CROWN VICTORIA

ride quality and outstanding comfort. Yet, in a number of important respects, it is quite unlike any 6-passenger Ford that has come before it. This Crown Victoria bears the unmistakable signature of Ford design leadership: a distinctively Ford aerodynamic shape which not only gives

handling capability, and quietness. In the Crown Victoria you have advanced engineering technology. A computer-controlled

4.6-liter overhead-cam V-8 with state-of-the-art sequential electronic fuel injection is teamed with an electronically controlled 4-speed automatic

A driver air bag is standard and a passenger air bag optional (for use with safety belts). And to the 4-wheel disc brakes you can add the optional anti-lock system with Electronic Traction Assist. Quality. Comfort. Assurance. Everything you could ask for is yours in a full-size Crown Victoria.

Crown Victoria LX in China Blue Clearcoat Metallic, Some equipment shown is optional.

engineering, the Crown Victoria is designed for the '90s. But advanced as the Crown Victoria is, you still have the qualities that have always been prized by drivers of the full-size automobile. In the traditional sense of what "full-size" comfort means, Crown Victoria accommodates six adult passengers with head, shoulder, hip

"FULL-SIZE" COMFORT

With its contemporary shape and sophisticated

Today's Ford and leg room to spare. Crown Victoria Along with the Crown remains true to the meaning of Victoria's customarily "full-size" in the generous space you'll traditional sense of the word. find the seating exceptionally comfortable, whether you are riding up front or in the rear passenger compartment.

You have, too, the smooth ride for which Crown Victoria is famous, compliments of bodyon-frame construction and a full coil spring suspension system equipped with nitrogen gas-pressurized hydraulic shock absorbers.

Only one thing is more important than physical

comfort. And that's the peace of mind you feel in

conditioning, individually reclining split bench front seats, front and rear center fold-down armrests, tilt steering wheel, electronic AM/FM stereo, dual electric remote mirrors, and power windows with "express-down" feature that lets you lower the driver's window at just the touch of a switch.

in strategic areas of the body structure.

And there is Crown Victoria quietness, perhaps

the most impressive feature of all. The suspen-

Standard also are the added convenience and security of the Autolamp On/Off Delay System.

The SRS is designed to activate in a frontal

impact roughly equivalent to striking a parked

car of comparable size at 28 miles-per-hour. And

At right: With more than 20 cu. ft. of space and a "deeg-well" design, Crown Victoria's trunk is the largest in its class and can

carry a substantial amount of luggage or cargo.

You get luxury cloth split bench front seats with 6-way power adjustment for the driver. Deluxe 18-oz. carpeting. Plus thoughtful conve-

There is yet a higher level of Crown Victoria

luxury and comfort to consider.

The Crown Victoria LX.

niences like front seat back map pockets, a remote fuel filler door release, a trunk cargo net, and a carpeted spare tire cover.

And LX offers you optional 6-way power for the passenger seat, elegant leather seating surfaces, and top-of-the-line Ford sound systems including a new trunk-mounted compact disc changer. A cellular telephone and remote keyless entry system are also new options for 1993. A heavy-duty towing package is available, too.

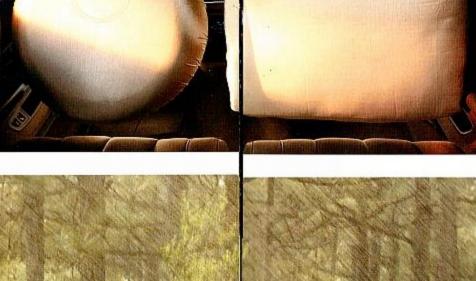

Or a handling and performance package to enhance Crown Victoria's superb road manners.

a car that's solidly engineered for your safety. Occupant Safety. The air bag Supplemental Restraint System (SRS) is but one of many "occupant safety" features designed to provide protection in the event of an accident. In Crown Victoria it is standard for the driver and available as an option for the right front passenger.

But remember, the air bag only supplements your lap/shoulder safety belts, which can help protect you in all types of impacts. Together, the air bag and properly worn safety belts are one of the most effective restraint systems available.

it inflates in less than 1/10 of a second.

What's more, the optional anti-lock brake system (ABS) can reduce stopping distances on wet or slippery surfaces and help you maintain steering control in extreme braking situations. ABS consists basically of a speed sensor at

that can stop you quickly and smoothly.

Operating Safety. Crown Victoria is engineered

with suspension and steering systems designed

to help you maintain control, and with brakes

ensure that optimum traction is being delivered. When wheel slippage is detected, the brakes are automatically applied to slow down the slipping wheel(s), providing an added measure of control.

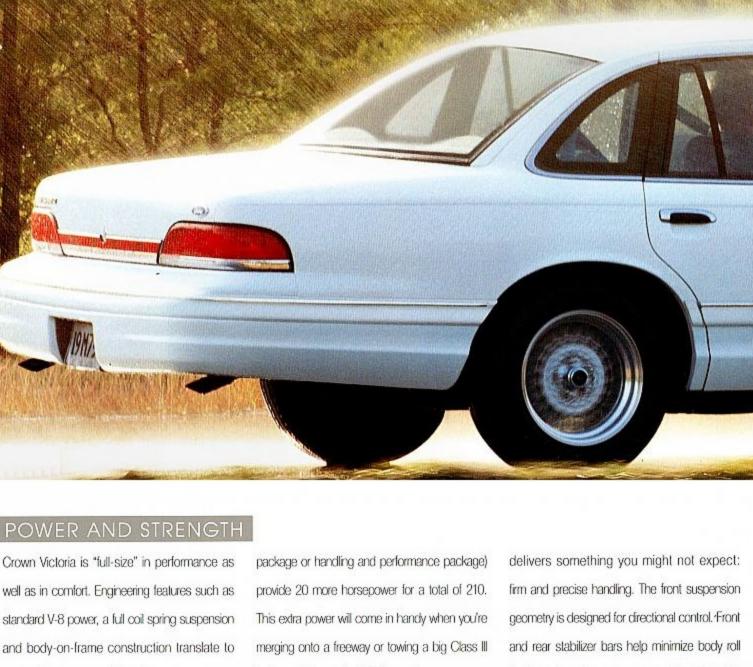

each wheel and a microprocessor. When braking-

induced wheel lock-up is detected, the system

"pumps" the brakes up to 10 times per second.

Linked to ABS technology is the Traction Assist

system. Its sensors monitor wheel rotation to

standard V-8 power, a full coil spring suspension

and body-on-frame construction translate to outstanding power and strength. The 4.6-liter V-8 is the most advanced engine in its class. It has an overhead cam design, is Crown Victoria equipped with a state-

has all the power of-the-art sequential and strength you would expect in a multi-port electronic fuel full-size automobile injection system (SEFI), with so much room

and ride comfort. and is governed by one of the world's most sophisticated engine control computers called EEC-IV. The 4.6 is powerful, putting out 190 hp (SAE net) @ 4,200 rpm. And it's fuel-efficient, too, with features like fast-burn combustion chambers, the precise fuel-metering of the SEFI system, and

components that cut power-wasting friction."

Dual exhausts (with the optional trailer towing

block design and deep-mounted head bolt

The 4.6 is also a quiet powerplant. A deep-skirt

trailer weighing up to 5,000 pounds.

is another notable engineering feature. This stateof-the-art, computer-controlled system provides more power assist at low speeds (when you're cornering or parking, for example) and progressively reduces power assist as rpm increase for a firmer steering feel at cruising speeds. The full coil spring suspension system, while providing the kind of smooth, quiet ride you would expect in the full-size class of automobile,

in sharp lane-changing maneuvers and while

cornering. Nitrogen gas-pressurized shocks are

tuned for optimized ride comfort and stability.

Package that takes Crown Victoria to an even higher level of power, handling, and control.

For added security,

available in the '93

Crown Wictoria is a

new remate keyless entry system.

An exclusive feature in Crown Victoria's class is the optional rear air suspension. Its air springs are automatically adjusted to maintain a constant rear ride height, whether you're traveling alone or carrying a full complement of passengers and cargo. And the air springs improve ride comfort while maintaining the car's responsive handling. The rear air suspension is an individual option (for LX only) and it's included in the LX Luxury Group. It's also in the Handling and Performance

Optional B-way power seat adjustment, available

with the driver seat alone or with the driver
