“THE WORLD IS A BOOK, AND THOSE WHO DO NOT TRAVEL READ ONLY A PAGE.”

— Saint Augustine
Telluride is assembled in the United States from U.S. and foreign parts. You will find them in every corner of our country. Everyday people who refuse to live by half measures. The ones who go all in — not for fame or glory, but because they just love doing what they do. They give it everything, and inspire us to do the same. In this spirit, we created the 2021 Telluride, designed with guts and grace, assembled in America and equipped to let you pursue what thrills you — on any road you choose.
THE ORIGINAL THRILL-SEEKERS:  TELLURIDE’S FIRST MINERS.

In 1875, a prospector named John Fallon staked the first claim in Telluride’s remote gold- and silver-filled mountains. An arduous journey over rough terrain, bushwhacked trails, and the sky-high elevations of the Colorado Rockies, the path to reach the “City of Gold” test made sense of new. Telluride was seen as a mining boomtown, bringing thrilling possibilities to this new, rugged, thrilling community of spirited residents. Over the next century, Telluride rode the highs of boom and busts, and a community grew, savvy residents that their mountain town was home to another sort of gold — “white gold” — the form of incredible snow, the accumulation more than when mining ceased for good in 1878, for the community called to transform Telluride into a world-class ski resort — ushering in a new legacy of adventure.

TELLURIDE, CO

Lore has it that Telluride got its name from the mineral tellurium, a non-metallic element associated with mineral deposits of gold that were found in Colorado’s precious mineral-filled mountains. Today, Telluride is best known for its “white gold” — snow — making it perfect for those who love adventure, and so envy it in a Kia Telluride.

WHAT’S YOUR ADVENTURE?

Wherever the road calls you, Telluride is equipped to take you there — whether it’s mountains covered in fresh snow, a remote desert escape, or perhaps more intriguing — no set destination at all. Like its namesake town of today and the legacy of its founding residents, the Kia Telluride is built for thrilling endeavors, rugged conditions, and an innate pull toward the exciting — with available Active On-Demand AWD, V6 power, advanced technology, and modern luxury.

*For 2020 Telluride. No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and injury. Always drive safely and obey all traffic laws. Aftermarket snow tires (sold separately) are recommended for snowy or icy conditions. Always drive safely and use caution.
†No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive safely and obey all traffic laws. Snow powder added for effect. Aftermarket snow tires (sold separately) are recommended for snowy or icy conditions. Always drive safely and use caution. SX WITH PRESTIGE PACKAGE SHOWN BECAUSE THERE’S A SNOW MODE IN ALL OF US.

When fresh snow beckons, Telluride’s available ACTIVE ON-DEMAND AWD system is ready for challenging road conditions. The system is designed to actively distribute torque between the front and rear wheels to help improve performance depending on the driving situation, and features two custom modes: SNOW MODE† is engineered to help reduce wheelspin and give you enhanced control in snow. And AWD LOCK MODE† gives you full-time all-wheel drive at the touch of a button to help conquer sand, mud, and other difficult terrain that dares to stand between you and your destination.
HERE’S TO GOING ALL OUT.

Telluride is made to thrill, wherever your travels take you. So, while you may not happen upon a racetrack, at some point in your travels you’ll likely encounter a nice, curvy road, mountain pass, or wide-open stretch of highway — and this is your chance to experience its 291-HP 3.8L Gasoline Direct Injection V6 engine and sporty, ultra-responsive performance. Ready for even more excitement? Add the all-new, exclusive NIGHTFALL EDITION PACKAGE* for a completely blacked-out exterior, flaunting a bold, glossy black finish on everything from the 20” alloy wheels and grille to the emblems.

**SELF-LEVELING REAR SUSPENSION** is designed to automatically calibrate the weight load to help keep the vehicle level, helping to keep the vehicle level and balanced for better traction and handling.

**TORQUE VECTORING CORNERING CONTROL** is designed to increase cornering stability by applying braking force to the rear inside-corner wheel for more precise turning in a variety of situations.

**8-SPEED AUTOMATIC TRANSMISSION** gives you a greater range of gears for seamless acceleration — along with Sportmatic® shifting for a sportier, more engaged driving experience.

**MULTIPLE DRIVE MODES** include a Sport Mode that adjusts the settings for powertrain, drivetrain, and steering effort to provide an optimal driving experience.

**ISO-STRUCTURE™ CONSTRUCTION** made from 59% advanced, high-strength steel, is stronger and lighter than regular steel, providing enhanced rigidity, body control, and a quiet ride.
MADE FOR THOSE MOMENTS WHEN SOMEONE SAYS, "LET'S CHECK IT OUT OVER THERE!"

You can follow your urge to explore with the confidence in knowing that Telluride excelled in RUGGED CAPABILITY TESTING at Kia’s high-desert proving grounds. Water, grit, temperature extremes, steep roads, choppy roads, slick roads — you name it, Telluride has been subjected to it.

No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive safely and obey all traffic laws.

**ELECTRONIC STABILITY CONTROL (ESC)**
In difficult driving situations, ESC is designed to help control the engine and brakes for improved directional stability.

**VEHICLE STABILITY MANAGEMENT (VSM)**
VSM works in tandem to help maintain stability and steering responsiveness when driving on some slippery roads.

**TRACTION CONTROL SYSTEM (TCS)**
When TCS detects wheelspin during acceleration, it uses a combination of engine power and brake force to help transfer power to the wheel that has more traction.

**ELECTRONIC BRAKE-FORCE DISTRIBUTION (EBD)**
EBD helps adjust the balance of braking power accordingly.

**INSURANCE INSTITUTE FOR HIGHWAY SAFETY**
For 2020 Telluride when equipped with optional LED headlights.
MY GOAL IS TO CREATE A BEAUTIFUL PIECE OF ART THAT IS MEANT TO BE USED.” — Dan Bitterman, Cascadian Canoe Works

FUNCTIONAL BEAUTY. Though craftsmanship takes many forms, we can agree it shares a few common traits: a beautiful, intelligent design; quality materials; meticulous attention to detail; and pride in the end result. This was the high bar we set in designing Telluride’s cabin. We chose premium seating materials like available NAPPA LEATHER TRIM* and detailed it with padded, double-stitched quilting. Simulated BRUSHED METAL accents and MATTE-FINISHED WOOD TRIM add modern, elegant ambience. We covered the surrounding surfaces with soft-touch materials, and put it all together in a thoughtfully ERGONOMIC DESIGN. The level of craftsmanship is similar to one of Dan’s canoes: you can sense it when you see it. You can feel it when you sit inside. And you know it for sure when you experience how it performs.

*Optional feature available on certain trim levels; see Features page for availability. SX WITH PRESTIGE PACKAGE SHOWN.
12-WAY POWER MEMORY DRIVER’S SEAT
lets you customize and set the perfect seating position for two drivers, and includes power seat-extension settings for additional thigh support.

HEATED & VENTILATED FRONT & 2ND-ROW SEATS1*
provide that perfect boost of warmth or cooling, with three modes in each setting to let you customize your comfort.

HEATED STEERING WHEEL1*
helps beat the chill on frosty days.

MOOD LIGHTING*
lets you choose from a range of colors to accent key areas throughout the cabin.

ACOUSTIC GLASS on the windshield and front doors* reduces road noise for a quieter ride.

WHEN YOU’RE TRAVELING HUNDREDS OF MILES,
EVERY INCH MATTERS.

More space to stretch out can transform your entire travel experience, so Telluride’s ultra-comfortable cabin features CLASS-LEADING TOTAL LEGROOM† including impressive legroom in the third row. The cabin is designed with standard 8-PASSENGER SEATING, or if you prefer, available 7-passer seating with reclining second-row captain’s chairs. Plus RECLINING SEATBACKS in the third row for added relaxation on long rides.

†Legroom comparison based on 2020 and available 2021 models. 3.4% as of July 2020. †Optional feature available only on certain trim. See features pages for availability. 1-row seat might be available. Information based on 2020 model. PRODUCTION STARTS 4/2021.

SX WITH PRESTIGE PACKAGE SHOWN
DUAL-ZONE AUTOMATIC TEMPERATURE CONTROL* gives driver and front passenger separate controls to maintain their own personal climate zone.

REAR AUTOMATIC TEMPERATURE CONTROLS* let front and rear passengers adjust the temperature.

REAR ROOF-MOUNTED DIFFUSED-AIR VENTS let rear passengers diffuse the air flow for a softer, more indirect output when desired.

WIRELESS SMARTPHONE CHARGER 6* lets you charge your compatible smartphone in the console storage area for cord-free charging.

REAR OCCUPANT ALERT 5 uses ultrasonic sensors that are designed to detect children or pets in the second or third row, and give visual and audible alerts if it detects movement inside, before and after the vehicle has been locked.

USB CHARGE PORTS IN EVERY ROW provide easy access for front and rear passengers to charge their devices.

DRIVER TALK* allows the driver’s voice to be played through the rear speakers at the touch of a button, making it easier for second- and third-row passengers to hear.

QUIET MODE REAR1* activates the rear speakers in the second and third rows to accommodate sleeping passengers.

BLUETOOTH® WIRELESS TECHNOLOGY WITH MULTI-POINT CONNECTIVITY* allows two users to be connected at the same time, allowing one user to listen to music or media streaming, while the other uses the call function.

APPLE CarPlay® & ANDROID AUTOMOBILE® let you plug in 6 your compatible smartphone to listen to music, make calls, send texts, or play voice commands.

*Optional feature available only on certain trims. See Features page for availability. 2–6 See last page for endnotes. Simulated screen shown.
WE’VE DONE IT ALL. YOU COULD SAY OUR VERSATILITY IS WHAT’S KEPT US GOING ALL THESE YEARS.” — Curtis Hanks, Smith-Worthington Saddlery

UP FOR ANYTHING. Helping you go where you want to go, do what you want to do, and bring what you’ll need when you get there is the mission of Telluride’s versatile cargo design. The available SMART POWER LIFTGATE™ opens automatically when you stand behind it, and can be customized to your preferred height and speed (normal or fast) — perfect for when your arms are full. The liftgate’s wide opening makes it easy to load and unload your gear, while MULTIPLE CARGO CONFIGURATIONS accommodate large, bulky items, from riding gear to camping gear! Like Smith-Worthington Saddlery, it’s all about meeting your needs.

SMITH-WORTHINGTON SADDLERY

Smith-Worthington Saddlery of Hartford, Connecticut, has been designing and producing custom saddles, bridles, and other equestrian goods since 1802. Recognized for their attention to detail, fine craftsmanship, and use of traditional materials such as open-grained leather and wool flock lining, the company has thrived for over 200 years as much for their quality as for their versatility. In their long and colorful history, they’ve been trusted to make saddles for cavalry in the Civil War, bridles for Barnum & Bailey’s horse-drawn wagons, and dog harnesses for rugged expeditions to Antarctica. With their deep knowledge, creativity, versatility, and skilled craftsmanship, it’s no wonder this family-run business is still going strong — and their products can be spotted across the country and beyond.

HARTFORD, CT

For over 200 years, Smith-Worthington Saddlery has made custom products as varied as the places their clients take them — from New England to the California desert.
2-WAY LUGGAGE BOARD can be opened to increase the storage area depth for storing taller items like luggage or sports gear,† or closed to create a flat storage area that aligns with the rear seats in their folded-down position.

CONCEALED UNDER-FLOOR STORAGE beneath the closed luggage board provides a hidden, sunken storage compartment to organize smaller, lesser-used items.

All cargo should be evenly distributed, properly secured, and never piled higher than the seatback. SX WITH PRESTIGE PACKAGE SHOWN.
BRING WHAT YOU NEED, DO WHAT YOU LOVE.

Horses, boat, travel trailer—of course you want to bring them with you, so Telluride is up to the task. Its 291-hp, 3.8L V6 engine puts out a capable 262 lb.-ft. of torque to provide up to 5,000 LB. OF TOWING CAPACITY, allowing you to haul a variety of trailers.

7 See last page for endnote. No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive safely and obey all traffic laws.
ON TURNING A ROUGH PATCH INTO RECREATION.

Should the road become rocky, Telluride is ready. Its body frame is constructed with Ring-Shaped Reinforcements around the B and D pillars, for enhanced torsional stiffness and Structural Stability—which translates to greater control and confidence tackling rugged terrain. Telluride also features Hill-Start Assist Control (HAC), designed to automatically hold the brake pressure for two seconds after you take your foot off the brake pedal when starting on a steep hill.
SHANI GANDHI

Shani Gandhi is an award-winning music producer and engineer in Nashville, known for her work with top artists in the Americana and folk genres. Originally from Singapore and raised in Australia, Shani had a scientific, problem-focused upbringing, and realized she would continue down a conventional career path—though she always had a strong passion for music that she considered a “hobby.” It wasn’t until she learned about the engineering side of music that all the pieces came together. As Shani describes it, “I kind of found out that there was a technical side to music. Instead I could take my hobby and my scientific background and build a career from it.”

NASHVILLE, TN

The music industry is the beating heart of Nashville, earning it the title “Music City” and attracting top talent in audio and technology like Shani. Telluride shares this passion of blending a high level of technology into audio, as well as its communications and driver-assistance features.

“HOLD ME TO A HIGHER STANDARD. I’LL MEET YOU THERE.” — Shani Gandhi, music producer and engineer

ADVANCED TECHNOLOGY is the soul of Telluride, enhancing everything from the music that provides the soundtrack to your travels, to embedded modern features and state-of-the-art driver-assistance functions. We’re proud to offer an available 10-speaker HARMAN KARDON® 630-WATT PREMIUM AUDIO SYSTEM™ that includes both QuantumLogic™ surround sound and CLARI-Fi™ — an intelligent, real-time, music-restoration technology that restores the crisp, dynamic sound of music that gets lost during the digital audio compression process. Together with the advanced technologies you’ll find on the following pages, we’re confident they’ll meet your own high standard of approval.

*Optional feature available only on certain trims, see last page for endnote. SX WITH PRESTIGE PACKAGE SHOWN
DESIGNED TO LOOK OUT, SPEAK UP, AND EVEN STEP IN.

Even the best drivers can’t be perfect 100% of the time, so we created Kia Drive Wise, a suite of advanced driver-assistance technologies. These include an available SURROUND VIEW MONITOR WITH 10.25” SCREEN, which uses four cameras to provide an aerial view around the vehicle to help when parking in tight spots; REAR CROSS-TRAFFIC COLLISION-AVOIDANCE ASSIST, which uses visual and audible alerts that can help warn of traffic the system detects coming from either side when you’re in reverse, and can even automatically apply the brakes in some cases; and REAR AND AVAILABLE FRONT PARKING DISTANCE WARNING, which is designed to give an audible warning if it detects certain objects close to your vehicle when parking.

THINGS YOU CAN DO REMOTELY FROM YOUR SMARTPHONE:

REMOTE LOCK/UNLOCK/START lets you control the doors or start the engine from afar
REMOTE CLIMATE CONTROL lets you get the air conditioning or heater started to preheat or precool the cabin (available on EX and SX)
REMOTE REAR OCCUPANCY ALERT can send push notification alerts if movement is detected inside the vehicle
REMOTE FIND MY CAR can locate where you parked your Telluride, and even give you directions to it

UVO & SMART SPEAKER INTEGRATION allows you to utilize a nearby, paired Amazon Alexa or Google Assistant to remotely control certain on-board functions such as vehicle start or your Kia with just your voice. To enable the feature, enable UVO in the Amazon Alexa app or link the UVO Agent to your Google Assistant.

REMOTE ACCESS VIA YOUR SMARTPHONE. UVO link is Kia’s smart connectivity system that lets you integrate your compatible smartphone via an embedded modem to perform an array of impressive functions. Just activate UVO link and download the Kia Access with UVO link app from the App Store or Google Play Store. We’ll even cover your subscription fees for one year from the original retail purchase date.

Hey Google works with Amazon Alexa and Google Assistant to remotely control some functions (such as remote start) on your Kia with just your voice. To activate this feature, enable UVO Skill in the Amazon Alexa app or link the UVO Agent on your Google Account.
Stopping can be as high performance as going, thanks to Telluride’s standard advanced systems. These include FORWARD COLLISION WARNING, designed to help detect slowing or stopped traffic ahead, and alert you if it detects you getting too close. And FORWARD COLLISION-AVOIDANCE ASSIST WITH PEDESTRIAN DETECTION, which is designed to help detect and alert you of a collision risk or pedestrian approaching, and even automatically apply the brakes in some cases.
THE SECRETS TO STAYING CENTERED.

Telluride's advanced technologies include BLIND-SPOT COLLISION-AVOIDANCE ASSIST, which uses radar to help detect and alert you to vehicles in your blind spot, and even apply corrective braking to help you avoid some hazardous lane-change decisions. LANE DEPARTURE WARNING can help alert you with a warning beep if the system detects you drifting too close to lane markers without signaling. If you fail to respond to the warning, LANE KEEPING ASSIST is designed to detect the vehicle getting close to lane markers, and can apply steering input to help prevent you from drifting into another lane. SMART CRUISE CONTROL WITH STOP & GO is designed to adjust your driving speed to help maintain a predetermined distance from the vehicle detected ahead of you. LANE FOLLOWING ASSIST can provide a degree of automatic steering control in certain circumstances during Smart Cruise Control operation based on analyzing lane markings and radar-based front-vehicle information that it detects. Finally, HIGHWAY DRIVING ASSIST is designed to automatically adjust the speed based on the speed limit of selected federal highways detected through the available Navigation system.
WEST POINT, GEORGIA: A SMALL TOWN DOING BIG THINGS.

Chances are, you’ve never heard of WEST POINT. To be honest, we hadn’t either, at least not when we began searching for a location for our first U.S. manufacturing facility. But there was something about the people of West Point that made a lasting impression. For around 150 years, West Point had been the hub of a thriving textile industry. But after the decline of textile manufacturing in the late 1990s, this COMMUNITY OF HIGHLY SKILLED CRAFTSPeople, factory workers, and technicians was looking for a new challenge, an opportunity to re-channel its immense talent and unstoppable spirit. It was as if Kia and the people of West Point were destined to join forces to do something amazing. By 2006, our plan was formed; a 2,200-acre, state-of-the-art manufacturing and training facility followed, and along the way, A NEW KIA FAMILY WAS BORN—now around 14,000 members strong, including plant workers and suppliers. Our first vehicle came off the line here in 2009, and since then, more than 3.1 million Kias have been assembled, including Telluride.† The people of West Point may not be known for who they are — but in what they do, in every Kia they build, they give it everything.

†Kia Telluride, Sorento, and Optima (not including Hybrid and Plug-in Hybrid) are assembled in the United States from U.S. and foreign parts.
### FEATURES

**MECHANICAL & EXTERIOR**
- 3.8L Gasoline Direct Injection V6 engine
- 8-speed Automatic Transmission
- Action On-Demand™ 4WD w/lock & Snow Mode
- Torque Vectoring Control
- 18” Alloy wheels
- 18” alloy wheels w/black finish
- 20” alloy wheels w/black finish
- Self-leveling rear suspension
- Electronic Stability Control
- Electronic Parking Brake
- Push Button Start w/Smart Key
- Safe Exit Assist
- Heated & ventilated 2nd-row seats
- 8-way power-adjustable front passenger seat
- Outside mirrors integrated memory system for driver’s seat & w/lumbar support & seat-cushion extension
- 12-way power-adjustable driver’s seat
- Leather seat trim
- SOFINO seat trim
- Nappa leather seat trim
- 7-passenger seating w/50/50 remote split-folding 2nd-row bench
- Nappa leather seat trim
- Gloss black exterior trim
- Brake type power-assisted braking
- Headlights & fog lights w/black bezels (fog lights N/A on EX)
- Nightfall Edition exclusive 20” alloy wheels in black finish
- Nightfall Edition exclusive 20” alloy wheels in machine finish
- Rain Sensing Wipers
- Blind-Spot View Monitor
- Rear Cross Traffic Collision-Avoidance Assist
- Parking Distance Warning — Forward

**INTERIOR & CONVENIENCE**
- UVO Link
- Apple CarPlay™ Android Auto™ audio system w/5” touch screen
- Apple CarPlay™ Android Auto™ audio system w/7” touch screen
- Herman Harmer™ 620 watt premium audio
- QuantumTech™ surround sound system w/Clari-Fi™ & 14 speakers
- Acoustic Tinting Glass & Anti-Glare Tech™
- Premium Navigation w/10.25” touch screen
- 8-way power-adjustable front passenger seat
- 2-way power-adjustable driver’s seat
- Driver’s knee airbag
- Driver’s seat-mounted side airbag
- Electronic Stability Control
- Vehicle Stability Management
- Hi-Start Assist Control
- All-weather floor mats
- Side impact sensor

**KIA DRIVE WISE™**
- Blind-Spot Drive-Collision Avoidance-Assist
- Blind-Spot View Monitor
- Forward Collision Warning
- Forward Collision Avoidance Assist
- Forward Collision Warning
- Front Cross Traffic Collision-Avoidance Assist
- Smart Cruise Control w/stop & go
- Lane Following Assist
- Lane Departure Warning
- Lane Departure Warning — Reverse
- Rear Cross Traffic Collision-Avoidance Assist
- Smart City Brake Assist
- Surround View Monitor
- Rear View Monitor w/Parking Guidance

**SEATING & TRIM**
- 20/26/23 19/24/21 City/Highway/Combined MPG
- Fuel tank capacity (gallons)
- 13.8 13.8
