What defines a life well lived?
Calculating, planning and contemplating each and every detail? Acting spontaneously on a whim?
Is it enjoying every moment as if it could be your last or knowing each moment will last forever?
Reimagining what happened yesterday, today, only to help drive tomorrow?
Sitting back in total comfort or taking command?
No matter how you define it, there's always one way to recognize that you've lived it.

*THE 2019 XTS*
AN ACHIEVEMENT OF ITS OWN

You simply can’t ignore the fresh exterior design styled in modern elegance and classic Cadillac motifs. From a powerful grille to bold taillamps, the XTS presents striking lines from front to rear.

Step inside and high-design cues are matched by tremendous comfort. Suple leathers and generous space help the driver focus, and passengers can relax, spread out and stay cool or warm to the touch.

XTS Platinum in Black Raven. Shown with available equipment.
Enjoy the unexpected confidence and power of the exhilarating V-Sport Platinum model, featuring a 410-hp Twin Turbo V6 engine. Standard on V-Sport Platinum, All-Wheel Drive maximizes stability and handling in less-than-perfect driving conditions.
Take the chill out of a cold-weather commute. Enjoy a more comfortable drive when the weather turns cold. With the push of a button, the available heated steering wheel turns warm to the touch.

Space for everything that matters. With 18 cu. ft. of cargo volume, the XTS has generous space for all the things that matter to you.
Rear passengers enjoy 40” of unobstructed leg room, with the option of sumptuous leather seating surfaces or supple yet strong available Semi-Aniline leather.
STYLE IS FOREVER MOVING FORWARD

Framing a powerful grille, stunning LED headlamps and available Front Cornering Lamps are nestled in each corner. The headlamps emit a crisp, white light, providing illumination superior to traditional lighting. Available illuminating outside mirrors and door handles create a beacon as the driver approaches the vehicle, while available 20" wheels make a powerful statement.

From the rear, bold signature LED taillamps showcase the dramatically sculpted rear profile, while the Cadillac Crest on the trunk becomes a cleverly functioning design detail. Simply press it to release the trunk.
The moment you open the door to the 2019 XTS, you’re introduced to stunning beauty and comfort. Select from elegant interior trim options that all work together harmoniously. The materials themselves are also quite special. Available Semi-Aniline leather is both supple and strong, and wood trims such as Ebony Lineate are selected for both durability and delight.

Up front, available 22-way adjustable massaging front seats feature power-adjustable seatback bolsters and manual thigh support for true indulgence. Available front seats that both heat and ventilate quickly become something you cannot imagine doing without, as is the specially optimized sound system experienced with the available 14-speaker Bose Studio Surround Sound.

You’re also able to select what you see with an available reconfigurable gauge cluster that lets you display driving, entertainment, communications and, if equipped, navigation information. And with the available 12.3” diagonal display, staying informed feels effortless.
SURROUNDED BY AVAILABLE SAFETY INNOVATIONS

BE ALERTED EVEN IN REVERSE
When backing out of a parking space, available Rear Cross Traffic Alert warns of oncoming left or right cross traffic.

WINDSHIELD WIPERS AND BRAKES WORK TOGETHER
Available Rainsense Wipers automatically engage when rain is detected, adjusting their speed to the rain’s intensity. Whenever wipers are activated, Auto-Dry brakes automatically position the brake pads closer to the rotors to sweep away moisture and improve performance.

TRULY FORWARD THINKING
Available Forward Collision Alert monitors traffic ahead, alerting you if a potential collision with a detected vehicle is imminent.

HINDSIGHT IS 20/20
The Rear Vision Camera automatically displays a live image of the area behind you on the Cadillac user experience screen. Guiding lines on the image plot out your intended trajectory, helping you to see people and objects that might be in your path.

SMART SPACE
Available Adaptive Cruise Control-Advanced uses both radar and cameras to maintain a set distance between you and the vehicle ahead.

TRAVEL THE STRAIGHT AND SMART
Using cameras to sense lane boundaries, available Lane Keep Assist gently turns the steering wheel if the system anticipates the vehicle is leaving the lane unintentionally or if the turn signal is not activated. Working in conjunction with the available Safety Alert Seat, available Lane Departure Warning sends a visual alert in the gauge cluster and a warning pulse through the seat cushion if your vehicle crosses the lane marking.

AN ATTENTION-GRABBER
Available Lane Change Alert with Side Blind Zone Alert surveys the area well beyond the side blind zone, and illuminates the side-mirror warning icon to alert you if a moving vehicle is rapidly approaching. Available Side Blind Zone Alert monitors your blind zones, so if a vehicle is in the adjacent lane, it also illuminates the side-mirror icon. In both features, if you’ve activated your turn signal, the icon on the side mirror flashes to alert you.

GAIN PRECIOUS TIME
Up to certain speeds, available Forward and Reverse Automatic Braking can sense imminent forward and reverse collisions and automatically engage the brakes, if you have not already done so, helping to reduce the severity of the collision. The system may even help avoid a collision at very low speeds.

DANGER, DETECTED
Cadillac’s available patented Safety Alert Seat sends a discreet pulse to the left, right or both sides of the driver’s seat, indicating the direction of the potential threat.

A HIGHER LOOK AT WHAT SURROUNDS
Available Surround Vision provides a bird’s-eye view of the area immediately surrounding the vehicle when in low-speed Drive or Reverse. This view, projected onto the Cadillac user experience screen, helps increase your awareness when parking or in Reverse.

STRONG ENOUGH TO CRUMPLE
The ultra-high-strength steel safety cage features strategically placed crumple zones that absorb and manage the energy from a collision, helping preserve occupant space.

Select safety features shown.

Safety or driver-assistance features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner’s Manual for more important feature limitations and information.
Connectivity is key. You’ll find innovations throughout the vehicle that keep you, your world and your vehicle fully integrated. Take for instance Adaptive Remote Start. Designed within your key fob, it engages the engine from up to 65 yards away and can sense the outside temperature to heat your steering wheel, if equipped, and activate the rear-window defogger when needed.

Or with the available myCadillac mobile app and a paid subscription, you can lock and unlock, remote-start and get select vehicle information from anywhere you have cellular reception.

The Cadillac user experience enables a suite of information and entertainment offerings, including different user profiles for different drivers. It will save your personal settings when it comes to climate, audio, vehicle settings and available 3D GPS Navigation all at your command. Plus, it offers connected Apps, where you will be able to select and install a range of apps from music to audiobooks to weather. (Data plan rates apply.)
Take control with an exhilarating amount of performance options. Cadillac’s available Magnetic Ride Control reads the road up to 1000 times a second, automatically adjusting the suspension to road quality and weather conditions. You will feel highly responsive handling regardless of road conditions. Utilizing lightweight aluminum calipers, Brembo® front brakes offer a host of advantages, including responsive stopping power and fade resistance.

Consider two remarkable power plants. The standard 304-hp, 3.6L V6 engine features direct injection for power and efficiency. The available V-Sport Platinum model is equipped with a 410-hp Twin Turbo V6 engine for exhilarating power, alongside standard AWD for all-weather performance.

**AVAILABLE V-SPORT PLATINUM TORQUE**

- **410 hp**
- **369 lb-ft**
