Where it comes from is where everyone else goes.

As the flagship of the marque that earned the patent on the automobile itself, there is arguably no car whose lineage surpasses the S-Class. It has not, however, ever cashed in its inheritance. For generations, it has not just advanced its own family legacy but repeatedly elevated what all cars can do: How they please and protect their occupants, How they engage their drivers and relieve them of stress, Even how they interact with other vehicles. The heritage of the S-Class has always been rooted in a tomorrow other cars can reach for. And that you can enjoy today.

With more than 100,000 patents, Mercedes-Benz has repeatedly redefined where all cars will go next. It’s why the S-Class might be the only car in the world that aspires only to outdo itself.
Leadership with a comfortable lead
Any luxury car can assert that it’s comfortable. At least to ride in. The S-Class is comfortable in many additional ways. It’s at ease when the road turns. Composed when the weather turns. And with a combination of foresight and fortitude, it’s in its element if a situation turns for the worse. It all comes from an unwavering commitment to lead by example, and comfort you like no other car.

Breadth of choice, depth of character
While much of what defines an S-Class is singular, even superlative, it offers a choice of 11 models in three body types—spacious sedan, sleek coupe, or soft-top cabriolet. All have biturbo power—with six, eight or 12 cylinders, or six plus an electric motor. And all meld modern with timeless—raising the state of the art, and of the artisan.

PROGRESS

The very definition of poise under pressure

The swell of turbo-boosted torque can make a highway merge feel like ballet. The agile reflexes of adaptive air suspension helps iron out bumps, unravel winding roads, and keep an even keel as you load cargo or welcome passengers aboard. And the aerodynamics of its athletic yet majestic body help an S-Class slice through the wind with quiet efficiency, cleave to the road sure-footedly, and cut a dashing profile whether it’s parked or, well, dashing. Whether taking off from a stoplight or taking on a mountain switchback, an S-Class condenses air, fuel, spark and pressure into pure pleasure.

Performance highlights

- Biturbo engines: V6 or V8, V6 with EQ Power plug-in hybrid electric motor, or handcrafted AMG V8 or V12
- 4MATIC® all-wheel drive*, or fully variable AMG Performance 4MATIC®+ (S 63)
- Adaptive AIRMATIC® suspension, or fully active MAGIC BODY CONTROL® with road-scanning camera and curve tilting* (AMG Adaptive Suspension on S 63; AMG Active Suspension on S 65)
- Automatic 4-wheel level control
- DYNAMIC SELECT drive modes
- Fuel-saving ECO Start/Stop system

Breakthroughs in performance are how the S-Class has driven change for decades. And how it responds to change in milliseconds.

WHERE EVERY SENSE GETS A SENDATION

Seamlessness from a thousand stitches
Leather, wood and metal flow together in a cabin that’s as sculptural as it is spacious. Beyond impeccable, the details approach impossibly precise: Stitching that runs around the perforations. Drilled metal speaker grilles that redefine audiovisual. And multiple zones of LED ambient lighting with 64 colors to choose and combine.

Ambiance you can tailor for yourself
ENERGIZING Comfort orchestrates front-seat heating, ventilation and massage options with ambient lighting, climate settings, fragrance and music. Pioneered by the S-Class, it offers a range of programs that can help rejuvenate, revitalize or relax you in body and spirit.

Whether you inspect them up close or sit back and take it all in, the cabin’s details are crafted to reward all your senses – especially your sense of style.

Luxury highlights
Heated front seats with ventilation* and “hot stone” massage*
Multiple rear seating configurations* for sedans, including Executive right seat or dual seats with folding tables

**WATCHFULNESS IS A CONSTANT**

**Advancements to protect your future**

Mercedes-Benz engineers have spent decades preparing for events they hope you’ll never experience. Car-to-X Communication lets your S-Class learn about hazards ahead and help notify others. If an impact is sensed as imminent, PRE-SAFE® Sound can emit a special tone to trigger your ears’ natural defenses before a loud crash.

**Innovations to flow with the present**

An available suite of driver assists lets you change lanes with a tap of a turn signal, uses GPS to help the cruise control slow for tolls or exits, watches the speed limit, and more. It can also help you execute an evasive move, and prepare for an impending front or rear impact.

**Safety highlights**

- Radar-based Active Brake Assist
- Frontal collision mitigation, PRE-SAFE®
- Active Parking Assist, Blind Spot Assistance with Exit Warning Assist
- Rearview camera or multicamera Surround View System
- Driver Assistance Package with Active Distance Assist DISTRONIC® cruise control, Route-based Speed Adaptation, Evasive Steering Assist, Active Blind Spot, Emergency Stop, Lane Change, Speed Limit and Steering Assist, and more
- Pop-up roll bars (Cabriolets)

An advanced network of sensors watches ahead and around you. S-Class safety innovations peer into the future, to look out for yours.

**THOUGHTFULNESS MAKES IT ADAPTABLE**

**Seamless connections, multiple options**

Dual 12.3" screens team with a console touchpad and Touch Control Buttons on the steering wheel, for clear display of information and intuitive control of audio, navigation and comfort settings. You can also control a wide array of cockpit features—from navigation to audio to turning on the heated seats—with your voice.

**Variable visuals, custom-tailored sound**

The digital instrument cluster lets you reconfigure its displays and change gauge styles. Germany’s renowned Burmester has created two surround sound systems for the S-Class: a 13-speaker digital system, or an analog/digital High-End 3D system with up to 26 speakers.

**Technology highlights**

- Dual 12.3" displays for instruments and COMAND® navigation/audio, touchpad controller, and steering-wheel Touch Control Buttons
- Head-Up Display
- Apple CarPlay™ and Android Auto
- HD Radio stations, Bluetooth® audio streaming, SiriusXM®, and in-car WiFi® with TuneIn Radio
- Wireless charging and NFC pairing
- Burmester® Surround Sound or High-End 3D Surround Sound System

Human-focused tech expands what your hands and voice can perform. And elevates what your eyes and ears can perceive.

There may be no sedan that inspires like an S-Class. And no sedan that’s so widely admired. For those who drive one, there’s simply no car that’s so deeply desired.
Composure without compromise

Semi-active AIRMATIC® suspension can adapt for changing roads, passenger and cargo loads, and the driving modes of DYNAMIC SELECT. It helps keep the car level, can lower it to enhance efficiency and stability at speed, and continually adjusts to balance precise handling feel with an air-cushioned ride.

Sumptuousness with support

Heated, power front seats are designed for comfort you can feel right way and enjoy for hours of travel and years of ownership. The Premium Package adds ventilation, rapid heating and multi-contour features that can enhance side support in corners, or offer a range of massages including "hot stone" treatments.

Spaciousness is a specialty

Multiple cabin configurations lets passengers make the most of the S-Class sedans’ exceptional legroom. Beyond heating, ventilation, power adjustment and massage options, an Executive right seat adds power calf and footrests. Twin lounge chairs have foldaway writing tables. You can even add a refrigerator box.

Progress with peace of mind

Available driver assists help you de-stress in traffic. Radar/GPS-based cruise control can adapt to posted speeds or slow for an offramp. A tap of a turn signal can expertly perform a lane change. Other systems can watch out for crossing traffic and pedestrians.

Put an S-Class in motion, and you’ll feel elegance become exuberance. And you’ll quickly understand how its greatest tradition is to always advance.

The S 450 and S 560 Sedans

There’s a reason so many heads of state have long elected to be driven in an S-Class sedan. And it goes far beyond ample room for their heads, and legs. It’s much the same reason you’ll find champion racecar drivers leaving the track behind the wheel of one. Simply put, there’s likely no other car that leads the way in so many measures of an automobile at once: Innovation in safety, performance and luxury. Elegance in its design, appointments, and its agile, athletic moves. And with an unbroken tradition of redefining what’s new, while remembering what matters.

This is also why so many heads of car companies look to the S-Class for inspiration. For generations, its industry-first features, from adaptive headlamps and intelligent cruise control to ventilated seats and 100% LED lighting, have previewed how all cars will be in the future. S-Class drivers and passengers, however, get to enjoy these firsts, first. Because whether you’re riding like royalty in its spacious rear cabin, or relishing its biturbo torque, crisp handling and available 4MATIC® all-wheel drive, no sedan leads—and leads you to enjoyment—like an S-Class can.

ENERGIZED

The S 560e EQ Power Plug-in Hybrid Sedan

There’s only one car that can claim to be the S-Class of plug-in hybrids. Because there’s only one sedan that delivers its innovation, inspiration and indulgence with advanced gas-electric power. A smooth, strong biturbo V6, a 90kW electric motor, and a compact lithium-ion battery join forces for a combined 469 hp. Radar helps it recuperate energy intelligently as you slow down. Its navigation system helps optimize the use of gas and electric power along your route, or up to four miles ahead if you’re not using guidance. And it can return up 64 MPGe in combined city/highway driving.11

Plug-in hybrid highlights

- 469 hp (combined) V6 biturbo gasoline engine with 90kW electric motor
- Compact underhood lithium-ion battery charges at home or public charging station
- Adaptive, self-leveling AIRMATIC® suspension, 19" multispoke wheels
- Haptic accelerator pedal offers efficient driving feedback via gentle pulsing
- Route-Based Battery Optimization and Anticipatory Operating Mode
- Radar-based Regenerative Braking System

Can sumptuous be sensible? The S-Class has already proven that luxury can be sporty, and safety can be stylish. Imagine a plug-in hybrid that can recharge you.

Please see endnotes at back of brochure.
Its most beautiful features are concealed from sight: a pillarless profile that’s uninterrupted by visible framework, and peerless engineering that’s never restrained by the ordinary.
Magnetic attractions
Whether you follow the sun or are guided by stars, the standard Panorama roof offers a grand vista. Available MAGIC SKY CONTROL® adds an entirely different dimension: instant darkening of the roof. Switch it on, and electromagnetic particles align to let light in. Turn it off, and they scatter to block it.

Organic technology
Wafer-thin organic LED elements (OLEDs) turn the taillamps into three-dimensional sculptures of light that change with your viewing angle. The jewel-like mances of optional Swarovski® crystal accents add further intrigue to the intelligent LED headlamps.

Natural beauty
Supple Nappa leather, notable for its smooth grain, is fitted by hand to all four individually contoured seats. Even more exquisitely crafted designo Nappa is available in seven solid and two-tone motifs. All six of your wood trim options are finished by hand.

Functional artistry
Six wheel choices are available in 19" or 20" sizes and a range of styles. Included are an AMG® wheel in each size to complement the even more athletic, aerodynamic and aggressive look that the available AMG Line brings to the coupe’s wind-boned design.

The unencumbered view out of an S-Class Coupe also reveals what’s enshrouded within. The engineering that can create a body that’s both airy and strong, and performance that even passengers can enjoy.

FOR A MORE ENLIGHTENED PERSPECTIVE

The S 560 4MATIC Coupe
If it seems like most cars are a compromise born from a battle between designers, engineers and accountants, the S-Class Coupe is an emphatic exception. For one, the engineers at Mercedes Benz are quite passionate about styling. One walk around the showroom or a classic car event should make that long-held tradition clear. What you see in the S-Class Coupe—or more importantly, do not see—is further proof. Since 1961, it’s been the only car in continuous production with a “pillarless” design. Its four retractable side windows are uninterrupted by visible framework, for an airy lightness with the windows open or closed. And yet it offers a Mercedes-Benz level of strength and solidity, which might explain its singular longevity. Of course, there’s also everything that makes it an S-Class: The groundbreaking innovation in luxury, safety and driving ease. The breathtaking thrust of a 463-hp biturbo V8. The surefooted confidence of 4MATIC® all-wheel drive. And the graceful agility of AIRMATIC® suspension. Invisible strengths define the character of an S-Class, but its powerful allure is there for all to see.
S 560 4MATIC COUPE

- 463-hp V8 biturbo engine
- 4MATIC® all-wheel drive
- Selenite Grey metallic
- 19" multispoke wheels
- Driver Assistance Package
An S-Class is a car that follows only its own star. So there might be no more perfect expression of it than one that also outshines the sun.
Season extension
AIRSCARF® can envelop your neck and shoulders in warm air via vents below each front head restraint. Heated rear seats and front armrests are available, too. ENERGIZING Comfort can create rejuvenating environments by teaming front-seat heating and massage with cabin lighting, music and fragrance.

Tailored tradition
The “acoustic” soft top is crafted from three layers. A rich fabric covering is bonded to a thick inner layer that insulates noise and temperature for coupelike comfort. In under 20 seconds, at up to 31 mph, the power top vanishes under the sculpted rear deck.

Seamless transition
The intelligent climate control is designed to adapt automatically to top-down driving. Likewise for the Burmester® surround sound – not just volume but the full audio profile. AIRCAP® raises a wind deflector atop the windshield and a draft stop near the rear head restraints to minimize top-down turbulence.

Splashless vision
MAGIC VISION CONTROL® emits heated windshield washer fluid from laser-cut holes along each wiper blade. Spraying only in the direction of wiping so it’s quickly swept away, it can clean the glass without overspray that might reach the open-topped cabin.

Innovation that can extend seasons. Performance whose immediate joys endure. Style that’ll outlive trends. You won’t count minutes in this car. Instead, an S-Class Cabriolet has a way of making every minute count.

FUTURE HERITAGE, LIVING IN THE PRESENT

The S 560 Cabriolet
On any given day, we encounter bridges to other times in our lives. Family photos look into our past. An investment portfolio focuses on the future. If you’re an enthusiast of automobiles, they might do both – especially those that have earned notoriety as collectibles, like any number of Mercedes-Benz cabriolets from generations past. Does such a rich heritage matter in a new car? Consider this: Of all classic marques, how many are still in production? The S-Class has endured not by growing old gracefully, but by continually redefining new. Boldly. And gracefully.

The S 560 Cabriolet has a knack for transcending time in numerous ways. Its 463-hp biturbo V8 and AIRMATIC® suspension let you revel in the moment for hours on end. Its clever comfort features can make a chilly evening the perfect time for a starlit, top-down cruise. And the highly advanced driver assists and cabin technologies available can make an everyday commute feel like an escape. With every generation, the S-Class Cabriolet has renewed its defining tradition. Like no other car, it lets you live in the present, celebrate history, and preview the future.
