The Porsche Macan

Life, intensified
Life, intensified

Are we simply bystanders or do we take the plunge?
Are we driven by obligation or passion?
Do we lean back and relax or do we want to feel the power of acceleration?

The answer is simple. That’s why we create sports cars.
Those who prefer to blaze a trail of their own don’t need to follow the lead of others. We’re thinking specifically about cars known as compact SUVs, characterized by five doors, five seats, all-wheel drive—and, of course, a higher sitting position. But aren’t they lacking a certain something? Something that adds a little life, lets us enjoy a more intimate relationship with the road and deliver great driving pleasure. A concept that boasts plenty of space for hobbies, leisure and sport. But no room for compromise. Compact, concentrated and intensive, but still powerful. Practical, but never ordinary.

No efforts were spared. Our engineers achieved their development objective: the first sports car among compact SUVs.

The Macan—built for an intensive life in which the thirst for experience and thrills are ever present, and in which new challenges are a permanent driving force. Built for a life that refuses to be cut short by conventions and feels all the more authentic for it. Direct and intimate.

A sports car that gives us what we’re looking for, even in our everyday life: that feeling of being alive.

The Porsche Macan. Life, intensified.

It is by these standards that we created the Macan, and saw it emerge with four distinct guises. Each one a sports car. Each one unmistakable in its own segment. Each one a genuine Porsche—from design and driving dynamics to equipment specification. From our dynamic entry-level model to the ultra sporty S variant and the striking GTS model to the Turbo, which sets performance standards in its vehicle class.

All Macan models were developed, tested and built in keeping with the Porsche philosophy. That’s where we take sporty style and performance from the racetrack and inject them into everyday driving. We make the Macan as efficient as possible—and of course, comfortable.

No efforts were spared. Our engineers achieved their development objective: the first sports car among compact SUVs.

The Macan—built for an intensive life in which the thirst for experience and thrills are ever present, and in which new challenges are a permanent driving force. Built for a life that refuses to be cut short by conventions and feels all the more authentic for it. Direct and intimate.

A sports car that gives us what we’re looking for, even in our everyday life: that feeling of being alive.

A sports car that gives us what we’re looking for, even in our everyday life: that feeling of being alive.

The Porsche Macan. Life, intensified.
What makes a Porsche a Porsche? The fact that it is instantly recognizable, some would answer. Others might say it’s the face that stands out from the crowd. Our engineers would say that it’s the Porsche DNA. It’s what gives every Porsche its own unmistakable character, and makes the Macan what it is, too. An extraordinary sports car.

That’s also proven by the most recent addition to the family: the new 4C Macan. This latest model lines up on the starting grid looking muscular, sharp and imposing. Bi-Xenon™ headlights in black and tinted LED taillights catch the eye, attracting every gaze. And the Sport exhaust system catches the ear, emitting a particularly intense and resonant sound.

SportDesign package, fitted as standard, underscores the sporty impression further still. The rear fascia painted in black is a case in point, standard for GTS (optional for all other Macan models). The side skirts also lend a dynamic appearance. Another standard feature: the hi-gloss black exterior package. It ensures an even more commanding presence. And adds accents of its own.

Accents are also added by the new Turbo exterior package. Only available on the Macan Turbo, it’s made for anyone who demands nothing less than exclusivity from life. The exclusive 21-inch 911 Turbo Design wheels—highly polished on the outside, black (high-gloss) paint finish on the inside—feature wheel centers with full-color Porsche Crest. And the LED headlights, including Porsche Dynamic Light System Plus (PDLS Plus), catch the eye both day and night.

Exterior design.

The SportDesign package, fitted as standard, underscores the sporty impression further still. The rear fascia painted in black is a case in point, standard for GTS (optional for all other Macan models). The side skirts also lend a dynamic appearance. Another standard feature: the hi-gloss black exterior package. It ensures an even more commanding presence. And adds accents of its own.

SportDesign exterior mirrors, air-intake grilles painted in black (high-gloss) and side blades in black (high-gloss) also create stunning design accents.

The face of every model in the Macan range displays the dominant sporty genes of their hereditary line. Markers include the characteristic headlights recessed in the hood. The large, imposing air intakes of the front fascia are just waiting to inhale life. Every single second.

The hood stretches through to the wheel arches. This lends the front a broad and powerful presence and reminds us of the legendary Porsche 917, which won countless victories in the early 1970s—including at 24 Hours of Le Mans, where it held the distance record for 39 years. The side profile is typically Porsche. From this angle, every muscle appears flexed—like a predator ready to pounce.

We could etch character in stone. But we prefer more dynamic forms of expression. Exterior design.
The roof line slopes distinctively down towards the rear, drawing the customary sports car contour that promises excellent aerodynamics. Our designers call it the Porsche flyline.

A visual highlight of the Macan is the side blades. Not only do they set a sporty accent, their design pays homage to the 918 Spyder. They make the proportions of the doors appear narrower and the flanks seem much sleeker and sportier. Side blades are available with a paint finish in matte black (Macan GTS only), Lava Black, in the exterior color of the vehicle or—for a particularly exclusive statement—in Carbon Fiber. A black (high-gloss) finish is reserved exclusively for the Turbo exterior package.

In sizes of up to 21 inches, the wheels of the Macan are equally eye-catching. The particular Macan model that you see before you is recognizable by its brake calipers: black on the Macan, silver-colored on the Macan S and red on the GTS and Turbo. Typically Porsche.

The classic Porsche sports car design reveals itself at the rear: slender at the top, widening into broad shoulders above the rear wheels—a tribute to the 911. The styling of the rear hatch gives the rear end a particularly harmonious form. For convenience, the rear hatch on all Macan models is equipped with an automatic powerlift function. The slimline LED taillights have three-dimensional proportions, which gives them an extraordinary appearance of depth—and captures your attention. The overall effect is to make the Macan look low, wide, and thus intimate with the road—like any genuine Porsche. After all, a muscle-toned body is meant to be admired from the rear as well as the front.

Of course, our engineers took great care to ensure that the interior of the Macan is just as intensive with sports car sensations.
True beauty is more than just skin deep.

Interior design.

As a creator of sports cars, we know that driver and car must form a single entity. As such, you do not simply sit in the Macan—the ergonomic architecture integrates you into the vehicle. The three-dimensional arrangement of the controls lends the interior a cockpit-style layout. In typical Macan fashion, the sporty sport seats convey a sense of height above the road but a firm connection with it.

This feeling can be experienced in an even more exclusive way—with the new Turbo interior package*, available only for the Macan Turbo and in a choice of two contrasting colors: Rhodium Silver and Garnet Red. Eye-catching through and through, the black full-leather interior features Alcantara® on the seat centers, center console and door armrests.

The front and outer rear seat belts, the tachometer, the deviated stitching and the “Turbo” logo embroidered on the headrests are finished in the contrasting color. So it goes to show once again: the Macan Turbo not only looks outstanding on the road—it is the epitome of exceptional exclusivity.

Profound sportiness is a question of inner attitude, and this is answered emphatically by the new GTS interior package—reserved exclusively for the Macan GTS. Stitching and seat belts, the tachometer and the “GTS” logo in Carmine Red or Rhodium Silver lend the interior an even more dynamic tone. In addition, selected items upholstered, as standard, in Alcantara® highlight only too clearly the sporty genes that the Macan GTS has inherited.

The instrument panel, with its cluster of three dials, is always in view—just like in a classic sports car. In the center: the tachometer. To the right: the 4.8-inch color screen. This displays a range of useful information as well as a host of new functions introduced with the latest version of Porsche Communication Management (PCM) system.

Thanks to the ascending center console—a typical feature of a sports car—you don’t have very far to reach from the steering wheel to the PDK gear selector and most important vehicle functions. The ignition switch, as ever, is closest to the door—typically Porsche.

* You will find further information on the new Turbo interior package on page 22.
The multifunction three-spoke Sport steering wheel is inspired by the design of the 918 Spyder—and an established motorsport principle: keep your hands on the wheel. Two manually operated and ergonomically positioned gearshift paddles enable fast and sporty gear changes.

Sound and navigation systems follow the ergonomics philosophy. Equipped with a high-resolution color touchscreen, they offer intuitive ease of use.

With the versatile three-way split-folding rear bench seat—ratio 40:20:40—you can adapt the Macan perfectly to your needs.

On the subject of customization, you can make the interior even more individual thanks to a diverse selection of options. The palette of materials and finishes ranges from classic to sporty. For an exclusive ambience, you could have the interior of your Macan lined in leather in various ways or have the finish refined with the elegant Dark Walnut wood. For a theme that places the emphasis on sport, choose Alcantara®, Carbon Fiber or Brushed Aluminum. However you personalize the interior of your Macan, remember one thing: there are no limits.

Life, intensified | Design
Where it comes from, valuable seconds count. Where it wants to go, valuable moments matter.

Macan principle.

Our home is the racetrack. It’s where we fight for every tenth of a second and every ounce in weight. The knowledge we gain is streamed into our series production models.

We’ve known since 1948 that nobody wins on horsepower alone, whether it’s on the racetrack or in everyday life. Our main development objective is to create sports cars that stir emotions. By that we mean the driving feel that only a genuine Porsche can provide. With considerable agility and dynamics, but always with responsibility in mind. We achieve these goals with highly efficient engines, outstanding driving features and the relentless will to push boundaries—upwards.

We want something to happen—on the asphalt certainly, but first and foremost just beneath the skin. That’s why every member of the Macan family was developed to fulfill one principle in particular: to bring the urban way of life to the fast lane and to provide a high level of sporty performance to everyday driving. Job done.

Let’s begin at the heart. All engines are characterized not only by their impressive performance and high efficiency but, above all, by the typical resonance of their sound, making a particularly strong impression in conjunction with the optional Sport exhaust system. The power of the new Macan models is transmitted to the road by active all-wheel drive.

This system sets standards for driving dynamics and stability. Staggered wheel sizing front to rear is standard—as seen on the 911—to deliver even greater traction and agility.
Fitted as standard, the 7-speed Porsche Doppelkupplung (PDK) lets you experience motorsport-style gear changes, which take place in milliseconds and with no interruption in the flow of power. The system also features a coasting mode, which reduces fuel consumption and emissions where the driving situation allows. To this end, the Auto Start Stop function, intelligent thermal management and many more efficiency-enhancing measures make a decisive contribution.

The steel spring suspension, standard, helps to provide the driving precision and performance typical of any Porsche. As an option (standard in the Macan Turbo and Macan GTS), it can be upgraded to include optional Porsche Active Suspension Management (PASM). At the push of a button, the shock absorbers respond even more precisely to the current driving style. Air suspension, standard on the Macan GTS is available for even greater dynamic performance and a high level of ride comfort. With this suspension, the Macan GTS sits 10 mm lower than that of the Macan S. The three-position ride-height adjustment capability enables you to adapt it optimally to the driving situation.

Optional Porsche Torque Vectoring Plus (PTV Plus) lets you feel the Macan principle in every corner—and in a particularly intense way. Operating in conjunction with an electronically controlled rear differential lock, the system works by varying the torque distribution to the rear wheels and thereby significantly further improves handling and steering precision. It also increases the agility of the car when it attacks the corner.

Naturally, active safety also follows the Macan principle—and, in doing so, fulfills the requirements of a sports car. Porsche Stability Management (PSM) helps to ensure stability at the limits of sporty performance. Typically Porsche, the brakes set standards for deceleration. Optional driver assistance systems relieve your workload so that you can have more fun. Adaptive cruise control, including Porsche Active Safe (PAS), regulates the speed of your vehicle in line with the speed of the vehicle in front. Lane Change Assist monitors your blind spots, while Lane Keep Assist tracks your car’s distance to divider line markings on the road.

Intensive living can also be measured in bits and bytes—for example, with the new version of Porsche Communication Management (PCM) system with optional navigation module. Additionally, the optional Porsche Connect Plus module offers wireless Internet access and online navigation, featuring real-time traffic information in the map view of the navigation system, including Google Earth and Google Street View. The module also comes with Apple CarPlay, which you can use to access the apps of your iPhone conveniently from the driver’s seat—using PCM or the optional voice control system.

So you see: being highly networked can also be the principle of a sports car. That’s because, for us, staying true to one’s principles is essential. The principle of power above all.
Must intensity really have any limits? In the areas of design, performance, and exclusivity, we have at the very least redefined them.

The distinctly muscular front fascia, with the side air intakes of the conspicuously large cooling air intakes, is found nowhere else but on the Macan Turbo. It’s a visual promise of thrilling performance. Bi-Xenon™ headlights with dynamic cornering lights provide optimal illumination of the road. These are supplemented by the stunning four-point LED daytime running lights.

The Macan Turbo also stands out thanks to its lower front spoiler, inspired by the 918 Spyder. The turn signals and position lights have been integrated in such a way that they appear to hover inside the side air intakes. Below them are the LEDs of the fog lights. The side blades are painted in the exterior color of the body. SportDesign side skirts underline the powerful profile. Another typical feature of the Turbo is the “Macan Turbo” logo on the rear hatch.

Impressively, the 3.6-liter twin-turbo V6 engine delivers an enormous power output of 400 horsepower. The sprint from 0 to 60 mph is completed in a mere 4.6 seconds. Top track speed is 164 mph. Those aren’t simply bare numbers, but a compelling statement in terms of performance—and efficiency.

19-inch Macan Turbo wheels are fitted as standard. Behind these are the red brake calipers of the large-diameter brakes. The steel spring suspension is equipped, as standard, with Porsche Active Suspension Management (PASM), which enhances both sporty performance and ride comfort.

As standard, the Macan Turbo comes with the leather package, which emphasizes the exquisite quality of the interior. Another highlight is the new version of Porsche Communication Management (PCM) system with navigation module and a large touchscreen. It comes as standard, just like the Bose® Surround Sound System. Offering a total output of 665 watts and with 14 loudspeakers, including active subwoofer, it delivers a special listening experience.

The Macan Turbo. Performance in its most intense form.

**Drive concept**
- 3.6-liter twin-turbo V6 engine
- 400 horsepower at 6000 rpm
- Maximum torque: 406 lb.-ft. at 1350–4500 rpm
- Acceleration from 0 to 60 mph: 4.6 seconds
- Top track speed: 164 mph
- Direct fuel injection (DFI)
- VarioCam Plus
- Auto Start Stop function

**Highlights of the Macan Turbo**
- Sport button
- Porsche Doppelkupplung (PDK)
- Steel spring suspension with Porsche Active Suspension Management (PASM)
- 20-inch Macan Turbo wheels
- Side blades painted in exterior color
- Twin dual-tube tailpipes outside left and right with design specific to Macan Turbo
- Bi-Xenon™ headlights with Porsche Dynamic Light System (PDLS)
- LED fog lights
- Electrically folding exterior mirrors
- Three-zone automatic climate control
- 19-way Adaptive Sport Seats with comfort memory package
- Lane Departure Warning
- Brushed Aluminum interior package
- Leather package
- Roof lining in Alcantara®
- Multi-function Sport steering wheel with gearshift paddles
- New Porsche Communication Management (PCM) system with navigation module
- Bose® Surround Sound System
- Manual rear hatch
- ParkAssist (front and rear) with reversing camera
- Power Steering Plus
- Privacy glass

Selection of personalization options
- Air suspension with Porsche Active Suspension Management (PASM)
- Porsche Torque Vectoring Plus (P4T Plus)

Life can give you more than 100 percent.

The new Macan Turbo packages.

Life is exactly what you make it. In your free time. On the road. And with your Macan. For us, there is no time for compromise.

Turbo exterior package
To command a strong presence, it’s crucial to have a persuasive demeanor, superior to all else. With the new Turbo exterior package, the Macan hits the road equipped with exclusive 21-inch 911 Turbo Design wheels—highly polished on the outside, black (high-gloss) paint finish on the inside—including wheel centers with full-color Porsche Crest.

The LED headlights with Porsche Dynamic Light System Plus (PDLS Plus) and tinted LED taillights draw gazes whatever the time of day. Other distinguishing design options include SportDesign exterior mirrors in the exterior color of the vehicle, or the side blades, side window trims and intake grilles finished in black (high-gloss). Other head-turners are the rear fascia in black (high-gloss) and the rear spoiler in exterior color.

The Sport exhaust system, featuring Sport tailpipes in black, will lend your Macan Turbo with an even more powerful sound.

Turbo interior package
When you enhance beauty, you eventually elicit exclusivity. That’s proven by the new Turbo interior package in Garnet Red or Rhodium Silver. The full leather interior in black, with the use of Alcantara® on the seat centers, center console armrest and door armrests, emphasizes this stunning appearance further still. And it underlines something else: we take beauty literally. The two available contrasting colors of Rhodium Silver and Garnet Red capture the attention and create visual accents—for example, on the headrests with “Turbo” logo, the seat belts and all the deviated stitching. The exquisite design is completed by the Carbon Fiber interior package and illuminated door sill guards, featuring the “Macan Turbo” logo—also in Carbon Fiber. Together, they make one thing crystal clear: such an exclusive driving feel is worthy of an exclusive interior ambience.

Turbo exterior package
Turbo interior package
Life isn’t meant to be lived in neutral. It drives us on to new things day in, day out. It isn’t about getting from A to B, but pushing oneself to the limit, taking everything on board. And being part of the race—24 hours of each new day.

Made for the challenge, the highly efficient 3.0-liter twin-turbo V6 engine produces 360 horsepower and 369 lb.-ft. torque. And acceleration? The figures speak for themselves: 0 to 60 mph in a matter of 5.0 seconds. Not to mention the top track speed of 159 mph. The gearshifts of 7-speed Porsche Doppelkupplung (PDK), as standard, are equally sporty. And the Sport exhaust system with black Sport tailpipes delivers a particularly aggressive sound.

Air Suspension with Porsche Active Suspension Management is standard for Macan GTS and sits 10 mm lower than other Macan models equipped with air suspension. It regulates damping force based on current road conditions and driving style, maintaining an intimate and intense relationship with the road. A typical trait for the Macan GTS.

The Macan GTS conveys an even lower and muscular stance when equipped with the dynamic SportDesign package. The imposing SportDesign front fascia, featuring matte black air intake grilles and side skirts reinforce the dynamic appearance. As do the side blades in matte black, a finish reserved exclusively for the Macan GTS. A genuine top-class athlete, we might say. And that status is reaffirmed by its 20-inch RS Spyder Design wheels in Satin Black.

As sporty as they are exclusive, they simply can’t wait to blaze the asphalt. Visual accents are added by the Bi-Xenon™ headlights in black, including Porsche Dynamic Light System (PDLS) and the tinted LED taillights. Even the black “GTS” logo on the rear makes something unmistakably clear: the Macan GTS accepts no compromise.

Exquisite materials, such as leather and Alcantara®, and the latest version of Porsche Communication Management (PCM) system add the final touches to a sports car masterpiece promising to excite pure fascination. Right down the line.

If we had to express the word sportiness in just three letters, our answer would forever be: GTS.
Macan GTS: 369 lb-ft. at 1650–4000 rpm, 360 horsepower at 6000 rpm

For more on personalization, please refer to page 103 onwards.
The “5” principle has long been a tradition as far as Porsche cars are concerned. It represents an especially sporty interpretation of a particular idea. It’s a promise of spine-tingling thrills—and omits anything superfluous to the spirit of sporty driving.

High performance, on the other hand, is something that the Macan S would never do without. Its 3.0-liter twin-turbo V6 engine generates 340 horsepower and helps it to sprint from 0 to 60 mph in only 5.2 seconds. Top track speed is 156 mph. Figures to raise the hairs on the neck of any sports car enthusiast.

The Macan S is equipped with 19” Macan Design wheels and silver-colored brake calipers. This high-performance athlete is also recognizable by the “Macan S” logo on the rear hatch—and on the door sills in aluminum.

Inside, sportiness is epitomized by the tachometer with silver-colored dial.

The sporty spirit can be intensified even further with a range of options such as the Sport Chrono Package. It includes the Sport Plus button, one press of which tunes the engine for an even sharper response. The chassis and transmission also adapt their setup to Sport Plus mode. The package additionally comprises a stopwatch and the Launch Control function for the fastest possible acceleration from a standing start, e.g., on a race track. The latest Porsche Communication Management (PCM) system, integrated as standard, is supplemented by a performance display showing lap times and other essential driving stats.

The Macan S. For an unadulterated encounter with intensity.
Selection of personalization options
- Air suspension with Porsche Active Suspension Management (PASM)
- Porsche Torque Vectoring Plus (PTV Plus)
- Porsche Ceramic Composite Brake (PCCB)
- Sport Chrono Package
- Wheels up to 21 inches
- Side blades in Carbon Fiber
- Bi-Xenon™ headlights with Porsche Dynamic Light System (PDLS)
- LED headlights with Porsche Dynamic Light System Plus (PDLS Plus)
- 18-way Adaptive Sport Seats with comfort memory package
- Porsche Communication Management (PCM) system with navigation module
- Connect module with Porsche Car Connect and Apple CarPlay™
- Connect Plus module with telephone module, wireless Internet access, real-time traffic information, Apple CarPlay™, Google™ Earth, and Google™ Street View
- Bose® Surround Sound System

Drive concept
- 3.0-liter twin-turbo V6 engine
- 340 horsepower at 5500–6500 rpm
- Maximum torque: 339 lb.-ft. at 1450–5000 rpm
- Acceleration from 0 to 60 mph: 5.2 seconds
- Top track speed: 156 mph
- Direct fuel injection (DFI)
- VarioCam Plus
- Auto Start Stop function

For more on personalization, please refer to page 103 onwards.
Some of us focus on leisure time, while for others family comes first. The Macan is prepared for the many challenges of life. Under the hood, we see a 2-liter 4-cylinder engine—but we still claim that this is a sports car! Of course we do. It is a Porsche after all. With 252 horsepower and acceleration from 0 to 60 mph in 6.3 seconds, the new Macan simply packs a punch. Efficiency is no exception.

Other features include 18-inch Macan wheels and black brake calipers. For an individual look, you can choose from a wide range of colors and finishes. The interior is ergonomic and multifunctional, and typical of a sports car. The driving experience inside the Macan can be intensified even further with features such as the new version of Porsche Communication Management (PCM) system—your control center for audio and telephone functions. Thanks to mobile phone integration, you can connect directly via Bluetooth®. In response to hand movement, the integral proximity sensor activates the screen to display the relevant menu contents, which you can then operate intuitively using multi-touch gestures. Other options to help you face various challenges include the navigation module, the Connect Plus module, seat heating in the front and rear, child seats, and loadspace management systems.

The new Macan. Built for the most exciting terrain in life: new ground.

• Bi-Xenon® headlights with Porsche Dynamic Light System (PDL5)
• LED headlights with Porsche Dynamic Light System Plus (PDL5 Plus)
• Panoramic roof system
• Driver memory package
• Seat heating (front)
• New Porsche Communication Management (PCM) system with navigation module
• Connect module with Porsche Car Connect and Apple CarPlay®
• Connect Plus module with telephone module, wireless Internet access, real-time traffic information, Apple CarPlay®, Google® Earth, and Google® Street View
• 6-disc CD/DVD changer
Drive concept
• 2.0-liter inline 4-cylinder engine
• 252 horsepower at 5000-6800 rpm
• Maximum torque: 273 lb-ft. at 1600-4500 rpm
• Acceleration from 0 to 60 mph: 6.3 seconds
• Top track speed: 142 mph
• Direct fuel injection (DFI)
• Auto Start Stop function
For more on personalization, please refer to page 103 onwards.
There is much to motivate us. But what actually moves us?

It's a question we've been answering since 1948 with "sports car technology".

Dynamics
Even a life of moderation can be lived with intensity.

Drive.

VarioCam
The intake and exhaust camshafts in all Macan models are each equipped with a fully variable vane-cell controller for continuous timing adjustments. This helps deliver high specific power and high torque—even at low engine speeds—and, above all, reduced fuel consumption and low emissions.

VarioCam Plus
With their twin-turbo V6 engines, the Macan Turbo, Macan GTS and Macan S are additionally equipped with VarioCam Plus. This system switches the lift of the intake valves, resulting in instant acceleration and smooth engine running performance.

Coasting mode
The coasting function enables you to save even more fuel where the situation allows. The engine is decoupled from the transmission, which avoids the deceleration caused by engine braking. In this way, the vehicle makes optimal use of its own momentum and is able to coast for longer distances. This has real benefits for fuel consumption without any impact on comfort or sporty performance. Standard in all Macan models.

Auto Start Stop function
To improve fuel economy, the Auto Start Stop function switches off the engine when you are coming to a stop at traffic lights, for example. Standard in all Macan models.
Direct fuel injection (DFI)

With millisecond precision, DFI injects fuel at up to 2900 psi directly into the combustion chamber by means of electromagnetically actuated injection valves. The spray and cone angles have been optimized for torque, power output, fuel consumption and emissions by enabling a homogeneous distribution of the air/fuel mixture and, therefore, effective combustion. DFI improves the internal cooling of the combustion chamber by having the mixture prepared directly in the cylinder. This allows for a higher compression ratio, which helps deliver greater power output at the same time as enhanced engine efficiency.

Thermal management

Engine cooling is prevented during the initial stages of a cold start so that the engine reaches its optimal operating temperature faster. This means it can begin working at high efficiency sooner, thereby consuming less fuel.

Active aerodynamics

The active radiator baffles open the air-intake flaps only as needed. Whenever the cooling requirement is low, such as on relaxed drives, the radiator baffles close. Aerodynamics are enhanced, which helps to improve fuel economy. If, for example, a sporty driving style is adopted and the demand for power increases, the air-intake flaps will open and let in the necessary amount of cooling air for increased driving performance.

Oil supply

The integrated dry-sump lubrication of the V6 gasoline engines guarantees a reliable supply of oil in all driving situations. The oil reservoir is located directly inside the engine, which saves on space and weight. An electronically controlled oil pump provides the correct amount of oil as and when needed. Optimized for sporty driving, it ensures optimal engine lubrication even in extreme situations.
Exhaust turbocharging

The twin-turbo V6 engines are equipped with two turbochargers arranged in parallel—one for each cylinder bank. Intake air is compressed and then fed to the engine via the respective intercoolers. This cooling process achieves high cylinder charge and low component temperatures.

Electrical system recuperation

To enhance efficiency, the electrical system in the Macan models is recharged on demand during engine overrun phases. Fuel consumption is thereby reduced, while the full power output of the engine is made available for acceleration phases. You won’t notice anything of the process itself, except for the results: optimal power and torque with lower fuel consumption and CO₂ emissions.

Sport button

The Sport button, which is fitted as standard, allows you to select a setup that favors either comfort or sporty performance. When the button is pressed, the electronic engine management system switches the engine mapping to offer an even sharper response and more direct engine dynamics.

Sport tailpipes

Sport tailpipes are available for your Macan on request. The twin dual-tube tailpipes are specially designed and feature a highly polished chrome-plated stainless steel finish, also available in chrome-plated black. A sporty statement that is visually unmistakable.

Standard in the Macan GTS. Optional for all other models.

Sport exhaust system

The Sport exhaust system delivers an even more resonant sound. The Sport tailpipes in chrome-plated stainless steel—available in a choice of silver color or black—are a treat for both the eyes and the ears.

Standard in the Macan GTS. Optional for all other models.

The love of the road inspires some remarkably intense relationships.

Transmission.

Porsche Doppelkupplung (PDK) 7-speed PDK, standard in the Macan models and featuring both a manual and an automatic mode, offers extremely fast gear changes with no interruption in the flow of power—as well as excellent driving dynamics and a high degree of efficiency.

The principle of PDK is that whenever a particular gear is engaged, the next gear is already preselected. As a result, gear changes take place within milliseconds.

Automatic mode is optimized for fuel economy. This means that PDK is able to offer not only a sporty, agile driving feel, but also increased efficiency.

Would you rather change gears manually? You can do this using the two gearshift paddles on the multifunction Sport steering wheel, standard, or using the PDK gear selector.

In conjunction with the optional Sport Chrono Package, the shift times of PDK become even shorter, the gear changes even sportier. Additional gearshift strategies are also available—for uncompromising driving pleasure.

Porsche Traction Management (PTM) The tremendous dynamic performance of the Macan is thanks in part to the Porsche Traction Management (PTM) active all-wheel drive system. It comprises an electronic and map-controlled multi-plate clutch, the automatic brake differential (ABD) and anti-slip regulation (ASR). The electronically controlled multi-plate clutch regulates the distribution of drive force between the rear axle and the front axle. Driving conditions are constantly monitored to enable a precise and lightning-quick response to a variety of situations.

Sensors continuously check, among other variables, the rotation speeds of all four wheels, the longitudinal and lateral acceleration of the vehicle, and the steering angle. If, for example, the rear wheels threaten to spin under acceleration, a greater proportion of drive force is distributed to the front by a more powerful engagement of the multiplate clutch. In addition, ASR reduces wheel slip. In corners, the drive force sent to the front wheels is regulated for optimal lateral stability.

In short, PTM transfers the incredible sportiness of the Macan to the road. Behind the wheel, you can feel what it’s like to be driving a genuine sports car: traction, outstanding steering behavior, superior handling, and, of course, the excellent dynamics typical of any Porsche.
Weight savings
Those who enjoy life are bound to be more light-hearted than others. The axles of the Macan models are characterised by purposeful lightweight construction with use of lightweight, stable materials. The results are excellent driving dynamics, high comfort levels and low fuel consumption.

Suspension tuning
The suspension is tuned for sporty performance by default—typically Porsche. With a series of optional systems ranging from uncompromisingly sporty to comfortable sport, you can adapt the suspension tuning of the Macan perfectly to your needs.

Sport suspension
The steel spring suspension is standard in the Macan, Macan S, and Turbo models. Not only does it fulfill exacting requirements for performance and driving pleasure, it contributes to enhanced driving dynamics, lower fuel consumption and increased ride comfort.

Air suspension
For a high level of comfort and tremendous dynamic performance, you have the option of an air suspension with PASM. With this setup, the car is 15 mm lower than with the Sport suspension. Macan GTS is an additional 10 mm lower than the Macan S with air suspension. The effect? A generous spread of ride comfort and dynamic performance. The self-leveling function helps to keep the ride height constant. Standard in the Macan GTS. Optional for all other Macan models.

Available on request, a ride-height adjustment capability enables you to switch the ground clearance to three levels: Terrain Level, Normal Level and Low Level. At Terrain Level, the car is 40 mm above Normal Level; at Low Level, 10 mm below it. Loading Level is especially practical: from Normal Level, the rear end of the body lowers 40 mm to make it easier to load the car. This function is operated by means of a button in the luggage compartment.

1. Terrain Level +40 mm
2. Normal Level +0 mm
3. Low Level –10 mm
4. Loading Level –40 mm

Porsche Active Suspension Management (PASM)
PASM is an electronic damping control system. It actively and continuously adjusts damping force based on current road conditions and driving style. When a car is driven off-road or assertively in a manner that demands hard acceleration and braking, the forces acting on the car will normally induce perceptible body movements. PASM intervenes in these situations to reduce them. You can select from three modes: Comfort, Sport, and Sport Plus.
PASM is permanently active, adapting automatically to the current driving situation with the aim of increasing driving stability and comfort. Standard in the Macan Turbo and GTS. Optional for the Macan S and Macan. Standard in the Macan GTS. Optional for all other Macan models.

Dynamics | Chassis

How should such intensity be brought to the road? Our engineers have some specific ideas.

Chassis.

Porsche Active Suspension Management (PASM)
Off-road button
Would you like to try roads that aren’t actually there? A button on the center console sets your Macan in Off-road mode. All relevant systems switch to a traction-optimized program for off-road terrain. The optional air suspension with PASM automatically adjusts to Terrain Level. In addition, optional Porsche Torque Vectoring Plus (PTV Plus) and Porsche Stability Management (PSM)—integrated as standard—optimally adapt their setup for off-road use, delivering improved driveability and safety.

Porsche Traction Management (PTM), which is also standard, provides a fully variable distribution of drive force between the front and rear axles—up to 100 percent if necessary. This delivers an increase in traction and driving safety.

Porsche Hill Control (PHC)
A button on the center console enables you to activate Porsche Hill Control (PHC), which keeps your speed constant on downhill gradients. You can set any speed between 2 and 19 mph.

Steering
The steering has been engineered for sporty and immediate handling. The tuning of the electromechanical steering system is what makes the Macan models so extraordinarily agile. It also contributes to low fuel consumption. As there is no hydraulic system constantly drawing power, energy is consumed only when the steering is turned.

Power Steering Plus
Power Steering Plus is a speed-sensitive power steering system. At high speeds, the steering firms up and responds with greater precision, while steering comfort remains outstanding. At low speeds, the steering ratio adjusts for easy maneuvering and parking.

In exceptional circumstances, even a Porsche doesn’t seem out of place.
Life can’t be truly intense without some twists and turns.

Porsche Torque Vectoring Plus (PTV Plus)

Sports car makers adore corners. With our technologies, we are forever fanning the flames of the relationship. PTV Plus is an optional system for enhancing both driving dynamics and stability.

Operating in conjunction with an electronically regulated rear differential lock, it works by varying the torque distribution to the rear wheels. When the car is driven into a corner, moderate brake pressure is applied to the inside rear wheel as the situation demands. Consequently, a greater amount of drive force is distributed to the outside rear wheel, inducing an additional rotational pulse (yaw movement) around the vehicle’s vertical axis. The effect is a direct and sporty steering action. And tremendous driving pleasure at every twist and turn.

At low and medium vehicle speeds, PTV Plus significantly increases agility and steering precision. At high speeds on the straight, and in last corners where the wheels threaten to spin, the electronically controlled rear differential lock provides added driving stability. Stability is also improved on road surfaces with varying grip as well as in the wet and snow.

Optional for all Macan models.

Sport Chrono Package

The Sport Chrono Package adds a stopwatch with an analog and a digital display to the cockpit. The performance display in PCM lets you view a range of driving stats, including your total driving time, current lap distance and lap times recorded so far.

The center console also comes equipped with the Sport Plus button, which is used to activate Sport Plus mode. In this mode, the engine becomes even more responsive and the rev limiter is adjusted to a harder setting. Porsche Traction Management (PTM) is now tuned for even sportier performance. For cars with Porsche Active Suspension Management (PASM), Sport Plus mode results in harder damping and more direct steering. In addition, the trigger threshold for PSM is raised for increased longitudinal and lateral dynamics. The shift times of PDK, standard, become even shorter, the gear changes even sportier. The optional air suspension automatically drops to Low Level. Launch Control is primed to deliver optimal acceleration from a standing start.

Optional for all Macan models.
The wheel was invented 5000 years ago. Seems only now it’s hitting the big time.

Staggered tires
As with any genuine sports car, the Macan is equipped with wider tires at the rear—just like the 911. The visual impact is not the only effect: the larger footprint at the rear improves both stability and traction and also enhances agility for intensified contact with the road.

Wheels
For the wheels, too, everything revolves around sporty performance—and style. Accordingly, the Macan serves up some impressive numbers: the wheels look exceptionally large, with optional sizes up to 21 inches.

What they all have in common is their aluminum construction, which saves weight and increases agility. That’s particularly true of the forged 21-inch wheels.

The Macan is equipped, as standard, with 18-inch Macan wheels, the Macan S with 19-inch Macan Design wheels.

Tires
All tires have been optimized for driving performance, handling, rolling resistance and weight. Wheel sizes between 18-inch and 20-inch come with all-season tires as standard. High-performance summer tires are available as a no-cost option. All 21-inch wheels come with summer tires as standard.

Tire Pressure Monitoring System (TPMS)
Tire Pressure Monitoring System sends warnings to the onboard computer’s display screen in the event of low tire pressure or a gradual or sudden loss of pressure. The multifunction display in the instrument cluster gives you a quick and convenient way to check your tire pressure.

Dynamics
21-inch 911 Turbo Design wheel highly polished on the outside, black (high-gloss) on the inside—exclusive to the Macan Turbo with Turbo exterior package

Exclusive
21-inch Sport Classic wheel painted in black (high-gloss)

20-inch RS Spyder Design wheel in Satin Black—exclusive to the Macan GTS
Life is good. To keep it that way, you need protection.
With a sense of balance between fun and responsibility.
Brakes
At Porsche, we also set high standards for braking performance. So it goes without saying that our brake systems are super-sized and adapted to the high power output of the engine.

The 4C Macan model is equipped with 4-piston aluminum monobloc fixed brake calipers at the front. All other models get 6-piston fronts. Rear calipers are the same across all models. The brake discs are internally vented for consistently high braking power even during continuous use.

To cope with the performance capability of the Macan models, the brake discs fitted to the front axle are up to 360 mm in diameter.

Porsche Ceramic Composite Brake (PCCB)
As an option, you can have your Macan equipped with the track-proven Porsche Ceramic Composite Brake (PCCB).

The cross-drilled ceramic brake discs have a diameter of 396 mm at the front axle and a thickness of 38 mm. At the rear, they are 370 mm in diameter and 30 mm thick.

Their low thermal expansion prevents deformation under heavy braking. Furthermore, the ceramic brake discs are totally resistant to corrosion and offer more favorable noise-damping properties.

The key advantage is that the brake discs are approximately 50 percent lighter than standard discs of similar design and size. Enhanced performance and fuel economy are among the most notable benefits along with a major reduction in unsprung and rotating masses. The results are improved handling, better roadholding and increased comfort.

Porsche Stability Management (PSM)
PSM is an electronic control system that helps maintain stability—and increases driving safety—even at the limits of sporty performance.

Sensors continuously monitor driving direction, speed, yaw velocity and lateral acceleration. PSM actively intervenes to stabilize the vehicle when necessary by strategically applying the brakes at individual wheels. That’s not all. If the driver suddenly releases the accelerator pedal, PSM primes the brake system for a higher state of readiness. Maximum braking power is therefore achieved much sooner. Integral ABS is optimized for short braking distances.

You aren’t usually so quick to brake.
Airbags
All Macan models are equipped, as standard, with full-size airbags for the driver and front passenger. These are supplemented by the Porsche Side Impact Protection (POSIP) system.

It comprises side airbags in the front seats, curtain airbags along the entire roof frame and the side windows from the A-pillar to the C-pillar, and side impact protection elements in the doors. Side airbags are standard for the rear compartment.

Two auxiliary sensors in the bumper help detect frontal collisions. A cluster of acceleration and yaw rate sensors detects a threat of rollover and triggers the curtain airbags and seat belt pretensioners.

Engineered body design
The use of ultra- and super-high-strength micro-alloyed steels makes a crucial contribution to safety and, at the same time, purposefully encapsulates the principle of lightweight construction.

The forces exerted in the event of a frontal impact are dispersed by a system of longitudinal and transverse members. Reinforcements in ultra-high-strength steel provide additional protection for occupants in the event of a side impact.

The system also uses multiphase steels. High-strength and clearly defined deformability are two qualities that they have in common. The passenger cell is a cage formed of high-tech steels and offers a high level of protection.
Efficiency

The basic premise of any Porsche is power. It’s been that way ever since 1948. But there has always been another principle: efficiency. We remain committed to both, and we always will.

In addition to our pursuit of efficient engine technologies, such as the turbochargers used across the model range, we routinely rely on innovative, lightweight materials. We are constantly developing our production techniques and functionalities, and as we do so, we are continuously refining our concepts.

How does this benefit you as the driver? Greater agility with increased dynamic performance—and lower fuel consumption. Now that’s efficiency.

Exhaust emissions

The Macan once again demonstrates that even high-performance sports cars can achieve comparatively moderate emission values. The state-of-the-art engines of the Macan model range reach their optimal operating temperature soon after start-up, thanks to rapid heating of the catalytic converter system. Emissions are thereby reduced, while tires optimized for low rolling resistance play their part by reducing fuel consumption.

All models are equipped with stereo Lambda control circuits. These are used by the electronic engine management to determine the optimal amount of fuel for effective emission control.

Fuel and fuel consumption

Doing more with comparatively less—another philosophy that the Macan models live and breathe. The gasoline models are designed to operate on fuels with an ethanol content of up to 10 percent. Ethanol has a positive impact on the CO₂ balance because this biofuel is manufactured from plants that absorb CO₂ from the atmosphere in order to grow.

Environment

Living for today, in the here and now. But always caring about tomorrow.

Environment.
Fuel system
Even the emissions of the fuel system itself are minimized for the protection of the environment. Evaporative emissions are significantly reduced by the returnless supply system. Vapor-carrying lines are made from multilayered plastic, while a high-capacity active carbon filter and the fuel tank also feature a multilayered construction in order to make everything as impermeable as possible.

Noise reduction
The characteristic Porsche sound may drive our passion, but acoustics is yet another area in which we continuously strive for optimization. Stiff components and lightweight, temperature-stable materials minimize play between parts and therefore mechanical noise. Voluminous silencers and air induction systems reduce noise levels further—and that’s over the course of the entire service life.

In collaboration with tire manufacturers, we are managing to reduce the rolling noise of tires, while aerodynamic refinements keep wind noise as low as possible. What’s left? The Porsche sound, pure and simple.

Maintenance
Long-life and hard-wearing materials reduce maintenance items to a minimum. At the time of an oil filter change, for example, only the recycling-friendly paper insert needs to be exchanged and not the entire housing.

Moving parts are adjusted automatically, e.g., by hydraulic valve clearance compensation.

The use of individual ignition coils in gasoline engines makes the entire ignition system, except for the spark plugs, wear- and maintenance-free. Advantage for you! If it doesn’t need replacing, it doesn’t need to be disposed of. Not only does this support the responsible handling of resources and a caring attitude towards the environment, it saves you time and money.

The maintenance intervals of the Macan models nevertheless depend on various factors, including the local fuel grade. For exact information, please refer to the price list published in your country or consult your authorized Porsche dealer.

Materials and recycling
A Porsche is a source of long-lasting pleasure for our customers and a refreshing change for their environment. This Porsche principle can be summed up in one word: sustainability.

Here’s just one example: the exhaust system of the Macan models is made from extremely corrosion-resistant stainless steel—and purposefully manufactured on the principles of lightweight construction. In addition, our cars are free from CFCs and parts manufactured with the use of CFCs. In all, they are over 95 percent recoverable. Naturally, all statutory recycling requirements are fulfilled. The labeling of materials facilitates future sorting for excellent recycling.

On the subject of recycling, there is plenty of time before it is even needed. Two-thirds of all Porsche cars ever built are still being driven today. What better way to conserve resources?
Life is about challenges: what we want from life—and what everyday life wants from us. So it’s nice to be prepared for every eventuality.
Nothing in life should remain unseen.

LED headlights with Porsche Dynamic Light System Plus (PDLS Plus)
Available as an option, new PDLS Plus LED headlights are distinguished by their unmistakable look, characterized by style-defining four-point LED spotlights. The luminous power of the headlights helps provide optimal illumination of the road at all times.

The Porsche Dynamic Light System Plus (PDLS Plus) also includes dynamic high beam control for better illumination of your surroundings, so you see what’s going on all around you. The dynamic cornering light function orients the main headlights towards the inside of a bend, while the static cornering lights activate the auxiliary headlights in order to illuminate more of the road in tight bends and turns.

Daytime running lights
Daytime running lights are standard on all models. The light source is four LED spotlights in each. The benefit is clear: driving becomes a safer experience.
Bi-Xenon™ headlights with Porsche Dynamic Light System (PDLS)
The Bi-Xenon™ headlights feature automatic and dynamic range control, which provides uniform illumination of the road whether low or high beam is selected. The dynamic cornering light function orients the headlights towards the inside corner based on the steering angle and road speed. The static cornering lights activate the auxiliary headlights so as to light up more of the road at tight bends and turns. Put simply, a greater part of the road ahead is illuminated the moment you enter a bend.

Ultra-exclusive accents are added by the optionally available Bi-Xenon™ headlights in black with PDLS. On the Macan GTS, the inner trim is also finished in black.

LED taillights
The three-dimensional design of the LED taillights pays homage to the 918 Spyder super sports car and lends an impressive appearance of depth. At the same time, they are especially responsive and powerful. The third brake light is integrated in the roof spoiler. What’s more, the LED taillights are also available with tinted lenses: standard on the Macan GTS as part of the Turbo exterior package, otherwise optional for every Macan model. A sporty accent to leave a lasting impression.
Interior architecture

Five doors. Five seats. Excellent everyday practicality—and an elevated sitting position. That’s what you can expect of an SUV. Now let’s consider what you can expect of a Porsche: sports car sensations.

You get in—and find the ignition switch closest to the door. It’s typically Porsche, and has been since 1948. An old motorsport tradition.

The interior architecture integrates you perfectly into the vehicle. This is exemplified by the three-dimensional arrangement of the controls and the ascending center console with control buttons for the most important comfort functions. The layout emulates that of the Carrera GT—it’s as if you’re sitting in a sports car.

The multifunction Sport steering wheel with 918 Spyder design provides the ideal hands-on experience. Its appearance is futuristic and its design highly ergonomic. Gearshift paddles as well as multifunction buttons for telephone, radio, and onboard computer offer high levels of user comfort. Steering wheel heating is available as an option.

Sports car genes are also inherent in the three round instruments. The tachometer is positioned in the center, exactly where it belongs in a sports car. In this way, you can see all the essentials at a glance when you’re on the move—and keep up to speed with all relevant information.

Lean back? Yes. Put your feet up? No.

Comfort.

The multifunction Sport steering wheel with 918 Spyder design provides the ideal hands-on experience. Its appearance is futuristic and its design highly ergonomic. Take the high-resolution 4.8-inch color screen in the instrument cluster as an example. It displays messages from the onboard computer and—in conjunction with the new version of PCM with optional navigation module—shows the map of the navigation system.

The seats offer racing-style support and a high degree of seating comfort. In cars with the driver memory package or comfort memory package, you can store personalized seat, steering wheel and exterior mirror settings. Your car will then automatically adapt to you. In the Macan GTS, exclusive eight-way Sport seats convey the thrilling feel typical of a genuine sports car, while “GTS” logos embroidered on the headrests catch the eye. Even more exclusive: the Turbo interior package comes with a full leather interior in black, selected items in Alcantara®, embroidered “Turbo” logos and precisely defined contrasts.

The use of exquisite materials such as leather brings exclusivity to ordinary life. In the Macan Turbo, the adaptive Sport seats with 18-way adjustment are completely upholstered in leather. On request, you can refine even more interior features of your Macan with Alcantara®, leather, wood, Carbon Fiber or aluminum.

Standard onboard features include three-zone automatic climate control as well as remote central locking. On principle, all controls are ergonomically arranged for speedy access to desired functions.

Practicality is also assured by storage solutions in the front and rear doors. Even large bottles are accommodated. The large luggage compartment offers a loading capacity of 17.7 cu. ft. The rear bench seat has a split-folding ratio of 40:20:40. With the seats fully folded, available capacity increases to 53 cu. ft.

For more on personalization, please refer to page 103 onwards.
Power seats
Power seats with electric eight-way adjustment on the driver’s and passenger side are both ideal for relaxed motoring and practical to operate. Seat height, fore/aft position, cushion angle and backrest angle are all adjustable. Seat centers in Alcantara® create a sporty accent. Standard in the Macan S and Macan.

8-way Sport Seats
Exclusive eight-way Sport seats provide a rather sportier alternative, perfectly emulating the feel of an out-and-out sports car. The 8-way electric adjustment capability on the driver’s and front passenger side includes seat height, fore/aft position, cushion angle and backrest angle. Standard and exclusive to the Macan GTS.

With the GTS interior package available for the Macan GTS, the seat centers are upholstered in Alcantara®—in true motorsport style. Contrasting stitching in Carmine Red or Rhodium Silver creates an even sportier appearance. The “GTS” logo in a contrasting color embroidered on the headrests completes the profile of a top-class athlete. Optional and exclusive to the Macan GTS.

14-way Power Seats with comfort memory
Would you like generous seating comfort for both seats in the front? To supplement the eight adjustable features of the comfort seats, the power seats with comfort memory package offer additional adjustment capabilities, namely the lumbar support, seat cushion length and steering column. Personalized settings, such as driver and front passenger seat positions, including lumbar support, can be stored—as can steering wheel and exterior mirror positions. Standard in the Macan Turbo. Optional for all other Macan models.

18-way Adaptive Sport Seats with comfort memory
The 18-way electric adjustment, the seats can be optionally adapted to meet your needs in terms of seat height, cushion and backrest angle, cushion length, fore/aft adjustment and four-way lumbar support. The steering column is also electrically adjustable. The following functions can be memorized: driver and front passenger seat positions, including lumbar support, and steering wheel and exterior mirror positions. Standard in the Macan Turbo. Optional for all other Macan models.

Exclusive to the Turbo interior package: contrasts in Garnet Red or Rhodium Silver and selected items in Alcantara®. And, adding further accents, the “Turbo” logo embroidered on the headrests.

Seat/steering wheel heating
For all seat designs, seat heating is available for the front as a package for the front and rear. Steering wheel heating, which keeps the rim at a pleasant temperature, is available as an option. Standard in the Macan Turbo. Optional for all other Macan models.

Seat ventilation
Optional seat ventilation for the front provides even greater comfort on long journeys and in the summer. (Only available in conjunction with seat heating, comfort memory package or Adaptive Sport Seats.) Not compatible with seat centers in Alcantara®.

Seat heating and venting
Multitasking | Comfort

With 30 000 racing victories behind us, we can afford to ease back a little.
Rear seats
The rear bench seat has a three-way split-folding ratio—and folds down fully if required. The versatile center seat doubles as a through-loading facility for long cargo items and for the optional ski bag. It additionally contains the folding armrest, which features two extra cupholders. Operation of the rear bench seat is totally straightforward: release, fold—done.

Child seats
The Porsche Tequipment range of aftermarket accessories features a collection of specially designed Porsche child seats. Engineered to meet strict safety standards, they have been tested and approved specifically for Porsche cars. As a result, they provide protection and comfort to passengers up to 12 years of age. The fabrics are breathable, hypoallergenic and easy to clean. The cover is removable and washable.

For increased safety, Porsche Baby Seat and Porsche Junior Seat LATCH have an independent five-point belt system with central belt length adjustment.

LATCH mounting points are available on the outer rear seats as standard, while the additional top-tether belt attachment is a standard feature on all rear seats.

1 LATCH is a secure and user-friendly child seat mounting system that rigidly attaches the child seat to the vehicle.
New Porsche Communication Management (PCM) system

Infotainment for a new generation: the latest version of Porsche Communication Management (PCM) system—integrated as standard, optionally with navigation module—is your control center for audio, navigation and communication functions.

PCM is operated by means of the new 7-inch multi-touchscreen or multifunction Sport steering wheel. Alternatively, you can use the conventional rotary pushbutton controls. In response to hand movement, the integral proximity sensor activates the screen to display the relevant menu contents, which you can then operate easily using multi-touch gestures. With its high-quality glass surface, PCM is the aesthetically perfect addition to the center console.

Infotainment begins the moment you connect and charge your smartphone or hook up any other audio source of your choice. Simply use the USB interface or the auxiliary input in the center console.

Your iPod® or USB stick can also be operated conveniently via PCM or the multifunction Sport steering wheel. What’s more, the USB connection allows you to download data from the performance display of the optional Sport Chrono Package or from the optional electronic logbook. For your personal music collection, the CD/DVD drive is supplemented by an internal hard drive (“jukebox”) and two SD card readers.

With mobile phone preparation integrated as standard, a Bluetooth® connection can be established automatically with smartphones that support the Handsfree Profile (HFP). This means that you can leave your smartphone tucked away, and you can use PCM to operate its basic functions. The GSM connection is always established through the antenna of the smartphone.

Infotainment highlights at a glance:

- Latest version of Porsche Communication Management (PCM) system, including mobile phone preparation and Sound Package Plus
- Optional navigation module, including voice control system
- Optional Connect module with Porsche Car Connect and Apple CarPlay™
- Optional Connect Plus module, including telephone module, real-time traffic information, Google® Earth, Google® Street View, Porsche Connect app, and wireless Internet access

Our contribution to the information age: acceleration.

Multitasking | Comfort

Real-time traffic information and Google® Earth screen
Connect module
The optional Connect module makes the optimal connection between your smartphone and your Macan. Porsche CarConnect allows you to control certain functions of your Macan via your smartphone or Apple Watch®. Apple CarPlay™ lets you use your iPhone® even when you’re on the move.

Connect Plus module
In conjunction with the PCM including navigation module, the Connect Plus module is offered as an alternative, upgraded option. It comes with online navigation (with real-time traffic information), Apple CarPlay™, wireless Internet access and a convenient voice control system (available at no extra cost) for operating PCM or your audio source.

The LTE telephone module offers convenience, excellent reception and optimized voice quality. You can simply insert your SIM card into the card reader and make calls using the hands-free facility. For even more convenience, the Bluetooth® capability of a mobile phone can be used to make calls via the SIM Access Profile (SAP). Once the link has been established automatically, the mobile phone’s antenna is switched off to conserve battery charge and the phone operates via the car antenna.

Online navigation
The Connect Plus module delivers real-time traffic information to the Macan for the first time. Now you can find out even before you set off which routes are best avoided if you wish to arrive at your destination sooner. Throughout the journey, the optimal route is dynamically recalculated based on regular updating of traffic data.

The online navigation feature of the Connect Plus module also includes Google® Street View™ and Google® Earth™. Their 360° views and satellite imagery provide helpful visual cues on the way to your destination.

Apple CarPlay™
With Apple CarPlay™, you can use the apps on your iPhone® from the driver’s seat—via PCM or optional voice control. The voice control system can also be used to make phone calls. And with Siri®, the Apple® voice recognition interface, you can compose text messages, have incoming SMS read out loud and send your replies—or you can listen to music and podcasts, all while keeping your full concentration on the road.

Wireless Internet access
Wireless Internet access gives you in-car online access from WiFi-enabled client devices (e.g., tablets, laptops, smartphones or netbooks), simultaneously if necessary.

The services real-time traffic information, Google Street View and Google Earth include an initial free subscription period of at least 12 months. Please visit www.porscheusa.com/connect if you wish to continue usage (subject to change after this period). A: data-enabled SIM card and a separate, valid subscription to a mobile network provider (subject to charge) are required for use of these services and wireless Internet access.

For further information on the availability of Connect Plus and availability in your area, please visit www.porscheusa.com/connect or consult your authorized Porsche dealer.
Porsche Connect app

The Porsche Connect app for your smartphone (available free of charge from Apple® iTunes and Google® Play Store) is designed to interact with the Connect Plus module. As soon as your smartphone is connected to the vehicle, you can use PCM with navigation module to gain easy access to your calendar events, addresses and any destinations saved in the app. In this way, you can dial stored telephone numbers directly and use addresses from your calendar events as your navigation destination.

That’s not all. The music streaming function gives you access to millions of music tracks.

Porsche Connect Sports car driving has always relied on the relationship between driver and vehicle being as intimate as possible. Thanks to Porsche Connect, this relationship becomes even more intimate—no matter how far from your Porsche you might be.

As an integral feature of the Connect or Connect Plus module, Porsche Car Connect offers a host of information and functions for accessing your Macan remotely. Carfinder, for example, displays the shortest route from your current position to your car’s parked location.

Thanks to Remote Vehicle Status, the most important data from your Macan are always available at a glance. For example, you can call up your odometer reading and fuel level or check whether the windows and doors are open or closed. Remote Services gives you fingertip access to a range of statistics recorded by your car, including distance covered, average speed, and fuel consumed during the last drive.

Your smartphone or Apple Watch® can also be used to lock the doors and fold the electric exterior mirrors. Particularly practical: with Porsche Car Connect, you can make a breakdown call at any time.

Porsche Vehicle Tracking System (PVTS)

Another feature of Porsche Car Connect is the Porsche Vehicle Tracking System (PVTS), enabling remote location of a stolen vehicle.

For further information on Porsche Car Connect, please visit: www.porscheusa.com/connect
How Porsche sounds in the rock, pop, and classical categories.

Porsche Rear Seat Entertainment Plus
A cinematic experience enjoyed in the second row. New Porsche Rear Seat Entertainment Plus has been specially developed to appeal to the discerning viewers in your Macan. Thanks to two high-resolution 10.1-inch TFT color touchscreeners on the front seat backrests, each featuring an integrated DVD drive, two USB interfaces, an SD card interface, an HDMI interface and an internal 32-GB flash memory, a world of entertainment is at your passengers’ fingertips. What’s more, it’s also possible to surf the Internet\(^1\) along the way.

Sound Package Plus
Sound Package Plus, with 10 loudspeakers and a total output of 150 watts, delivers excellent sound. The amplifier integrated into PCM optimally adapts the acoustic pattern in the vehicle interior to the driver and front passenger.

Bose® Surround Sound System
The system has been optimally tuned for the models in the Macan range. A total of 14 loudspeakers, including an active subwoofer and center speaker, and 14 amplifier channels with a total output of 665 watts deliver an impressive sound experience. In combination with the new version of Porsche Communication Management (PCM) system, the Bose® Surround Sound System enables audio playback of DVDs and is thus able to make full use of the impressive sound spectrum of 5.1 digital recordings. Of course, you can still play other audio sources, such as CDs or MP3 players, in stereo or, at the push of a button, in one of the available virtual surround modes.

Noise compensation technology uses a microphone to continuously measure the ambient noise inside the vehicle and adapts music playback automatically so that a consistent sound is maintained at all times.

Standard in the Macan Turbo.
Optional for all other Macan models.\(^2\)

---

\(^1\) The Internet connection can be established either by means of the Wireless Internet Access feature of the optional Connect Plus module or by using a smartphone or tablet connected as a mobile hotspot (tethering).

\(^2\) Optional for all other Macan models.
A pounding beat. Even when the engine’s switched off.

Burmester® High-End Surround Sound System

As a creator of sports cars, we love to push boundaries—sound barriers included. This is demonstrated perfectly by the Burmester® High-End Surround Sound System, which has been optimally tuned for the Macan model range. It converts sound waves into a unique feast for the senses—and music into an exclusive listening experience.

Optimized sound distribution in the Macan (figurative illustration)

The surround sound system developed by Burmester®—one of the most respected manufacturers of high-end audio equipment worldwide—is available as an option. The technologies behind the system are from the finest premium home audio systems that Burmester® has to offer. It is of the art and never heard before in a vehicle of this class.

The technologies behind the system are from the finest premium home audio systems that Burmester® has to offer. Stale of the art and never heard before in a vehicle of this class.

The extravagance is uncompromising, the craftsmanship exquisite, the sound phenomenon. The system owes its excellence to countless details, and one goal: perfection in sound.

The figures alone sound impressive: 16 amplifier channels with a total output of more than 1000 watts, 16 loudspeakers including an active subwoofer with 300-watt class D amplifier, a total diaphragm surface area of more than 2400 cm², and a frequency response of 30 Hz to 20 kHz. Crossover technology has been carried over more or less unmodified from Burmester® high-end home audio products. Analogue and digital filters have been optimally defined for their installation location and finely tuned after extensive in-car audio testing. Ribbon tweeters have been used for unmistakably fine, clear and undistorted high-frequency sound reproduction with excellent level stability.

The elegantly pure design with galvanized surrounds and Burmester® logos on selected loudspeakers make it clear that the exclusive appeal of the Burmester® High-End Surround Sound System is as much about the visual as it is the audio. Uncompromising luxury in sound and style.

Optional for all Macan models.
As if you’d ever get cold feet.

Three-zone automatic climate control
Standard, three-zone automatic climate control provides separate air conditioning in the rear compartment—and a cooling function for the glove compartment. Air conditioning settings in the rear compartment are infinitely variable. Standard in all Macan models.

Privacy glass
Dark-tinted privacy glass provides additional privacy in the rear compartment.

Thermally/noise insulated glass
Optional: thermally and noise insulated laminated glass for all round more efficient reflection of infrared radiation. Enjoy an even more pleasant climate and peace and quiet in the passenger compartment.

Like privacy glass, the thermally/noise insulated glass also comes tinted at the rear.

Panoramic roof system
The panoramic roof system is a good square meter in size and comprises two large glass panels. Even when closed, it lives up to its name, letting you enjoy a generous panoramic view—but keeping you well protected from the elements at the same time. In addition, the front portion slides open or tilts to a raised position. A roll-up blind shields you from strong sunlight.

Optional for all Macan models.

Climate-controls in front for automatic climate control

Panoramic roof system
Comfort lighting package
The comfort lighting package includes dimmable ambient lighting in the door panels, LED lights in place of bulbs, practical LED reading lights for the rear passengers, two vanity lights, additional courtesy lighting in both exterior mirrors, and LED illumination of the footwells.
Optional for all Macan models.

Roll-up sunblind
To protect against sunlight, a mechanical roll-up sunblind is an available option for the rear side windows.
Standard in all Macan models.

Rain sensor
The window wiper system has three wiper speeds and a rain sensor for automatic operation.
Standard in all Macan models.

Porsche Entry & Drive
Porsche Entry & Drive is designed to minimize key use.
As soon as you touch the door handle, Porsche Entry & Drive checks the encrypted access code on the key in your pocket. Once the key is validated, the door unlocks. The engine can then be started and switched off using the ignition key in the normal way.
To lock the vehicle, you simply touch the sensor on the outside of the door handle. Porsche Entry & Drive then locks the vehicle and simultaneously activates the engine immobilizer.
Optional for all Macan models.
A passenger that can help control more than the radio.

Assistance systems.

Adaptive cruise control with Porsche Active Safe (PAS)

This system regulates the speed of your vehicle in line with the speed of the vehicle in front, and brakes your vehicle automatically—if necessary, even down to a halt. As soon as the road ahead clears, your vehicle will accelerate back up to the cruising speed originally set. Selectable cruising speeds start at 19 mph. If required, your car can even brake itself to a complete stop behind the vehicle in front in situations such as congested traffic. To pull away again, all it takes is for the driver to give a brief start command using the control lever or accelerator pedal.

Integrated Porsche Active Safe (PAS) is designed to detect whether you are approaching the vehicle in front too quickly. In this event, you will be prompted to take the necessary action by an audible and visual warning as well as a jolt of the brakes. The system may even boost brake pressure as the situation demands, even to the point of the maximum braking force that the system is able to provide. Optional for all Macan models.

Lane Change Assist

Lane Change Assist monitors the areas to the rear of the vehicle and the blind spots on either side. Above 19 mph, the system issues a visual warning signal in the exterior mirrors whenever a vehicle rapidly approaches your vehicle from behind or enters one of your blind spots. In this way, Lane Change Assist improves comfort and safety, particularly on motorways. However, the system does not actively intervene to control the vehicle and can be deactivated at any time. Optional for all Macan models.

Lane Keep Assist

Lane Keep Assist uses a camera installed in the front end to detect divider line markings on the road. If the car threatens to cross one of the lines, the system steers the vehicle back into the center of the lane. This correction is accompanied by a soft steering pulse. Of course, you are able to override the system at any time. The function may be deactivated in specific conditions, e.g., bad weather. Optional for all Macan models.

Lane Departure Warning

A camera inside the rear-view mirror casing monitors the road surface in front of the vehicle. When activated, the system will sound a warning tone whenever you steer towards a divider line marking and threaten to leave the current lane without indicating. Standard in all Macan models.
ParkAssist

ParkAssist warns you of obstacles detected at the front and rear of the vehicle. Its sensors are integrated harmoniously in the front and rear end. The audible alert is supplemented by a bird’s eye graphical representation of the vehicle on the central display screen showing the proximity to these obstacles.

Standard in all Macan models.

Reversing camera

The reversing camera facilitates precise reverse parking and maneuvering and also assists in hitching a trailer. Help is provided in the form of the camera image and the dynamic, superimposed guidelines on the PCM screen, which illustrate the predicted course of the vehicle given the current position of the steering wheel.

Standard in all Macan models.

Surround View

With Surround View, four cameras located in the front end, exterior mirrors, and rear generate an all-round image of the car and its immediate surroundings. In PCM, the driver can choose between a bird’s eye view, side view, and corner view.

Optional for all Macan models.

Anti-theft protection

All Macan models are equipped with an engine immobilizer. It works in response to an automatic exchange of data between the key and vehicle electronics. On correct identification, the engine start will be authorized by the engine electronics.

The Macan models can be optionally equipped with an alarm system that includes ultrasonic interior surveillance. In the Macan Turbo, the alarm system is fitted as standard, and ultrasonic interior surveillance can be added on request.

The security system monitors all four doors, the hood, the entire rear hatch, the interior, the ignition, and any trailer you have hitched to the car.

Standard in all Macan models.

Multitasking

Assistance systems

ParkAssist including reversing camera and Surround View

ParkAssist including reversing camera and Surround View
The large luggage compartment of the Macan models is prepared for a wide variety of uses and boasts a capacity of 17.7 cu. ft. A storage compartment to the side offers additional space.

The rear bench seat folds down with a ratio of 40:20:40. With the seats fully folded, the available capacity increases to 53 cu. ft.

To protect against sunlight and offer additional privacy, the luggage compartment is equipped with a removable luggage compartment cover. The optional ski bag is also removable. It can be used for carrying ski equipment outside the vehicle or simply taken out for cleaning. Practical and hygienic in equal measure.

For loading convenience, the optional air suspension enables you to lower the rear end of the vehicle using a button in the luggage compartment.

The rear hatch features a heated and tinted glass panel. The hatch opens automatically within five seconds at the push of a button. Its adjustable opening height can be memorized so that it stops at a safe distance from your garage ceiling, for example.

Loadspace management system

The loadspace management system lets you partition the luggage compartment to suit your needs. Items are held in place by a rail system with slide-adjustable telescopic rod, a strap roller and four variable lashing eyelets. The reversible mat protects against dirt and helps to prevent luggage displacement. The loadspace partition net provides added safety with the vehicle laden. Optional for all Macan models.

Luggage compartment capacity up to 53 cu. ft.

Loadspace management system

Example loading arrangement with loadspace management system
Roof rails
High-quality roof rails are available in aluminum or with a black painted finish. They blend harmoniously into the vehicle’s dynamic design. Roof rails are a prerequisite for installation of the optional roof transport system and are available as a factory fitted option only. Optional for all Macan models.

Roof transport system
In conjunction with the optional roof rails, this set of lockable roof bars is compatible with all Porsche roof attachment modules. The load-bearing parts in aluminum are designed to carry a maximum load of 220 lbs. A range of aftermarket attachment modules is available from Porsche Tequipment. Optional for all Macan models.

Trailer Hitch
The Macan is quite simply the most versatile vehicle we have ever built. This includes the capability of being used as a tow vehicle.

The Towing Package includes trailer receiver without tow ball that accommodates a maximum braked trailer weight of 4409 pounds.

With its exceptional towing capacity, the Macan takes you down the road as perhaps no Porsche has ever before. Optional for all Macan models.

Fortunately, intensity allows for some further expansion.

There are many ways to paint your life and add a splash of color. That’s why the possibilities are almost limitless when it comes to personalization.

Power of imagination
We believe in passion for the sports car. And for every detail.

Personalization.

Just imagine if everything were possible. If you could create the sports car of your dreams. Without restriction. With a diverse range of colors. With materials such as aluminum and Carbon Fiber. With extra personality and performance.

Whatever you envisage: we have passion for detail. We believe in the one-of-a-kind, and turn it into reality. Piece by piece. Detail by detail. Nuance by nuance. With experience. With expertise. With the power of imagination—and of the hands.

Adding to one’s strengths in the pursuit of a dream is worthwhile. And so is imbuing this dream with individuality and vitality by means of precision craftsmanship. Just as Ferry Porsche did with the first ever Porsche: the 356 no. 1.

Now it’s up to you to give your Porsche that one extra thing to make it truly unmistakable: personality. With optional equipment. Or bespoke customizations.

Let the following pages fill you with inspiration—and let your creativity run wild. The possibilities are many. The limits are few and far between. Take Porsche Exclusive Manufaktur as an example, where you can have your Porsche personalized directly on the shop floor. To the ultimate level. And for the most part by hand.
The transition from handicraft to craftsmanship is a fluid one.

Porsche Exclusive Manufaktur.

Our wealth of experience goes back a long way. Since the very beginning, Porsche has been dedicated to giving customers the opportunity to personalize their vehicle as part of our special request service. Known until 1986 as the Porsche Sonderwunschprogramm (Special Wishes Program), today we call it Porsche Exclusive Manufaktur. The philosophy has remained the same. You have our word.

We love what we do. We love our work. Every seam, every square inch of leather, and every single other fine detail receives the same devotion. It’s how we bring dreams to life. And how we create something unique. Directly from the Manufaktur.

None of this would be possible without originality, inspiration and enthusiasm, beginning as early as the consultation stage. That’s because we keep one thing in mind above all else: your particular wishes and requirements. We fulfill them with compound and meticulous care, with precision handcrafting and the use of exquisite materials such as Leather, Alcantara®, Carbon Fiber, Mahogany or Aluminum.

Our dedication and finesse add value. In other words, we handcraft a product that blends sporty performance, comfort, and style, and reflects your own personal taste. A Porsche with your signature touch.

We offer a wide range of personalization options, with visual and technical enhancements for the interior and exterior, from a single alteration to extensive modifications. To discover more about Porsche Exclusive Manufaktur, please visit www.porscheusa.com/exclusive or consult your authorized Porsche dealer.
Sport always allows a little more intensity.

The Macan S in Sapphire Blue Metallic.

What can you achieve as a result of broadening your mind and thinking outside the box? A Porsche. Like the Macan S in Sapphire Blue Metallic from Porsche Exclusive.

An extraordinary look: your Macan S in Sapphire Blue Metallic with 21-inch Sport Classic wheels painted in black high-gloss. Bi-Xenon™ headlights in black and tinted LED taillights are the ideal complement. Other special features include the SportDesign package painted in black high-gloss and the distinctive SportDesign exterior mirrors, while the Sport exhaust system with black Sport tailpipes combines a powerful sound with a masculine appearance.

Black leather dominates the interior of your Macan S. Precisely defined accents in Sapphire Blue Metallic create a masterful contrast. Door sill guards in Carbon Fiber prove that the boundaries of narrow thinking have been left far behind.

Visit www.porscheusa.com/exclusive to discover everything you need to know about configuring a unique vehicle.

1. SportDesign package painted in black high-gloss with side skirts, SportDesign exterior mirrors, Bi-Xenon™ headlights in black, 21-inch Sport Classic wheels painted in black high-gloss.
2. SportDesign package painted in black high-gloss with side skirts, door release levers painted in black high-gloss. "Porsche" logo and model designation painted, SportDesign exterior mirrors, tinted LED taillights, Sport exhaust system, including Sport tailpipes in black. 21-inch Sport Classic wheels painted in black high-gloss.
3. Interior package painted, instrument dials in white, SportChrono stopwatch instrument dial in white, PDK gear selector in aluminum.
4. Door sill guards in Carbon Fiber, including loading edge protection.
5. Vehicle key painted with key pouch in leather.

Power of imagination | Porsche Exclusive
Some highly complex precision instruments have been at work here.

The Macan S in Rhodium Silver Metallic.

Exclusively begins in the most intricate detail: genuinely handcrafted, for instance. But also with creative force and the will to create something unmistakable.

The defining feature of this Macan S in Rhodium Silver Metallic is the SportDesign package with side skirts painted in black (high-gloss). The Bi-Xenon™ headlights in black and tinted LED taillights are equally characteristic.

21-inch Sport Classic wheels painted in black (high-gloss) add another striking detail, while sport car sensations are further intensified by the Sport exhaust system, including Sport tailpipes in black.

Inside, decorative stitching in Garnet Red and seat centers lined with leather in Agate Grey create stylish contrasts. The Porsche Crest on the center console armrest lends even more elegance. Now that’s our idea of craftsmanship.

Visit www.porscheusa.com/exclusive to discover everything you need to know about configuring a unique vehicle.
The pinnacle of exclusivity and elegance—that is the standard to which the Macan S in Palladium Metallic aspires. It is resplendent with classy details. A Palladium Metallic paint finish adorns not only the 21-inch Sport Classic wheels, but also the SportDesign package as well as the “Porsche” logo and model designation on the rear. The v-shaped SportDesign exterior mirrors in exterior color further accentuate the elegant look.

Inside, the interior package and the multifunction Sport steering wheel in exquisite Whitewashed Oak take elegance to a new level. Air-vent slats painted in Palladium Metallic are a visual treat. The exclusive theme is perfected by numerous features in sumptuous leather.

Is there any higher form of personalization?

1 SportDesign package with side skirts, SportDesign exterior mirrors, Bi-Xenon™ headlights in black.
2 SportDesign package with side skirts, “Porsche” logo and model designation painted, tinted LED taillights, Sport-tailpipes in black, 21-inch Sport Classic wheels painted.
3 Whitewashed Oak interior package, heated multifunction Sport steering wheel in Whitewashed Oak, air-vent slats painted in Palladium Metallic, PDK gear selector in aluminum, dashboard trim package in leather.

Visit www.porscheusa.com/exclusive to discover everything you need to know about configuring a unique vehicle.

The highest benchmark?
The measure of all things.

The Macan S in Palladium Metallic.
Resist conformity. Personalize.

Intensity can be felt in many ways. The extensive color palette comprises a total of 11 exterior colors with a choice from two solid colors, eight metallic colors and one special color. Then there are five interior colors, four two-tone leather interior combinations, and one two-tone finish as part of the leather package.

No fewer than six interior packages complete the selection: Piano Finish Black, Brushed Aluminum, Black Brushed Special exterior color Black Jet Black Metallic, White Mahogany Metallic Volcano Grey Metallic Carmine Red 1,2 Palladium Metallic Rhodium Silver Metallic 1 2 Available from 11/2016 for all models.

Aluminum, Carbon Fiber, Dark Walnut and Whitewashed Oak.

4 Non-binding limited offer. For the latest information on availability, please consult your authorized Porsche dealer.

For more information on the options featured in this catalog, please refer to the separate price list.
With the Porsche Tequipment range of accessories developed specifically for your Macan, you can style it entirely to your own preference. From the start, the same rules that apply to our vehicles also apply to the products of Porsche Tequipment: developed, tested, and proven at the Development Center in Weissach by the same Porsche engineers and designers who made your car. Designed with the complete vehicle in mind and precisely tailored to your Porsche.

And your original car warranty? It will remain completely intact, whichever Tequipment products you ask your authorized Porsche dealer to fit.

To discover more about Porsche Tequipment, please consult your authorized Porsche dealer. Alternatively, all Tequipment products can be found online at www.porscheusa.com/tequipment using our “Tequipment accessories finder”.

(1) Roof boxes
Lockable plastic roof boxes in black (high gloss) or platinum look, with a capacity of approximately 11 or 173 liters.

(2) Cargo liners
These made-to-measure plastic liners protect the luggage compartment from dirt and damage.

(3) All-weather floor mats
In an appealing design featuring the Macan silhouette and the “Porsche” logo.

(4) Winter wheel and tire sets
For enhanced individuality, agility and safety. And even greater driving pleasure.

(5) Child seats
Distinctively designed, and specially tested and approved for Porsche cars.

(6) Car care set
Interior and exterior care products optimally selected and formulated for your Porsche.
Designing your Porsche.

Consultation
At your authorized Porsche dealer, we’re on hand to answer all your questions about your new Porsche. Of course, the same applies to the personalization options of Porsche Exclusive.

In our customer centers in Zuffenhausen, as well as Leipzig and in our Porsche Exclusive—Personal Design Studios in Atlanta, Georgia and Beverly Hills, California, we will show you what else can be done. Here, you can select your materials and paint colors and plan your vehicle in detail using the Porsche Car Configurator. In order to book an appointment with one of our Design Specialists, please email PersonalDesign@porsche.us or visit us online at www.porscheusa.com/exclusive.

Factory collection
Once the planning is over, the anticipation begins—looking forward to the day of delivery. The Porsche factory collection makes this an event to cherish even more. Stuttgart or Leipzig or even our new Atlanta facility? These venues hold their own special allure.

In Stuttgart-Zuffenhausen, you can experience and learn about every aspect of the legendary Porsche brand. In addition to receiving the detailed lowdown on your car, you will also gain insight into the entire history of Porsche with a visit to the Porsche Museum. Legendary models from a sports car history spanning more than six decades await.

At our Leipzig location, you’re going to take to the starting grid—in a Porsche model identical to the one you purchased and under the expert supervision of one of our instructors. During the drive, they will demonstrate all the functions of your new Porsche. And, indeed, the potential that lies within. Onroad on the racetrack. Or offroad, on our very own off-road track.

Whichever location you choose, your itinerary includes a guided factory tour, a stylish lunch and, of course, the moment you’ve been waiting for: taking delivery of your Porsche.

The new Porsche Experience Center in Atlanta, now offers new vehicle delivery at this location with a complete immersion into the Porsche experience. To arrange a date for your factory collection experience, please consult your authorized Porsche dealer.

Porsche Car Configurator.

Intensity in motion—and a definite driving force in creative styling. With the new Porsche Car Configurator, you will see quickly and intuitively which design for your chosen Macan model suits you best. On the way to realizing your dream car, you can now create your own personalized configuration not only on your desktop and tablet, but also on your smartphone. Your car can be displayed in the perspectives of your choice and with 3D animations. Tailored recommendations along the way help you make those all-important decisions. Visit www.porscheusa.com to find the Porsche Car Configurator and discover much more about the fascination of Porsche.

In the midst of life. And never far from reach. Whether on the road or online. With easy access to social networks, you’ve got flexibility—no matter where you are.
