We are Mitsubishi. We build quality cars. Yet we also offer something more. Because while a car should answer your needs, it should also stir your emotions. Like it or not, cars are a window through which the world views us. Through that window we can appear dull and lifeless—sensible to the point of boring. Or we can show the world that our hearts beat strong, and our minds are quick. Mitsubishi takes pride in building cars that ignite the vital spark which often lies sleeping just beneath the surface in each of us. Cars that challenge us to wake up and drive™.

For over forty years, we’ve put thoughtful engineering to the test on the international rally circuit. In addition to the obvious thrill of winning, competing against our peers helps us develop and refine new ideas. Ideas that find their way into all our vehicles. Ideas that look good sitting in your driveway.

There’s a lot of reasons to buy the new Eclipse. But let’s be honest, how it makes you look and feel are going to top the list. And they should. A car is a piece of you parked out there on the side of the road. It’s your very own 3000 lb business card. What do you want yours to say?
STYLING

Incorporating Mitsubishi’s distinct “geo-mechanical” styling, the newly re-sculpted front end brings the ’03 truer to the concept car than any model to date. And it lets you know it. Boasting 17”, five-spoke alloy wheels, two-tone graphite-lined taillight clusters and truly integrated foglights, you can rest assured a lot of thought went into the styling of the Eclipse. Even if it was to fuel your neighbor’s fear they bought the wrong car.

A GLASS GARAGE
SUDDENLY DOESN’T SEEM SO IMPractical
When you own a car like this, you want people to know. And what better way than to give the roof a sabbatical. But don't get the impression this car is a sawed-off version of its coupe cousin. The Spyder was conceived and built to the true specifications of a convertible. Which means you won't find any bulky reinforcements to add weight, or worse yet, to detract from its looks. In fact, you'll likely need a bottle of Windex® to wipe the envy off this car. And the defroster in the glass rear window will make sure you'll catch every envious glance with self-indulgent clarity. Throwing the switch to your 210W, seven-speaker CD system won't exactly slow the stares either. In fact, forcing your musical tastes on others has never been easier. Just release the latches and hit the one-button power roof retraction. In 15 seconds the top is lowered and all four windows are down, giving you a 360-degree gloating zone. It's almost a shame to hide the European-quality 3-layer soft top, but let's drop the charade, you never bought the Spyder to have it up in the first place.
PERFORMANCE

Harboring a 210-hp, 3.0L Variable Induction V6, you almost need a straitjacket to keep this car parked. And with the RS and GS sporting 2.4-liter, 16-valve power plants, you get the impression they’re not feeling lightly either. Especially since these efficient engines produce 90% of their torque under 2000 rpm. In other words, this car can do a lot more than just strut. And putting this power to the road is no problem. With the sporty 5-speed manual you’re in great hands. But if you want something to take care of the grunt work, there’s always the 4-speed adaptive shift control automatic. It learns, then implements gear transitions to match your driving style. How does it do it? Do you really care? Just repeating that last sentence will impress somebody. But if that doesn’t light their candle, you can always tell them about the clutchless Sportronic™ shift system. Who has time for a clutch anyway? Tap up or down through the gears at will, even during acceleration. Handling won’t be a problem either. Thanks to the 4-wheel disc brakes, rack-and-pinion steering and up-front Macpherson struts. The 4-wheel independent suspension with stabilizer bars is pretty convenient too when you have to take, oh, what do you call those again, oh yeah, corners.

INTERIOR

Ahh, the interior. The arena where relationships will be severed, and friendships secured, the moment you decide who rides shotgun. Take your time. The leather-trimmed, driver side 12-way adjustable power seat offers a comfortable location for this critical decision. Not that anyone in the sporty two-tone accented cockpit will be complaining. In fact, once you use the steering wheel audio controls to crank up the Mitsubishi/Infinity® 6-disc, in-dash 7-speaker audio system, you’ll start thinking about the benefits of a cover charge. Meanwhile, the one-touch power sunroof is letting everyone at the intersection know your taste in CDs is as good as it is in cars. As far as other features like air, tilt, power, and cruise— it’s got them all. But it’s details like dual 12-volt outlets that really come in handy. When? Well, we don’t know. But we’re sure you’ll think of something.

This year’s Eclipse gives you confidence on a lot of different levels. With a sophisticated anti-lock braking system, 4-wheel disc brakes and automatic traction control, the GTS offers surefooted comfort in any weather condition. Unfortunately, not all vehicles on the road are this well prepared. That’s why we’ve equipped the Eclipse with a great defense in standard dual front air bags*, available dual side air bags* and our Refined Impact Safety Evolution (RISE) chassis. Designed to provide greater protection in a side collision, the flex-resistant RISE chassis is reinforced with steel side-impact door beams and energy-absorbing crush zones. And with the available single-button panic feature on our remote keyless entry the Eclipse doesn’t only help to protect you when you’re on the inside, it’s also got you covered when you’re not. Of course the ‘03 Eclipse itself is well fortified with an anti-theft engine immobilizer, and the GTS even comes with its own factory-installed security alarm system. What better way to silently scream “look but don’t touch.” It’s all part of the ‘03 Eclipse. Securing a lot more than just your ego.

Buying a car can be an overwhelming process. Keep in mind Mitsubishi makes it easy with two simple questions. How are you going to feel when you walk towards your car? And how many times will you look back when you walk away? The ‘03 Eclipse. Are you in?
