

2012 LEAF™

It's a new day. And your garage is the new filling station. So charge at home and enjoy up to 100 miles, using no gas and releasing zero emissions! It's time.

start Nissan LEAF

this is the start of something big.

**WORLD CAR AWARDS**

**2011 World Car of the Year**

100% electric. Room for 5 and speeds of up to 90 mph. The Nissan LEAF™ is not just the world's first mass market electric car, it's the 2011 World Car of the Year.<sup>1</sup> In choosing LEAF for this top spot, the panel of automotive journalists from Europe, Asia and North America described it as "...the gateway to a brave new electric world from Nissan." Let's go.

**innovation for the planet. innovation for all.**

Electric cars are a reality. We're even mass-producing them so anyone can drive one. 100% electric, no gas and no tailpipe emissions. New ideas, for a better future. Change begins when you say yes. Ready?

click on any image and get to know Nissan LEAF<sup>™</sup> better.

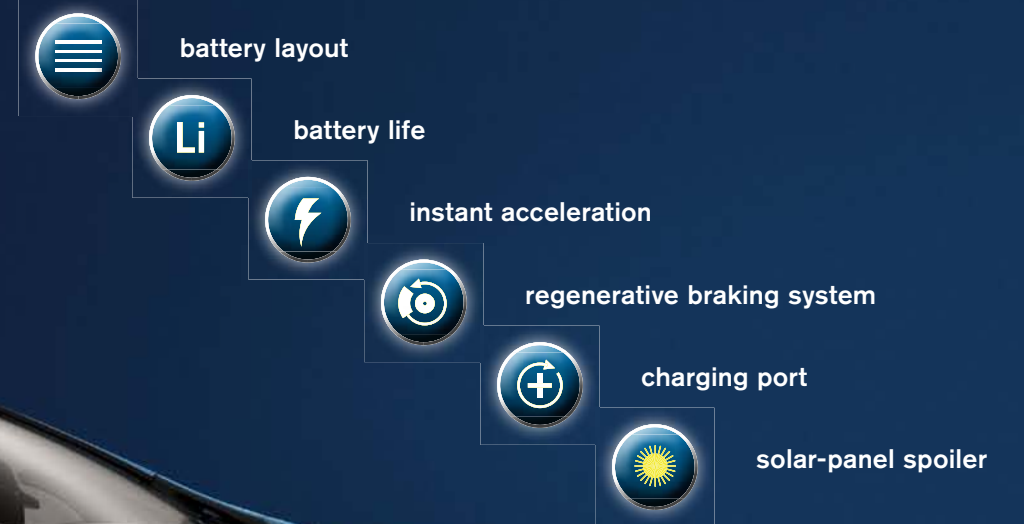

**take Nissan LEAF™ out for a spin.**

That's the best way to get friendly with 100% electric driving. Out on the road, around town, with nothing at all between you and the blue sky. No tailpipe emissions. Just a road-hugging, planet-loving drive. 100% electric fun.

## the new power.

Nissan LEAF™ runs completely on electricity stored in one of our most advanced laminated lithium-ion batteries ever. Compared to nickel metal hydrides found in most hybrids, lithium-ion batteries are only half the weight, yet twice the power. And to help maintain performance in cold weather, a battery heater automatically turns on when the battery temperature dips too low.

your home is the new filling station.

charge status lights

**hello, your Nissan LEAF™ is calling.**

Stay connected and communicate with Nissan LEAF remotely through your smartphone or laptop. Schedule off-peak charging, and pre-set the heat or A/C functions from any web-enabled phone or your computer.

embrace the moment, every one of them.

## range management made easy.

Nissan LEAF<sup>™</sup> provides lots of info to help you get the most out of every charge and keep an eye on your range. Of course, driving at moderate, more constant speeds is always a good idea. You can also pre-heat or pre-cool the cabin, and use a moderate temperature setting while driving. Then again, if you charge regularly, and know your daily driving habits, you're good to go.

eco mode

## car of the future meets latest technology.

Nissan LEAF<sup>™</sup> is special because it's electric, but it's a real car too. So of course you'll enjoy the very latest in Nissan technology. From an advanced navigation system to Bluetooth<sup>®</sup> and iPod<sup>®</sup> connectivity, all at the same time you're driving the future.<sup>1,2,3</sup>

-  Bluetooth<sup>®</sup>
-  iPod<sup>®</sup> connectivity
-  XM<sup>®</sup> Satellite Radio

of course it has that

recycled materials

we didn't forget the extras. like heated seats.

open the hatch

**sure it's electric, but is it versatile inside?**

Who knows what you'll want to bring? Convenient 60/40 split folding rear seats fit your friends or fold down flat, giving you a roomy storage surface for plenty of cargo options.

## protecting more than the planet.

Nissan LEAF<sup>™</sup> is built not only to surpass the government's rigorous safety standards, but has also undergone additional testing to verify battery performance in crash situations.
