MOVING DESIGN

With its glowing Bi-function HID headlamps, outlined with crystal white daytime running LEDs, and its toned bodyshape, the XF always looks ready for action. Its primed, nose-down, attitude, power vents and aerodynamic lines are more than an athletic pose, they’ve been precision-honed through exhaustive design testing to perfect the air flow emergency of the XF. Each curve and contour has been refined to produce top aerodynamic performance, helping to improve fuel consumption and emissions. Beautiful, intense, potent; first the XF captures your imagination and then your heart.
VEHICLE SHOWN: XF IN POLARIS WHITE
THE XF COLLECTION

Refined power and modern sporting elegance – the XF collection has the engines, the style and the attitude from the four distinct characters of XF, XF Supercharged, XFR and XFR-S. You can choose your perfect balance between performance and economy, driving style and lifestyle from the four distinct characters of XF, XF Supercharged, XFR and XFR-S.

Discover the stylish design, luxury craftsmanship, remarkable fuel economy and performance, thanks to a range of innovative technologies.

The XFR combines stunning looks with exceptional performance. This is reflected in its sculpted front air intakes, gloss black front grille and lower valance and quad exhausts.

The XFR-S has a 5.0 liter supercharged engine producing 550HP and 502 lb-ft of torque for a top speed of 186mph and awe-inspiring acceleration of 0-60mph in 4.4 seconds*. XFR-S is the Jaguar sports sedan taken to the extreme.

Exterior and Interior Option packs are available to enable you to create the XF that’s just right for you. For more information visit jaguarusa.com or visit your local retailer.

The XF is renowned for its performance, refined drive and effortless power and offers a choice of engines to suit every driver’s needs and driving style, whether improved fuel economy or power and performance are the priority. The range includes new smaller engines including the 2.0 Liter turbocharged delivering lower CO₂ emission and better fuel economy. Intelligent Stop/Start technology featured on all engines also contributes to delivering improvement in fuel efficiency depending on conditions.

DRIVING DYNAMICS

ADAPTIVE DYNAMICS | SERVOTRONIC STEERING SYSTEM
Responsive, powerful, driver-focused, the XF utilizes a range of technologies to assist, improve and enhance the driving experience. The acclaimed handling is delivered through combining stiff body architecture, aerodynamic form and innovative suspension systems.

The **Adaptive Dynamics** system of the XF, available on a selection of engines, continuously monitors the suspension, varying the damping to suit the conditions, whether cornering, navigating potholes or accelerating on highways*. The system is designed to calculate the appropriate suspension settings up to 500 times per second, adjusting the dampers to help keep the car as flat, stable and secure as possible.

With the **Servotronic steering system**, the XF delivers pinpoint maneuverability at low speeds then reduces assistance at higher speeds for confident handling.

*These features are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Jaguar Retailer for more details.

VEHICLE SHOWN: XF WITH OPTIONAL AERODYNAMIC PACK IN DARK SAPPHIRE
ALL CONDITIONS, ALL WHEEL DRIVE

Inspiring driver confidence on almost all driving surfaces and in extreme weather, the advanced and intelligent technology includes Jaguar Instinctive All Wheel Drive™ system (AWD), which is available with the 3.0 liter V6 Supercharged engine. In normal conditions, Jaguar AWD preserves the signature Jaguar rear wheel drive performance and agility, as well as improving fuel use and reducing emissions, by applying most of the torque to the rear wheels.

If low traction is sensed at the rear wheels, up to 50 percent of torque is quickly redistributed to the front wheels. When the most extreme conditions are detected - imagine pulling out of a slippery side road onto a dry main road at a T-junction in winter – up to 100 percent of available torque can be applied to the front wheels. The result is the reassurance of having all wheel drive when needed, while maintaining sports car performance in the majority of situations.

*This feature is not a substitute for safe and attentive driving, nor can it overcome all extreme circumstances. Please consult the owner’s manual or your local authorized Jaguar Retailer for more details.

VEHICLE SHOWN: XF IN DARK SAPPHIRE WITH OPTIONAL CHROME SIDE POWER VENT
The XFR takes the XF to another performance dimension. With acceleration of 0-60mph in 4.7 seconds*, the XFR intensifies the sporting experience without compromising any of the comfort.

Beneath the hood with its enlarged air intakes, sits Jaguar’s 5.0 liter V8 Supercharged all-aluminum quad-cam engine. Its Intelligent Stop/Start technology and 8-speed electronic automatic transmission is designed to help reduce CO₂ emissions, yet is powerful enough to produce an impressive 510HP and 461 lb-ft of torque.

The XFR also offers the opportunity for individuals to tailor the car to their own requirements, as well as for personalization, including some option packs which use XFR-S derived components. The Speed Pack recalibrates the engine and transmission to take top speed (Vmax) from 155mph to 174mph*. The Dynamic pack offers sports tuned suspensions, a front bumper aero-splitter, a bespoke rear spoiler, 20 inch Varuna alloy wheels, as well as raising the Vmax to 174mph*.

*Always obey legal speed limits

VEHICLE SHOWN: XFR IN ITALIAN RACING RED
The XFR-S is the most powerful, most agile production sports sedan EVER created by Jaguar. It builds on the performance of the XFR to create a car that is even more driver-focused. The XFR-S has a 5.0 Liter supercharged engine that has been tuned to produce 550HP and 502lb-ft of torque for a top speed of 186mph and awe-inspiring acceleration of 0-60mph in 4.4 seconds*. There is handling to match, thanks to the superb torsional stiffness of the body structure and a chassis set-up that is designed to inspire driver confidence and to keep the car planted. Specially designed suspension components help to maximize response, reduce roll and boost body control with lateral stiffness up by 30 percent.

The XFR-S has the bold, assertive looks too with honed, sleeker aerodynamic lines and super strong, lightweight carbon fiber details, including the lower grille surround, front splitter and rear diffuser, that reduce lift by 68 percent. It also has its own throaty, signature sound from a bespoke R-S sports exhaust. The XFR-S features a new rear subframe for superior traction and cornering agility. The car’s increased power calls for the capabilities of high performance brakes and forged 20-inch Varuna lightweight alloy wheels.

*Always obey legal speed limits

VEHICLE SHOWN: XFR-S IN FRENCH RACING BLUE
INTELLIGENT ASSISTANCE

The safety systems of the XF are designed to be anticipatory, utilizing an array of innovative technological features to be ready for almost anything and assist the driver in dealing with the unexpected. Dynamic Stability Control (DSC) maximizes the stability when it detects the wheels slipping. Electronic Brake Force Distribution measures load weight and distributes braking force to front and back wheels accordingly.

Optional Adaptive Cruise Control (ACC) on the XF uses a radar in the front bumper to monitor the vehicle in front, automatically adjusting the speed to maintain a constant distance*.

Emergency Brake Assist (EBA)* is designed to work with Adaptive Cruise Control to detect the severity of a stopping situation and applies optimum crisis braking forces as necessary*.

Adaptive Front Lighting enhances night-time driving. Sensors react to the speed and steering input to deflect the headlamp beams casting light deeper and wider to help give added confidence at night*. The feature is standard on XF Supercharged, XFR and XFR-S and optional on all other models.

An Optional Blind Spot Monitor* uses radar sensors to remotely cover areas that cannot be seen either directly or in the mirror, and is designed to alert the driver to cars overtaking with an amber warning icon in the external mirrors*.

The body structure of the XF uses 25 different grades of steel. Boron, an element 900 percent stronger than regular mild steel, is used to help create a vertical ring of safety around occupants. A total of eight airbags help to add further protection**.

*These features are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner’s manual or your local authorized Jaguar Retailer for more details.

**Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.
A single 7-inch color Touch-screen in the center console provides multi-function control and displays the three primary functions: audio, climate control and satellite navigation*. For a hands-free experience, the system also offers voice control of audio, navigation and telephone connectivity.

*Driving while distracted can result in the loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones, and other devices, even with voice commands, when it is safe to do so.

**Only available on optional Portfolio Pack, standard on XF Supercharged, XFR and XFR-S

Adjust the environment to suit every occupant with dual-zone climate control, which includes air particle and odor filtration, humidity control and automatic window defrosting. Your front seats can also be heated or cooled at the touch of a button.**

The navigation system of the XF gives clear instructions through the Touch-screen.
Phone calls can be made using controls on your Touch-screen or steering wheel via your built-in telephone system of the XF. Link compatible mobile phones to the hands-free telephone system* of the XF and even stream audio content wirelessly into your entertainment system, all using Bluetooth® audio streaming technology. To make things even easier, the optional Interactive Voice system – Say What You See – helps the driver to use and interact more easily. It displays voice prompts on the Touch-screen for you to vocally control phone calls, navigation or audio.

Adjust primary controls such as switching stations via the Touch-screen*. The listening experience can be further optimized by adjusting tone, balance and fade.
Turn on the superb audio system of the XF and the cabin comes alive, delivering 250 watt of pure audio fidelity, surrounding you with exceptional sound quality.

You can personalize your Jaguar even further to enhance your listening experience. Meridian, the ultimate audio specialists, have optimized two systems specifically for the unique interior space of the two systems for your unique interior space. Both are engineered to take your sound system to the next level. Meridian’s 380 watt Sound System with 11 loudspeakers produces a seminal audio experience while the incredible 825 watt Surround System uses no less than 17 loudspeakers (including subwoofer) to create sound that is just as the artist intended. Meridian achieves this by benchmarking acoustic performance against real musical instruments.

Pioneered by Meridian, Trifield™ technology ensures a perfect central image for each occupant and produces an holistic sound within the cabin to deliver a concert-like experience. With an XF Meridian Audio System everyone can hear the difference.

INTERIOR SHOWN: XF WITH PORTFOLIO INTERIOR PACK. UPPER FASCIA IN WARM CHARCOAL WITH IVORY CONTRAST STITCH AND KNURLED ALUMINUM WITH SATIN ROSEWOOD VENEER
Settle in to the XF and the softly pulsing 'start' button greets you. Push and the engine engages, and the XF awakes. Even as you lift your finger, the precision-milled aluminum JaguarDrive Selector™ rises snugly into the palm of your hand. The engine gently throbs as the air vents, invisible until needed, roll open in unison and cool Phosphor blue halo lighting illuminates the interior controls. Let the excitement begin.

Ergonomically optimized, the cabin of the XF is a space both contemporary and luxury, created to focus on driver and passenger needs and to excite the senses. Comfort and quality reign supreme with form hugging seats, real wood veneers, Piano Black veneer and aluminum surfaces.

From the premium floor carpet and side trims to the polished stainless steel finishers, there is luxury throughout the XF. Thoughtful design encompasses every feature. The steering wheel position adjusts at the touch of a button, along with the seat and mirror. These settings can be memorized for different drivers. The XF welcomes you to the drive ahead.
Jaguar offers a stunning collection of different color, trim and veneer choices. The XF is available in four model choices; XF, XF Supercharged, XFR and XFR-S, to enable you to create the XF that’s just right for you.
From Polaris White to Caviar, from the race inspired colors of Italian Racing Red to British Racing Green, Jaguar offers an outstanding paint spectrum to bring your XF alive. With numerous color choices in either standard or metallic finish, this is the opportunity to make it your XF.

Craftsmanship goes to the very heart of the XF and provides unequivocal evidence of Jaguar quality.

Seat leather is available in 3 different grains: Bond grain, soft grain and carbon soft grain. Leather is sourced from the finest hide suppliers in the UK and Italy ensuring a glove soft and natural feel. All leathers go through an extensive finishing process to protect the material while preserving its unique appearance and character.

**Twin needle stitching** is applied throughout the XF for durability. On selected models, contrast stitching is combined with seat leathers and door bins to add a further touch of luxury. There is also a choice between Carbon Fiber and Piano Black veneers, while every XFR-S interior is finished with piping on the seats.

A range of optional style packs is available, providing an opportunity to upgrade your XF even further.

**SPORT INTERIOR PACK**

Matching the powerful character of the XF, a Sport Interior Pack is available featuring double stitched soft grain leather Sport seats which reshape and adjust to create a perfect fit. From individually fine-tuned lumbar support to powerfully sculpted side bolsters, they deliver exceptional lateral support during hard cornering. With polished metal sports pedals and Piano Black veneer, the Sport Interior Pack is simply stunning.
AERODYNAMIC PACK

Giving the XF an even more assertive stance and a distinctive new profile, the Aerodynamic Pack includes a trunk spoiler and modified, lower front bumper with a black grille, sculpted rear valance, diffuser and streamlined side sills.

BLACK PACK

Add high gloss black finish to front and rear, ranging from window surrounds to front grille and bumper, as well as rear signature blades. The pack also includes 20 inch gloss black wheels (style dependent on model).
