The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your Chevy dealer for additional details.

STANDARD TOURING SUSPENSION

Venture all-wheel-drive models include a Touring suspension with automatic load-level control, air pump, rear auxiliary power outlet and 16-inch wheels with Touring tires.

VERSATRAK — GM’s exclusive, all-wheel-drive system — offers the confidence of enhanced traction and control on low-grip surfaces such as snow or ice. Versatrak is available on LT, LT and Warner Bros. Edition Extended Wheelbase models.

ON-DEMAND TRACTION

Versatrak’s technology uses frontwheel drive for normal driving situations and in slick conditions. When it “senses” the front wheels beginning to slip (such as on lowgrip surfaces like snow, ice or gravel), it literally does the thinking for you, automatically delivering available engine power to the rear wheels to help keep the vehicle in control and moving forward. Versatrak keeps your vehicle in the all-wheel-drive mode until all wheels regain equal traction, then returns it to front-wheel-drive mode.

A SOPHISTICATED, ADVANCED AWD SYSTEM

Many of Versatrak’s components are made of lightweight cast aluminum. In fact, the entire system adds only 200 lbs. to Venture’s weight. Versatrak senses — and automatically compensates — when a compact spare tire is being used. And a built-in Self-Save mode helps protect Versatrak components from overheating.

INDEPENDENT REAR SUSPENSION AND FOUR-WHEEL DISC BRAKES

The Versatrak system includes an independent rear suspension with monotube shock absorbers and lightweight alloy control arms to help improve handling performance. This design is so compact, the rear load floor remains flat for optimized space utility. And the four-wheel disc antilock brakes (included only with Versatrak all-wheel drive) help enhance stopping power.

VERSATRAK ALL-WHEEL DRIVE

Venture LT Versatrak all-wheel-drive model shown in Dark Tropic Teal Metallic.

ALL-WEATHER TRACTION WHEN YOU NEED IT.

VERSATRAK ALL-WHEEL DRIVE

ALL-WHEEL-DRIVE SECURITY, IMPRESSIVE MPG

Versatrak with Versatrak delivers better fuel economy than Dodge Caravan AWD models (Venture MPG 18 city and 24 highway vs. Caravan MPG 17 city and 23 highway). In fact, it matches the highway fuel economy of a front-wheel-drive Caravan.†

†2003 Venture estimates based on GM testing. Official EPA estimates not yet available.

OPTIONAL TRAILERING WITH CHEVY VENTURE

The available Venture trailering provisions can help your Venture tow up to 3,500-lbs. when properly equipped.‡

The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your Chevy dealer for additional details.
