INNOVATION THAT GIVES YOU THE BEST OF BOTH WORLDS.

What if you could get excellent fuel economy in a roomy, comfortable car that lot's of fun to drive? With Sentra® FE+® S we deliver just that.¹

We got there by developing everything from exterior aerodynamics that whisper through the wind to a powerful, 1.8-liter engine teamed with a virtually gearless CVT transmission that helps maximize efficiency and performance. The PUREDRIVE™ badge also means that Sentra® FE+® S meets or exceeds the industry-average US Federal CAFE standards for model-year 2016.² And best of all, Sentra® FE+® S is just one of a family of PUREDRIVE™ vehicles, reflecting Nissan's commitment to developing more environmentally friendly transportation for all of us.³

.27 Drag coefficient, thanks to an exceptionally aerodynamic design³

4 Low rolling resistance tires that use less energy to roll, so you use less fuel³

40 Up to 40 MPG highway, so you can breeze past the pump with ease¹

ECO PEDAL INDICATOR

A smarter way to drive. In Sentra®, an Eco Pedal Indicator in the instrument cluster gives you instant feedback on how you're driving, helping you become a smarter, more efficient driver.

Say goodbye to fixed gear ratios and hello to a smooth ride. Unlike traditional automatic transmissions, the Xtronic CVT® (Continuously Variable Transmission) eliminates the need for gear-hunting and delivers a seamless wave of power. Without traditional gears, the CVT is able to hold the engine in the "sweet spot" for instant, smooth acceleration, and keep rpm low for quiet, efficient cruising that helps produce up to 40 MPG highway.¹

LIKE HAVING THREE DIFFERENT CARS AT YOUR FINGERTIPS.

With the simple push of a button, you can custom-tailor Sentra® to match your mood. So what will it be today? Eco, Normal or Sport?

ECO

Feeling thrifty? In Eco mode, Sentra® adjusts engine and transmission response to maximize fuel efficiency, and even adjusts the air conditioning for less draw on the power.

NORMAL

Something for everybody. Normal mode gives you a perfect blend of efficiency and response.

SPORT

Curvy roads ahead? Sport mode sharpens engine and CVT transmission response to rev up your senses.

NISSAN SAFETY SHIELD® PHILOSOPHY

INNOVATION THAT LOOKS OUT FOR YOU.

What if you had the confidence you need for every part of your drive? The Nissan Safety Shield® is a comprehensive approach to safety that guides the engineering and development of every vehicle we make.

MONITOR

Smart technologies help monitor conditions. Like an available rearview camera that helps you see something directly behind you, or a system that helps ensure you're travelling on properly inflated tires.

Available RearView Monitor¹ Helps you see what's directly behind you when you engage Reverse.

Tire Pressure Monitoring System with Available Class-exclusive Easy-Fill Tire Alert^{2, 3, 4}

RESPOND

Whether you need to hit the brakes hard or maneuver around an unexpected obstacle, these standard technologies help you respond to a potentially harmful situation.

Vehicle Dynamic Control helps you maintain your steered path.⁵

Traction Control System helps reduce wheelspin in low-traction situations.

Anti-lock Braking System helps you maintain steering control around obstacles while braking heavily.

Electronic Brake force Distribution sends extra force to the rear brakes when you have additional weight of passengers or cargo in the back.

Brake Assist helps apply maximum braking force if it detects hard braking and senses you are in an emergency situation.⁶

PROTECT

When a collision is unavoidable, Nissan's Zone Body construction helps absorb the impact while the advanced seat belt and air bag systems help protect everyone on board.

Six Standard Air Bags⁷

LATCH System (Lower Anchors and Tethers for Children)

6 Standard Air Bags. Nissan Advanced Air Bag System with dual-stage supplemental front air bags with seat belt and occupant-classification sensors⁷ helps protect you and your loved ones in case of collision. Also featured, front seat-mounted side-impact supplemental air bags⁷ and roof-mounted curtain side-impact supplemental air bags⁷ help to add head protection for outboard occupants.

Tire Pressure Monitoring System (TPMS) with Available Class-exclusive Easy-Fill Tire Alert^{2, 3, 4} TPMS lets you know when a tire is low. And Easy-Fill Tire Alert takes the guesswork out of filling your tires, with a beep of the horn when you've reached the correct pressure.

snug-kids. Nissan safety engineers have dedicated thousands of hours to evaluating hundreds of child restraints in Nissans. The result: An industry first, The Snug Kids® Child Safety Seat Fit Guide. This guide lists child seats that fit the rear seats of Nissan vehicles, as well as offers invaluable tips on correct installation. Look for the latest Fit Guide at NissanUSA.com/SnugKids

¹Parking aid/convenience feature. Cannot completely eliminate blind spots. May not detect every object and does not warn of moving objects. Always check surroundings and turn to look behind you before moving vehicle. ²Tire Pressure Monitoring System is not a substitute for regular tire pressure checks. ³Ward's segmentation, 2015 Sentra® vs. 2014 Upper Small Class. ⁴Vehicle must be on for the Easy-Fill Tire Alert to operate. ⁵VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. ⁶Brake Assist is only an aid to assist the driver and is not a collision warning or avoidance device. It is the driver's responsibility to be in control of the vehicle at all times. ⁷Air bags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. All children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Air bags will only inflate in certain accidents; see your Owner's Manual for more details. Inflated air bags shown for illustration purposes only, actual coverage area may differ. Air bags deflate after deployment.
