Look at it.
THE TRUTH IS, finding a car that’s right for you isn’t that easy. You’ve got cars that over promise and under deliver. Cars that assume you’ve won the lottery and desperately want to part with the proceeds. And value-priced cars that, unfortunately, drive that way.

Fortunately, there is one company that understands and embraces the concept of what people really want in a car. That company is Hyundai.

We make smart cars for smart people. Cars that routinely get 5-star crash test ratings. Cars where the number of safety features takes precedence over the number of cupholders. And cars that put quality exactly where it belongs—first and foremost.

We also believe in a warranty that lasts twice as long as the average car loan. Not to mention the average car warranty.

We steadfastly adhere to the proposition that premium amenities are not to be reserved exclusively for the wealthy. That beautiful design shouldn’t necessitate a second mortgage. And that stimulating performance and handling needn’t come from engineers with names like Hans and Giuseppe.

In other words, we believe in cars that don’t insult your intelligence, but rather, respect it.

Introducing the Sonata. It’s the refined and sophisticated kind of car you’d expect from Germany. But it actually comes from a place better known for its biscuits. Namely, Montgomery, Alabama. Complete with the safety you demand, the power you want and more features than you ever saw coming. It’s the sedan that’s everything a sedan should be. And one that IntelliChoice named as “Top Winner for Lowest Ownership and Operating Costs.”

Now that we’ve whetted your appetite, feel free to turn the page and get better acquainted.
SHOULDN’T EVERYTHING YOU WANT IN A CAR COME CONVENIENTLY PACKAGED IN A CAR?

HYUNDAI IS THE CAR COMPANY that believes you deserve more than you’re used to getting. That’s why the Sonata gives you so much. We know getting everything you want is a foreign concept, but we think you’ll come around. With a 5-star crash test rating, unsurpassed standard safety features in its class, impeccable design and America’s Best Warranty, the Sonata has raised the bar of expectation.
THERE'S NOTHING LIKE A NICE FAMILY CAR TO STIR THE SOUL.

IT'S THE FAMILY SEDAN THAT DOESN'T FEEL LIKE ONE. On all Sonata trim levels, you have your choice of two advanced engines – the fuel-efficient 2.4-liter 4-cylinder or the even more performance-oriented 3.3-liter V6, both with Continuously Variable Valve Timing and a suspension that perfectly balances a smooth ride with nimble handling. And since another inefficient, gas-guzzling vehicle is the last thing the world needs, we engineered the Sonata to emit fewer pollutants, earning it the EPA's rating as an Ultra-Low Emissions Vehicle (ULEV).

V6 POWER
Short highway on-ramps happen. Handling them is a cakewalk with a potent 3.3-liter V6 engine. Continuously Variable Valve Timing and a variable induction system help churn out 234 horsepower and 226 lb.-ft. of torque.

5-SPEED AUTOMATIC
The powerful V6 engine matches up to a 5-speed automatic transmission for smooth in-town driving and quiet cruising on the highway. SHIFTRONIC® manual shift mode gives you control over gear selection.

4-WHEEL INDEPENDENT SUSPENSION
For precise control and a smooth ride, the Sonata is equipped with MacPherson struts up front and a multi-link rear suspension with front and rear stabilizer bars. The result is responsive handling that's surprisingly refined.
More Than Just a Pretty Face

ALL THIS AND LOOKS, TOO?

AS YOU ADMIRE THE SONATA’S HANDSOME APPEARANCE, realize that you’ve merely scratched the surface. Because underneath its handsome bodywork are exemplary quality, thoughtful design and keen attention to detail. We started with corrosion-resistant paint, made possible by a thorough 18-pass rotary-dip, opposite-electric-charge primer process. Then added aerodynamically designed side mirrors to minimize wind noise. A-pillars engineered to improve the driver’s visibility. And jeweled projector headlights and fog lights to keep the road illuminated. But we didn’t stop there.
HEATED POWER SIDE MIRRORS
On cold mornings, your side mirrors might be covered in frost, but your fingers don’t need to be. This convenient feature lets you clear the mirrors to improve visibility.

INFINITY AUDIO SYSTEM
The 360-watt Infinity® audio system comes with six speakers, a subwoofer and external amplifier. All of which help make your favorite XM channels sound even better.

8-WAY POWER SEAT
A great car fits its owner. That’s why the Sonata’s driver seat offers 8-way power adjustability, allowing you to customize everything from seat height to lumbar support.

POWER SUNROOF
Enjoy the sun or the city lights above you. A push of a button opens the large sunroof, allowing you to slide or tilt it for just the right amount of airflow into the cabin.

HEATED FRONT SEATS
This luxurious feature brings a new level of comfort to your driving. Thanks to heated front seats, chilly winter mornings have met their match.

LARGEST CARGO VOLUME
Specially designed hinges that don’t use trunk space give Sonata more cargo volume than its competitors. Plus, the 60/40 split fold-down rear seatback creates even more room.

AUTOMATIC TEMPERATURE CONTROL
This feature lets you select the exact temperature you want. Then, it constantly monitors and makes adjustments as needed to maintain your preferred setting.

LESS IS NOT MORE. It’s just less. Especially when it comes to interior space. Or features. Or comfort. That’s why the engineers at Hyundai come from the school of thought where more is more. Starting with the Sonata’s EPA classification as a Large Car with the most total interior volume in its class. This means loads of legroom and headroom. On top of that, Sonata offers a tilt-and-telescopic, leather-wrapped steering wheel with integrated audio controls and a power-adjustable driver seat, ensuring you a ride in total comfort while pondering where less might actually be a good thing.
PREVENTING AN ACCIDENT IS THE BEST WAY TO SURVIVE ONE.

IT’S COMMON SENSE REALLY, but a fact that goes beneath the notice of many car companies. Not Hyundai. That’s why we fill our cars with cutting-edge active safety features—standard—that work dynamically with input from you and the road to help prevent an accident in the event of an emergency. Which is why a Hyundai is the ideal vehicle to protect you, your passengers and your peace of mind.

**Active Safety**

**ELECTRONIC STABILITY CONTROL**
An advanced, electronically-controlled system reads data from sensors throughout the vehicle. Input is relayed to a sophisticated computer, and is processed using proven algorithms, which enables ESC to react instantaneously to input from you and the road.¹

**TRACTION CONTROL SYSTEM**
Wet pavement may have met its match. The advanced Traction Control System senses unexpected wheelspin while accelerating and automatically applies the appropriate combination of brakes and throttle to route power to the tire with the most traction.²

**ANTI-LOCK BRAKING SYSTEM**
ABS prevents wheel lock-up and helps maintain steering control, even during emergency braking situations, by rapidly pulsing the brakes. So you can control steering to successfully maneuver around objects ahead of you.

**ELECTRONIC BRAKE-FORCE DISTRIBUTION**
You never know where you’ll be when you need to stop quickly— from a dirt road to a major thoroughfare. EBD uses a network of sensors to provide the appropriate braking pressure at each wheel for maximum braking performance.

**BRAKE ASSIST**
Statistics show that drivers frequently don’t brake forcefully enough in an emergency situation. Brake Assist actually senses when you are in a panic stop and immediately applies the maximum braking pressure to help you stop in a shorter distance.

¹Electronic Stability Control (ESC) cannot control your vehicle's stability under all driving situations. ESC is not a substitute for safe driving practices. No system, no matter how advanced, can overcome physics or correct poor driving. The driver is always responsible for controlling the vehicle and must use caution to avoid loss of control in all driving conditions. Speed, road conditions and driver steering input will affect whether ESC can help prevent loss of control. See Owner’s Manual for details. ²The Traction Control System (TCS) is meant to enhance conscientious driving habits and is not a substitute for safe driving practices.
ON TOP OF OUR ACTIVE SAFETY FEATURES, the Sonata is equipped with a host of standard passive safety features as well. Because we take the task of keeping you and your passengers safe just as seriously as you do. From an advanced airbag system to rear child-seat anchors, our commitment to safety is clear in every detail. So, should an accident occur, you can rest assured that you’re surrounded by state-of-the-art safety engineering and numerous features that have all been proven to help minimize the effects of it.
IT’S DIFFICULT TO PREDICT THE FUTURE. UNLESS YOU HAPPEN TO BE DESIGNING IT.

IT TAKES A WORLD OF PEOPLE TO MAKE A HYUNDAI. From our R&D Center in South Korea, where we conduct predesign studies, prototyping, full-scale aerodynamics analysis, crash testing and test driving. To Alabama and our $1.1 billion state-of-the-art manufacturing plant. To Michigan and our engineering center. To our Southern California design facility, where we utilize the world’s most advanced visualization, graphics and clay-modeling technologies. To our environmental technology research center in Seoul. Together, these facilities ensure that every vehicle we build is at the forefront of automotive technology.
We’re Very Hands On
We hand check nuts, bolts, cables, wiring and power components before any Hyundai leaves the plant. Then every vehicle is road tested to eliminate squeaks and rattles that can’t be detected on the factory floor.

Meet Our Quality Inspector
An army of 250 robots, equipped with optical sensors far more sensitive than the human eye, inspects every vehicle for quality welds and proper fit. This ensures tight seams and seals, as well as perfect alignment.

We Treat Our Bodies Like Temples
Prior to painting, the body of each Hyundai is electrically charged, then immersed in a primer bath with an opposite charge. This ensures even hidden surfaces are completely coated for incredible corrosion resistance.

Perfection is Our Obsession
For example, this door hinge used to look a little different. But our engineers noticed that the old design was adding a minute amount of wind noise to the vehicle. So they redesigned it. Now it adds none at all.

You Can Never Be Too Safe
Our vehicles’ excellent safety ratings are the result of thousands of hours of simulations in state-of-the-art safety testing facilities. Is destroying millions of dollars worth of automobiles worth it? Absolutely.

The Mysterious 2.3 Miles
Every new Hyundai that comes out of our Alabama plant has 2.3 miles on the odometer. That’s because each one is road tested on our test track to ensure every vehicle is working perfectly.

Tested to the Extremes
From the scorching heat of Death Valley, Calif., to the frozen tundra of central Canada, our cars are tested in the most extreme conditions. This ensures their performance never wavers, no matter what life throws your way.

Proven Before It’s Driven
At our California Proving Grounds, every new design is tested in real-world situations. This includes a 6.4-mile track to evaluate engine and road noise, and a 3.3-mile road course that simulates America’s highways.

Investing in Excellence
A FIVE-YEAR WARRANTY SAYS A LOT ABOUT THE CAR.
A TEN-YEAR WARRANTY SAYS A LOT ABOUT THE CAR COMPANY.

IT SAYS THAT WE STAND BEHIND OUR VEHICLES with a warranty matched by no other automaker in the country. It says your new Hyundai’s powertrain may be covered until the year 2018. (Just think about that for a minute.) But above all, it says that we build a vehicle that you can rely on. That as a company, we’re committed to your satisfaction, long after you leave the dealership and your car is bought and paid for. And that’s as refreshing now as it will be in a decade.
STANDARD FEATURES INCLUDE:

- 2.4-liter, Inline 4-cylinder engine with CVVT + 5-speed manual transmission
- 3.3-liter, V6 engine with CVVT + 5-speed automatic transmission with SHIFTRONIC®
- Chrome-tipped dual exhaust on V6
- Electronic Stability Control
- Traction Control System
- 4-wheel Anti-lock Braking System with Electronic Brake-force Distribution and Brake Assist
- Tire Pressure Monitoring System
- Advanced dual front airbags with Occupant Classification System, front side-impact airbags, front and rear side-curtain airbags
- Active front head restraints
- Power heated side mirrors
- Solar control glass on V6
- Air conditioning with cabin air filter
- AM/FM/CD/MP3 audio system
- XM® Satellite Radio
- Tilt steering wheel
- Power windows
- Remote keyless entry system with alarm

INCLUDES ALL STANDARD GLS FEATURES PLUS:

- 17-inch, 5-spoke Euroflange alloy wheels
- 215/55VR performance tires
- B&M® Sport Shifter with 4-cylinder engine
- Automatic headlights
- Front fog lights
- Solar control glass
- 8-way power driver seat
- Driver seat adjustable lumbar support
- Tilt-and-telescopic steering wheel
- Steering-wheel-mounted audio controls
- Multi-function trip computer
- Interior metalgrain accents
- Chrome window belt molding
- Rear spoiler

INCLUDES ALL STANDARD SE FEATURES PLUS:

- Leather seating surfaces
- Heated front seats
- 360-watt Infinity® AM/FM/in-dash 6-disc CD/MP3 changer, external amplifier and subwoofer
- Automatic temperature control with outside temperature display
- Electrochromic auto-dimming rearview mirror
- HomeLink® integrated transceiver
- Compass
- Sliding center armrest
- Chrome-accented front grilles, exterior door handles and bodyside molding
- Interior woodgrain or metalgrain accents
- Premium door-sill plates
- “Limited” badging
- Deletes rear spoiler, performance tires and B&M Sport Shifter
