**The Pinnacle Grand Cherokee Summit®**

**New Acoustic Glass with Active Noise Cancellation**
Grand Cherokee Summit’s cabin removes you even further from the sound of traffic and wind. The standard acoustic front side glass is now matched by the new, non-standard acoustic glass in the windshield and rear side windows. They all work together to noticeably decrease NVH (noise, vibration and harshness). Here, peaceful comfort comes along for the ride.

**Inspired Designer Palette**
Grand Cherokee Summit’s available Jeep® Brown interior is inspired by the warm tones that grace the majestic walls of the Grand Canyon. Copper-colored bezels and accent stitching continue the homage to this world wonder.

**Seating in First Class**
All of Grand Cherokee Summit’s first- and second-row seats are heated for comfort in every climate, and front seats are ventilated and power-adjustable eight ways, with four-way lumbar adjustment.

**CommandView® Panoramic Sunroof**
This view from the top is revealing. There’s more to be seen when you look up and out via Grand Cherokee’s full-power sunroof with a power sunshade in front and a fixed-glass window in the rear. One look at this dual-pane sliding-glass ceiling and you’ll definitely enjoy seeing what comes naturally into view.

JEFF, 4x4 CONFIDENCE
Choose from three available 4WD systems:

+ QUADRA-DRIVE® II employs an Electronic Limited-Slip Differential that can transfer up to 100 percent of torque to the rear wheel(s) with traction to help you maintain forward movement. Available.

+ QUADRA-TRAC II® offers all-speed traction control via a two-speed low transfer case that can quickly distribute power to the axle with the most traction. Available.

+ QUADRA-TRAC I® is fully automatic, offering a continual balance of torque distribution; if slippage occurs, torque is transferred to the axle with the most traction. Available.

SELECT-SPeed® CONTROL
Select-Speed adds Hill Ascent Control to the familiar Hill Descent Control. Hill Ascent engages the throttle to help provide stable low-range control when going uphill, while Hill Descent uses engine and physical braking to aid in vehicle control when going downhill. Available.

Available.

**Electronic Sway Control (ESC)** A vehicle-wide network of safety sensors helps maintain vehicle control, providing instant aid should they detect you’re swerving off your intended path. ESC can detect sideslip by monitoring the speed difference between the inner and outer wheels of a tire, and it can help prevent skidding by braking the inner wheel. Available.

**Parked Rear Back-up Camera** Back out safely with grace. This system helps bring previously hidden rear objects to your attention, either on screen or with an audible warning, in good time to react. Available.

**Parked Sensing Front and Rear Park Assist System** Grand Cherokee can help you park and back out with grace. This available system works in tandem with ParkView to display previously hidden front and rear objects, bringing them to your attention on-screen and also with an audible warning so you have time to react. When in Reverse, the on-screen image includes a dynamic distance grid to help gauge your rear perimeter.

**Adaptive Cruise Control with Stop (ACC)** Take the guesswork out of keeping a safe distance from the car ahead while cruising on the highway. ACC automatically adjusts your speed to maintain a pre-set distance between your Grand Cherokee and the vehicle in front of you. It can even help bring your vehicle to a complete stop if conditions require. Available.

**Forward Collision Warning with Brake Mitigation (FCW)** Radar sensors detect when Grand Cherokee may be approaching another vehicle too rapidly and send an audible and visual alert to the driver. The system also provides 1.5 seconds of braking assistance if the driver does not react in time. Available.

**Selective Speed Control** Smoothly navigating steep hills can be daunting. Engage Select-Speed Control on the Select-Terrain® dial of your 4WD Grand Cherokee and you’ll climb and descend with greater safety. ACC automatically adjusts your speed to maintain a pre-set distance between your Grand Cherokee and the vehicle in front of you. It can even help bring your vehicle to a complete stop if conditions require. Available.

**Trailer Sway Control (TSC)** Crosswinds and traffic hold no sway over you and your payload. As part of ESC, TSC helps keep you on course.

**Blind Spot Monitoring and Rear Cross Path Detection System** These systems constantly monitor the space between you and other drivers while you’re out on the open road. If an object enters your blind spot, you’re notified via illuminated icons on sideview mirrors or an audible chime. Available.

**Forward Collision Warning with Crash Mitigation (FCW)** Radar sensors detect when Grand Cherokee may be approaching another vehicle too rapidly and send an audible and visual alert to the driver. The system also provides 1.5 seconds of braking assistance if the driver does not react in time. Available.
