EXPECT THE EXCEPTIONAL.

“Intelligent Cruise Control is not a collision avoidance system or warning device. Designed to use limited braking. Failure to apply the brakes could result in an accident. W hen used to help maintain your speed, it is not intended to keep you at a safe distance from the vehicle ahead. It cannot prevent accidents due to careless or dangerous driving behavior. Always remain alert and check the road. Only use features when safe to do so. A visible or audible alert does not mean speed changes or braking are necessary. Intelligent Cruise Control helps keep you a set distance from the vehicle ahead of you, even at low speeds.”

GET AWAY WITH JUST A WARNING.

Murano can even help detect if you’re getting drowsy or inattentive, giving you an audible and visual alert.
