Nature rewards the rugged.
And you get bonus points for being civilized about it.
Adventure calls.
Have enough muscle to respond.
You choose. As versatile as you want.

Pilot 2WD LX
- 244-hp, 3.5-liter i-VTEC® V-6 engine with Variable Cylinder Management® (vCM®)
- 5-speed automatic transmission
- 4-wheel disc brakes with ABS and Electronic Brake Distribution (EBD)
- Brake Assist
- Tire Pressure Monitoring System (TPMS)
- Dual-stage, dual-threshold front airbags (SRS)
- Front side airbags with Occupant Position Detection System (OPDS)
- Three-row side curtain airbags with rollover sensor
- Vehicle Stability Assist (VSA®) with traction control
- Body-colored body molding
- 60/40 split flat-folding 2nd- and 3rd-row bench seats
- 16-inch painted alloy wheels

Pilot 2WD EX
Adds to or replaces 2WD LX features:
- Driver’s seat with 8-way power adjustment
- AM/FM/XM Ready®/6-disc in-dash CD audio system with 7 speakers, including subwoofer
- Front and rear synchronized automatic climate control system
- Unique 16-inch alloy wheels
- Fog lights

Pilot 2WD EX-L
Adds to or replaces 2WD EX features:
- Moonroof, leather-trimmed interior, rearview mirror with electronic compass (except navigation-equipped models), leather-wrapped steering wheel, heated front seats and side mirrors, and XM® Satellite Radio
- Available Honda Satellite-Linked Navigation System™ with Voice Recognition, off-road tracking and rearview camera
- Available Honda DVD Entertainment System

Pilot 4WD LX/EX/EX-L
Adds to or replaces 2WD features:
- 244-hp, 3.5-liter VTEC® V-6 engine
- Variable Torque Management®
- 4-wheel-drive system (VTM-4®)

Pilot’s combination of energetic performance, excellent handling and rugged reliability makes it ideal for all your adventures. The experts agree. It’s won the large SUV class in Car and Driver’s “5Best” Trucks in ’05—and every other year since its release. For ’06, Pilot offers more style, technology and safety—plus a new 2WD model, too.
Thanks to 60/40 split seats that fold flat in seconds, Pilot switches easily from a comfortable cabin for people to a spacious cargo carrier. With the second- and third-row seats folded down, Pilot offers up an impressive 87.6 cu. ft. of cargo area\textsuperscript{a} to handle large or bulky items.\textsuperscript{b} In fact, the flat floor space in the cargo area is more than four feet wide.
Now playing.
Also working and relaxing

Available moonroof features a sunshade.

Rear-seat passengers can adjust the temperature in the back. In DVD-equipped models, a new 115-volt power outlet can provide current for various electronic devices like a laptop or game console.

Second-row activity tray in EX model

Storage pockets located in every door.

Rear climate control and power outlet.

The front armrest flips up to provide access to a large storage area. It can hold as many as 13 CDs and also features a 12-volt power outlet and a cradle to keep your cell phone secure and handy.*

6-disk-in-dash CD changer in EX model.

Covered storage protects small cargo.

Center console holds CDs and phone cradle.*

Available DVD system has a new 9" screen.

Small items like cameras or valuable electronics are safely out of view and secure in the rear underfloor storage area. And another 12-volt outlet nearby offers convenient power for many uses.

Pilot provides a wealth of entertainment. The LX offers a 120-watt AM/FM/CD audio system with 4 speakers. The EX has 155 watts, 7 speakers and a 6-disk CD changer. And with the available DVD Entertainment System,² rear passengers choose their own audio or video source and listen in privacy to surround-sound headphones.

*Drive responsibly. State laws prohibit distracted driving.

²Rear entertainment system available in EX model.
Go places.
Including off the map.

Onboard guidance.
Some EX models are available with the Honda Satellite-Linked Navigation System. It provides driving directions to virtually anywhere in the 48 contiguous states, plus an 8-gigabyte database will direct you to 7 million points of interest.

Tracks back to your start point.
When traveling in rural areas or in designated off-road driving areas where no map is available, the system displays electronic “bread crumbs” onscreen to mark your path—so you can retrace your steps without worry or guesswork.

Points of interest are listed by type or name. Big intersections are displayed in detail.

Pilot’s cockpit is the perfect control center for adventure. The EX has an 8-way power driver’s seat, while models with leather trim have heated front seats. And the available navigation system’s new voice-recognition function can respond to over 600 voice commands.

Off-planet radio.
Leather-trimmed models come with XM Satellite Radio, with over 150 channels of digital-quality sound. All music channels are commercial-free. EX models are XM Ready to accommodate an accessory receiver with ease.

*Some roads unverified. See the navigation system owner’s manual for more details on coverage.
Power up.
Go, tow or just pass the slow.
In addition to all that power, the Pilot earns an enviable rating as an Ultra-Low-Emission Vehicle.

**ULEV-2 rated.**

VTEC gives you everything.
The variable valve timing and lift electronic control system gives you low-end torque and high-end power.

5-speed automatic transmission.
The electronically controlled 5-speed automatic delivers the power when you need it. The Grade Logic Control holds the ideal gear for conditions.

For fast response and plenty of power reserves, the 3.5-liter V-6 engine on 4WD models makes 244 hp and 240 lb-ft. of torque—on regular gas—plus it can tow up to 4,500 lbs! The Programmed Fuel Injection and direct ignition system provide efficiency and power.
The 4WD Pilot models benefit from the ingenuity of Variable Torque Management (VTM-4). And every Pilot offers a rigid body that resists twisting and bending forces. Plus, the fully independent suspension provides precise handling as well as a surpassingly smooth, supple ride.

VTM-4 Lock™ gets you under way.
When circumstances require some extra traction—such as starting off in mud or snow—you can manually lock the rear differential with a button conveniently located on the Pilot’s instrument panel.

Front differential for most driving.
When extra traction isn’t needed, VTM-4 directs all power to the front differential, boosting efficiency in daily use.

Center propeller shaft.
The propeller shaft always sends power back to the rear differential. But the rear wheels are not engaged until directed by the VTM-4 electronic control unit (ECU).

Rear differential always on call.
When added traction is needed, the VTM-4 ECU signals the rear differential magnetic clutches to engage, seamlessly transferring power to the rear wheels.

The very brainy VTM-4 ECU.
By constantly monitoring traction needs, the VTM-4 ECU automatically engages the rear wheels if it senses wheel slippage. When added traction is not needed, the system reverts to front-wheel drive.

Know-it-all sensors.
A sensor array sends data to the VTM-4 ECU on road and vehicle conditions.

*Drive responsibly. State laws prohibit distracted driving.
Powerfully efficient.
Presenting the smart utility vehicle
The new 2WD models let you combine Pilot ruggedness with remarkable efficiency. Pilot 2WD models come with a standard Variable Cylinder Management (VCM) system that's been designed to boost fuel economy* without sacrificing power when and where you need it.

**Six for power, three for economy.**
Using an array of sensors and electronic controls, the VCM system activates or deactivates the three rear cylinders depending on the driver's demands.

**Economical cruising.**
While under light engine load conditions, the VCM system deactivates the three rear cylinders by pausing the fuel injection and leaving the valves closed. This pioneering design helps use less fuel and save you money.

**Power on demand.**
Under acceleration or with a full load, all six cylinders are activated to provide you with the 3.5-liter's full rating of 244 hp. You'll have all the power and torque for towing, passing or merging on to the highway.
Peace of mind.
Safety for Everyone.

In the lab and the real world.
Laboratory crash testing goes a very long way toward creating rigid structures that help promote occupant protection. Those results, however, are always verified by what happens out in the real world. The combination results in industry-leading crashworthiness and safety.

As evidence of Honda’s dedication to safety, the Pilot has received a 5-star rating in frontal- and side-impact testing by the National Highway Traffic Safety Administration (NHTSA).* In fact, several Honda models have earned a 5-star crash-test rating, the highest possible from NHTSA.

Dynamic safety with VSA and ABS.
The Vehicle Stability Assist (VSA) system senses oversteer or understeer conditions and takes appropriate measures to help keep you on your intended course. ABS helps you to maintain steering control during hard braking. And Brake Assist can help in an emergency situation.

---

Side curtain airbags for added safety.
All 2006 Pilot models have 3-row side curtain airbags standard. They deploy in the event of a sufficient side impact or when a sensor detects a vehicle rollover.

Front and front side airbag system.
Protection is important, so all models feature a standard dual-stage, dual-threshold front airbag system combined with front side airbags as well.

Watch your back.
Pilot models with the navigation system feature a standard rearview camera that helps you watch for obstacles when you select reverse gear.

*Honda reminds you and your passengers to always buckle up. Children 12 and under are safest when properly restrained in the rear seat.*
Higher tech.
Dreams are our drawing board.

Honda Motor Co. was founded in 1948 to help people get around. We quickly became one of the world’s top motorcycle makers—the first of our many successes. Listening to people and understanding their needs has always been first. So we develop and build many products where they’re used. Safety, reliability, Earth-friendliness and driving fun are must-haves.

And we believe in the power of ingenious thinking to make great things possible.

Over 27,500 American associates pitch in. Honda has assembled cars in the U.S. since 1982. Today, close to 4 out of 5 Honda vehicles sold in the U.S. are assembled in North America—with the help of over 550 U.S. supplier companies.

We’re always looking ahead. Honda’s ASIMO is the world’s most advanced humanoid robot. And Honda has joined with GE—world’s largest maker of jet engines—to bring the Honda-developed HF118 jet engine to market.

At Honda, we’re working full time to make Safety for Everyone. Through a comprehensive and evolving approach to vehicle safety, Honda seeks to provide a high level of occupant and pedestrian protection in our cars and trucks, regardless of size or price, as well as increased crash compatibility with other vehicles.

Power up. Our generators, outboard motors, motorcycles, lawnmowers, tillers, pumps, snowblowers, cars, trucks and more add up to making Honda the world’s largest manufacturer of engines. And every one of them performs like, well, a Honda.

We’re not afraid of the water. Between our highly regarded AquaTrax personal watercraft and our lineup of outboards from 2 to 225 hp, Honda gives you plenty of ways to enjoy the wet stuff.
We have a clear edge.
Honda has long led the way in making Earth-friendly cars. The latest is our advanced zero-emission FCX fuel-cell car – the first certified for U.S. commercial use. And for the third year in a row, Honda has been named the “Greenest Automaker” by the Union of Concerned Scientists.

“A company is most clearly defined neither by its people nor by its history, but by its products. Our products will speak the truth about Honda.”
Soichiro Honda, Founder, Honda Motor Co., Ltd.

Sometimes it’s good to get dirty.
Honda began racing motorcycles in the 1950s and cars in the ’60s. Over the years, our vehicles have proven their grit time and again. In fact, Honda is the most winning nameplate in the history of the SCORE Baja 1000 desert race. And while the toughness and technology are certainly reflected in our production vehicles, we think the greatest benefit of racing is how it prepares our engineers to be creative under pressure.

**EX Sport Package**

The dealer-installed sport package helps set your Pilot apart with running boards, an accessory front grille and roof-rail crossbars to provide extra cargo capacity.

2. Required XM® subscription sold separately after three trial months. All fees and programming subject to change. Subscriptions subject to Customer Agreement available at XM. Ready® audio system pre-wired to accept the dealer-installed accessory XM Satellite Radio hardware. XM service available only in the 48 contiguous states. The XM name and related marks and logos are registered trademarks of SiriusXM Radio Inc. The factory-installed navigation system and DVD Entertainment System are only available separately on EX-L models. The Honda Satellite-Linked Navigation System is available only in the 48 contiguous states on select EX-L models. See your Honda dealer for details.
3. Carrying too much cargo or improperly storing it can affect the handling and operation of this vehicle. Before carrying any cargo, be sure to consult the owner’s manual for load limits and loading guides. Towing requires installation of power-steering and transmission fluid cooler, both available exclusively from your Honda dealer. Maximum towing capacity for 4WD models is 4,500 lbs. for boat trailers and 3,500 lbs. for all other trailers; premium unleaded fuel is recommended when towing above 3,000 lbs. Maximum towing capacity for 2WD models is 3,000 lbs. Refer to the owner’s manual for additional towing information.
4. Wi-Fi Hotspot available only. Based on 2006 EPA mileage estimates. Use for comparison purpose only. Actual mileage may vary. *Headlamp & Fog Light Kit* is a registered trademark of Prince Corporation, a wholly owned subsidiary of John Crane, Inc. **Always use seat belts and appropriate child seats. Children 12 and under are safest when properly restrained in the rear seat.** Specifications, features, illustrations and equipment shown in this brochure are based upon the latest available information at the time of printing. Although descriptions are believed to be correct, accuracy cannot be guaranteed. Appearance and specifications are subject to change at any time, without notice or obligation, in colors, specifications, accessories, materials and models. Service, parts and accessories mentioned herein are not available in all areas. See your Honda dealer for details. Some vehicles may be shown with optional equipment. Available “Optional” includes the above. EX model only. Based on 2006 EPA mileage estimates. Final 2006 EPA mileage estimates were not available at the time of printing. Use for comparison purpose only. Actual mileage may vary. *HondaLink® Services Accessory.*

---

**Does not apply to Fuel Filter and filter changes. Exact mileage is determined by actual driving conditions. Please see your owner’s manual for more details.

**Massaging seat is available only on EX-L models.

**Drive responsibly. State laws prohibit distracted driving.
Your dealer's team of trained technicians is at the ready to help keep your Honda in superb shape. All 2006 Honda vehicles—and any Genuine Honda Accessories installed at the time of purchase—are covered by the 3-year/36,000-mile New-Vehicle Limited Warranty.1 Plus, Honda cars and trucks are covered by a 5-year/60,000-mile Limited Powertrain Warranty, too. For more information or assistance, see your Honda dealer or please give us a call at 1-800-33-Honda.

Honda Financial Services

Whether you buy or lease a Honda vehicle, Honda Financial Services can assist you with the process. Please ask your dealer which lease or purchase plan best suits your needs.

Hondacare

Honda Care™ is a highly affordable, comprehensive vehicle and travel protection plan backed by Honda reliability, service and parts. Please see your dealer for all the details.
