One look leaves you wanting.

How can we be so confident? Just take a peek. Its shape is surprisingly different. Arrestingly sleek. We analyzed every edge and line and performed hundreds of hours of wind-tunnel testing to improve aerodynamics – rendering the all-new 2013 Ford Fusion almost undetected by the air it slips through. The same can't be said for everyone else.

Eyes are irresistibly drawn to its swept-back silhouette, along its shapely curves, ending with its radiant LED taillamps and flush-mounted tailpipes.

And that’s just the beginning.

More than you ever expected. Exactly what you need. From the company that goes further to bring it to you. See for yourself at your local Ford Dealer.

1Available feature.
More than a new car model.
A new model for cars.

Shouldn’t you be able to choose what powers your vehicle and best fits your lifestyle? With the all-new 2013 Ford Fusion, you can.

Do you run on gasoline alone? Four different powertrain combinations show the breadth of choice in the Fusion gasoline engine lineup, which includes 2 advanced EcoBoost® engines. Prefer hybrid power? Our 3rd-generation hybrid system is our most advanced yet, strengthening the hybrid city mpg leadership that Fusion is known for.

One remarkable sedan. Two distinct choices. Which one is right for you?

Fusion
Advanced gasoline engines, including 2 EcoBoost GTDi4s that combine direct-injection with turbocharging, give Fusion quick acceleration and impressive fuel efficiency.

Fusion Hybrid
Our 3rd-generation hybrid system uses a gasoline engine, electric traction motor and lithium-ion battery pack to propel Fusion Hybrid to a class-leading 47 mpg city, 4 mpg more than its nearest class competitor.

Increases efficiency with advanced EcoBoost technology.

And more. Our turbocharged, direct-injection EcoBoost® gasoline engines, featuring instantaneous low-end torque responsiveness and virtually no turbo lag, squeeze maximum power and efficiency from each drop of fuel. On Fusion, we’ve paired our 1.6L EcoBoost1 with Auto Start-Stop.2 This new feature shuts off engine power when Fusion comes to a complete stop and seamlessly restarts it as you release the brake pedal, helping to reduce fuel consumption. Choose a 6-speed manual1 or 6-speed SelectShift Automatic® transmission1 and Active Grille Shutters1 that adjust to improve aerodynamics. These advanced technologies help Fusion achieve 37 mpg hwy.3 A 175-hp 2.5L IVCT I-4 engine with 6-speed SelectShift Automatic is standard, rounding out an impressive gasoline engine lineup.

For performance-minded drivers. A 240-hp* 2.0L EcoBoost I-4 engine1 is paired with a 6-speed SelectShift Automatic1 that can be paddle shifted. Intelligent all-wheel drive1 and 19" aluminum wheels1 can also be added on Titanium models. As you accelerate through corners, Torque Vectoring Control (standard on all models) seamlessly enhances your hold on the road.

1.6L EcoBoost I-4 gasoline engine

- 6-speed manual transmission1
- Horsepower: 178† Torque (lb.-ft.): 184‡
- 25 city/37 hwy/29 combined mpg

2.0L EcoBoost I-4 gasoline engine

- 6-speed SelectShift Automatic1
- Horsepower: 240† Torque (lb.-ft.): 270‡
- 22 city/33 hwy/26 combined mpg

2.5L IVCT I-4 gasoline engine

- 6-speed SelectShift Automatic
- Horsepower: 175† Torque (lb.-ft.): 175
- 22 city/34 hwy/26 combined mpg

SE. Ruby Red Metallic Tinted Clearcoat. Available equipment.

1Available feature. 2Late availability. 3EPA-estimated 25 city/37 hwy/29 combined mpg. 41.6L EcoBoost I-4 with 6-speed manual.

*Figures achieved using premium unleaded gasoline.
Strengthens its hybrid mpg leadership.

47 mpg in the city and on the highway? Yes, it’s true. Building upon the award-winning success of the 2012 model, the all-new 2013 Fusion Hybrid achieves 47 combined mpg.¹ City mileage is best in class and 4 mpg more than its nearest class competitor. Our powersplit hybrid architecture helps maximize efficiency by seamlessly switching between the electric traction motor and its 2.0L Atkinson-cycle gasoline engine. Powered by state-of-the-art, lithium-ion batteries, the traction motor allows Fusion Hybrid to operate gas-free at speeds of up to 62 mph. When you’re accelerating at speed or passing, the 2.0L engine kicks in as needed to power the battery and to enhance performance. Finally, the Regenerative Braking System captures over 90% of brake energy and uses it to help recharge the battery and maximize your mileage. Even when you’re stopping, you’re moving forward in Fusion Hybrid.

Fusion Hybrid 3rd-Generation Powertrain

- New 2.0L IVCT Atkinson-cycle L-4 engine
- New high-voltage, lithium-ion battery pack
- 88kW electric traction motor
- Electronically controlled continuously variable transmission (eCVT)
- Total system net horsepower: 188
- Up to 62 mph in EV mode

¹EPA-estimated 47 city/47 hwy/47 combined mpg, Hybrid. Class is Midsize Hybrid Sedans vs. 2012/2013 competitors.

These vibrant leaves and vines on the SmartGauge® with EcoGuide instrument cluster coach you to get the most from every ride. The higher your mpg, the more lush your vine — giving you instant feedback to help you improve your efficiency.
Reshapes expectations, outside and in.

More than you expected. That’s what we designed Fusion to deliver on every drive. Soft-touch surfaces greet your hands wherever they rest, including on the leather-wrapped steering wheel, shift knob and leather-trimmed seats. Brilliant LED lighting treats your eyes. Real metal mesh grilles cover each of the 12 speakers of the Audio System from Sony. Even the glove compartment will delight you. It’s lighted, lined and lockable. Outside, slim sideview mirrors mount low on the doors – instead of the windows – designed to allow more light inside, minimize drag and help reduce wind noise. On Titanium, they’re power, heated and auto-dimming with security approach lamps, integrated LED turn signal indicators, and a convenient memory feature for up to 3 drivers. The 2013 Fusion. Taking sedan convention – and sweeping it aside.

1Available feature. 2Driver’s side only.
Keeps it quiet
to connect with your voice.

So you can connect with friends, family, driving directions, and more, sound-absorption material minimizes extraneous noise. Active noise cancellation\textsuperscript{1} uses the audio system to cancel road noise. In this hushed atmosphere, Ford SYNC\textsuperscript{2} responds to your commands. Once paired, the system recognizes your phone and transfers your contacts to support voice calling. It also plays music from your phone, MP3, USB or iPod. In fact, SYNC AppLink\textsuperscript{3} lets smartphone users control Pandora\textsuperscript{®}, iHeartRadio\textsuperscript{®}, Stitcher Smart Radio\textsuperscript{™} and other apps by voice too. Press the steering wheel controls and say things like “Call: Scott at work,” or “Play playlist: nightlife.” SYNC also offers 911 Assist,\textsuperscript{®} and with a SYNC Services\textsuperscript{2} account you get business searches, turn-by-turn driving directions, local movie times and more. Activate and personalize yours at ford.com/sync. SYNC. Say the word.

\textsuperscript{1}Fusion Hybrid only. Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. SYNC Services varies by trim level and model year and may require a subscription. Traffic alerts and turn-by-turn directions available in select markets. Message and data rates may apply. Not all features are compatible with all phones. \textsuperscript{2}SYNC AppLink is available on select models and compatible with select smartphone platforms. Commands may vary by phone and AppLink software.
Transforms every day and every drive.

With simple graphics and fast touch-screen responses, voice-activated SYNC® with MyFord Touch™ easily controls your phone, entertainment, navigation² and climate settings. Featuring an 8" center touch screen, 2 liquid crystal displays in the instrument panel, 5-way controls on the steering wheel, and a media hub with dual USB ports, this remarkable system recognizes thousands of voice commands, everything from "Travel Link: 5-day weather forecast" to "Destination: nearest museum." And it does it all while you keep both hands on the wheel and your eyes on the road.

See who's calling. MyFord Touch can download personal photos from your phone book and display them on its full-color screen when you receive a call, place a call or browse your directory.

Take the eco-friendly route. The Navigation System² includes a 6-month trial subscription to SiriusXM Satellite Radio (also available without navigation), Traffic and Travel Link to bring you over 130 channels, including commercial-free music, plus sports, news, talk and entertainment. Drive smarter with the ability to look up fuel prices, check local and national weather, get alerts on traffic-related incidents, receive alternate route suggestions and much more. Turn-by-turn directions are offered in your choice of Fastest, Shortest or Eco Route.

Keep all entertained. Access music files from a USB drive, an SD card, a portable hard drive or almost any device you can plug into one of the dual USB ports of the MyFord Touch media hub. With HD Radio™ Technology,² you can "Tag" songs for purchase later at the iTunes® Store. By plugging a smartphone or mobile broadband modem into one of the ports, you can even create a Wi-Fi® hotspot³ so passengers can browse the Internet while you drive in peace.
From the comforting white of the overhead light to the 7 vibrant hues of ambient lighting, LED illumination treats your eyes inside Fusion. Your ears will appreciate both the hushed quiet from acoustic underbody shields and sound-absorption material, as well as the rapturous output of the 12-speaker Audio System from Sony® with HD Radio™ Technology and iTunes® tagging. Beyond that, your good sense will also be pleased. Fusion puts plastic bottles and other recycled materials usually destined for landfills to surprisingly practical reuse. Nearly 40 recycled 16-oz. plastic bottles go into the EcoCloth seats on select models, while recycled material is used for the injection-molded splash shields and other underbody components. Whether you look, touch or listen, the feeling is the same. Well done.
Helps keep you in line. Even if you start to drift.

If it detects Fusion drifting toward a lane marker, the Lane-Keeping System is designed to alert you by applying torque to the steering wheel, directing you to correct your path. If you continue to drift, Fusion shudders the steering wheel, alerting you to steer back toward center. Drowsy drivers should promptly heed the warning of the Driver Alert System, which displays a coffee cup icon in your gauge cluster if it detects that you need to take a break from driving.

Detects traffic in your blind spots.

While you’re driving, BLIS® (Blind Spot Information System) with cross-traffic alert is designed to alert you with an amber light in your sideview mirror whenever it detects traffic in your blind spots. And when you’re slowly backing out of a parking spot or driveway, it alerts you to vehicles approaching from either side with a sound, a message center warning and the amber light.

Maintains your gap. Automatically.

By maintaining your preset gap from the vehicle in front of you, adaptive cruise control and forward collision warning with brake support helps reduce concerns about traffic. And, if it detects a potential collision, the system flashes a warning across your windshield, sounds an alarm, pre-charges the brakes and increases brake-assist sensitivity to provide full responsiveness when you do brake.

Makes waves. All over.

In addition to causing a stir in traffic, the all-new Fusion utilizes radar waves to provide visual and audible feedback that can help you make the most of every drive. In addition, a sophisticated camera helps improve your rear view when backing up. Wipers that sense moisture activate at the first hint of rain to help keep your windshield clear. Heated sideview mirrors do the same by melting snow and ice buildup. From the narrow confines of city driving to the wide-open stretches of highway, you can be confident that Fusion is your ally on the road.
Fulfills your desire for *individuality*.

There are many ways to make the 2013 Ford Fusion your own. A rear view camera allows you to see objects behind Fusion as you slowly back up. An invisible keyless entry keypad on the driver’s door lights up as it senses your touch. Just enter your code and you’re in. Then, start Fusion without ever taking your keys out of your pocket with push-button start. For parents of young drivers, standard MyKey® lets you limit top speed, and block calls and text messaging while they’re driving. And active park assist helps determine a suitable parallel parking spot and virtually parks Fusion itself.

Hybrid SE. Ice Storm Metallic. Available equipment.

Available early 2013. Additional charge.
New Vehicle Limited Warranty. We want your Ford Fusion ownership experience to be the best it can be. Under this warranty, your new vehicle comes with 3-year/36,000-mile bumper-to-bumper coverage, 5-year/60,000-mile Powertrain Warranty coverage, 5-year/60,000-mile safety restraint coverage, and 5-year/unlimited-mile corrosion (perforation) coverage – all with no deductible. Fusion Hybrid unique electric components are covered during the Hybrid Unique Component Coverage, which lasts for 8 years or 100,000 miles, whichever occurs first. Please ask your Ford Dealer for copies of these limited warranties. 

Roadside Assistance. Covers your vehicle for 5 years or 60,000 miles, so you have the security of knowing that help may be only a phone call away should you run out of fuel, lock yourself out of the vehicle or need towing. Your Ford Dealer can provide complete details on all of these advantages. 

Ford Credit. Get the ride you want. Whether you plan to lease or finance, you’ll find the choices that are right for you at Ford Credit. Ask your Ford Dealer for details or check us out at fordcredit.com.

Ford Extended Service Plan. For a purchase or lease, the Ford Extended Service Plan (ESP) gives you “Peace-of-Mind” protection designed to cover key vehicle components and protect you from the cost of unexpected repairs. Ask your dealer for a Ford ESP, the only service contract backed exclusively by Ford and honored at all Ford Lincoln dealerships.

Genuine Ford Accessories will be warranted for whichever provides you the greatest benefit: 12 months or 12,000 miles (whichever occurs first), or the remainder of your Bumper-to-Bumper 3-year/36,000-mile New Vehicle Limited Warranty. Ford Licensed Accessories (FLA) are warranted by the accessory manufacturer’s warranty. FLA are fully designed and developed by the accessory manufacturer and have not been designed or tested to Ford Motor Company engineering requirements. Contact your Ford Dealer for details and/or a copy of all limited warranties.
