With best-in-class max. 9,300-lb. towing capability, you can hit the ground towing in the 2019 Ford Expedition. It all begins with a high-strength-steel frame and high-strength, aluminum-alloy body. It continues with some features of the 10-speed automatic transmission that are particularly useful when towing. SelectShift capability allows you to manually upshift or downshift without using a clutch. Progressive range select mode allows you to lock out the upper gears while towing to help maintain a consistent speed on steep grades. And tow/haul mode features smart shift logic that helps eliminate unwanted frequent gear shifting on steep uphill grades, while allowing engine braking to help maintain vehicle speed when descending a steep grade with a load in tow.

Ford Co-Pilot360 Technology offers driver-assist features like Pro Trailer Backup Assist™ (PTBA), which makes backing up your trailer as easy as turning a knob. Once the system is programmed, simply rotate the PTBA knob left or right in the direction you want the trailer to go. The system then automatically steers Expedition to turn the trailer the desired amount. While your sideview mirrors are your primary visual aid, PTBA features a Rear View Camera image that allows you to view trailer direction and help determine trailer placement. Further assistance is provided by our 360-Degree Camera with Split-View Display that works at low speeds in Forward and Reverse. 4 cameras let you see all sides of Expedition on the 8” color LCD screen in the center stack.
