Your New Lumina was beautifully designed. And carefully built. It is harmoniously designed and built to be a consistently high standard of excellence.

A solid, strong foundation. Rigid, limited-body-frame construction helps make Lumina strong and quiet. This foundation is an important reason why Lumina has an exceptionally smooth ride and feels so solid, stable and well-built.

Genuine value. Genuine Chevrolet. Lumina has the safety features you need, including dual air bags and safety-cage construction, the performance you expect (standard V6 power), and the features you want (from air conditioning to easy holding)...all at a price you can afford.

That's great American value. And that's genuine Chevrolet.
You want a car that can handle everyday life. You want the room for friends, family and groceries. You want to take that summer vacation — and you want to be able to take your luggage, too.

**Lumina LS**

**ALL THE ROOM AND COMFORT YOU ASKED FOR.**

That's why Lumina LS Sedan offers more interior room and trunk space than Honda Accord or Toyota Camry sedans.

Lumina LS Sedan seats six in comfort with the standard 60/40 seating arrangement (includes center storage armrest). Or you can opt for 40/40 reclining front bucket seats and center console (shown below). Either way, you get newly contoured chair-high seats, cup holder, and power windows with a driver's Express-Down feature. Optional: a remote keyless entry system that allows you to lock or unlock doors, or unlock the trunk from up to 30 feet away.
Refined. Refreshing. Confident. Safe. These are the words people are using to describe the 1995 Lumina LS.

It's a feeling of quality that is noticeable when you're behind the wheel. The performance of the 3.1L V6 and the electronically controlled 4-speed automatic transmission is virtually seamless, with almost imperceptible shifts. For even more power, order the optional 3.4L V6 DOHC (dual overhead camshaft) V6.

A four-wheel antilock brake system (ABS) is standard on the LS. ABS is designed to help maintain steering control and prevent skidding when braking on most slippery surfaces.

Lumina LS
Enjoy the subtle feel of genuine quality.
True after year, the majority of mid-size sedans began to offer a V6 engine and automatic transmissions. That’s why this powertrain...

**Choose from two levels of smooth V6 performance.**

**Standard 3.0L V6 with Sequential Port Fuel Injection.**

This standard 160hp V6 offers an outstanding combination of performance and quiet operation. For a smooth ride and world-class throttle response, the 3.0L V6 features Sequential-Port Fuel Injection. A direct fuel injection system helps provide quick starts and eliminates the need for periodic timing adjustments...

**Optional 3.4L DOHC V6.**

Lumina LS Sedans available with a sophisticated 3.4L V6 with dual overhead camshafts and Sequential Port Fuel Injection. This four-valve-per-cylinder engine delivers 210 hp at 5200 rpm. Torque is an impressive 215 lb-ft. at 4000 rpm. Bottom line: the DOHC Lumina is just plain fun to drive.

4-speed automatic transmission.

This electronically controlled 4-speed automatic, which is standard in both Lumina Sedan and Lumina LS Sedan, is one of the auto industry’s most advanced transmissions. The benefit to you is an unparalleled shift control for precise, virtually undetectable shifting, and shift timing that is perfectly matched to the performance characteristics of the Lumina V6 engine.
There's no subject more important than safety for you and the ones you love. That's why Lumina is designed and built with more safety features than ever before. Here are a few of the reasons you'll feel more secure in a Lumina.

**SAFETY**

**ONE OF THE BEST REASONS TO BUY A 95 Lumina.**

**Energy-absorbing controlled crush zones.**

In collisions, the front and rear ends of the Lumina are designed to help absorb energy in a controlled manner, so that the integrity of the passenger compartment can be maintained. Other integral safety features include an energy-absorbing steering column and an energy-absorbing instrument panel.

**Safety-cage construction.**

A rugged steel safety cage (with reinforced floor and body rails, high-strength roof construction and pillars, and side-panel door beams) surrounds the entire Lumina passenger compartment. This cage is so strong it helps Lumina meet 1997 U.S. government side-impact standards, today.

**Dual air bags.**

Driver- and right-front passenger-side air bags are standard in every 1995 Lumina. These air bags have been engineered to provide you with enhanced protection when used in conjunction with safety belts. A special note: Always wear safety belts, even with air bags.

**All-wheel anti-lock brake system.**

GM's award-winning ABS VI four-wheel anti-lock brake system is standard in Lumina LS Sedan, and optional in Lumina Sedan. ABS prevents wheel lockup and is designed to help you maintain steering control and prevent skidding on most slippery surfaces.
Here's something you don't see every day: a spacious six-passenger interior in a truly affordable mid-size car.

But there's more to this story than room. Lumina Sedan is beautifully equipped, too. Standard features include air conditioning, tilt steering, runway-deploying, CFC-free refrigeration, power door locks, auxiliary lights, a Delco AM/FM stereo, and a Tilt-Wheel™ Adjustable Steering Column.

The newly designed 90/40 front seat with full-foam construction offers exceptional comfort and the added convenience of a center armrest with storage compartment and cup holders. Nighttime "theater lighting" is a new standard feature for 1993. It turns out bright when you get in the car, then gradually dim as you prepare to drive away.

Lumina Sedan, the new six-passenger mid-size car from GM, is the perfect car for your family. Whether you're heading to the beach, going out to dinner, or running errands, Lumina Sedan is the car for you.
Chevrolet is committed, in every way, to making your 1993 Lumina the best car you've ever owned. This commitment starts with a quality car, and it continues with genuine customer care. Always.

As a Chevrolet owner, you are covered by genuine customer care, a comprehensive owner-protection plan that includes all of the following:

**Bumper to Bumper Warranty.**

The GM 3-year/36,000-mile (whichever comes first) limited warranty covers repairs for all 1993 Luminas, including labor and parts, to correct any defects in material or workmanship occurring during the warranty period. Warranty features include air conditioning repair, towing, on-cost warranty transfer, 6-year/100,000-mile (whichever comes first) structural rust-through protection and 3-year/36,000-mile (whichever comes first) emissions control system coverage. Items not covered by the warranty include tires (which are covered by their manufacturer) and normal maintenance. See your Chevrolet dealer for terms of this limited warranty.

**Customer Transportation.**

Customs who purchase or lease a 1993 Lumina will be able to take advantage of Customer Transportation at no additional charge when their vehicles are left at a participating dealership for repairs covered under the 3-year/36,000-mile New Vehicle Limited Warranty. See your participating dealer for details.

**24-Hour Roadside Assistance.**

For as long as you own your 1993 Lumina, the security and convenience of round-the-clock roadside assistance is available via a special hotline (1-800-CHYSUSA). Your call will be answered by a Roadside Assistance phone advisor trained by Chevrolet.
