At Mitsubishi, we believe not all drivers are created equal.
So we build our vehicles for a different breed of driver: the
feet driver who takes pride in what they drive, who
fearlessly takes on the road, in a car that expresses
himself and his street cred. We believe every vehicle
we make should stand for something. Something more
than expected. And that’s why we don’t build Mitsubishi
cars for stereotypes. We build them for you.
Outlander Sport SE with Premium Package and Accessories in Laguna Blue

Outlander XLS in Cool Silver
Like most people on the go, you expect a lot from your vehicle. And as it turns out, you can have it. And more. The 2011 Mitsubishi Outlander and exciting all-new Outlander Sport don’t just do more than you expect; they help you do more than you expect.

Loaded with cargo space, either Outlander will impress you with its versatility. But then, you’ll be no less impressed by your own versatility as you utilize its convenient hands-free features. Likewise, its responsive power will be all you could wish for. And so too will be your own responsiveness as you access the advanced navigation system to find the best route through town.

So don’t underestimate what’s possible in the right vehicle. Whether it’s the roomy Outlander or the sharp Outlander Sport, you’ll be amazed by its capabilities. Not to mention your own.
THE ALL-NEW OUTLANDER SPORT’S EXTERIOR AND ITS AGGRESSIVE FRONT GRILLE HAVE BEEN CAUSING A STIR. THOUGH, NOT IN THE AIR AROUND IT. TO THE CONTRARY, ITS SWIFT SHAPE ACHIEVES CLASS-LEADING AERODYNAMIC EFFICIENCY. ITS STYLING, HOWEVER, WITH ITS DISTINCTIVE TAIL LIGHTS AND SCALLOPED SIDES, HAS CAPTURED SOARING ACCLAIM.

OUTLANDER SPORT

Super-Wide HID Headlamps
Using xenon gas, super-wide High Intensity Discharge headlamps (S-HID) project a beam 35 percent brighter than normal lights, coming even closer to the light this sporty vehicle’s name suggests: definition and less eye-fatigue.

LED Combination Tail Lights
Outlander Sport has got your back with LED combination tail lights. These high-quality units have the sharper definition and less eye-fatigue that your inner pilot will approve.
Panoramic Glass Roof
By day, the panoramic glass roof creates a fresh, open-air feeling throughout the interior. By night, the roof’s LED mood lighting sets the tone for endless evening drive possibilities.

With its available panoramic glass roof, the all-new Outlander Sport’s interior offers a brilliant open-air experience. Basking inside, you’ll find the seats well-appointed with embossed upholstery while the pebble-texture dash and subtle silver accents add a touch of class.

Throw in the ample cargo space and Outlander Sport really shines.
Brake Energy Regeneration System
In most cars, the engine is burdened with the task of driving an alternator, which in turn charges the battery. This system’s smart alternator captures kinetic energy during deceleration and converts it into electric energy. With the regenerative system keeping the battery charged, the engine doesn’t have to, thereby improving gas mileage.

Electric Power Steering
Without the constant burden of a belt-driven hydraulic pump, the engine is able to achieve better fuel efficiency. When the driver turns the steering wheel, the Electric Power Steering system uses sophisticated electronics to provide the appropriate amount of steering assist needed.

THE ALL-NEW OUTLANDER SPORT’S HIGH-TECH POWER PLANT OFFERS A VARIETY OF INNOVATIONS THAT HELP IMPROVE EFFICIENCY AND GAS MILEAGE. THE PISTONS HAVE BEEN COATED WITH A SPECIAL RESIN SURFACE TREATMENT THAT REDUCES FRICTION, WHILE A SMART ALTERNATOR AND AN ELECTRIC ASSIST POWER STEERING UNIT HELP REDUCE THE LOAD ON THE ENGINE.

2.0L MIVEC Engine
Powering Outlander Sport is an updated 2.0-liter engine that features resin-coated pistons and smoother surface camshafts for reduced friction. The dual overhead cam, 16-valve engine generates 148 horsepower at 6,000 rpm and 145 lb.-ft. of torque at 4,200 rpm. As with all Mitsubishi engines, it employs the efficient breathing of Mitsubishi Innovative Valve-timing Electronic Control (MIVEC).

Magnesium Paddle Shifters
Available with our Continuously Variable Transmission (CVT) are rally-inspired magnesium paddle shifters that offer real hands-on performance. Because the lightweight paddles are made of magnesium, they stay cool— even when outside temperatures reach triple digits. Shifting is easy; simply pull the right paddle to upshift and the left to downshift.

Under the hood we went above and beyond.

Outlander Sport SE with Premium Package in Laguna Blue

Brake Energy Regeneration System

Electric Power Steering

Outlander Sport SE with Premium Package in Laguna Blue
THE OUTLANDER AND OUTLANDER SPORT’S MANY TECHNOLOGY FEATURES ARE SO ADVANCED, YOU MIGHT FEEL YOURSELF ADVancing ALONG WITH THEM. WITH AMENITIES LIKE HARD-DRIVE NAVIGATION, AND VOICE-ACTIVATED COMMAND OF YOUR PHONE AND YOUR MUSIC COLLECTION, YOU’LL SOON BE MULTI-TASKING WITH THE BEST OF THEM.

40GB Hard Disc Drive Navigation System and Music Server

The Outlander Series’ available 40-gigabyte navigation system not only offers ultrafast data access, it provides a wealth of useful features like Real-Time Traffic and Diamond Lane Guidance™ that gives the driver High-Occupancy Vehicle (HOV) lane information, and points of interest along with directions.

The entertainment system is controlled through the sharp 7-inch LCD touch screen, where you can browse your music library. Complete with a DVD player and a digital music server, it holds as many as 3,000 of your favorite tunes. Additional functionality includes the ability to set the behavior of systems such as power locks and interior lighting.

Consider yourself upgraded.

Outlander Sport ES in Rally Red
TECHNOLOGY

FUSE Hands-Free Link System™ with USB Port
Incorporating Bluetooth® 2.0 technology, FUSE allows you to enjoy full use of your Bluetooth-enabled phone and play music from your iPod or other MP3 player and USB devices, hands-free. In addition to more traditional controls, such as buttons on the steering wheel and on-the-navigation screen, FUSE also utilizes advanced speech recognition technology when connected to the USB port so you can operate selected features with the sound of your voice. FUSE can recognize up to seven different mobile phones, automatically syncing up with contact lists from each phone that’s been paired with the system and keeping the lists private to each user.

Rockford Fosgate® Audio System
Outlander’s many capabilities include a top-shelf audio system. The available Rockford Fosgate Punch premium sound system, with nine speakers in seven locations (including a 10-inch long-throw subwoofer), is driven by 710 watts of deep bass and crystal clear highs. Along with digital signal processing, the system also includes a sound compensation feature that automatically adjusts audio levels based on vehicle speed. And if all that wasn’t enough, the system is also equipped with SIRIUS Satellite Radio that includes three months of prepaid service.

Audio Doors
In addition to providing impact protection, the front and rear doors on Outlander offer audio projection. Mitsubishi tuned the doors to function as speaker cabinets, extending response, increasing clarity and reducing coloration.

FAST-Key System
Key fumbling is so last year. Outlander’s FAST-Key (Free-hand Advanced Security Transmitter) makes vehicle entry easy. Unlock the doors by simply pressing the button on either front door or the trunk lever. You can even start the engine with the keys tucked away in a pocket or purse.

Available Real-Time Traffic
Kick congestion to the curb. Real-Time Traffic receives compiled traffic data and warns you of delays, including accidents and construction. Based on your location and scheduled destination, the system automatically adjusts your route to steer you clear of possible jams.

ECO Drive Lamp
Outlander Sport’s ECO Drive Lamp can actually help you learn to drive more efficiently. Note when the lamp indicates you’re getting good mileage and develop the most economical throttle technique.
SOME MAY FIND OUTLANDER, WITH ITS ASSERTIVE FRONT GRILLE, A LITTLE INTIMIDATING. RELAX. IT ACTUALLY LIVES TO PLEASE. WITH A DISTINCTIVE FRONT BUMPER, HOOD AND FRONT FENDERS, NOT TO MENTION SIDE SILLS, SIDE MIRRORS AND 18-INCH WHEELS, THE HANDSOME OUTLANDER WILL ESCORT YOUR FAMILY IN FORMIDABLE STYLE.

Thule® Integrated Roof Rack
As if you needed even more cargo options with your Outlander, this roof rack from Thule® gives you just that. Choose from a variety of available cargo boxes to match your particular gear needs.

Flap-Fold Tailgate
Outlander features the only two-piece flap style tailgate in its class. It makes for easy loading and also doubles as a bench for outdoor activities, handling up to 400 pounds.

Looks aggressive, but it’s great with your kids.
INSIDE YOU’LL FIND IT IMMENSELY OUTGOING

Available in five or seven passenger configurations, Outlander happily makes room for the whole family and their assorted gear. Its 60/40 split rear seat folds and tumbles to unveil over 72 cubic feet of space. And with the hidden storage compartment found on five-seat models, Outlander demonstrates it can keep a secret, too.

Inner Beauty

Along with a sharp instrument cluster, Outlander’s interior has been designed with handsome seats, door and dash trim crafted from available grained leather with double stitching.

Available Third-Row Seating

For groups as large as seven, Outlander offers an available third row of seating that conveniently drops down and out of the way when it’s not needed.4

MITSUBISHICARS.COM
All-Wheel Control

All-Wheel Control (AWC) is a philosophy that combines the electronically controlled 4WD system with Active Stability Control (ASC). AWC transfers power to all four wheels, improving traction and stability. The 4WD system regulates drive torque front-to-rear with a network of handling technologies. Outlander uses an advanced 4WD system allowing the driver to choose from one of three modes (2WD/4WD/LOCK) depending on performance preferences and surface conditions. The anti-lock brakes with Electronic Brakeforce Distribution (EBD), and aluminum roof (which lowers the center of gravity) all work hand in hand to give the driver optimal driving performance and safety.

Super All-Wheel Control

Engineered to take full advantage of the engine's power, Super All-Wheel Control (S-AWC) is actually a series of advanced technologies orchestrated to work in harmony. An industry first, the Active Front Differential (AFD), intelligently distributes engine power between left and right on the front axle, while the Active Center Differential (ACD) intelligently distributes power between the front and rear wheels. Active Stability Control (ASC) helps keep the vehicle on the intended path when cornering, and the Anti-lock Braking System (ABS) improves control and stability under hard braking. A mode switch allows the driver to select from “TARMAC,” “SNOW” or “LOCK” settings for maximum traction regardless of surface conditions.

Continuously Variable Transmission

One of the smoothest, most efficient drive trains available, a Continuously Variable Transmission (CVT) operates on a pulley system that allows infinite variability between the highest and lowest ratios. Instead of shifting gears, it readily adapts to changing vehicle speeds and allows the engine to remain efficient, improving both fuel economy and exhaust emissions.

Sportronic® Shift Mode

Can’t decide between an automatic or manual transmission? Get the best of both worlds with our Sportronic® transmission with adaptive shift control. Its clutchless “manual” shift mode offers light-footed manual shifting without the need for a clutch, while still giving the driver the ability to shift the shift lever forward to upshift or back to downshift.

EXERCISE YOUR CHOICE OF POWER

Whether you’re looking for quick responsiveness or raw pulling force, the Outlander offers two strong aluminum-block engine choices that are more than up to the task. And with its amazing grip, Outlander’s available All-Wheel Control will leave no doubt that when it comes to power, you can handle it.

2.4L MIVEC Engine

Outlander’s 2.4-liter engine is an aluminum-block, 16-valve, 168-hp engine. With single overhead cam, 16 valves and MIVEC technology, it produces 200 ft-lbs torque to 6,000 rpm and 168-hp at 6,000 rpm. With the available towing package, this power plant can pull a trailer up to 2,000 pounds.

6-Speed Automatic Transmission with Idle Neutral Logic

Built to handle the extra torque of the powerful 4-cylinder, the 6-speed automatic transmission includes a new feature called Idle Neutral Logic. This system increases fuel efficiency by defaulting the Neutra Neutral Logic when the vehicle comes to a stop, reducing the load on the idle engine.

3.0L MIVEC Engine

Outlander’s 3.0-liter engine is a brawny aluminum-block V6 with single overhead cam, 24 valves and MIVEC technology. It produces 230-hp at 6,250 rpm and 215 lb.-ft. of torque at 3,750 rpm. Along with the available towing package, this power plant can pull a trailer up to 3,500 pounds.

6-Speed Automatic Transmission with Idle Neutral Logic

Built to handle the extra torque of the powerful V6 engine, the 6-speed automatic transmission includes a new feature called Idle Neutral Logic. This system increases fuel efficiency by defaulting the Neutra Neutral Logic when the vehicle comes to a stop, reducing the load on the idle engine.
