStar Advisor can further assist authorities by sending a remote signal to activate Stolen Vehicle Slowdown,4 which can gradually slow the vehicle to a stop to aid in its recovery. Advisors can also enable a Remote Ignition Block, making it impossible to restart a stolen vehicle once it has been turned off.

NAVIGATION BY ONSTAR

Just push the blue OnStar button and an Advisor can download your current directions to your Cadillac. A voice will then call out every turn, or the directions will be sent to your navigation system, if equipped. You can also plan routes using MapQuest.com4 and send them to your Cadillac.

CONNECTIONS BY ONSTAR

Available OnStar Hands-Free Calling4 allows you to make and receive calls safely from your Cadillac. With the OnStar RemoteLink mobile app, you can access real-time information and control your vehicle from wherever you have cell phone service. With a few simple steps, you can find a destination using the RemoteLink app and send directions right to your vehicle.

Available OnStar with 4G LTE and built-in Wi-Fi Hotspot4 can help you stay better connected to the world around you. The content and connections you crave throughout your day have moved inside your Cadillac with a hotspot capable of supporting up to seven mobile devices at once, along with a high-speed, highly reliable 4G LTE connection—making it easy to access data on the go. You’ll also see an enhancement to current OnStar services, including shorter response times and faster service delivery. This is the most powerful OnStar ever, empowering you and your passengers to create a highly connected world inside your car.

THE ONSTER® DIRECTIONS & CONNECTIONS™ PLAN allows you to push one button to connect with a specially trained Advisor to find the things and places you need. Get directions or a diagnostic check while you drive. Make calls with both hands on the wheel, and customize your vehicle with the OnStar RemoteLink™ mobile app. And, as always, get help immediately in a crash or an emergency. Excludes comes standard with one year of the OnStar Directions & Connections Plan.

PREMISES BY ONSTAR

With Automatic Crash Response, In a crash, built-in sensors can automatically alert a specially trained OnStar Advisor who is immediately connected to your Cadillac to see if you need help and send to your exact location. Other OnStar emergency services include:1

1. Owner-encoded Owner-activated OnStar system, including OnStar Directions & Connections™ Plan.
2. Powertrain Warranty is available for 6 years or 70,000 miles (whichever occurs first).
3. Bumper-to-Bumper Warranty is available for 4 years or 50,000 miles (whichever occurs first).
4. Powertrain Warranty is available for 6 years or 70,000 miles (whichever occurs first).

MY CADILLAC APP™

TheMY CADILLAC APP™ is available for your smartphone. Make sure your vehicle is equipped with a cellular data plan. You will then be able to use the MY CADILLAC APP™ to:

1. Monitor vehicle location, fuel level, and battery status.
3. View owner’s manual online.
4. Schedule service appointments.
5. Access vehicle photos and videos.

1. Standard on all 2016 and newer vehicles. 2. Powertrain Warranty is available for 6 years or 70,000 miles (whichever occurs first). 3. Bumper-to-Bumper Warranty is available for 4 years or 50,000 miles (whichever occurs first). 4. MyCadillac.com is available on Apple® and Android devices. Services vary by device and conditions. 5. Does not apply to returns or exchanges. 6. OnStar subscription is available for cars, trucks, and SUVs. 7. MyCar.com is available on Apple® and Android devices. 8. Does not apply to returns or exchanges. 9. Android is a trademark of Google LLC. © 2016 Cadillac. All rights reserved.
