

performance beyond imagination

Lotus Esprit V8

Know that World Driving Champions such as Andretti, Clark, Mansell, Piquet and Senna have occupied this same position in a Lotus seat as they flashed by the finish line.

Designed for competitive driving and maximum performance, constant care has been taken during its years of development to design a chassis of exceptional strength and rigidity.

A wide torque band with a peak of 400 Nm (295 ft.lb) at 4,250 rpm assures an incredibly smooth power delivery and an effortless but rapid acceleration in all five gears.

The distinctive aerodynamic lip spoiler provides superb stability at high speeds, allowing you perfect control of the Esprit's impressive power.

The Lotus Esprit looks a champion and performs like one too, through all weather and road conditions. The Lotus Esprit, driving it is the closest experience to driving a pure race car on the road today.

Round rear lamps in a new GRP moulding and the new V8 badging add a new touch of style.

*New OZ Monoblock Nova style wheels.
Front 8.5 x 17
Rear 10 x 18*

Two tone leather embossed seats and door panel trim come as standard to add even more class to the stylish interior.

2002 Lotus Esprit V8

For further details on additional refinements please speak to your Lotus dealer.

powerful

The Esprit from Lotus is unlike any other supercar. Drive it and be thrilled beyond your wildest expectation.

Settle into a semi-reclining driving position - the classic racing position and brace yourself for take off, this supercar, powered by the Lotus designed 3.5 litre twin turbo charged V8 engine, is relentlessly fast.
