Designed to save fuel. And fuel desire.

It’s great that hybrid vehicles help save fuel. But at Hyundai, we believe better tech can do so much more. We designed a hybrid that does something wise—your favorite sedan. Hyundai designers gave the New Sonata Hybrid a spacious interior that starts with its signature grille. Ready-to-go LED daytime running lights peer from beneath the hood, illuminating the leading edge of a long hood (like defined by an extended band of chrome that curves uninterrupted around the side glass. To emphasize its ground-hugging stance, side view mirrors feature a rear spoiler that grazes the 17” of Sonata Hybrid’s low-slung sporty attitude.

Now, look closely at that sleek exterior. On the Limited model, it conceals an innovative new solar roof panel designed to soak up sunlight and charge the hybrid battery. It’s one of many ways the 2019 Sonata Hybrid takes advanced technology into tangible benefits. Another benefit pays homage to improving the impressive fuel economy, our Blue mode delivers an EPA-estimated 50 mpg (combined) with a real-world driving range.

Inside the refined interior, there’s an available 12.3” digital instrument cluster that lets you customize the gauges and information you want displayed. For your listening pleasure, there’s available sound calibration with the audio innovators at Bose®. To ensure every occupant enjoys a truly premium audio experience, the available surround sound system uses CenterPoint® surround technology.

Then there’s the Hyundai Digital Key, where your compatible Android smartphone, and the I30 and Limited’s front door visor where your phone’s placed on the door handle. Place your phone on the center console’s wireless charging pad, and the engine’s push start button is enabled. You can assign a digital key to multiple users, and two drivers can use their digital keys to receive emergency call assistance. The instrument cluster displays preferences and other multimedia settings. It’s a system that’s as intuitive as it is advanced.

J.D. POWER

Kaplan Automotive Research Survey: Consumer Report

15 out of 18 of our hybrids are rated for 4 years, 116,000 miles.

Hyundai among the Top Three Firms in the J.D. Power Initial Quality Study for the Third Straight Year.
Your time is at a premium. Here’s where you can spend it wisely.

With all the time you spend driving, what’s the return on your investment? It’s a question that drives us to make Hyundai vehicles more comfortable, more efficient and easier to live with. But it’s a question that also drives us to rethink a variety of smaller things. Like adding leather to the steering wheel. Or reducing road noise and vibration, so you can cover more ground with less fatigue. And to help make the interior less stuffy and brighter. Hyundai engineers focused on a more open, airy feeling to create the car’s high-rent luxury feel.

Notice how the climate controls and electronic gear selection buttons are spaced exactly where you’d expect them to be. For example, access to your smartphone apps and music files, the standard 8” display audio system integrates Apple CarPlay® and Android Auto™. An available 10.25” multimedia navigation system helps eliminate freeway stress with junction view lane guidance, filled birds’ eye views and competitive traffic updates.

To create a new level of personalization, an available feature called Remote Driver Profile Management lets you quickly recall seat positions for your car’s driver seat, side mirrors, audio and navigation systems, then send them to your Sonata Hybrid™ before walking out the door! A wise use of time, indeed.

Hyundai SmartSense Safety Technologies

60 Degrees of Protection

Hyundai completely surrounds you and your passengers with a wide range of features that optimize your safety. From sensors to ultrasonic and radar sensors, our sophisticated safety technologies act as a virtual fence around you when you drive or park. We call it Hyundai SmartSense. You’ll know it as peace of mind.

Is Sonata Hybrid a car? Or a computer on wheels?

With everything Sonata Hybrid's available Blue Link® connected car technologies can do, it’s a fair question. We’re constantly asking how we can make everything about driving and owning a Hyundai better. That means making it a totally seamless – and highly customizable – part of your daily life.

Hyundai Blue Link keeps you connected to your digital life with features that allow you to interact with your car in smarter, practical ways. And Blue Link continues to expand the wide range of Connected Care, Guidance and Remote services available with its complimentary 3-year activation.

Enhancements to Blue Link’s remote features go beyond letting you start the car’s engine and locate your vehicle. Now you can remotely change the climate control of your home or office. Sonata Hybrid Limited owners can also do things like adjust their profile settings – from the driver’s seat of your Sonata Hybrid to your home or office.2

Your app knows the answers to these questions, and more.2

Your app lets you remotely check the status of your Sonata Hybrid from just a few taps. With the myHyundai app, you can check vehicle diagnostics such as the status of your battery levels and request emergency services from the driver’s seat of your Sonata Hybrid or your home or office.3

To learn more about Hyundai’s Blue Link® system, visit Hyundai.com/BlueLink or contact your local Hyundai dealer.

To learn more about Connected Care, visit Hyundai.com/ConnectedCare.

The safety features available vary by model and equipment level, and the manufacturer reserves the right to change specifications, options, and equipment at any time without notice. Always obey traffic safety laws and regulations.

The 2020 Hyundai Santa Fe includes 3 years of the Blue Link Connected Care, Remote and Guidance (factory-equipped navigation required) packages.
Hope makes every Hyundai better.

Each time we sell a Hyundai, a portion goes to Hyundai Hope On Wheels® to help find a cure for childhood cancer. Over the last 21 years, Hyundai Hope On Wheels has donated more than $160 million. Hope is our greatest feature. And it comes standard on every Hyundai. For more information, please visit HyundaiHopeOnWheels.org.
