718 Spyder

Perfectly irrational.
The models featured in this publication are approved for road use in Germany. Some items of equipment are available as extra-cost options only. The availability of models and options may vary from market to market due to local restrictions and regulations. For information on standard and optional equipment, please consult your Porsche Centre. All information regarding construction, features, design, performance, dimensions, weight, fuel consumption and running costs is correct to the best of our knowledge at the time of going to print (05/19). Porsche reserves the right to alter specifications, equipment and delivery scopes without prior notice. Colours may differ from those illustrated. Errors and omissions excepted. For the disclaimer in every language please refer to www.porsche.com/disclaimer.
Finally a sports car with no rational arguments.
20-inch wheels with sports tyres

Mid-engined concept
4.0-litre six-cylinder horizontally opposed and naturally aspirated engine

Adaptive GT sports suspension

GT brakes

6-speed manual transmission

309kW (420PS)
Design and aerodynamics
Serpentine roads, hairpin bends, gradients. Mountain races have always been a special challenge. At the start of the 1960s, Porsche continued to expand the successful concept of the legendary 550 Spyder and its successor models – lightweight, lower centre of gravity, mid-mounted engine, great manoeuvrability – and sparked waves of excitement in countless mountain and long-distance races.

The design language of the 718 RS 60 Spyder was influenced by its function: be fast, be agile, win races. And exactly this design language can be seen now in the new 718 Spyder. Its highly distinctive front spoiler, for example. Or the front spoiler: elegantly rounded, flattened, closer to the road. The front spoiler is reduced to the basics. Its clearly defined shape with the typical flow-ridge tells the headwind what it has to do: create optimum tyre contact pressure. Especially in the corners.

The highly distinctive front spoiler lip is aerodynamically optimised. Here, the special profiling – similar to a golf ball surface – ensures drag is as low as possible. Air curtains in the front apron minimise the air turbulence created on the wheels and therefore minimise drag by releasing the inflowing air precisely in front of the wheels from the wheel arches.

The large air intakes with air intake grilles ensure high cooling capacity. Thanks to the new honeycomb structure of the grilles, these are even more aerodynamically efficient than in previous models.

The design is additionally rounded off by the CG-inclusive underbody. The large air intakes behind the wheels ensure that the mid-mounted engine has the necessary flow of air to stay cool. The typical 718 lines on the doors direct air to the side air intakes. These supply the mid-mounted engine with fresh air, ensuring that it is efficiently ventilated – if it gets hot.

Design and aerodynamics.

Pure recklessness. At its best.
The rear end of the new 718 shows how perfect irrationality can be. The rear is influenced by the characteristic streamliners that visually carry forward the shape of the black roll-over bars. They lend the new 718 Spyder its unmistakable look and, at the same time, are reminiscent of the silhouette of one or other of its predecessors.

The distinctive rear spoiler between the tinted taillights emphasises the performance-oriented design. At speeds in excess of 120km/h it automatically extends — and reduces lift for more driving stability.

The dynamic slope of the rear end is made-up of the diffuser and the new, concise sports exhaust system. Its two black sports tailpipes are separated further and create the unfiltered sound that, every now and then, silences reason.

The new rear diffuser creates a very fast flow on the rear underbody and has a decisive impact on reducing overall lift by 50%. Super sports car technology that makes itself felt every second — in a good way of course.
Reason's last step is the recognition that there are an infinite number of things which are beyond it.

Blaise Pascal
Let's face it, you'll barely ever want to close it: the partially electric and high-speed compatible, lightweight hood of the new 718 Spyder. Simply open and closed with ease and enhance the presence of the new 718 Spyder when parked.

The side profile of the hood is flat and shaped to pass harmoniously into the streamliner over the rear lid. At the rear, the hood tapers into two streamlined fins.

It releases electrically. In a few simple steps, the hood can then be stored under the rear lid — without reducing the luggage compartment volume of course. The hood is available in flat red and black to correspond with the Classic package. The roll-over bars can also optionally be painted in the exterior colour.

Hood.

Open to everything. Except half measures.
Freedom doesn’t need much. Only the readiness to let go.
Even in the 1950s our engineers were a little irrational – in a good way. In 1957, for example, they sent the, then recently tested, 718 RSK Spyder to what is probably the toughest long-distance race in the world: the 24h of Le Mans. One year later it took third and fourth place. Victories in the European Hill-Climb Championship and the Targa Florio followed in 1959. Its direct successor was the 718 RS 60 Spyder. Together they dominated the Hill-Climb Championships for years.

With the optional Spyder Classic interior package, this legend lives on in the new 718 Spyder. Starting with the specific two-tone look in Bordeaux Red and black – on request, also available on the hood of the new 718 Spyder. In contrast: extended items in black Alcantara® as in motorsport. The trim strips painted in GT Silver Metallic contour the expressive colour combination with simple elegance, and are reminiscent of the style of historical race cars.
Performance
An open 718 with 4.0-litre naturally aspirated engine: sounds crazy. And insanely sporty.

Perfect. Or in other words: the horizontally opposed engine, completely redesigned. Six-cylinder, 4.0-litre displacement, naturally aspirated engine, excellent torque. Clear announcements presented by our broadly grinning engineers.

With its 309kW (420PS), the engine delivers 420PS extra than its predecessors. It’s a high-performance six-cylinder horizontally opposed engine that mixes powerful sportiness with efficiency. It delivers 45PS more than its predecessor, thanks to a new intake manifold with switchable resonance valves, direct fuel injection (DFI), integrated dry-sump lubrication and adaptive cylinder control.

The maximum engine speed? 8,000rpm. The maximum torque of 420Nm is from 5,000 to 6,800rpm. Enough thrust to accelerate the new 718 Spyder to 100km/h in 4.4 seconds. Irrational: the sprint only ends the other side of the 300km/h mark.

An acoustic exclamation mark: the sound of the new 718 Spyder. Thanks to the precise sports exhaust system with its twin clearly separated black tailpipes, to the carbon fiber diffuser on the left and right of the rear wheels. For an even more powerful sports car sound at the press of a button.

For fuel consumption, CO₂ emissions and efficiency class, please refer to page 77.
A lot of handwork awaits you. And we don't mean making doilies.

Transmission.

1st gear: start. 2nd gear: acceleration. 3rd gear: note symmetric. 4th gear: smile. 5th gear: shoot at tip of your nose. 6th gear: sing contentedly. And then repeat as often as you like.

The torque transmission in the new 718 Spyder is achieved by the precise 6-speed manual transmission with dual-mass flywheel, optimally designed for power. The movements of the gearshift paddles are crisp and short. The driving experience is especially active, intense and pure. The dynamic throttle-blip function plays its part in keeping you and your endorphin levels busy.

Porsche Torque Vectoring (PTV) including rear differential lock.

In short: PTV improves the dynamic performance. In detail: the integrated rear differential lock enables higher traction and significantly increased lateral dynamics and vehicle stability during load changes in corners and when changing lanes. In addition, when the car is driven actively into a corner, brake pressure is applied to the inside rear wheel. Consequently, a greater amount of drive torque is distributed to the inside rear wheel, almost pulling the car into the corner. Steering response is improved, agility is increased.
Life can sometimes be tough. Aren’t you glad?

Drifting gently through. Floating along the road on a cloud. To be frank: the new 718 Spyder is nothing like that.

The adaptive GT sports suspension of the new 718 Spyder is designed so that you experience every centimetre of road as directly as possible. And master every corner. Thanks to the wide toe angle, the streamlined tuning of the shock absorbers and the lowered body, every journey is a wild ride.

The lightweight spring-strut axle at the front is designed in typical GT style, the lightweight spring-strut axle at the rear is adjusted to the high performance of the new 718 Spyder with additional reinforcements and springs as well as accumulator dampers. But it’s not just the axles that connect the chassis to the body in a particularly streamlined way, enabling an even more precise wheel control. Height, camber, toe angle and the anti-roll bars of the chassis can be adjusted individually. The new 718 Spyder doesn’t just remain true to the track, it also remains true to your adrenaline levels – at the next mountain race for example.

Dynamic transmission mounts.

The electrically regulated system minimizes perceptible oscillations and the vibration of the entire drivetrain, in particular the engine. It also adjusts the damping force and stiffness to the driving style and road surface conditions. So that the benefits of a hard and a soft engine mounting arrangement can be used. The handling is noticeably more stable and precise during fast cornering. At the same time, the vertical oscillations of the engine are reduced during transients under full load. The result: more comfort and better acceleration. Whenever a less assertive driving style is adopted, the dynamic transmission mounts soften to provide a heightened level of comfort.
Porsche Active Suspension Management (PASM).
This variable damping system offers continuous adjustment of the damping force on each wheel. Based on the current driving situation and your driving style, you can choose between Normal mode for everyday use, Sport mode for sporty driving on public roads, and Sport mode for maximum lateral acceleration on the race track. The system also offers a manual option to adjust the damping force as desired.

Porsche Stability Management (PSM).
PSM is an automatic control system for maintaining stability at the limits of dynamic driving performance. In addition to the anti-lock braking system (ABS), Electronic Stability Control (ESC), and Traction Control (TC), PSM continuously monitors the direction, speed, yaw velocity, and lateral acceleration of the car. Using this information, PSM is able to calculate the actual direction of travel and initiate strategic braking of individual wheels to prevent deviation from the intended line. The sporty tuning with extremely sensitive and accurate systems interventions is a feature previously reserved for the GT models.
The 20-inch alloy wheels of the new 718 Spyder are painted in satin black, satin platinum, or satin white. The dimensions of the front-rear sports tyres are 245/35 ZR 20 on 8.5 J × 20 front and 295/30 ZR 20 on 11 J × 20 rear. Multiple contact surfaces and grip with the reduced tread depth increases, however, the risk of aquaplaning on wet surfaces.

Wheels and tyres.

1. 20-inch 718 Spyder wheel painted in satin black
2. 20-inch 718 Spyder wheel painted in satin platinum
3. 20-inch 718 Spyder wheel painted in satin white
In the midst of irrationality – we can also be extremely sensible. Not just for quality and sustainability but also when it comes to the most important thing: your safe arrival. Brakes.

They say with great power comes great responsibility. That’s when the brakes of the new 718 Spyder, derived directly from the 911 GT3, come into play. Specifically, front six-piston, rear four-piston aluminium monobloc fixed brake calipers with red finish. For greater inherent stability and faster response when applying and releasing the brake, even under extreme loads. The composite brake discs, adapted to the high power output, have a 380mm diameter at the front and rear. They are internally vented and cross-drilled for high thermal load and good responsiveness – even in the wet.

Porsche Ceramic Composite Brake (PCCB).

Motorsport tested: the optionally available Porsche Ceramic Composite Brake (PCCB). With their pupil is a diameter of 410mm at the front and 390mm at the rear, they offer more grip and better response. The cross-drilled front six-piston aluminium alloy fixed brake calipers release front end and rear from maximum distances. The brake calipers ensure that even in braking situations, the rear brakes are extremely high and absolutely consistent, breaking power. PCCB enables the shortest braking distances in even the toughest road and race conditions. The main benefit of the ceramic braking system is its extremely low weight. The brake discs are approximately 50% lighter than cast-iron discs of a similar design and size.

As well as enhancing driving performance and fuel economy, this reduces unsprung and rotating masses. Which results in better roadholding and increased comfort, particularly on uneven roads.

Light systems.

So that you always know what’s coming towards you, the new 718 Spyder is fitted with Bi-Xenon main headlights with integrated LED daytime running lights as standard. Bi-Xenon main headlights with optional Porsche Dynamic Light System (PDLS) and LED main headlights with optional Porsche Dynamic Light System Plus (PDLS Plus) are optionally available.

Joking aside.

Safety.

Interior and infotainment
We would love to say, “please step in!” but that wouldn’t do justice to your first contact with the new 718 Spyder. You slip into it, like a hand into a perfectly fitting glove. Everything fits. Everything is tailored to the driver. Mostly due to the sports car ergonomics, perfected over decades. The elevated centre console ensures a short path from the motorsport-typical small GT sports steering wheel to the shortened gear lever and back. Door pull loops emphasize the puristic sporty interior. You can also forego the audio and communication system, upon request — if you want absolutely nothing to distract from pure driving. The instrument cluster with the three round instruments (typical of the 718) and central rev counter provide the driver with all the information they need fast. The dial faces are black, the needles and increment markings are white, as are the analogue and digital stopwatch of the Chrono Package on the dashboard. The centre of the rev counter features the 'Spyder' logo. The dashboard trim in sun and the centre console are painted in the exterior colour. A leather steering wheel, seat covers, head restraints and Alcantara® are optionally available. Visual highlight: the dashboard trim in a painted or leather colour continue on the doors. An interior package with elements made of brushed aluminium in black is also available. In conjunction with the leather interior, packages with decorative stitching can create contrast in the interior, upon request. They are available in silver, red or yellow and also include the ‘Spyder’ logo on the headrests as well as door pull loops. The seat belts can also be in matching colours if desired. Nostalgia for the history of the 718 Spyder: the optional interior package Spyder Classic in Bordeaux Red and black. The colour can also be reflected in the hood, door edges and extended items in black Alcantara® and GT Silver Metallic painted trim strips.
The seats of the new 718 Spyder also reflect its sporty appeal. The cover, in all seat variants, is in black leather, the seat centres in Alcantara®. The headrests are embroidered with the Spyder® logo in different stitching colours according to equipment variant.

**Sports seats Plus.**
The Sports seats Plus, with their sporty streamlined padding and raised side bolsters, provide optimal hold. The backrest can be adjusted electrically and the seat height and fore/aft position can be adjusted manually.

**Adaptive Sports seats Plus.**
The Adaptive Sports seats Plus go a step further. They complement the Sports seats Plus with an electric 18-way adjustment. The seats can be individually adapted to meet your needs in terms of seat height, squab and backrest angle, seat depth, all adjustable and four-way lumbar support. The side bolsters on the seat surface and backrest can also be individually adjusted for precise lateral support and added comfort on long journeys.

**Sports bucket seats.**¹⁾
Optionally available: the Sports bucket seats with folding backrest, integral thorax airbag and manual fore/aft adjustment. The seat shells are made of glass and carbon-fibre reinforced plastic with a carbon surface finish.

**Full bucket seats.**¹⁾
The Full bucket seats are made of carbon-fibre reinforced plastic (CFRP) with carbon surface finish. This provides extremely good lateral support at minimal weight. The backrest adjustment is electric, the height adjustment is electric.

---

¹⁾ Each shown in conjunction with decorative stitching in contrasting silver colour.
²⁾ Child seats are not compatible with the Sports bucket seats or full bucket seats.
Closely connected to the driver. And everything else too.

Porsche Connect.

On the race track or on the road: Porsche Connect expands the existing vehicle functions of the 718 Spyder with smart services and apps. All designed to make the connection between driver and car even closer. To improve Porsche fascination. And to overcome the challenges of everyday life, fast and simply. You can also do without the audio and communication system, if you want. When the way there is your destination you don’t need a navigation system.

Porsche Communication Management (PCM).

Porsche Communication Management (PCM) is your central control centre for audio and communication. The latest generation features a high-resolution 7˝ touchscreen display which can be used to control many of the vehicle functions. On the move, you can enjoy your favourite music via the CD/DVD drive, SD cards, internal 10GB hard drive (jukebox), the AUX input or the USB connection, for your iPhone®, for example. Or you can simply listen to the radio. Your 718 also enables you to use countless Car Connect Services via smartphone, such as vehicle positioning. The optional smartphone compartment in the centre console transfers your mobile phone signal to the external aerial of the car – conserving phone charge and providing optimum reception.

Navigation including Porsche Connect.

Thanks to Real-time Traffic Information, the optional navigation module including Porsche Connect gets you to your destination quicker, and offers you numerous Porsche Connect services. You can use all the online functions with the help of the integrated LTE communication module with SIM card reader. In some countries, an integrated LTE-compatible SIM card with data allowance is also included, with which you can use Porsche Connect services such as navigation and infotainment services.¹)

¹) Porsche Connect services include a free inclusive period of use, the length of which may vary by services package and country but shall not be less than three months. The full range of Porsche Connect services or individual services thereof may not be available in some countries. The breakdown and emergency call services included in certain models are available in selected countries for 10 years after the production date. Availability also depends on the country-specific variants of the vehicle. In addition, an integrated SIM card with data allowance for use of selected Porsche Connect services will be included in the price in some countries. For use of the WiFi hotspot and the other non-included Porsche Connect services, e.g. music streaming, via integrated SIM card, in these countries a chargeable data package is also available from the Porsche Connect Store. Alternatively, you can establish a data connection using a SIM card of your own. For further information on free subscription periods, follow-on costs and availability of individual services in your country, please visit the ‘Availability’ area in the Porsche Connect Store at www.porsche.de/connect-store or consult your Porsche Centre.
In addition to its range of smart services, Porsche Connect also offers three smartphone apps. The Porsche Connect app allows you to send destinations to your Porsche before you start your journey. As soon as your smartphone has connected to PCM, you will be able to display them in the vehicle and start route guidance directly. Your smartphone calendar can be viewed directly on PCM and stored addresses can be used for navigation. What’s more, the Porsche Connect app gives you access to millions of music tracks thanks to its built-in music streaming function.

The Porsche Car Connect app lets you use your smartphone or Apple Watch® to retrieve vehicle data and remotely control selected vehicle functions. Another feature is the Porsche Vehicle Tracking System (PVTS) including theft detection.

The new Porsche Track Precision app* with a fully optimised interface that is even safer and more intuitive to use enables your detailed driving stats to be displayed, logged and separately on your smartphone. On the race track, the app visualises dynamic performance data, and in addition to sector and lap times, also shows the exact lap components until a defined reference lap. Recorded start, circuit and dress profiles can be managed and shared directly on your smartphone.

Visit www.porsche.com/connect to discover more about the available apps and services. The range of Porsche Connect services is regularly expanded.

Apple® CarPlay.

The optionally available Apple® CarPlay function enables you to connect your iPhone® to your Porsche and have certain apps shown directly on the central display screen of Porsche Communication Management (PCM). With the Siri® voice recognition interface, you can conveniently use your apps on the move while keeping your full concentration on the road.

My Porsche.

Every Porsche can be configured to your preferences. Porsche Connect is the same. Using My Porsche, you can retrieve relevant vehicle data and personalise your Porsche Connect services to suit your interests. By adding new destinations for your navigation system, for instance, or selecting your favourite sources for the news articles that you want to have read aloud in the car. My Porsche also lets you create additional users – such as family members or friends.

Porsche Connect Store.

Would you like to extend your initial free subscription period? Or purchase additional Porsche Connect services? Visit the Porsche Connect Store at www.porsche.com/connect-store and discover more about what Porsche Connect has to offer.

*1) App usage permitted on private land only. Operation of this product (including the video recording feature in particular) could be prohibited by laws or regulations in specific markets or events. Before any use of this product, please check that this is permitted under local laws and regulations.
Sound Package Plus
The Sound Package Plus ensures an excellent sound. The acoustic pattern in the vehicle interior is perfectly adapted to the driver and passengers by the amplifiers integrated into PCM.

Bose® Surround Sound System
The optional Bose® Surround Sound system has been specially developed for the 718 models and is optimally tuned to the specific acoustic characteristics of these particular vehicles. The audio system features 10 loudspeakers and amplifier channels in a patented, 200-watt active subwoofer integral to the vehicle bodyshell. This fully active system set-up enables each individual loudspeaker to be individually adapted to the vehicle interior. The total output: 505 watts. Should you ever want to drown out the resonant sound of the engine. For whatever reason.

Burmester® High-End Surround Sound System
For even greater listening pleasure: the optional Burmester® High-End Surround Sound System. With a total output of 821 watts and 12 individually controlled loudspeakers, including a 300-watt active subwoofer with class D digital amplifier integrated into the body, it provides a unique sound experience — even with an open hood. Sophisticated high-end audio components, e.g. special ribbon tweeters (air motion transformers, AMT), and a total diaphragm surface area of more than 1,340 cm² enable precision playback even at very high sound levels. A wide selection of preset equalisers ensures that there is always the perfect audio experience, while a sound conditioner based on microphone technology adapts the sound sensitively and in real-time to the driving situation.
Perfectly irrational. Absolutely.

You turn on the engine — and you can’t let you rest again. It takes you out to the mountain pass roads and brings tears to your eyes. It won’t let you sleep, makes you get up at 6 a.m. on a Sunday morning, and doesn’t let you go. It makes no sense. And perhaps that’s why it’s so much fun.

The new 718 Spyder is a pure driving machine. Is it even possible to improve? Probably not. But it can be reinterpreted. And brought even closer to motorsport.

The new 718 Cayman GT4 brings to the race track what the 718 Spyder brings to the road: a sense of irrationality that promises unending driving pleasure.

The new 718 Cayman GT4 and the new 718 Spyder.
Personalisation
Our wealth of experience goes back a long way. Since the very beginning, Porsche has been dedicated to realising customers’ wishes. Known until 1986 as the ‘Sonderwunschprogramm’, then Porsche Exclusive – and now Porsche Exclusive Manufaktur.

We love what we do. We love our work. Every seam, every square inch of leather and every other tiny aspect receives the same devotion. We transfer our experience and passion to the vehicle, together with your inspiration – directly down to life on the shop floor.

None of this would be possible without originality, enthusiasm and attention to detail. Beginning as early as the consultation stage. Because we keep everything in mind above all else, meeting your individual requirements, thereby turning a Porsche into your Porsche.

How do we fulfil these requirements? With composure and care – by means of precise craftsmanship and the use of exquisite materials such as leather, carbon or Alcantara®. The result: a product born of dedication and craftsmanship.

In other words, a blend of sportiness, comfort and design that reflects your own personal taste. A Porsche bearing your signature touch.

We offer a wide range of refinement options. Be it visual and technical, for the interior and exterior. From a single alteration to extensive modifications. Because your inspiration is our passion.

Take inspiration from our examples on the following pages and visit www.porsche.com/exclusive-manufaktur to learn all about how to turn your extraordinary vehicle.

Your inspiration.
Our passion.
Porsche Exclusive Manufaktur.

**Engine**

- Design: Aluminium horizontally opposed and naturally aspirated engine
- Number of cylinders: 6
- Displacement: 3,995cm³
- Power (DIN) at rpm: 309kW (420PS) at 7,600
- Max. torque at rpm: 420Nm at 5,000–6,800
- Maximum engine speed: 8,000rpm

**Transmission**

- Drive: Rear-wheel drive
- Manual: 6-speed

**Chassis**

- Front axle: Lightweight spring-strut suspension, anti-roll bar, selected suspension mountings ball-jointed
- Rear axle: Lightweight spring-strut suspension, helper springs, anti-roll bar, selected suspension mountings ball-jointed

**Steering**

- Electromechanical direct steering with variable steering ratio and steering pulse generator

**Turning circle**: 11.4m

**Brakes**

- Six-piston aluminium monobloc fixed brake calipers at front, four-piston aluminium monobloc fixed brake calipers at rear, discs internally vented and cross-drilled
- Brake disc diameter: 380mm front and rear

**Vehicle stability system**: Porsche Stability Management (PSM)

**Wheels**

- Front: 8.5 J × 20 ET 61
- Rear: 11 J × 20 ET 50

**Tyres**

- Front: 245/35 ZR 20 (sports tyres)
- Rear: 295/30 ZR 20 (sports tyres)

**Performance**

- Top speed: 301km/h
- 0–100km/h: 4.4secs
- 0–160km/h: 9.0secs
- 0–200km/h: 13.8secs
- Flexibility (80–120km/h): 6.0secs

**Unladen weight**: DIN 1,420kg

**Fuel consumption**

- Urban, in/l/100km: 15.6
- Extra urban, in/l/100km: 8.1
- Combined, in/l/100km: 10.9

**CO₂ emissions**

- Combined in g/km: 249

**Emission standards**: Yes

**Energy efficiency specifications Germany**

- Efficiency class: G

**Energy efficiency specifications Switzerland**

- Efficiency class: G

- The average CO₂ emissions value of all new vehicles sold in Switzerland is 137g/km.
