A NOTE ON CHILD SAFETY: Always use seat belts and the correct child restraint for your child’s age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See your vehicle Owner’s Manual and child safety seat instructions for more safety information.

BECAUSE IT’S A JUNGLE OUT THERE

Canyon’s available collision-avoidance and security technologies are engineered to help enhance your awareness of the road and surrounding vehicles. Additional peace of mind is provided by six standard airbags.

Safety or driver-assistance features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner’s Manual for more important feature limitations and information.
