NO CUP RUNNETH OVER
With 10 beverage holders, cleanliness and proper hydration go without saying.

COMFORT IS PERSONAL
Power windows, mirrors and door locks may be unexpected. Supportive seats may be uncommon. But a tilt and telescopic steering column? Here, it's all about adjusting to you.

LONG-DISTANCE CRUISIN'
Cruise control was made for road trips. Simply set the system using the steering wheel-mounted controls and off you go.

NO CUP RUNNETH OVER
With 10 beverage holders, cleanliness and proper hydration go without saying.
THE POSSE FACTOR!

Friends. Family. Pets. Stuff. They all come with you. So why not give them their space? With Fit’s 2nd-row Magic Seat, you can create multiple seating configurations that’ll accommodate practically any situation. And if you and four of your posse decide to head out, Fit can accommodate them too. Comfortably seating five with more than 20 cubic feet of storage in the back.

PEOPLE MODE
All seatbacks up. And prepare to seat five. Fit may be power-packed with capability, but sometimes, it’s the human bond that carries the day.

LONG MODE
Fold the front passenger seat and right side of the rear seat down. Slide in your favorite surfboard, ladder, rolled-up rug or totem pole. (Anything up to 7’9” will be allowed to ride.) And since the rear seat is a 60/40 split, there’s even room for a roadie in the back.

UTILITY MODE
Ditch the delivery truck. With 57 cubic feet of smooth, flat space, you can haul your own stuff. Just fold the Magic Seat down and start packing. A low floor height and huge rear hatch make it easy to load and unload.

TALL MODE
Ready for some magic? Flip up Fit’s 2nd-row Magic Seat and presto – over 4 feet of space from floor to ceiling. And as tempting as it may be to see how many friends you can fit in a Fit, this space is reserved for non-human cargo only.

Honda reminds you to properly secure items stored in the cargo area.
SUPER SIPPER!
With a rating of 28 mpg city and 35 mpg highway (Fit w/5AT), life suddenly changes. Commutes become more pleasant. Saturday errands are no longer the chore they once were. And your wallet? Why, it feels fuller, more substantial in your pocket or purse. Maximum satisfaction. Minimum cost.

POUR ON THE ENERGY!
Whether it's steering around potholes or double-parked cars, speeding up to pass a slow-moving bus, or stopping to avoid an oblivious camera-laden tourist, Fit performs. Head out to the open road and Fit Sport’s available steering wheel-mounted paddle shifters respond lightning-fast. So the next time you need to get somewhere pronto, remember: The Fit is Go!

RACE-INSPIRED PADDLE SHIFTERS
Sharpen your reaction time. The Fit Sport’s leather-wrapped steering wheel comes complete with paddle shifters when you opt for the available 5-speed automatic transmission. There’s also a quick-shifting 5-speed manual for all you clutch-it-yourself types.

AWESOME 16-INCH ALLOY WHEELS
At first glance, you think eye candy. After a couple of miles, you quickly realize that these lightweight beauties help deliver the feel that makes Fit Sport irresistible.

FEISTY 117-HP i-VTEC® ENGINE
Ever wonder how Honda gets so much out of a 4-cylinder? Technology. Specifically its i-VTEC technology, which delivers more horsepower over a broader range. Fit also keeps its edge with a Drive-by-Wire™ throttle system for smooth acceleration.

RIDE-ENHANCING SUSPENSION
Small may be beautiful. But it’s also comfortable. And extremely nimble. Thanks to an independent front and torsion-beam rear suspension that’s precision-tuned.

Fit Sport shown in Alabaster Silver Metallic.
THE FIT IS GO!

160-WATT AUDIO SYSTEM

USB AUDIO INTERFACE

MUSIC METROPOLIS!
The Fit’s 160-watt audio system has MP3 and Windows Media® Audio® (WMA) playback capability, Radio Data System (RDS) and CD text display. An auxiliary input jack connects you to the portable music world, as does a digital audio-card reader on navigation-equipped models.¹ Open the upper glove compartment and you’ll find Honda’s USB Audio Interface, a port that lets you operate your digital player through the audio-system controls while at the same time charging up its battery.

MUGEN ACCESSORIES
Everyone knows the name Mugen goes hand in hand with aftermarket performance accessories. Honda brings that prestigious history of refined power, style and handling to the Fit.

MUGEN ACCESSORIES
FIT ACCESSORIES:
- Carbon B-Pillar Trim
- Leather-Wrapped Shift Knob
- MT Sport Pedals
- 16-Inch Alloy Wheels
- Aluminum Shift Knob
- Textured Aluminum Pedals
- High-Performance Cat-Back Exhaust

Fit owners can choose from a dozen Mugen accessories. Just visit your local dealer and pick the ones that match your style.

MORE ACCESSORIES:
- Stainless Exhaust Finisher
- Door Sill Trim
- Fog Lights
- Interior Ambient Light
- Carbon Fiber Interior Trim
- Sport Brace
- Leather Steering Wheel Cover

SAFETY CONTENTS!

Every Honda comes packed with safety technology. Take Fit. It offers six airbags, active front head restraints and a host of additional standard safety features. Honda seeks to provide a high level of occupant and pedestrian protection in all of our cars and trucks, regardless of size or price.

AUTOMATIC TENSIONING SEAT BELTS
An automatic seat-belt tensioning system helps hold the front-seat occupants securely in a collision. The system is triggered by the same sensors that deploy the airbags.

SIDE-IMPACT DOOR BEAMS
Four doors. Four more ways to help protect you and your passengers in a side-impact collision. High-tensile steel beams are welded into the doors.

VEHICLE STABILITY ASSIST™
VSA® helps sense oversteer and understeer, and responds by adjusting brake pressure and/or reducing engine power. Look for it on all Fit models.

ACTIVE FRONT HEAD RESTRAINTS
Designed to move up and forward in a rear collision, active front head restraints help reduce the likelihood of whiplash injuries in certain rear impacts.

ABS WITH EBD
The anti-lock braking system (ABS) is arguably the most effective way to maintain steering control during hard braking. So naturally it’s standard. As is Electronic Brake Distribution (EBD), a sensory system that monitors and calculates weight balance, and adjusts brake force accordingly.

FRONT AIRBAGS
The vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). One or both of these airbags will be deployed only in the event of a sufficient frontal impact. If deployed, these airbags are capable of being inflated at different rates depending on crash severity, seat-belt usage and other factors.*

SIDE AIRBAGS WITH OPDS
The front passenger’s side airbag features our Occupant Position Detection System (OPDS) to help prevent the side airbag from deploying if its sensors detect a child or small-statured person in the airbag’s path of deployment.*

SIDE CURTAIN AIRBAGS
Help lessen the likelihood of head or neck injuries for outboard occupants in the chance of a sufficient side collision.

ACE™ BODY STRUCTURE
The Advanced Compatibility Engineering™ (ACE) body structure is a Honda-exclusive body design that enhances occupant protection and crash compatibility in frontal collisions.

*Honda reminds you and your passengers to always buckle up. Children 12 and under are safest when properly restrained in the rear seat.

†VSA is not a substitute for safe driving. It cannot correct the vehicle’s course in every situation or compensate for reckless driving. Control of the vehicle always remains with the driver.

Airbags inflated for display purposes.
