# MERCURY VILLAGER

1993

*Introducing the all-new Villager. The minivan with everything you expect in a Mercury.*

*The spirit you see emblazoned across it. Its ability to deliver that coveted sense of prestige as it smoothly, confidently lifts the passengers in front of, and behind, its strong, supportive seats. Its dashboard. Its cross-handle wood-accented steering wheel. Mercury Villager. A minivan that combines front-wheel drive,* [illegible] *and a 3.0-liter V-6 engine that delivers 151 horsepower and 180 lb-ft of torque. A minivan that's available in standard and extended lengths. A minivan that's as sure-footed on wet, slippery roads as it is on dry pavement. A minivan that's as at home on the highway as it is in the driveway. A minivan that's as comfortable with the kids in the back seat as it is with the boss in the front seat. A minivan that's as much a Mercury as the Cougar XR-7 and Grand Marquis.*

*Mercury Villager. The all-new minivan from Mercury.*

Villager is powered by Ford Motor Company engines.
