Launch Control – Included with Manual Transmission

• The launch control system optimizes performance for full throttle starts on a track.

• In competitive mode, the system will hold a predetermined engine speed while the driver pushes the throttle to the floor.

• The driver can then quickly release the clutch and the system will modulate engine torque 100 times per second to optimize available traction.

• The system is capable of approaching a skilled driver's best effort and can do so very consistently.

GRAND SPORT

1963

1996
HISTORY

1963
Corvette purpose-built race car to win Sebring and Le Mans

The envisioned Grand Sport would be the ultimate Corvette, a lightweight, powerful factory built racer.

Only 5 were built out of the planned 125.

1996
The Corvette Design Team wanted to do a fitting 'close' for the long-running C4 body style.

Only 1000 were built all Blue with White stripes and red hash marks.

The wider ZR1 tires and chassis were used. All had the LT4 engine that was available on all Corvettes.
The 1996 version used the standard Corvette engine (LT4) with wider ZR1 size wheels, tires, and chassis components.

The 2010 version will use the standard Corvette engine with wider Z06 size wheels, tires, brakes, and chassis.

A Grand Sport Heritage Package will be offered for those that want a unique package inspired by the 1996 version.
