

With the 2009 Honda Civic GX, ever-changing gas prices will cease to command your attention, allowing you to enjoy the Civic GX's other liberating characteristics. Like the fact that it relies on North American supplies of natural gas, not imported oil. That it's been certified by the EPA as the cleanest internal-combustion vehicle in the world¹ – 10 years running. And that you can fill up the tank right at home with

MDEPEMDENCE

the Phill® refueling system. And since GX is a dedicated alternative-fuel vehicle, you could qualify for a federal tax credit, up to \$4,000. An exhilarating characteristic every time you pass the pump.

It's an instant reaction, thanks to GX's highly responsive 1.8-liter i-VTEC® engine. GX-specific technologies include special high-strength forged pistons that help raise the compression ratio to a race car-like 12.5:1. And special low-friction fuel injectors that deliver longer life and cleaner operation. Of course, GX is all Civic at heart, so it offers bold new styling, a spacious interior and sporty handling. Safety features such as six airbags® and Honda's Advanced Compatibility Engineering™ (ACE™) body structure helped Civic earn a 5-star frontal crash-test rating from the National Highway Traffic Safety Administration (NHTSA).† civicgx.com

*Honda reminds you and your passengers to always buckle up. Childen 12 and under are safest when properly restrained in the rear seat. †Government star ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (www.safercar.gov).

Pair your GX up with Phill,² an easy-to-use refueling system, and you can tap right into your home's natural gas line. Developed by FuelMaker, Phill² is the world's first certified in-garage natural gas

refueling appliance. But the convenience of in-home refueling is only part of the equation. Phill² also offers impressive savings. Domestic natural gas typically costs significantly less than an equivalent quantity of gasoline. And with the possibility of additional incentives, including a \$1,000 federal tax credit³ when purchasing Phill,² going green never felt smarter. Or more fulfilling.
