For over a decade we've been providing simple answers for America's complex driving needs. With practical, fuel-efficient cars that are surprisingly roomy, comfortable and fun to drive. Along with the kind of engineering refinements and standard features you've come to expect from Honda.

Since its creation in 1948, Honda Motor Co., Ltd. has always been an engineering-oriented company. In fact, Honda has always had an engineer as president. That's why research and development has consistently played such a vital role in the evolution of our products.

At Honda, we believe our reputation for quality and innovative engineering has been rewarded by owner loyalty and high resale value. In fact, Honda enjoys one of the strongest owner loyalties of all imported cars. In 1980, almost one third of all Honda owners purchasing a new car bought another Honda. And the average retail value of all Honda cars ever sold in America is over 90 percent of the original suggested retail price.

The desire to constantly refine and test our engineering has led us to always strive for excellence. This is evident in the dozens of awards our cars have received in America and around the world. Honda cars are known for their quality, reliability and performance. And that's why Honda owners continue to enjoy the benefits of our cars long after the original purchase.
brought Honda to the international racing circuit, the harshest test of automotive technology. The Honda way is to test, refine and retest, reaching always for perfection.

Honda also owns and operates highly sophisticated proving grounds, where product refinements can be tested 24 hours a day, 365 days a year.

Two of the most important lessons learned on the racetrack and test track are efficiency and simplicity. And we've applied both lessons to the production of every Honda Prelude Sport Coupe.

We begin by designing in enough room for driver and passenger comfort. We then engineer all necessary components around them, keeping in mind that certain items must be easily accessible for required servicing. That's an important reason why Honda engines have always been mounted transversely. This configuration provides maximum interior space, while also keeping the spark plugs and oil filter right up front for easy accessibility.

And Honda is unique in that every one of its cars ever sold in America has featured front-wheel drive and a transversely-mounted engine. Placing the engine over the driving wheels provides increased traction, and delivers the power in the direction the car is being steered. Additionally, front-wheel drive increases available interior room, as there's no bulky drive shaft tunnel running through the passenger compartment.

The sporty Honda Prelude utilizes a 4-wheel independent MacPherson strut suspension system, so that each wheel reacts individually to road conditions. It assists also in providing comfortable, yet sportive road handling.

The Prelude also features rack and pinion steering, as do most modern race cars. Our reasons are similar. Rack and pinion steering furnishes quick steering response. And just enough road feel to keep the driver informed and involved.

Our sport coupe's aerodynamic profile presents an efficient chisel-shaped nose to the wind. This allows air flow to pass smoothly over the car, for reduced wind noise, great handling and increased fuel economy.

To aid the Prelude in maneuvering as gracefully as it looks, an optional variable-assist power steering system gives maximum assist when the car is stationary, or moving slowly. That helps make parking and maneuvering in traffic surprisingly simple. Yet at highway speeds the power assist is minimal, for excellent control and feel of the road.

in an instrument cluster that also includes our maintenance reminder and electronic warning system. As well as a light panel that monitors important driving data, including a low-fuel warning light and oil level/pressure indicator.

Attention to detail has always been an important consideration in the design and construction of Honda cars. For example, beneath each of the Prelude's rectangular headlamps are grilles designed to prevent snow buildup. That helps to insure adequate headlight illumination in winter driving conditions. The placement of a convenient passenger assist handle on the right windshield post represents another thoughtful touch.

This year, you'll find the Honda Prelude Sport Coupe exemplifies our high standards of quality craftsmanship and attention to fit, finish and detail. And presents further proof that a sportive car's lively performance doesn't have to detract from its efficiency and commonsense advantages.

Variable-assist power steering is available only with our optional 3-speed automatic transmission.

The Prelude's cockpit is the product of exhaustive testing and research, focused on the driver and his immediate environment. For driver convenience, a separate speedometer and tachometer are housed
Honda Prelude Sport Coupe. Think of it as a civilized sports car. A sleek, responsive automobile designed for uncomplicated sportive handling and fuel-efficient fun.

And a car to be enjoyed for many moons. Both because of the attention to quality engineering that goes into all our cars and the Prelude’s unique power-operated moonroof.

Honda engineering refinements help deliver a comfortable, yet sporty driving experience. So do the Prelude’s lively 1751cc engine, stylish interior and generous standard features. Like our front-wheel drive, smooth 5-speed manual transmission and power-assisted, self-adjusting front disc brakes with dual-diagonal circuits.

Additional refinements are numerous. And include our steel-belted radial tires and remote-control driver’s door mirror. Honda’s 3-speed automatic transmission, which comes with variable-assist power steering, is optional.
Stylish, handsome features to be enjoyed from any angle. With a tinted-glass moonroof for open-air driving at the touch of a switch. Fresh air and sunshine by day, and the moon and stars at night. The automatic retractable wind deflector helps shield you from the wind. And for shade, you simply slide the manual sunshade forward when the moonroof is closed.
You’ll appreciate thoughtful finishing touches inside, like a spacious trunk that’s lined to help protect your cargo. And the convenience of a remote trunk lid release, automatic trunk light and stowage boxes for small items. Outside, protective body side mouldings, sporty wheel trim rings, front wheel mud guards and a locking fuel filler door combine function with style.
The Prelude's cockpit design incorporates a light panel that monitors important driving data and includes a low-fuel warning light. The instrument panel features a trip odometer, convenient coin box, glove compartment, cigarette lighter and quartz digital clock. A two-speed plus intermittent action wiper/washer control lever is located to the right of the sporty steering wheel. The Prelude's stylish interior sports headrests that adjust forward, backward and vertically. As well as elegant color-coordinated seat fabric, with plush, deep-pile carpeting throughout. And generous interior appointments. Seen here with Honda's optional air conditioning and stereo entertainment system.
Honda’s quartz halogen fog lamps aid visibility in inclement weather. Front bumper guards can lessen possible damage to your new Prelude.

The stainless steel trunk rack, above, mounts simply on the Prelude. Two stylish black rear bumper guards fit the contour of the bumper. Rear wheel mud guards, besides being good-looking, help keep the car clean.

Front and rear pile-carpeted floor mats help keep the carpeting clean and match the 1982 Honda Prelude interior colors. Rubber floor mats are available in the same matching color range.

The Prelude’s optional teak and stainless steel trunk lid rack helps preserve the car’s finish when carrying extra luggage. Rear deck speakers are visible here as well.

Honda’s stainless steel fender well trim and door edge guards are designed for paint protection. Precision-made aluminum alloy wheels enhance the car’s sporty good looks.
In addition to a long list of standard features, we also offer a complete range of optional Honda accessories for your new Prelude.

A leather steering wheel cover adds a further sporty touch to the Prelude's interior.

Honda air conditioning is designed to be an integral part of the heating and ventilation system. With a 3-speed blower and fully adjustable outlets.

For 1982 there are eight different Honda entertainment systems to choose from. Like the AM/FM stereo with electronic tuning, digital display and autoreverse cassette with Dolby® shown in dash above.

Power as well as manual radio antennas are available. They both telescope completely into the windshield post to minimize potential damage.

The optional remote-control right-side mirror is helpful for changing lanes and right turns.
### Features and Standard Equipment

- 5-Speed Manual Transmission
- Variable-Assist Power Steering (with Optional Automatic Transmission Only)
- Power-Operated Moonroof
- Power-Assisted, Self-Adjusting Brakes
- Steel-Belted Radial Ply Tires
- Bright Metal Wheel Trim Rings
- Protective Body Side Moldings
- Bright Metal Window Reveal Moldings
- Matte Black Window Frames and Door Center Posts
- Tinted Glass
- Front Side Window Defrosters
- Locking Fuel Filler Door
- Rear Window Defroster
- Tachometer
- Electronic Warning System
- Quartz Digital Clock
- Combination Oil Pressure and Oil Level Light
- Combination Light Switch on Steering Column
- Glove Compartment Light
- Cigarette Lighter
- Coin Box
- Stowage Boxes in Rear Seat Side Panels and Center Armrest
- Passenger Assist Handle—Right Windshield Post
- Stowage Boxes in Each Side of Trunk Floor
- Mud Guards—Front Wheels
- Two-Speed Plus Intermittent Wipers
- Remote Trunk Lid Release
- Remote Control Outside Rearview Mirror
- Day/Night Rearview Mirror
- Vanity Mirror—Right Sun Visor
- Reclining Front Bucket Seats with 4-Way Adjustable Headrests
- Padded Door Armrests
- Moquette Interior Trim Including Door Panels
- Map Pocket in Driver's Door
- Full Carpeting
- Four-Spoke Sport Steering Wheel
- Trunk Light
- Maintenance Reminder
- Retractable Trip Odometer
- Low-Fuel Warning Light
