For a great drive, it’s WHAT’S INSIDE that counts.

WHAT’S INSIDE
We can all use some EXTRA HELP out there

Even the best drivers can’t be perfect 100% of the time. So we created Kia Drive Wise®, a suite of standard and available advanced driver-assistance technologies that are designed to help keep you alert, aware of surrounding traffic, and even intervene in certain situations to help you avoid collisions.

Look for the DRIVE WISE labels ahead.

LANE DEPARTURE WARNING® DW
If the system detects you drifting too close to lane markers without signaling, it can help alert you with a warning beep.

BLIND SPOT COLLISION WARNING WITH LANE CHANGE ASSIST® DW
Radar works to help detect vehicles in your blind spot and give visual and audible alerts to help you avoid some hazardous lane-change decisions.

*Optional feature available only on certain trims. See kia.com for details.

When life throws you a CURVE

Here’s how to stay on track

TO ENHANCE CONTROL
ELECTRONIC STABILITY CONTROL (ESC)†
In difficult driving situations, ESC is designed to help control the engine and brakes for improved directional stability.

TO HELP PREVENT SLIPPING
TRACTION CONTROL SYSTEM (TCS)†
When TCS senses wheelspin during acceleration, it uses a combination of engine power and brake force to help transfer power to the wheel that has more traction.

TO HELP CONTROL TURNS
CORNERING BRAKE CONTROL†
This system provides side-to-side brake pressure proportioning, resulting in optimized vehicle deceleration and stability when braking into a turn.

TO HELP PREVENT BACKSLIDING
HILL-START ASSIST CONTROL (HAC)†
When starting off on a steep hill, HAC is designed to automatically hold the brake pressure for two seconds after you take your foot off the brake pedal.

†No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive safely.
At Kia, the priority is always on improving all aspects of safety. Advanced sensor systems, strategically placed airbags, and breakthroughs in materials and design that have led to strong body construction are just a few of the ways we never stop working to increase your protection.

**ADVANCED AIRBAG SYSTEM**
- Includes dual front, front seat-mounted side, and full-length side curtain airbags

**AIRBAG & SEAT-BELT SENSORS**
