For as long as it has existed, the Mercedes-Benz S-Class has endeavored to be the pinnacle of automobiles—not just in luxury, but in leadership. From breakthroughs in safety to features that enhance the comfort, well-being and enjoyment of its occupants like never before, it’s an eternal mission to advance any and every standard. The evidence of its success can be found far beyond the car itself: In the hearts of loyal owners and the praise of the press. In the many automakers who adopt, adapt or just approximate its features on their future models. And in the industry standards that have driven a number of S-Class innovations to be required on every vehicle.

With that foundation, one might think that the creation of an S-Class Coupe is bound by stringent rules and strict limitations. But something magical happens as you build an automobile in limited numbers, for a special kind of driver. Its own core values set it free from convention and compromises. Entirely new horizons open wide.

That said, the 2017 S-Class Coupes uphold generations of tradition—but it’s entirely a legacy of accelerating the avant-garde. An example is its pillarless hardtop design, with the side windows uninterrupted by framework. The sleek profile and panoramic outlook it offers have been part of the flagship Mercedes-Benz coupe for 55 years—a claim no other car can make, even those without its reputation for safety and solidity. It’s a romantic, artful cue maintained at the state of the art for strength and lightness through continually advancing engineering. It is not a tradition that’s followed. It’s one driven forward. How the three S-Class Coupes express their shared soul sets them apart from each other, and all cars. With its standard Sport Package and 4matic® all-wheel drive, the S550 is seductive and self-assured. The AMG S 63, its biturbo V8 crafted by hand, is intense and intoxicating. The biturbo V12 AMG S 65 is polished to perfectionism. Each is the creation of countless minds but one mindset: To bring the romance of driving to the height of passion.
AN UNIMPEDED VIEW OF WHAT AN AUTOMOBILE CAN BE,
UNSHACKLED FROM CONVENTION,
UNCONFINED BY COMPROMISE

PERFORMANCE
Superlative biturbo power, seamless shifting, and air or active suspension.
Three drivetrains, each one driven to excel and excite.

DESIGN
Pillarless hardtop style, a modern art form for half a century. A lavishly outfitted, seductively sculpted cabin with four individual seats.

SAFETY
Groundbreaking safety systems that watch the road ahead, and all around. Active and semi-autonomous systems to assist you.

LUXURY
The pinnacle of innovative comfort and timeless craftsmanship. Unparalleled driving pleasure with grand vistas outward and upward.

TECHNOLOGY
User-friendly innovations to keep you connected, engaged and refreshed. Intuitive controls to keep your world within reach.

Biturbo engines: V8, or handcrafted AMG V8 and V12
9-speed or AMG SPEEDSHIFT® 7-speed transmission
Adaptive AIRMATIC®, or proactive MAGIC BODY CONTROL® suspension
4MATIC® or AMG Performance 4MATIC all-wheel drive

Pillarless coupe design with AMG lower body styling
19" or 20" wheels**
100% LED lighting, Swarovski® crystal headlamp accents*
Chrome diamond-block grille (S 550)
Sport, Night and AMG Carbon Fiber Packages*

Radar-based COLLISION PREVENTION ASSIST PLUS
Intelligent Drive active safety suite
Rearview camera
DISTRONIC PLUS® adaptive cruise control*
Night View Assist® PLUS*

Heated, ventilated and massaging* power front seats
Panorama roof
Cabin-air ionizer and aromatherapy
Multicolor LED ambient lighting
Two Burmester® surround sound systems, with up to 1,520 total watts*

Dual 12.3" color widescreens for instruments and COMAND® system
Mercedes me with smartphone app, in-car Internet and 4G LTE WiFi®
MAGIC VISION CONTROL® wipers
Variable-tint MAGIC SKY CONTROL® Panorama roof*

*Optional or not available on some models. Please see back of brochure.
On paper, an S-Class Coupe’s specs promise twin-turbocharged torque and surefooted agility. As a composition of metal, rubber and advanced electronics, it’s a kinetic sculpture of fast-moving beauty. On the road, an S-Class Coupe becomes a singular sensation: cool, composed confidence.

An S-Class Coupe is often best defined by its invisible strengths. Much as its pillarless hardtop design delivers exceptional rigidity without visible center roof pillars, it conceals an armada of performance innovations within that seductive body. More than a list of specs, there’s a highly coordinated team of specialists collaborating in real time to optimize every element of power in motion. One result is torrential torque — no S-Class Coupe peaks below 500 lb-ft — that can be turned into usable traction. Another is a brilliant balance between precise cornering and a polished ride — a collusion of chassis systems that constantly, instantly adapt and drivetrain elements that precisely apply the engine’s torque to optimize handling.

The most apparent result is both tangible and visible: An unswerving sense of confidence in the driver’s hands, and an agile athleticism that makes the muscular body a treat — perhaps even a source of envy — to see in motion.

Three biturbo engines — a 449-hp V8 in the S 550, a 577-hp V8 in the AMG S 63, and a 621-hp V12 in the AMG S 65 — deliver copious torque across a broad range of rpm. The result is evident the moment you take off from a stop, but no less rewarding when overtaking on the highway. The engines precisely self-tune not every few miles, but every few milliseconds. In the V8s, high-pressure Direct Injection squeezes fuel into an ultrafine mist. All three engines can fire their spark plugs up to four times in a combustion cycle — for power that’s not only stronger but more efficient. Keeping on message, the dramatic baritones of their exhaust notes conceal another invisible benefit: certified ultralow emissions.

The AMG models each feature a 7-speed transmission matched to their capability and character. The 7-speed S 550 sends its range even further. Its new 9G-TRONIC quick off the line and quiet at cruising speed. They all offer smooth, alert and supple responses — with standard shift paddles at your fingertips. The all-season, all-road confidence of 4matic® all-wheel drive is standard on the S 550 and — in AMG Performance form — on the S 63.

In fractions of a second, the semi-active electronically variable air springs of the S 550’s AIRMATIC® suspension adapt to modulation wheel motion while developing the body and passengers. The AMG Adaptive Sport Suspension is also based on AIRMATIC in the S 63. In the S 65, it’s based on fully active MAGIC BODY CONTROL® — arguably the most advanced suspension on the road. A camera pre-scans the road, so it can counteract bumps and dips in real time, while a curve tilting function leans into bends to minimize grip. In all models, a Sport mode sharpens handling response.

In all models, a Sport mode sharpens handling response. Four-wheel level control adapts to loads, self-lowers at speed for efficiency and stability, and lets you raise the ride height to better negotiate ruts, deep snow or steep driveways. And Torque Vectoring Brake on the S 550 or ESP® Dynamic Cornering Assist on the AMG coupes — with its side-side brake to make cornering quicker, more surefooted, and more fun.
An impeccably tailored cabin is among the most enduringly timeless traditions of a Mercedes-Benz coupe. And yet it’s one that has continued to develop in tandem with advanced technology it envelops. The S-Class cabin is a sculpture of flowing shapes, finely crafted from exquisite materials and detailed in modern satin aluminum. A stylistic spectrum of supple Nappa leathers is fitted by hand to far more than the seats, and tailored with such precision that no stitch overlaps the tiny perforations in the upholstery. Six options in hand-finished trim include five woods, including intriguing designo Metallized Ash and designo Black Piano Lacquer with blond “Flowing Lines.”

Clear, colorful and reconfigurable analog-style gauges and digital instruments are displayed on a 12.3” screen in front of the driver. And while they’re easy to read at a glance, the Head-Up Display* can keep key driving data even closer to your natural field of vision. A high-resolution color readout is projected as an 8”-wide virtual image that “floats” over the car’s hood. It lets you view speed and cruise settings, navigation info and more with minimal “eyes off the road.” Height-adjustable, its position is stored in the driver-seat memory. An exclusive design for the AMG models includes a bar-graph tachometer and other vital performance data.

Twenty years ago, Mercedes-Benz research shed new light on a fact of nighttime driving: Riding in a dark car tends to increase stress and fatigue—but soft, strategic illumination of key areas can bring inner peace without reducing outward vision. And so the first ambient cabin lighting debuted in the S-Class. Today’s S-Class has evolved this innovation to deliver its comforts in style. A network of hundreds of LEDs highlights the dash, console and doors while edge-lighting the instrument displays from behind. In addition to five levels of brightness and three lighting zones, you can choose among seven colors to suit your mood—or even create a new one.

Hundreds of LEDs illuminate the S-Class exterior, cabin and the road. In fact there’s not a single light bulb in the car. The active LED headlights enhance your nighttime view with light your eye perceives more like natural daylight. They also adapt their beams automatically as you steer into corners or approach other vehicles ahead. For an opulent jewel-like luxury by day or night, they can be accentuated with genuine Swarovski® crystals. Within each headlamp, an array of 17 single-cut crystals form the signature Daytime Running Lamp. Glitter them, 3D crystal stones create each lamp again. Even when they’re off, they add a scintillating touch of distinction.

Clear, colorful and reconfigurable analog-style gauges and digital instruments are displayed on a 12.3” screen in front of the driver. And while they’re easy to read at a glance, the Head-Up Display* can keep key driving data even closer to your natural field of vision. A high-resolution color readout is projected as an 8”-wide virtual image that “floats” over the car’s hood. It lets you view speed and cruise settings, navigation info and more with minimal “eyes off the road.” Height-adjustable, its position is stored in the driver-seat memory. An exclusive design for the AMG models includes a bar-graph tachometer and other vital performance data.

The aluminum-ringed vents and elegant controls of the dual-zone climate control offer both visual and tactile clues to the manner in which it tends to your comfort: with precision. A network of sensors helps maintain your settings regardless of outside conditions. The system takes extensive measures to cleanse the cabin as well: Dust/pollen filtration and two activated charcoal filters are standard, as is the Air Balance system. Its ionizer uses an electrical charge to neutralize allergens and other impurities, for freshness like you’d feel after a summer thunderstorm. A fragrance atomizer can then infuse the air with subtle aromatherapy in any of six scents.

*Optional or not available on some models. Please see back of brochure.
WHERE THEY'RE FROM
Affalterbach, Germany, is an orchard town where trophies are harvested. It’s the home of AMG, where for nearly 50 years championship racecars have been created by a team of people who are not just racers. They’re dreamers. Visionaries. And perfectionists. They develop technologies that heighten power, like patented NANOSLIDE® cylinder walls that slash friction and wear. They shatter limitations: Rear-biased AMG Performance 4MATIC® clings to pavement yet delivers nimble balance. They break Formula 1® records, and are by far the most winning name in the DTM (German Touring Car Championship). And they turn victory on the track into vehicles that conquer the streets of the world—and the hearts of its most passionate drivers.

IS WHAT THEY DO
The two AMG S-Class Coupes are endowed with the DNA of racing champions and the hardware to bring it to life: massive brakes, aerodynamic bodywork, 20” AMG® wheels, and exclusive cockpits. In the AMG S 63, a handcrafted 5.5-litre V8 bi-turbo V8 pairs forces with a paddle-shifted AMG SPEEDSHIFT® MCT automatic 7-speed. AMG Performance exhaust expertly delivers the car’s 664 lb-ft of torque to all four tires, launching it 0-60 mph in 3.8 seconds. Its AMG Adaptive Sport Suspension based on AIRMATIC® teams with the 4MATIC all-wheel drive for exceptional agility. In the AMG S 65, a superlative handcrafted 6.0-litre/738 lb-ft biturbo V12 catapults it to 60 in 4.0 seconds. Its AMG Adaptive Sport Suspension harnesses the power of MAGIC BODY CONTROL® with a curve tilting function that hugs into corners like a slalom skier. Exclusive details distinguish each model: AMG double-stitching, AMG “wing” front and rear skirts, matte silver/gloss black on the S 63, brilliant chrome for the S 65. Options include carbon fiber cabin and body elements, and Ceramic Compound brakes.
The ultramodern expression of classic motoring traditions is evident every time you drive your S-Class Coupe. Its elegant analog gauges are crisply rendered on a 12.3” high-resolution screen that’s easy to view through the sporty, 4-way power-adjustable steering wheel. A high pixel count and fast refresh rate provide seamlessly natural movement of the gauge indicator needles. Digital and graphical readouts display the fuel level, the outside temperature, and other ancillary data. Between the gauges is a changeable color display for various driver-assistance systems, trip data, and vehicle settings. Buttons on the steering wheel let you control it with ease.

The beauty of Mercedes-Benz engineering is how quickly it can make first-of-their-kind innovations feel like second nature. The COMAND system’s intuitive touchpad/rotary controller makes it easy to access, select and enjoy a variety of features—from entertainment and navigation to comfort and convenience settings. Carousel-style on-screen menus mimic the motion of the controller. The touchpad also lets you use multi-finger gestures similar to your smartphone. You can swipe through menus, pinch-to-zoom a navigation map, or even write an address with your fingertip. Or go touchless, with voice control that can learn your natural way of talking.

An advanced network of multirange radar, multiple cameras and other sensors, Mercedes-Benz Intelligent Drive includes industry-leading standard and available systems that can help make driving safer, less stressful, or simply more enjoyable. Radar-based COLLISION PREVENTION ASSIST PLUS can alert you to brake if you’re approaching traffic too quickly. It can even initiate braking if you don’t. ATTENTION ASSIST® monitors up to 70 parameters of driving behavior to help detect a driver getting drowsy on a longer trip. Beyond the standard rearview camera, the Surround View System* composing four cameras to give you a virtual birdseye view. MAGIC SKY CONTROL®, a Mercedes-Benz innovation that can darken the roof electrically. Magnetic particles embedded in the glass align when current is applied, allowing light to pass through. Switch it off, and the particles scatter to create near-opacity.

The Driver Assistance Package adds a suite of advancements. DISTRONIC PLUS® cruise control uses radar to adapt your speed to traffic flow, even stop-and-go. Steering Assist automatically helps keep you centered in your lane as you cruise. Active Blind Spot Assist helps keep you aware of oncoming traffic. Other groundbreaking systems also can alert you to cross-traffic or pedestrians in your path, or help prevent an impending collision from behind. Another option, Night View Assist® PLUS* uses infrared and thermal imaging to display a clearer view of the road. Its screen can be set to turn on if danger is detected.

Huge, high-mounted and high in resolution, a second 12.3” screen takes center stage in the dash. It presents audio and entertainment, integration hints, and comfort features you can personalize as you like. A split-screen sidebar lets you keep an additional item visible through the main view. You operate it all via the COMAND® touchscreen in the center. Illustrated menus put an abundance of luxuries at your fingertips, whether you’re fine-tuning your seat support or the Burmester® surround sound. COMAND also integrates with Mercedes me and mbrace®, bringing you in-car WiFi and a variety of Internet-based apps like HERE® Local Search.*
INSPIRATION FROM A RICH LEGACY MEETS INNOVATION TO ENRICH TODAY

S 550 4MATIC
4.7L V8 biturbo engine
449 hp / 516 lb-ft of torque
9G-TRONIC 9-speed automatic transmission
4MATIC® all-wheel drive
Staggered-width 19" AMG® twin 5-spoke wheels
0–60 mph in 4.5 seconds

0–60 mph in 4.0 seconds
## KEY STANDARD FEATURES

### PERFORMANCE AND EFFICIENCY

- ECO Start/Stop system
- AMG Dynamic Select
- Speed Limit Assist
- Active Blind Spot Assist
- PRE-SAFE PLUS rear collision detection and preparation
- BAS PLUS with Cross-Traffic Assist

### SAFETY AND SECURITY

- Collision Prevention Assist
- ESCP + PRE-SAFE®
- Night Vision Assist
- Night View Assist PLUS
- Rear Trunk Warning

### COMFORT AND CONVENIENCE

- Power heated and ventilated front seats with memory
- Active Multicontour seats with “hot stone” massage
- Heated rear seats with individual heating control
- Individual rear seats with functional center console
- Rear seat heaters

### ENTERTAINMENT AND NAVIGATION

- Dual 12.3" high-resolution screens
- COMAND® with telematics
- Voice control with natural language process
- Gesture control
- Rearview Camera

**Genuine ACCESSORIES**

Genuine Mercedes-Benz Accessories are engineered to exacting standards of quality, safety, and fit. They help make your car more of what you want or need it to be—from its wheels to the cabin, to protect your car’s finish or soothe yourself with aromatherapy. There’s no better way to make your car all your own, while keeping it 100% Mercedes-Benz.

### S-Class Coupe accessories include:
- Aerosport alloy wheels
- AMG Heritage wheel hub centers
- Valo wheel caps
- Chrome door handles/ports
- All-season floor mats
- Cold weather: Comfort door module
- Air Balance aromatherapy fragrance
- Module interface cables for smartphone
- Cargo area: Top and under

### ENNOTES
1. Exact contents may vary depending on country and year. 
2. Offer available through Mercedes-Benz Financial Services. See dealer for details. 
3. Limited availability. 
4. Additional fees may apply. 
5. Valid on new vehicles only. 
7. Must be used by 12/03/2024. 
8. Offer available on new vehicles. 
9. Subject to credit approval. 

### TOGETHER WHEREVER: mbrae

It’s perfectly natural to develop an emotional attachment to your Mercedes-Benz. With mbrae, enjoying a technological connection is just as easy.

Mercedes-Benz mbrae puts the power of Mercedes-Benz to work for you—from apps to Wi-Fi—when you’re in your car, and remote vehicle services when you’re not. Your mbrae package lets you tailor its many benefits to fit your life. 5 years of mbrae Current included!

Every new Mercedes-Benz comes with five years of mbrae Connectivity at no additional charge. It’s the core mbrae package but it’s far from basic, with remote features and in-car Internet.

### mbrae app includes:
- Remote Start
- Remote Door Locks
- Remote climate control
- Remote Vehicle Diagnostics
- Roadside Assistance
- Pull of Power/Remote Download
- Traffic Camera
- More and more

### mbrae Features:
- Peace of mind comes from automatic ADS calling after an accident, stolen vehicle tracking, and other security benefits.

### Features include:
- Automatic Accident Notification
- Automatic Collision Notification
- 3G Data Plan
- SiriusXM
- Geofence
- Vehicle Location Assistance
- App-Activated Lock/Unlock
- App-assisted Vehicle Information
- Safe and more

### mbrae Deal of the Month:
Live assistance from trained professionals, from tickets to a drive to travel planning. An agent can even help you find a point of interest, and then guide you there, turn-by-turn.

### Features include:
- Free mapsearch
- Pull of Power/Remote Download
- Traffic Camera Awareness
- mbrae Drivers app

### mbrae Features:
- Streaming audio and in-car WiFi for you and your passengers.

### Features include:
- Instrument Cluster
- Apple® CarPlay™
- Google® Android Auto™

### mbrae Features:
- Turn-by-Turn Route Assistance
- Remote Diagnostics
- Accident, stolen vehicle tracking, and other security benefits.

5 years of mbrae Connect included

Mercedes-Benz Concierge
- Turn-by-Turn Route Assistance
- Remote Diagnostics
- Accident, stolen vehicle tracking, and other security benefits.
