WHAT IF
THE ONLY COMPETITION WAS YOURSELF?
YOU GET TO CREATE YOUR OWN RULES.

With its unmatched blend of technology and soul, the GT-R® is built to be driven in real-world conditions, places other supercars wouldn’t dare to tread. And for 2015, that drive is even better, as GT-R® adds a new level of sophistication and refinement with no compromise in performance. All this, and that “R” on the badge glows even brighter for 2015 with the introduction of the awe-inducing GT-R® Nismo, the world’s fastest volume production car around Germany’s legendary Nürburgring racetrack. Proving once again that along with shattering records, the GT-R® reinvents the very definition of what a supercar can be.

1 Based on time at Nürburgring time attack set by GT-R® Nismo® at Nürburgring on September 30, 2013.
TO LIVE WITHOUT LIMITATION.

Think how incredible it would be to drive a supercar as astonishing as the GT-R® like it was any other car – in other words, anytime you wanted, for any and every reason, or just because it’s yours. So drive it to the office, out to dinner, or up and down the boulevards. Take a friend over a long weekend. Even up to the mountains, when the lifts open. And of course to the track, where you can set a few records of your own.”

1 Driving is serious business and requires your full attention. At all times, obey traffic laws. Do not drink and drive. Do not drive if you are under the influence of alcohol or drugs. Always wear your seat belt. Improper vehicle maintenance can affect performance and safety. See your Owner's Manual and Warranty Information Booklet for further details.

2 Damage resulting from racing, competitive driving, track and/or airstrip use not covered by warranty. See your New Vehicle Limited Warranty and Owner’s Manual for proper vehicle operation and complete warranty details.
A PERSONAL INVITATION TO AN UNFORGETTABLE PERFORMANCE.
TAKUMI: ONE MAN, ONE ENGINE.

To see the pure passion, the true Japanese DNA of the GT-R, you only need to lift the hood. Only four master craftsmen in the world are allowed to hand-assemble the GT-R’s engine. They are known as Takumi – a Japanese term used to describe a master craftsman who has perfected his skills over years of painstaking work and dedication. And with over 100 years of combined Takumi experience in building engines, the passion is very, very strong.

Each GT-R engine is assembled by a single craftsman – and proudly bears a plaque carrying his signature. Perfection comes in many ways; each Takumi inspects every piece for quality and to guarantee precision. But it’s more than just exceptional skill that goes into the process that makes the GT-R so special. As one of the Takumi says, “We put our souls into each engine, hoping to deliver that excitement to customers.”
Another day in the 545-hp office. Each of the drivers specializes in a unique key part of the GT-R’s development. The Autobahn expert drives at speeds exceeding 300 km/hr. While on the “Marketability Course,” another driver tests the GT-R’s refinement as it encounters real-world bumps, potholes, tar strips and manhole covers.

When it comes to the Nürburgring, the challenges are so extreme that development is entrusted to drivers with thousands of laps of the track under their belt – respectfully called “Ringmeisters” by those in the know.

A TEAM OF EXPERT DRIVERS, ONE SINGULAR DRIVING EXPERIENCE.

Master Craftsmanship is not only seen inside the clean-room conditions of the GT-R’s engine-building facility – it is also found behind the wheel at the edge of the performance envelope.

Any one of the GT-R’s development drivers alone would have made the Nissan GT-R an impressive vehicle. But from the beginning, we knew GT-R was going to redefine the breed in terms of performance, refinement and capabilities. So we brought together the AS Class drivers – the top development drivers at Nissan – to create a vehicle that would excel not just at one racetrack, in one kind of weather, or only when driven by a master driver. This supercar would have to be for anytime, anywhere, and be as rewarding to a novice enthusiast as it would to a veteran racer.

Driving is serious business and requires your full attention. At all times, obey traffic laws. Not intended for unpaved off-road use. Always wear your seat belt, and please don’t drink and drive.
TURNING AN ENEMY INTO AN ALLY.

For supercars, air is the enemy, to be avoided as much as possible. But Nissan employed a unique philosophy to win this battle. Building on Nissan’s extensive racing experience, the GT-R® spent two years at the rolling-road wind tunnel at Group Lotus in Europe and 1.5 years in Yoshitaka Suzuki in Japan fine-tuning the secrets of bringing racecar aerodynamics to the street. The results are an incredibly slippery 0.26 coefficient of drag, impressive downforce for traction and control, and superior air flow management and cooling of key components. Racing technology pays dividends you can enjoy on the street, giving the driver a feeling of superior stability, confidence and control.
Center of engine placed rearward in chassis for superior handling

Transmission placed at rear of chassis for better traction and braking

When building the GT-R®, we followed a philosophy that says nothing is sacred – question everything and come up with new answers to achieve the results desired. A perfect example: GT-R®’s Premium Midship Platform. By moving the engine further back in the chassis, it reduces weight over the nose for better handling. In traditional layouts, this would place the transmission rearward, intruding into the passenger cabin. The solution – separate the transmission from the engine, and mount it with the transfer case in the rear of the vehicle, creating the world’s first independent rear transaxle for an All-Wheel Drive vehicle. By putting greater weight over the rear axle, traction and braking are improved. It even creates less heat between engine and transmission, allowing both to run cooler and more efficiently. A brilliant innovation in pursuit of handling perfection.
IT SHIFTS THE WORLD OF TRANSMISSIONS IN JUST 0.15 SECONDS.

The longer a shift takes, the less time power is being put to the ground. So for maximum acceleration, the GT-R®’s paddle-shifted 6-speed sequential dual-clutch transmission can snap off lightning-quick gear changes in just 0.15 seconds when in R-Mode – almost as quickly as you can blink.

Two clutches. No clutch pedal. The Nissan GT-R®’s 6-speed dual-clutch transmission shifts incredibly quickly. How? Inside the transmission, there are separate clutches for the odd (1st, 3rd, 5th) and even (2nd, 4th, 6th) gears. When the car is in an odd-numbered gear, the adjacent even-numbered gear is “pre-selected” – ready to make the shift immediately. The transmission is so smart, it even “blips” the throttle on downshifts to match rpm. So even though your left leg may not get much exercise, you’ll have tremendous fun shifting the GT-R®.

Steering-column-mounted paddle shifters

Transmission settings: R-Mode, Normal and Save

Carbon-composite driveshaft

Independent rear transaxle
3.8-L V6

Unconventional wisdom. Nissan challenged tradition at every point in the GT-R’s development. Instead of a large engine that can be heavy and thirsty for fuel, the GT-R is powered by an ideally sized, twin-turbocharged 3.8-L V6 that produces a prodigious 545 horsepower and equally immense 463 lb-ft of torque. No detail was overlooked: rather than traditional cast-iron liners, each cylinder features a unique plasma coating sprayed onto the cylinder walls. This advanced process greatly reduces friction, allowing the engine to spin more freely, reducing wear for added durability, and improving cooling – a uniquely brilliant way to build an engine to perform under brutal conditions.

545 HP

An engine is an air pump. The better it breathes, the better it works. For maximum performance, the Nissan GT-R features a fully independent intake system for each bank of cylinders. With a special secondary air system that helps heat the catalysts more quickly, the Nissan GT-R is not only powerful, it runs so clean that it’s been certified as an Ultra Low Emissions Vehicle (ULEV).

463 LB-FT OF TORQUE

To complement its incredible horsepower and torque, the GT-R features awe-inspiring braking power. Look beyond the sheer size of the 15.4” front and 15.0” rear brake rotors, and you’ll see that Nissan has brought some of the biggest ideas in racing to this extraordinary road car. The brakes feature 6-piston front and 4-piston rear calipers for stronger, more even clamping power – something you’d expect to see on an all-out competition machine. For extreme rigidity with light weight, the caliper is machined from a single one-piece “monoblock” of aluminum.

Heat is the enemy of any braking system. It’s not uncommon to see the rotors of racecars glowing bright red. Along with cross-drilled rotors to help keep the Nissan GT-R’s brakes cool, you’ll find ingenious, diamond-shaped ventilation ribs to pull away heat. The GT-R also benefits from a full-floating rotor – a race-bred technology. By allowing the outer disc to expand away from the hub under extreme heat, it reduces the tendency of the rotor to warp.

Brembo® is a registered trademark of Freni Brembo S.p.A.
A true supercar is an extension of your will. As if you just think where you want to go, and you’re there. For GT-R®, getting there is now even more enjoyable, with new levels of refinement befitting a true Grand Touring machine. A retuned suspension better filters out the bumps and noise while still telling you everything you need to know. Steering effort is reduced at lower speeds for in-town maneuvering, while still delivering the precision you desire. It all adds up to a supreme balance. One that lets you feel fully confident, that lets you enjoy 545 thoroughbred horsepower and the adrenaline rush that comes from charging out of a turn with perfect balance at your fingertips.

The Nissan GT-R®’s ground-hugging aerodynamics plus powerful brakes allow it to carry speed much later into the turn. But the real key to its quickness is the All-Wheel Drive’s ability to put the power down much sooner in a corner. In contrast, as they approach the limit of cornering grip, many powerful Rear-Wheel Drive cars require the driver to wait before applying power until the exit of the corner to avoid upsetting the handling of the car. So when you give it the spurs, the GT-R® simply powers out of the corner.

IT CORNERS LIKE IT IS READING YOUR MIND.

Professional driver. Closed course. Obey all traffic laws, always drive safely and wear your seat belt. Damage resulting from racing, competitive driving, track or airstrip use not covered by warranty. See your New Vehicle Limited Warranty and Owner’s Manual for proper vehicle operation and complete warranty details.
MAKE ANY CONDITION “SUPERCAR WEATHER”!

While most supercars must stay in the garage, or make a hasty retreat to warmer climates, GT-R®’s advanced All-Wheel Drive gives you confidence in slippery conditions. One of the most advanced All-Wheel Drive systems ever used in a road car, the system helps provide control of power to all four wheels. Combined with an equally advanced VDC stability control system, this means you have superior confidence and controllability. Anytime, anywhere.¹

Biased performance. Instead of the traditional 50/50 torque split between front and rear axles, the Nissan GT-R®’s electronically controlled All-Wheel Drive system is designed to provide up to 100% of available torque to the rear wheels, and can send up to 50% of torque to the front wheels as needed. This provides the steering feel and response of a Rear-Wheel Drive vehicle – the preferred choice of racecar drivers and serious enthusiasts – while still giving the added confidence and controllability that only an All-Wheel Drive vehicle can offer.

VDC that pulls for you. Most stability control systems cut engine power or apply the brakes when they sense a loss of control. Fine for the road, but slow going in competition conditions on the track. While cornering with the Nissan GT-R®’s advanced Vehicle Dynamic Control (VDC) system in R-Mode, it actually sends more power to the appropriate wheels when it senses oversteer or understeer, helping you drive with superior power and control.²

¹VDC, which should remain on when driving except when clearing snow or ice, cannot prevent accidents due to abrupt steering, loss of traction, or negligence during the drive. Driving under these conditions may affect braking and engine performance. Always drive at speeds that will allow you to control vehicle. Please obey all traffic laws. Not intended for unpaved off-road use. Always wear your seat belt, and please don’t drink and drive.

²Driving is serious business and requires your full attention. At all times, obey traffic laws. Not intended for unpaved off-road use. Always wear your seat belt, and please don’t drink and drive.
VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques.

**THE DRIVE YOU DESIRE, JUST A FINGERTIP AWAY.**

Whether you’re out for a leisurely cruise, on your favorite track, or anywhere in between, GT-R®’s easy-to-use 3-mode system is always ready. Three switches allow for on-the-fly adjustment of specific performance parameters for the transmission, suspension and VDC stability control. For 2015, the system has been fine-tuned to give a smoother, more refined ride while enhancing roadholding and traction. This is performance with amazing flexibility, all at the flip of a switch.

*VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques.
COMPLETELY CAPTIVATING, EVEN AT REST.

Available leather appointments on the center console, door panels and shift lever surround you in comfort, while available semi-aniline leather and double stitching on the seats are a tactile and visual feast, especially in the GT-R®’s new Ivory interior color.

New Active Noise Control technology uses a microphone in the ceiling to identify undesirable low-frequency engine sounds and neutralizes them with sound waves of the opposite phase. The result – a quieter driving experience which still preserves the invigorating sounds of engine performance.
ARTFULLY STATE-OF-THE-ART.

The 11-speaker Bose® audio system was designed along with the vehicle itself. The die-cast aluminum structures in the doors and behind the rear seats not only make the car incredibly rigid, they’re also an ideal way to mount speakers for optimum sound. Even the dual subwoofers between the rear seats were developed especially for the GT-R®. Angled specifically to work in concert with the sounds of the car, the subwoofers are mounted in a way to employ the trunk as a giant enclosure, for incredibly deep, rich bass.

A supercar shouldn’t just be great on the open roads – it should also help you find them. With Nissan GT-R®’s touch-screen navigation system1 with voice recognition and a high-resolution screen, the world is at your command. It features a hard drive-based system for quick response, while NavTraffic® advisories in real time help keep you ahead of the crowd. You can even keep track of the weather with NavWeather®. And with DVD playback capability and a USB iPod® input, the entertainment will have no problem keeping pace. The system also includes a convenient RearView Monitor with a new wide 180° view, so even parking is a quick and easy affair.

ERASING THE LINE WHERE THE DRIVER ENDS AND THE GT-R® BEGINS.

Special attention to ergonomics means the Nissan GT-R® feels familiar the moment you sit down – all gauges, including the Multi-Function Display system, are on the same plane, making for an easy scan, while instruments are large, clear and simple for maximum legibility.

Intuitive by design. Switchgear – from the door to the steering wheel-mounted controls to audio, climate control and the three setup switches – are at a similar height and are grouped by shape and function.
Like everything else in the GT-R™, Nissan rethought the way the driver receives information. Multiple, easily accessed screens are an innovative way the driver can get immediate feedback to key performance parameters. The result is engaging and informative — providing quick readability combined with the flexibility of multiple customizable displays.

Factory preset screen. For proof of the GT-R™’s dedication to performance, look no further than the factory preset screen—a dedicated stopwatch activated from the steering wheel. You can even store your track times on a flash drive using the USB port in the center console.

Five customizable performance screens are designed to let the driver organize key information to their personal tastes. Choose from a variety of engine performance and efficiency parameters, as well as monitoring cornering and acceleration/braking G-forces.
Professional driver. Closed course. Obey all traffic laws, always drive safely and wear your seatbelt. Damage resulting from racing, competitive driving, track and/or airstrip use not covered by warranty. See your New Vehicle Limited Warranty and Owner’s Manual for proper vehicle operation and complete warranty details.
The “Green Hell.” Welcome to the Nürburgring, the world’s most torturous track. 13 miles long, 73 bends in the picturesque Eifel mountains of Germany. The GT-R® logged thousands of miles at the ‘Ring, consistently recording lap times only matched by a few of the world’s most capable – and most expensive – production cars.

Professional driver. Closed course. Obey all traffic laws, always drive safely and wear your seatbelt. Damage resulting from racing, competitive driving, track and/or airstrip use not covered by warranty. See your New Vehicle Limited Warranty and Owner’s Manual for proper vehicle operation and complete warranty details.

EVOLUTION NEVER STOPS FOR THE NISSAN GT-R®:

It has always been about passion. The Nürburgring is the great equalizer when it comes to supercar performance. Manufacturers from around the world come here to test and develop their ultimate performance machines. And for the very finest, there’s always the challenge of setting record times.

During testing in 2007, the all-new GT-R® created a sensation when it posted an official 7-minute, 38.5-second lap – the fastest lap ever for a production car. But for team GT-R®, it was just the beginning. In 2009, the GT-R® sent another shock wave through the performance world with an unofficial time of 7 minutes, 26.7 seconds. Why stop at just one lap? In May 2012, the GT-R® returned to the Nürburgring to compete in a grueling 24-hour race. Against full-on race cars, the stock production GT-R® took incredible punishment, and was able not only to finish – it was first in class.

Driven to constantly improve, on September 30, 2013, the all-new 2015 GT-R® Nismo® with track options took to the Nürburgring, and ran an incredible 7:08.679, making it – once again – the fastest volume production car in the world. We cheered. We celebrated. And then we went back to work. Because where others see a finish line, we just see the start of the next lap.
GT-R® HIGH-PERFORMANCE GUIDE

ENGINE

VR38 Twin Turbo Engine

An engine designed to answer the demands of a supercar for the 21st century, the VR38 is high-performance, while still being fuel-efficient and conscious of the environment.

IHI Integrated Turbocharger

An IHI turbocharger is mounted on each bank of the engine. By combining each side of the VR38 features its own turbocharger, intercooler, and catalyst. For higher horsepower and better response than a naturally aspirated engine, an independent intake and exhaust system for each side of the engine is adopted to give the crankshaft added support, important with the engine’s massive torque. Magnesium alloy was used for the oil pan and valve cover for its light weight and strength.

TRANSMISSION

World’s first independent rear AWD transaxle

Dry Sump Lubrication System

To ensure stable lubrication for the transmission even when cornering at high Gs, a dry sump lubrication system is employed. The system sprays transmission oil directly onto the gears, reducing friction and increasing reliability.

ATTESA E-TS® All-Wheel Drive System

The ATTESA E-TS® is a Rear-Wheel Drive biased system that can vary torque split from 0:100 to 50:50 depending on speed, lateral acceleration, steering angle, tire slip, road surface and yaw rate. A GT-R®-specific yaw rate feedback control measures the differences between the target yaw rate calculated from steering angle and actual yaw rate detected by the yaw-rate sensor and G sensor and adjusts torque bias to help follow the driver’s steered line.

AERODYNAMICS

0.26Cd

High downforce with an ultra-low coefficient of drag

Aerodynamics figured prominently in the development of the GT-R®. Generally, the lower the coefficient of drag (the resistance to air), the lower the downforce, which adds grip and handling. Thanks to the GT-R®’s Premium Midship Package, the GT-R® was able to create a strong downforce while capping the Cd at 0.26. And by using aerodynamics to actively cool the powertrain and brakes, a better overall performance was made possible.

BODY

Multi-material Body Structure

The GT-R®’s body gets maximum strength from Carbon Aluminum Die-cast Steel. For structural rigidity, aluminum die-cast door inner panels are employed. In addition, die-cast aluminum is also used for the front strut housing and in the front suspension. For added structural rigidity, the suspension’s strut tower bar is made of a lightweight carbon composite containing aluminum honeycomb.

2015 Model

At the velocity the GT-R® can attain, even the smallest stones can cause extensive damage to the vehicle’s finish. To keep the GT-R® looking new, models finished in Deep Blue Pearl, Gun Metallic, Solid Red and Super Silver feature an innovative anti-chipping coating applied to the top of the front grille and the front of the rear fender – the two places most prone to chipping during driving. In addition, a double clearcoat helps protect the finish. Vehicles finished in Pearl White, Jet Black and Regal Red feature a Scratch Shield, a clearcoat that is more scratch resistant compared with conventional clearcoats, helping a vehicle maintain its new look for a longer period of time.

Multi-material Body Structure

In addition, a double clearcoat helps protect the finish. Vehicles finished in Pearl White, Jet Black and Regal Red feature a Scratch Shield, a clearcoat that is more scratch resistant compared with conventional clearcoats, helping a vehicle maintain its new look for a longer period of time.

Lightweight, yet incredibly strong

Hyper LED Driving Lights

For greater visibility from other vehicles, the GT-R® features Hyper LED Driving Lights. Despite their compact size, the LED lights are highly visible, even in broad daylight.

545 HP

The perfect blend of size and power

Closed Deck and Ladder Frame Structure

The cylinder block features a closed deck for strength. For added strength, a ladder frame structure was also adopted to give the crankshaft added support, important with the engine’s massive torque. Magnesium alloy was selected for the oil pan and valve cover for its light weight and strength.

Indipendent Intakes and Exhaust System

For higher horsepower and better response than a naturally aspirated engine, each side of the VR38 features its own turbocharger, intercooler, and catalyst. By employing an independent intake and exhaust system for each side of the V6, intake air flow is increased and exhaust back-pressure is decreased.

Plasma Coating Bore

Innovative plasma-sprayed bores are used in each cylinder instead of traditional cast-iron liners. This enhances cooling, reduces friction and weight while maximizing horsepower and increasing fuel-efficiency. Compared to the cast-iron liner, the overall weight decreased by approximately 0.6 pounds (3 kg).

Oil Cooler with Thermostat

For optimal control of engine cooling, the VR38 features a thermostatically controlled oil cooler system. A scavenger pump is employed to help keep oil flowing to the turbochargers, even during the strong lateral Gs experienced on a racetrack.

The GT-R®’s Premium Midship (PM) platform layout places the transmission, transfer case and final drive at the rear of the vehicle without the use of traditional torque tubes, allowing the suspension to operate independently and experiencing tire grip at each corner.

This enables the use of the world’s first independent rear transaxle All-Wheel Drive system. To further enhance handling, the input and output shafts are slanted and flattened out to lower the center of gravity.

To ensure there is no turbo lag as torque rises, high-precision electronic sensor and adjusts torque bias to help follow the driver’s steered line. Driving Lights. Despite their compact size, the LED lights are highly visible, even in broad daylight.
**GT-R® HIGH-PERFORMANCE GUIDE**

**CHASSIS**

From a smooth, civilized ride to racetrack-ready performance at the touch of a button.

Handling duties are managed by a sophisticated 4-wheel independent suspension system mounted to high-precision 6-point front and rear subframes. A special Bilstein® “DampTronic” driver-adjustable shock absorber system utilizes multiple vehicle information systems to provide appropriate damping forces and a high level of control for a variety of driving situations.

Chassis development also has been continued for 2015, enhancing the sense of “grabbing the road” and enhanced high-speed handling. The front suspension utilizes multiple vehicle information systems to provide appropriate damping forces and a high level of control for a variety of driving situations.

**Cockpit**

Driving is no longer just a means to an end but a personal journey. Enjoy every single mile, no matter where you go. Always be aware of your surroundings, and always drive responsibly. Always observe speed limits and laws, and always be prepared for the unexpected.

The Nissan GT-R®’s rigid forged aluminum 20-inch wheels, manufactured by RAYS® utilize knurling inside the wheels to help keep the tires from slipping around the wheels under heavy acceleration or braking. The wheels feature a premium dark (near black) finish, which provides a high-quality, high-performance look. The Black Edition features special metallic dark-finished 6-spoke RAYS® forged lightweight wheels in place of the Premium model’s 10-spoke design.

Stopping power is provided by a high-performance braking system developed by Nissan for the GT-R. The system features Brembo® monoblock 6-piston front and 4-piston rear calipers.

19.35-inch front and 18.0-inch rear Brembo® full-floating cross-drilled two-piece rotors and low-overhead high-stiffness brake pads minimize fade and provide intense stopping performance.

The calipers utilize racecar-style radial mounting to minimize caliper lips during extreme braking.

Calipers machined from a single “monoblock” of aluminum.

**SETUP SWITCH**

The heart of the GT-R’s anytime, anywhere performance, the system allows adjustment of the settings at a touch of a fingertip. The transmission, shock absorbers and VDC® stability control can each be shifted into three modes: ‘R’ mode, ‘NORMAL’ mode and individual modes for each system. Combined with the choice of automatic or manual shifting, these modes help give the driver exhilarating performance and control, whether on the circuit, on the highway in the rain or snow, even on rough-road surfaces on city streets.

Street to Track at Your Fingertips.

**LED**

The combination uses meshing gears as its motif. The tachometer is placed in the center, with the large-scale shift indicator on the upper right, supporting the driver with immediate readability when driving on the circuit.

So advanced, it can even help make you a better driver.

Multi-Function Meter

On the center display, a 7-inch wide LCD monitor, the multi-function meter, displays the vehicle condition and driving log. For example, when driving on a circuit, the system gives the driver detailed information to help understand the condition of the car. The braking and steering display shows the corresponding log on lateral G and longitudinal G for 20 seconds. A recording feature with playback lets the driver see how they were able to control the car during cornering, or how much unnecessary movement took place – information that can be used to improve drive technique.

**RECARO® SEATS**

The Interface Between Driver and GT-R®

The standard for comfort and control. On select GT-R® models, the front driver and passenger seat are designed by legendary manufacturer Recaro®. Deep bolsters are designed to help hold the driver and passenger in place, even during the most strenuous cornering. superb support also makes the Recaro® an excellent seat for grand touring. On the GT-R® Black Edition, the seats are leather-appointed in a black and red contrasting color scheme.

Street to Track at Your Fingertips.

**LED**

The combination uses meshing gears as its motif. The tachometer is placed in the center, with the large-scale shift indicator on the upper right, supporting the driver with immediate readability when driving on the circuit.

So advanced, it can even help make you a better driver.

Multi-Function Meter

On the center display, a 7-inch wide LCD monitor, the multi-function meter, displays the vehicle condition and driving log. For example, when driving on a circuit, the system gives the driver detailed information to help understand the condition of the car. The braking and steering display shows the corresponding log on lateral G and longitudinal G for 20 seconds. A recording feature with playback lets the driver see how they were able to control the car during cornering, or how much unnecessary movement took place – information that can be used to improve drive technique.

**RECARO® SEATS**

The Interface Between Driver and GT-R®

The standard for comfort and control. On select GT-R® models, the front driver and passenger seat are designed by legendary manufacturer Recaro®. Deep bolsters are designed to help hold the driver and passenger in place, even during the most strenuous cornering. superb support also makes the Recaro® an excellent seat for grand touring. On the GT-R® Black Edition, the seats are leather-appointed in a black and red contrasting color scheme.

Driving is no longer just a means to an end but a personal journey. Enjoy every single mile, no matter where you go. Always be aware of your surroundings, and always drive responsibly. Always observe speed limits and laws, and always be prepared for the unexpected.
The connection between driver and machine gets even more intimate with the GT-R® Black Edition’s supremely supportive Recaro® leather-appointed front seats. Matching red leather on the door pulls and the shift lever are a perfect complement to the contrasting panels on the seats, with the finishing touch of red accents on the steering wheel to create a driver’s environment that is as inspiring to look at as it is to employ. Edging other appearances, the Black Edition rides on 6-spoke special lightweight forged aluminum wheels, measuring 20” x 9.5” in front and 20” x 10.5” at the rear. A dry carbon-fiber composite rear spoiler ensures that the final impression you leave will be a most memorable one.

Performance art. The Black Edition’s rear spoiler is as breathtaking to the eye as it is slippery to the wind. Handmade in a limited monthly production run, the lightweight dry carbon-fiber is also incredibly strong. To make it a feast for the senses, a special coating allows you to feel the weave of the carbon-fiber.
The Ultimate GT-R® is now available. Pure. Undiluted. Awe-inspiring. With 600 horsepower of fury combined with unmatched control. From its high capacity turbos to its specially tuned suspension, GT-R® Nismo® is simply the dominant supercar of its time.

On the outside, a competition-developed body kit adds an additional 220 lbs. of downforce with a unique rear spoiler and carbon-fiber bumpers, trunk lid and side sills. Subtle yet special, contrasting dark gray mirrors feature a red accent stripe. The entire body sits poised over unique front and rear alloy wheels, wearing specially developed tires by Dunlop.

Inside is just as focused, with Recaro® seats, an Alcantara-wrapped steering wheel with red leather stripe at 12 o’clock, and a signature NISMO® red throughout the cabin, including the seatbacks, tachometer face, shift lever and door handle pulls.

Hail to the King. Around Germany’s legendary Nürburgring, the Nissan GT-R® is royalty. But on September 30, 2013 the GT-R® Nismo didn’t just break the world volume production car record, it obliterated it, with a timed lap of 7:08.679.

Based on time at Nürburgring time attack set by GT-R® Nismo® with track options.
GENUINE NISSAN ACCESSORIES

Every Genuine Nissan Accessory is custom-fit, custom-designed and durability-tested. Each one is backed by Nissan’s 3-year/36,000-mile (whichever occurs first) limited warranty and can be financed when installed by dealer at time of purchase. See your Nissan dealer for more information on accessories, or log on to parts.NissanUSA.com.

GT-R® Genuine Branded Merchandise includes apparel, lifestyle, and sports and leisure equipment to show your passion wherever you – and your GT-R® – go.

A. Premium Sport Floor Mats with Carbon-fiber Inserts
   The ultimate mat for the ultimate supercar.

B. GT-R® Tech Performance Polo
   Expressive style. Available in black and white, in men’s and women’s sizes.

C. Vehicle Cover
   Like lingerie for your GT-R®, with a stretch satin custom cover for a perfect fit and a soft fleece inner liner to protect the finish. Available in gray or black.

D. GT-R® Multi-purpose Bag
   Great for your helmet on a track day.

E. GT-R® Carpeted Floor Mats
   Preserve and protect your GT-R®.

Premium Midship (PM) platform with hybrid unibody...
### Exterior Features (continued)
- LED Daytime Running Lights and LED taillights
- Dual power folding heated outside mirrors
- Flush-mounted aluminum door handles
- Quad 5” polished exhaust finishers
- Titanium exhaust with polished exhaust finishers
- UV-reducing solar glass

### Comfort/Convenience
- Nissan Drive Navigation System with 7.0” VGA touch-screen monitor and voice recognition
- NavTraffic® and NavWeather® provided by SiriusXM®
- Driver-configurable Multi-Function Display system with graphical readouts of vehicle data and driving data displayed on a total of six screens
- RealView Monitor
- Nissan Intelligent Key® with Push Button Ignition
- Electronic analog instrument cluster with upshift indicator, vehicle information display and digital gear indicator
- NISMO® tachometer
- Bluetooth® Hands-free Phone System®
- HomeLink® Universal Transceiver
- Dual Zone Automatic Temperature Control (ATC)
- In-cabin microfilter
- Power front windows with one-touch auto-up/down
- Power door locks with auto-locking feature
- Cruise control with steering wheel-mounted controls
- Ticonciliation steering column with integrated gauges
- Variable intermittent flat-blade speed-sensitive windshield wipers
- Sun visors with illuminated vanity mirrors
- Overhead sunglasses storage
- Map lights
- Auto-dimming inside rearview mirror
- 12-volt DC power outlets (2)
- Lockable glove compartment
- Front door pockets
- Cup holders (2 front, 1 rear)

### Seating/Appointments
- Leather-appointed front seats with synthetic suede inserts
- Hand-stitched semi-aniline leather-appointed seats
- Black/Red Recaro® leather-appointed front seats
- NISMO® Recaro® leather-appointed front seats with synthetic-suede inserts
- 8-way power driver’s seat
- 4-way power front passenger’s seat with entry/exit switch for near passenger
- Heated front seats
- Hand-stitched semi-aniline leather interior treatments
- Black/Red interior treatment
- NISMO® Black/Red interior treatment
- Leather-wrapped steering wheel
- NISMO® Alcantara®-wrapped steering wheel and gauge hood
- Leather-wrapped magnesium paddle shifters
- Leather-wrapped gearshift knob
- Carbon-fiber and charcoal brushed-metal interior trim
- Aluminum-trimmed pedals
- GT-R® carpeted floor mats

### Audio/Entertainment
- Bose® audio system with Active Noise Control
- 11 speakers, including dual subwoofers
- MP3/WMA CD and DVD video playback capability
- SiriusXM® Satellite Radio®
- USB connection port for iPod® interface and other compatible devices
- Streaming audio via Bluetooth® wireless technology®
- Steering wheel-mounted audio controls
- Speed-sensitive volume control

### Safety/Security
- Nissan Advanced Air Bag System with dual-stage supplemental front air bags with seat belt and occupant-classification sensors
- Driver and front-passenger side-impact supplemental air bags
- Roof-mounted curtain side-impact supplemental air bags
- Front seat belts with pretensioners and load limiters
- LATCH System (Lower Anchors and Tethers for CHildren)
- Zone Body construction with front and rear crumple zones
- Hood-buckling creases and energy-absorbing steering column
- Tire Pressure Monitoring System (TPMS) with individual tire pressure display
- Nissan Vehicle Immobilizer System
- Vehicle Security System

### Packages
- Premium Interior Package
- Hand-stitched semi-aniline leather-appointed seats
- Hand-stitched semi-aniline leather interior treatments
- Cold Weather Package
- Dunlop SP Sport 7010 all-season run-flat tires®
- Special 50:50 coolant mix

**BUYING/OWNING**

Nissan’s environmental action plan focuses on several key areas.

Nissan Motor Acceptance Corporation. Whether you're buying or leasing, you'll find attractive rates and flexible terms to make your purchase more accessible.

**College Grad Program.** Ask about our special new vehicle pricing available to individuals up to two years after graduation.

**Active and Reserve US Military Program.** Ask about our fixed discount on new vehicle pricing available to those serving our country.

**New Vehicle Limited Warranties.** Protection for your new Nissan includes 5-year/100,000-mile (whichever occurs first) basic coverage and 5-year/60,000-mile (whichever occurs first) powertrain coverage. Terms, conditions and exclusions apply. See Warranty Information Booklet for complete details.

**Security+®** For additional peace of mind, a variety of extended service plans lets you tailor the coverage to your driving habits.

**Maintenance+®** This extended plan ensures your Nissan will receive up to 17 different services and over 33 different inspection items at each visit, using the most up-to-date diagnostic equipment available.

**Genuine Nissan Parts.** When it comes time for service, any necessary replacement parts will be made using Genuine Nissan new or remanufactured parts, or Nissan-approved parts. And they’re the only parts to carry Nissan’s factory-backed limited warranty.

**Nissan Mobility Assist.** This program offers reimbursements toward the purchase and installation of certain mobility assistance products for program-eligible Nissans. Go to NissanUSA.com/mobility for more info.

Nissan's environmental action plan focuses on several key areas. Increasing production of Zero Emission vehicles, including the 100% electric LEAF® improving fuel efficiency through our PUREDRIVE™ measures. And reducing the environmental impact of manufacturing, as seen at our new, energy-efficient, low-emissions paint plant in Tennessee. For more information, log on to NissanUSA.com/green
