SABLE

Sable.
Perhaps the Most Copied Car in the World.

The 1991 Sables shown below are clockwise from upper left: Sable LS with Luxury Trim Option in Medium Titanium Clearcoat Metallic, Sable LS in Electric Red Clearcoat Metallic, Sable GS in Oxford White, Sable LS Wagon in Black Clearcoat, Some features shown may be optional. See option list on pages 26 and 27.

One glance at any Sable quickly discloses the most obvious of its virtues; styling so advanced that it's been widely imitated. Imitated, but not equalled. Indeed, Car and Driver magazine called it: "One of

the ten best inspired designs of all time."

Yet, beneath that handsome exterior, and equally appealing interior, are the advanced engineering accomplishments that make Sable a rewarding car in which to be either a passenger or driver. Admittedly though, Sable is partial to drivers.

As clear evidence of that, Sable comes equipped with a sequential fuel-injected V-6 engine, 4-wheel independent suspension and precise rackand-pinion steering.

Sable also seats six adults comfortably, in very attractive surroundings.

And there are many other reasons why Mercury Sable is an exceptional car to drive and to own, as you'll see on the following pages.

Sable LS with Luxury Trim Option shown in Medium Titanium Clearcoat Metallic, Some features shown may be optional. See option list on pages 26 and 27. The One Sable Pleasure You Can't Enjoy Behind the Wheel: Looking at it.

It's readily apparent this car was shaped by the wind. Its flowing contours and flush-fitted glass are not only pleasing to the eye, but highly efficient when moving through the

air. No doubt that's why Sable's design has received such high praise from automotive experts. And from its competitors, the highest praise of all. Imitation. Shown here is the LS with Luxury Trim Option which further enhances the appeal of the distinctive Sable shape with a monochromatic color treatment and special wheels. After you're through staring at it, turn the page and learn more about this year's Sable.

### A Very Comfortable Situation to Find Yourself In.

Sable offers a remarkably spacious interior for six adults with plenty of room for the often neglected parts of the human anatomy like hips and shoulders. Shown here is the LS with Luxury Trim Option which has its own distinctive touches. Like luxury cloth and shirred leather seating surfaces. Its twin comfort seats are both luxurious and supportive.

They reflect the thinking that drivers must assume the proper posture behind the wheel to be completely in control and comfortable. More evidence that Sable is a car designed to be especially rewarding to drivers.

Sable LS with Luxury Trim Option interior shown in Titanium huxury cloth and shirred supersoft leather (pictured above). Some features shown may be optional. See option list on pages 26 and 27.

#### Sable LS shown in Electric Red Clearcoat Metallic, Some features shown may be optional, See option list on pages 26 and 27.

## Consider it a Performance Car That Happens to Seat Six.

If you associate the term "six-passenger sedan" with unexciting transportation, be prepared for a major attitude adjustment.

Sable is designed to be an enjoyable car to drive as well as a comfortable car in which to be driven.

Some of the reasons for that are evident your first time at the wheel. The instrument panel is driveroriented. The 3.0-liter V-6 engine is smooth and responsive. The rack-andpinion steering is precise. You can even specify bucket seats in all Sable sedans. If all this is beginning to stir the driver in you, read on.

# A Beautiful Place to Go Places.

Designing an interior to match the revolutionary design of Sable's exterior was a challenging task. But, as you can see, the challenge was met. Handsomely. Sable's interior is spacious enough to hold most families. And you'll be delighted with the comfort. Sable LS's seats are anatomically contoured for added support. There are four-way front headrests, reclining front seats and power lumbar supports which adjust to individual needs.

The right extra touches are also there, with power windows and dual illuminated visor mirrors standard on all LS models. Newly available for both Sable GS and LS sedans for 1991 is an optional 5-passenger interior that includes individual bucket seats with power lumbar supports, center fold-down armrest, and center console with floor shift. This sporty configuration is also available with optional leather seating surfaces on Sable LS sedans.

Sable LS interior with optional bucket seats, center console and floor shifter, shown with optional Ebony leather seating surfaces. Some other features shown may also be optional. See option list on pages 26 and 27. Optional electronic cluster includes graph-style tachometer, digital speedometer and fuel computer and system readouts.

#### You Can Tell Our Designers are Also Serious Drivers.

Sable's instrument panel is a clear case in point. Everything is right where your hands and eyes expect it to be. No searching for gauges. No groping for controls. Tactile switches are designed to be operated by "feel" without taking your eyes off the road. Analog dials, including tachometer and trip odometer, are backlit for easy reading at night. Your attention is focused right where it should be: on the road.

Sable LS instrument panel with optional console and floor shifter. Some other features shown may also be optional, See option list on pages 26 and 27.

# It Changes the Way a Wagon Looks Without Changing the Way it Works.

Sable LS wagon shown in Black Clearcoat with optional cast aluminum wheels. Some features shown may be optional. See option list on pages 26 and 27.

Sable works beautifully.

It holds more than 81 cubic feet of cargo. Its specially designed suspension carries the load and still delivers the same ride and handling qualities found in Sable sedans.

Yet, for all its work capability, this is a wagon that hardly looks like a wagon.

The lines are sleek and

inviting. And they clearly dismiss the notion that wagons are supposed to be boxy. That's an idea whose time has gone.

# Welcome to the Great Indoors.

What makes it great are all the things Sable has to offer

Like a 60/40 split rear seat that makes room for the really big stuff and a flip-up liftgate window so you don't have to flip up the whole liftgate. There are also some great options available: a cargo cover to keep things hidden from view; a handy picnic tray and a rear win-

Standard cargo net keeps loose items in place.

dow wiper/washer to give you perfect hindsight. Plus, a rear-facing third seat boosts the passenger count to eight, meaning that a few more of you can enjoy the great indoors.

Sable LS reagon interior features an optional picnic truy that adds to the fun. Shown in Titanium cloth, Other features shown may be optional. See option list on pages 26 and 27.

The liftgate trindoce flips up for access to the cargo area without raising the liftgate.

Sable GS shown in Oxford White with PEP 451A. Some, features shown may be optional. See option list on pages 26 and 27.

## The Price of Leadership. In This Case, It's Reasonable.

One of Sable GS's nicer qualities is that it is priced well within reach. And that's for a very wellequipped Sable too.

In fact, every Sable GS

has an abundance of standard equipment that you might expect to see on an "option" list. Features such as air conditioning and dual power mirrors, for example.

Of course, if there are specific items you'd like to add to your Sable, there's an easy and affordable way to do that too. Simply order one of the Preferred Equipment Packages available. These PEP packages consist of the most frequently ordered options at considerable savings over ordering the items separately.

# An Interior That Doesn't Take a Back Seat to the Exterior.

Sable's shape delights the eye, but Sable's interior has to delight all your senses. After all, you spend your time in the car, not outside it.

To that end, Sable is roomy and comfortable. But beyond that, it features an extensive number of standard items that make driving, or riding, a pleasure. Items like air conditioning, tilt steering wheel, power steering and brakes, and an electronic AM/FM stereo radio with four well-placed speakers.

Also standard is the driver-side air bag Supplemental Restraint System, detailed on page 23. (See pages 26 and 27 for a list of standard features.)

Sable GS interior shown in Crystal Blue cloth. Some features shown may be optimal. See option list on pages 26 and 27.

Dual power mirrors are a convenient standard item.

Standard tilt steering wheel allows for individual adjustment.

Sable's four-wheel independent suspension (left) features nitrogen gas-pressurized MacPherson struts in front and rear of sedans and front of wagons. Rear of wagon has nitrogen gas-pressurized shocks. Coil springs and stabilizer bars are located at each wheel.

A driver-side air bag Supplemental Restraint System (below) is standard. The bag inflates in less than one-tenth of a second in the event of a moderate to severe frontal impact, then deflates in a fraction of a second. The sequence shown here twas not made during an actual test, It has available four-wheel disc anti-lock brakes for enhanced steering and control while braking on slick surfaces.

It features a suspension that allows it to tenaciously grip the road.

It is built with unibody construction that minimizes body twisting and torquing and provides front and rear crumple zones to protect the passenger compartment in the event of impact.

And it has a driver-side air bag Supplemental Restraint System, standard, that when combined with properly used safety belts can help provide added protection from head and chest injuries that might occur in moderate to severe frontal impacts.

Sound system choices include the standard electronic AM/FM stereo with four speakers (top), an optional electronic AM/FM stereo with cursette (center), and a High-Level AM/FM stereo with cussette (below), also optional

## The Way to Make a Distinctive Car Distinctively Yours.

This is where you can put your personal stamp on Sable. You have lots of choices. Options that can enhance every aspect of your Sable: from appearance to convenience to security and even entertainment.

Some of the options are shown here, but there are many more. For a complete list, please turn to pages 26 and 27. You'll find that in more ways than one, deciding to buy a Sable is just the start of a good time.

Fingertip speed control is a farigue-reducing convenience option.

Alluminated visor mirrors for driver and passenger are standard on Sable LS, available as an option on GS models.

Customer satisfaction with Mercury cars may be attributed to the personalized attention given by the sales and service staffs at Lincoln-Mercury dealerships and to the Lincoln-Mercury Quality Commitment program. Its goal is to achieve outright industry leadership in customer satisfaction. We want Lincoln-Mercury customers to be the most pleased in the entire automotive industry.

#### Motorcraft QUALITY PARTS

Genuine Ford and Motorcraft original equipment replacement parts are engineered and manufactured to Ford's high specifications. They're your best assurance of quality and long-term satisfaction because these replacement parts meet the same high standards as those installed in production.

The optional Ford Extended Service Plan covers selected components on new Mercury cars for longer than the vehicle's basic warranty. The cost is so moderate for the protection offered that it could pay for itself the first time it is needed. Ask your participating Lincoln-Mercury dealer for complete details of the plan, which is available on cars sold and normally operated in the 50 United States and Canada.

Participating Lincoln-Mercury dealers offer the Lifetime Service Guarantee, which guarantees their work on your Mercury Sable for as long as you own it. This means that you pay for a covered repair once and never again. If it ever has to be fixed again, the repairing dealer will fix it free. Free parts. Free labor. Ask your Lincoln-Mercury dealer for a copy of this limited warranty, and take time to read it.

EPA statement. 1991 EPA mileage estimates were unavailable when this publication was printed. The 1991 Mercury Sable, however, should post good mileage figures. Ask your Lincoln-Mercury dealer for the latest information.

Buckle up-together we can save lives.

Buy or lease your Mercury from your Lincoln-Mercury dealer.

Options Availability: Options shown or described in this catalog are available at extra cost and may be offered only in combination with other options or subject to additional ordering requirements or limitations.

**Product Changes:** Lincoln-Mercury Division reserves the right to change product specifications at any time without incurring obligations.

"Ask Your Lincoln-Mercury Dealer": Following publication of this catalog, certain changes in standard equipment, options, prices and the like, or product delays, may have occurred which would not be included in these pages. Your Lincoln-Mercury dealer is your best source for up-to-date information.
