All illustrations and specifications contained in this brochure are based on the latest product information available at the time of publication. smart USA Distributor LLC reserves the right to make changes at any time, without notice, in colors, materials, equipment, specifications and models. Any variations in colors shown are due to reproduction variations of the printing process. Illustrations may include test situations; some vehicles may be shown with non-US equipment. Some vehicles are shown with optional equipment.
Mobility begins in the mind. You’ll only find unusual solutions by asking unusual questions. “Open your mind” is a call to question the status quo, take a different angle and risk a fresh approach. All essential elements when broadening your horizons. As demonstrated by smart and the smart fortwo – an extraordinary vehicle concept for greater mobility in ever denser urban traffic. A concept that simply makes more intelligent use of the ever diminishing space available in our towns and cities.

Does a car need a rear seat when the vast majority of urban traffic carries just one person? Isn’t a hood a waste of space when the engine can be accommodated at the rear? Is a clutch pedal really necessary when an automated manual transmission is better suited to urban driving? Is size really a measure of safety when an innovative safety concept offers exceptional protection in a vehicle measuring just 8.84 ft. in length? All valid questions in an ever evolving world.
When less car means more.

Towns and cities offer a vast array of amenities. But what’s the use of having countless shops, restaurants and cafes, if you can’t find anywhere to park nearby?

In the smart fortwo you’ll soon discover a host of new places to park because all of a sudden the smallest parking space is more than big enough. At the same time, you’ll enjoy an amazing feeling of space inside and a cargo area that has no problems accommodating your shopping and luggage. In addition, the raised seat position offers a clearer overall view of traffic and makes getting in and out of your spot a breeze.

Apart from the added comfort, the smart fortwo also provides more flexible and agile driving in towns and cities. Getting around in a crowd is simpler and quicker thanks to the exceptionally tight turning circle of only 28.7 ft.

Moreover, the smart fortwo makes driving even easier by eliminating the need for a clutch pedal. This means driving is relaxed and worry-free even in rush hour. And the best part is how little fuel it takes to have a full day out and about.

Small wonder, in view of the economical engine and the low overall curb weight which can be directly attributed to the smart fortwo’s lightweight body components in high-quality plastic. The result is an excellent power/weight ratio, which means improved performance and reduced fuel consumption. Plus, these components are refreshingly robust and scratch-resistant, shrugging off light bumps practically unscathed.

As you can see, there’s more to the smart fortwo than meets the eye.
Getting more out of life.

In the smart fortwo you’ll discover new sides to life every day and enjoy a freedom you’ve never experienced before. A smart fortwo is even good for other drivers. Thanks to its limited footprint, the compact smart fortwo leaves more space for other cars.

So you needn’t have any qualms about popping into town on a Saturday afternoon. Just look forward to a relaxed, hassle-free trip and the luxury of finding a parking space without any fuss.

The surprisingly large luggage compartment is the icing on the cake offering more than enough space for your weekly shopping or your luggage for a weekend trip.

Plus, its low fuel consumption is not only kind to your wallet but to the environment as well. After all, reduced emissions means better air quality for everyone.
The 3-cylinder in-line engine remains consistent with the vehicle concept of the smart fortwo. With just under 1 liter displacement, it is extremely compact, space-saving, and thanks to its all-aluminum design, particularly light. And despite its low fuel consumption and low emissions, it offers an impressive array of technical features. All of this adds up to amazing agility and performance.

The engine:

With 4 valves per cylinder (12-valve engine) and 2 camshafts (1 hydraulically adjustable), the engine generates plenty of torque even at low revs. The naturally aspirated 3-cylinder in-line engine comes standard with 70 hp and 68 lb-ft of torque. So whether you’re navigating the urban landscape or hitting the open road, you’ve got more than enough power at your disposal.

The transmission:

The 5-speed automated manual transmission provides for faster gear shifting than a traditional manual transmission. The smart fortwo offers a user-friendly automatic gear program which does away with the need to use a clutch pedal. A feature you’ll find particularly convenient in town and city traffic. The transmission also features a kickdown function which changes down by 1 or 2 gears when more power is needed.

Steering wheel paddle shifters:

For sportier gear shifting and even more driving fun, you can change gears using the paddle shifters on the 3-spoke leather sports steering wheel. (Standard on passion models.) Which means you may never have to take your hands off the wheel. Alternatively, you can also use the gearshift lever.

5-speed automated manual transmission:

The 5-speed automated manual transmission allows for manual shifting for ultimate control. Just move the gearshift lever to the left to engage manual mode. Then push forward or pull back on the shifter to upshift or downshift, respectively.
The smart safety concept: Redefining automotive protection.

Despite its compact dimensions, the smart fortwo safety management system and special design provide exceptional all around protection.

1 Point of impact:
No matter where the vehicle is hit during a collision, the impact energy is distributed evenly across the entire tridion safety cell — which protects the entire passenger area.

2 Sandwich construction:
The tridion safety cell is comprised of 3 pieces of steel – 1 large piece of high-strength steel sandwiched between 2 pieces of regular steel. This feature both reinforces the side of the vehicle and elevates the passenger seating position out of the impact zone.

3 Crash boxes:
smart has further evolved the traditional crumple zone. Even in crashes up to 10 mph, the steel deformation elements at the front end rear ensure that the tridion safety cell itself remains undamaged.

4 Side door reinforcements:
The reinforced solid steel door frames, diagonal strut, and window slot frame all work together to protect occupants during side impact collisions.

5 Standard airbags:
The smart fortwo is equipped with 4 airbags: 2 full-sized front airbags and 2 side airbags for head/thorax protection.

6 Tubular reinforcements:
Tubular reinforcements offer passengers 2 passive safety benefits. First, the reinforcement of each seat effectively minimizes injuries from cargo which may shift or be thrown during emergency braking. More importantly, the tubular frame reinforcement also allows the seats to deform in a specific way during severe rear end collisions, ensuring the safety of occupants far away from the most dangerous impact energies by increasing rear displacement distance.

7 Safety seats with integrated headrests:
The modular sheet steel structure with integrated headrests offers the seats a high level of mechanical stability. In case of impact, belt tensioners reduce slack in a matter of milliseconds, while belt-force limiters carefully release the necessary length of belt to affix the occupants far more precisely on the chest.

12 ESP®, ABS, TRIDION SAFETY CELL.
Keeping you safely in control.

Active safety systems help you avoid critical situations. Active accident prevention is intrinsic to the smart fortwo:

The electronic stability program (esp®) is a standard feature in every smart. When the vehicle is in danger of swerving, esp reduces the engine torque and brakes specific individual wheels in order to stabilize the car.

The anti-lock braking system (abs) with electronic brake force distribution ensures that you are able to brake and steer simultaneously in critical situations. Brake assist makes a decisive contribution to driving safety. It automatically initiates controlled emergency braking when you step on the brake pedal quickly, but not firmly enough.

There are also numerous passive safety systems in the smart fortwo for your all around protection. Protection is also provided in the event of a head-on collision by 2 full-size 2 stage front airbags, belt tensioners and belt-force limiters — and by the safety steering column, which is capable of retracting out of harm’s way when necessary. Plenty of space has also been left between the car’s occupants and the dashboard. In addition, all interior bodyshell surfaces in the interior compartment, such as the A and B pillars are clad with light gray polypropylene panels. In case of side-on impact, the robust door structure in steel and standard head/thorax side airbags provide necessary protection.

In the front area, deformable plastic body components offer pedestrian protection, designed to minimize the risk of injury in the event of a collision.

As a brand of Mercedes-Benz Cars, smart benefits from the high-caliber expertise and experience of Mercedes-Benz in the field of safety.
Shouldn’t an innovative car also be produced in an innovative way?

Not only have we challenged the concept of the car and driving from an ecological perspective, we’ve also challenged the way that cars are produced. The result: smartville – one of the most modern car factories in the world. Here, lots of things are new and nothing is left to chance. After all, a car designed to be eco-friendly can only be produced in a factory where the environmental aspects have been thoroughly thought out.

Many components are produced on the premises by system partners. This saves transport costs, packaging material and enables just-in-sequence production: all parts are delivered in the exact order in which they are required.

By powder coating the tridion safety cell, smart has set new standards in the automotive industry. This process uses 40% less energy than conventional painting methods. Solvent emissions are very low because water-based lacquers are being used.

Industrial waste water and sewage are purified in a biological waste water purification plant. The Biosep process employed meets state-of-the-art technical standards. This enabled the waste water contamination to be reduced from the equivalent of that produced by a population of 3,000 to just 50. In other words, smartville does not pollute the environment any more than a town with 50 inhabitants.

These are just some of the many innovations that enable us to ensure environmentally compatible and sustainable car production.
All phases of the product lifecycle were and are integrated into a strict ecological concept. From the development of individual components to the construction of the smart plant in Rambach, France, the performance of the smart fortwo and finally, its recycling.

Great importance was attached to an ecological lifecycle right from the design stage. Starting with the production process that is as environmentally neutral and resource-saving as possible, through to ecological and economical use and particularly high level of recycling at the end of the vehicle’s life.

In addition to smartville, the modular design of the smart fortwo is an excellent example of forward thinking car building. Many components of the smart fortwo have experienced several lives. This is possible because even the materials selected have been chosen for their minimal environmental impact and maximum recyclability.

For example, some components, such as the inner fenders and the underbody trays, are already made from renewable raw materials and 100% recycled plastic. This guarantees efficient disassembly and is a prerequisite for being able to recycle the bulk of the vehicle.

Our vision for the future is to close this cycle. This is the only way to achieve our aim of building cars that are as environmentally friendly as possible throughout their whole lifecycle – from the production process through to recycling.

On the way to achieving this, the smart brand is already setting a milestone for ecological compatibility with its dynamic and continuously improving environmental management system. The result is an alternative method to producing cars we can all live with.
Get a grip on bad weather.
Experience exceptional handling.

From coast to coast, there is no shortage of weather extremes. From the frigid forecasts that bring us blizzards and black ice in the Northeast to the scorching sand of California’s Death Valley, the United States has its share of automotive trials and tribulations. This is why the smart fortwo was specifically designed with active safety systems such as electronic stability program (esp®) which helps you to stay in control, anti-lock braking system (abs) which automatically initiates controlled emergency braking, the fortress-like tridion safety cell, and 4 standard air bags.

All of these are key components in a sophisticated active safety management system painstakingly designed to keep you out of harm’s way regardless of the forecast. So whether it’s a torrential downpour on Route 66 or sleet and rain on a blustery New England night, you’ll be prepared. Safe and snug in the security of your new smart fortwo.
**Acceleration.**
More go. See for yourself how active technology improves acceleration in nasty conditions.

**Control.**
Stay in control. The smart fortwo’s revolutionary active technology improves control in unfavorable conditions.

- **Electronic Stability Program (ESP).** Weather can cause your car to do unwanted things, like swerve. Fortunately, the smart fortwo’s ESP can sense when you’re about to fishtail, and applies the brakes to individual wheels and adjusts engine power to stabilize the car.

- **Chassis Balancing.** The smart fortwo is a rear-drive, rear-engine vehicle. As such, the weight distribution allows the vehicle to perform extremely well in a variety of inclement weather conditions.

- **Tire Pressure Monitoring.** Don’t let your tires fall flat. smart’s easy-to-read dash indicator will alert you when you’ve lost 20 percent of the recommended air pressure in 1 or more of your tires. Now that’s a breath of fresh air!

- **Acceleration Skid Control (ASC).** Slick roads have met their match. The smart fortwo’s ASC detects drive-wheel slip and prevents loss of traction by braking the slipping wheel. Power can then be re-directed to the other driven wheel with more traction.

- **Automatic hill start assist.** So you’re on a slope. No sweat. When you remove your foot from the brake to pull away, the wheels remain braked for about 1 second, giving you enough time to move your foot to the accelerator without the car rolling backwards.

- **Grip under acceleration.** Because the smart fortwo has a rear engine, the rear weight of the engine is over the drive wheels to provide optimal traction between the front and back of the car, which in turn gives it better acceleration.

**Braking.**
Stop on a dime. See how the smart fortwo’s active technology improves braking in every conceivable driving condition.

- **Anti-lock Braking System (ABS).** Let’s say you need to stop suddenly. Not a problem. The ABS with electronic brake-force distribution will prevent wheel lockup, enabling you to properly steer your smart fortwo.

- **Brake Assist (BA).** There are going to be times when you simply have to slam on the brakes. BA automatically initiates controlled emergency braking and generates the high braking pressure necessary for ABS control. The distance it saves could end up saving something else. You.

- **Cornering Brake Control (CBC).** When you corner, a varying load is put on the wheels. Thanks to the smart fortwo’s CBC, optimal distribution of the brake force is maintained, and your smart fortwo stays safely on its chosen course.

- **Heated seats.** This is one of the greatest automotive inventions ever. Well, at least that’s what you may be thinking as you sit comfortably in your heated seat, while the temperature outside drops rapidly. (Optional on all models.)

- **Heated door mirrors.** Here’s the thing about mirrors: you can’t see all that much if they’re caked with ice. Hence, you can get electrically adjustable heated mirrors standard on all passion models. Nice.

- **Cabriolet.** Look on the bright side of things with the smart fortwo’s cabriolet roof with multiple operating modes and heated rear glass window. The folding soft top is a robust black polyacrylic fabric and even be opened and closed as you drive along at any speed.
**The smart fortwo coupe:** The smart in its classic guise.

Because there’s always plenty to see in the city, the smart fortwo passion coupe features a large panoramic roof made of break-resistant polycarbonate. It lets in the sunshine to provide for a marvellously light and airy interior. Unless you decide to use the integrated sunscreen, that is.

Or if you prefer, a solid roof is available as an option on the passion coupe.

The pure coupe comes standard with a solid roof made of resilient plastic – black on the outside, with a textured surface finish.

Another special feature of the smart fortwo coupe is that the tailgate and rear window can be opened separately. Opening only the rear window provides just enough room to place smaller items in the luggage compartment. Plus, it can be unlocked remotely by the 4-button key fob control.

A clever feature is an additional storage compartment in the tailgate that helps to keep things neat and tidy in the luggage compartment.

**The smart fortwo cabriolet:** Room for two on the sunny side of the street.

Now when the sun smiles down on you, you can smile back. The fully automatic tritop fabric soft top with heated glass rear window offers a variety of options to suit all conditions – from the folding soft top that can be opened to any position in the fully open top for a full-blown cabriolet feeling – all at the touch of a button.

You can also go the whole nine yards and remove the roof bars, which can be neatly stowed away in a special compartment in the tailgate.

The folding soft top in a robust black polyacrylic fabric can even be opened and closed as you drive along at any speed.

Alternatively, you can open it before you set off simply by using the remote control in the 4-button key fob. The rear top can be folded up to facilitate loading of the luggage compartment.

The scratch-resistant and heated rear window in safety glass also provides added comfort and safety. Whatever the weather.
The standard equipment: The smart fortwo is brimming over with ideas.

There are many things that make the smart fortwo particularly practical and functional. And most of these solutions are not even apparent at first sight.

Clever technical features such as automatic hill start assist, for example. Or the windshield wipers with speed-sensitive interval wiping. Electrical release of the tailgate at the push of a button. Central locking with remote control including panic feature and the 5-speed automated manual transmission with kickdown function.

Other practical features include the passenger seat backrest which can be folded down for easy loading. Or the large service panel at the front, which is very convenient for topping up coolant and windshield-washer fluid.

It goes without saying that every smart fortwo also comes with a comprehensive range of safety features as standard, including esp® and abs.

But that’s not all, there’s much more:

- The drive lock function: When you set off, all the locks are automatically engaged without you having to operate the locking system manually. This means the doors can only be opened from inside, not from outside – for safety’s sake.

- Central locking with remote control and immobilizer: The doors can be locked and unlocked using the remote control included in the 4-button key. The remote control also operates the rear window release, roof release (cabriolet) and panic functions.

- Automatic hill start assist: If you are starting on an upward slope, you need not release the brakes as soon as you step on the accelerator. The brakes remain engaged for a moment, until you press the accelerator. This gets you off to a comfortable start and prevents the car from rolling back.

- Low beam halogen projector headlamps: These large headlamps in clear-glass provide for bright and uniform illumination.

- Three rear windows or the cabriolet: Broad rear windows in safety glass – for a clear view of the rear at all times.

- Service panel: Easy to remove and attach to the front of the vehicle, i.e. when topping up coolant or windshield washer fluid. The bulb sockets of the large beam headlamps are also readily accessible.

- Multifunctional display: All key information at a glance – i.e. gear display, loose gas cap indicator, or fuel gauge. From a level of 1.3 gal the remaining fuel is indicated to an accuracy of 0.13 gal. Trip recorder, outside temperature, time and service interval indicator can also be called up at the touch of a button.

- Tire pressure monitoring: Don’t let your tires fall flat. The smart fortwo’s easy-to-read dash indicator will alert you when you’ve lost 20 percent of the recommended air pressure in 1 or more of your tires. Now that’s a breath of fresh air!

- Adjustable, fold-down passenger seat backrest: To enable you to transport larger and bulkier items, the passenger seat backrest can be folded down for through-loading, smart-style.
The pure model of the smart fortwo comes with all the features to make your life easier and more pleasant – functional, comfortable and unmistakably smart.

From the black tridion safety cell, including door mirror trim and radiator grille in black to its robust 15” steel wheels with smart wheel covers, and the solid roof of the coupe.

The focus inside is on practical and functional design with comfortable and hard-wearing safety seats with integral seat belts in discreet gray. Matching fabric elements on the instrument panel and contrast components in pearl gray complement a host of well-conceived storage facilities, and central locking with remote control.

The 5-speed automated manual transmission makes changing gears in the pure simpler than ever. And thanks to its high-torque engine rated at 70 hp the smart fortwo has discovered the perfect balance between responsiveness and economic responsibility.

For all its functionality and practicality, the pure also offers an excellent standard of safety, of course – with the complete scope of safety equipment included as standard.

All in all, the pure is designed to be the perfect and dependable vehicle for daily use.

>> The models:
Spoiling you for choice.

The smart fortwo comes in 3 models tailored to individual tastes and preferences.

The pure coupe – for those seeking functionality and economy.
The passion coupe – for those with a penchant for elegance and comfort.
The passion cabriolet – for those seeking unparalleled excitement and the wind in their hair. All featuring the complete scope of safety equipment and a host of innovative ideas, of course.

And if you’re still looking for more, the wide range of options and accessories from smart provide plenty of additional opportunities for individualization.

The pure coupe:
Focusing on the essentials.

The pure model of the smart fortwo comes with all the features to make your life easier and more pleasant – functional, comfortable and unmistakably smart.

From the black tridion safety cell, including door mirror trim and radiator grille in black to its robust 15” steel wheels with smart wheel covers, and the solid roof of the coupe.

The focus inside is on practical and functional design with comfortable and hard-wearing safety seats with integral seat belts in discreet gray. Matching fabric elements on the instrument panel and contrast components in pearl gray complement a host of well-conceived storage facilities, and central locking with remote control.

The 5-speed automated manual transmission makes changing gears in the pure simpler than ever. And thanks to its high-torque engine rated at 70 hp the smart fortwo has discovered the perfect balance between responsiveness and economic responsibility.

For all its functionality and practicality, the pure also offers an excellent standard of safety, of course – with the complete scope of safety equipment included as standard.

All in all, the pure is designed to be the perfect and dependable vehicle for daily use.

2-spoke leather steering wheel: In supple leather for excellent grip. To keep you firmly in control of your smart fortwo at all times.

Solid roof: The black plastic roof with a textured surface finish is particularly resilient. (Optional on passion coupe.)

Steel wheels (15") with smart wheel covers: Sturdy and functional. Fitted with 155/60 R 15 tires at the front and 175/55 R 15 tires at the rear.

4-button smart key including panic button: For highly convenient central locking and unlocking of your pure by remote control. Including remote rear window release (pure and passion coupe) and remote function (passion cabriolet) and panic button.

5-speed automated manual transmission: Changing gears has never been simpler. A gentle tap on the leather wrapped gearshift lever changes up and down or simply choose "D" for the automated gear change. Includes kickdown function.
The passion coupe:
Dynamic looks. Comfort in abundance.

The smart fortwo passion coupe will be your new passion. Its elegant appearance sets it apart. The tridion safety cell is standard in black, or upgrade to the optional silver metallic paint with silver door mirror trim and silver radiator grilles. Rounded off by attractive 15” 9-spoke alloy wheels with all season tires. And the finishing touch is provided by the standard tinted panoramic roof with sunscreen. Or, keep the heat out with the optional textured solid roof.

The interior of the passion is a marriage of elegance and comfort. It features a 3-spoke sport leather steering wheel with paddle shifters and leather gear knob, comfortable fabric-covered seats in an elegant design – in a choice of beige, red or black.

Fabric elements color-coordinated with the upholstery are featured on the instrument panel, door trims and kneepads – and there are contrast components in pearl beige, pearl red or pearl gray.

The air conditioning with automatic temperature control and the electrically adjustable heated mirrors ensure a pleasant trip every time. For even greater comfort, the passion additionally features optional heated seats and power steering.

The passion coupe comes standard with the smart radio (radio 9), which includes AM/FM radio with an in-dash single CD-player, 2 speakers, and an auxiliary input jack.

The passion coupe is the smart fortwo at its most elegant and comfortable.
The smart fortwo passion cabriolet – who knew automotive refinement could be so much fun?

With its myriad of features and fun the passion cabriolet is the epitome of elegance and automotive enjoyment. The tridion safety cell is optional in silver metallic paint with silver door mirror trim and silver radiator grille. Rounded off by attractive 15” 9-spoke alloy wheels with all season tires. And the finishing touch is provided by the fully automatic tritop fabric soft top with heated glass rear window.

For the ultimate in audio enjoyment, enjoy the smart premium radio (radio 10) with an MP3 compatible in-dash 6-disc CD changer, and smart sound system with 2 tweeters, 2 mid-range speakers and subwoofer. The smart premium radio and sound system are standard on the passion cabriolet.

The passion cabriolet is the smart fortwo at its most sporty and sophisticated.
Upholstery in design beige, red or black:
The 3 color variants combine to perfection with the colors of the bodypanels. The fabric elements and contrast components are color-coordinated.

3-spoke leather sport steering wheel:
Looks good, feels good – the leather steering wheel is a delight to (be)hold. And the same goes for the leather gear knob.

Panoramic roof:
Apart from offering a great view, the large tinted panoramic window also lets in more sunlight, to enrich and invigorate your drive.

Air conditioning with automatic temperature control: Simply set the desired temperature on the preset scale – the air conditioning attends to the rest automatically.

Steering wheel paddle shifters:
For sportier gear shifting and even more driving fun, you can change gears using the paddle shifters on the 3-spoke leather sports steering wheel. This means you may never have to take your hands off the wheel. Alternatively, you can also use the gearshift lever.

Head/thorax side airbags:
Side airbags to protect the head and chest area to supplement the front airbags for the driver and passenger.

Electrically adjustable and heated door mirrors:
Both door mirrors are simple and convenient to adjust from the driver’s side and the heating quickly banishes ice and condensation.

Power windows:
The express function allows you to adjust the driver’s side window at the touch of a button, or both windows just as far as you wish.

9-spoke alloy wheels (15”):
With 155/60 R 15 tires at the front and 175/55 R 15 tires at the rear.

Power windows:
The express function allows you to adjust the driver’s side window at the touch of a button, or both windows just as far as you wish.

Head/thorax side airbags:
Side airbags to protect the head and chest area to supplement the front airbags for the driver and passenger.

9-spoke alloy wheels (15”): With 155/60 R 15 tires at the front and 175/55 R 15 tires at the rear.
> Optional equipment: Make a smart of your very own.

Have you found the equipment line best suited to your wants and needs? With factory-fitted options you can further individualize your smart fortwo to your heart's desire.

- **Pure coupe**: Even though the pure is the definitive expression of style you can stay even cooler with optional A/C or for those times when you want to let the good times roll equip your pure with the smart radio (radio 9), an AM/FM radio complete with CD player and 2 loudspeakers. Or you can warm up to its optional heated seats.

- **Passion coupe and cabriolet**: With its optional leather seats as part of the comfort package, each smart curled cockpit clock and rev counter, integrated alarm system, and fog lamps the smart fortwo passion is as much a pleasure to be seen as it is to be seen in. All options of course combine signature smart style and substance.

  - **1. Smart radio (radio 9)**: AM/FM radio with CD player and 2 loudspeakers. (Standard on passion coupe.)
  - **2. Smart premium radio (radio 10)**: AM/FM radio with MP3 compatible 6-disc in-dash CD changer for hours of audio pleasure. (Standard on passion cabriolet. Optional on pure and passion coupe.)
  - **3. Smart sound system (Hi-Fi package)**: (Not shown.) Enhance your smart premium radio with the smart sound system, featuring 2 tweeters, 2 mid-range speakers and subwoofer. (Standard on passion cabriolet. Optional on passion coupe.)
  - **4. Air conditioning with automatic temperature control**: Cool down in next to no time. Just set the desired temperature on the preset scale. The air conditioning attends to the rest. Including dust and pollen filter. (Standard on passion models.)
  - **5. Heated seats**: Pleasantly warm seats, with a choice of 2 heating levels. The seat surfaces are heated up to the side supports, the backrests up to the shoulder area.
  - **6. Anti-theft alarm system**: The smart fortwo's fully integrated alarm was specifically designed to keep your smart fortwo just that: yours. In addition, the alarm button can double as a security feature when in questionable situations.
  - **7. Metallic paint**: Turn heads even more by choosing metallic paint for your new smart fortwo. Metallic paint is available in silver metallic, gray metallic and blue metallic.

- **Exchanging body panels**: Brighten up your life.

The bodypanels:

The smart fortwo's 2-color design makes it immediately obvious that it's no ordinary car. It's all down to the unique combination of the tridion safety cell and the high quality plastic bodypanels. These allow you to mix and match the colors of your smart fortwo all you want. You can even opt for a complete change of color schemes.

In the event of damage, individual bodypanels can simply be replaced. This is quicker and much less expensive than with conventional cars, which require replacing and repainting an entire panel.

- **The bodypanels:**
  - **1. Smart radio (radio 9)**: AM/FM radio with CD player and 2 loudspeakers. (Standard on passion coupe.)
  - **2. Smart premium radio (radio 10)**: AM/FM radio with MP3 compatible 6-disc in-dash CD changer for hours of audio pleasure. (Standard on passion cabriolet. Optional on pure and passion coupe.)
  - **3. Smart sound system (Hi-Fi package)**: (Not shown.) Enhance your smart premium radio with the smart sound system, featuring 2 tweeters, 2 mid-range speakers and subwoofer. (Standard on passion cabriolet. Optional on passion coupe.)
  - **4. Air conditioning with automatic temperature control**: Cool down in next to no time. Just set the desired temperature on the preset scale. The air conditioning attends to the rest. Including dust and pollen filter. (Standard on passion models.)
  - **5. Heated seats**: Pleasantly warm seats, with a choice of 2 heating levels. The seat surfaces are heated up to the side supports, the backrests up to the shoulder area.
  - **6. Anti-theft alarm system**: The smart fortwo's fully integrated alarm was specifically designed to keep your smart fortwo just that: yours. In addition, the alarm button can double as a security feature when in questionable situations.
  - **7. Metallic paint**: Turn heads even more by choosing metallic paint for your new smart fortwo. Metallic paint is available in silver metallic, gray metallic and blue metallic.
Whatever you’re looking for, at www.smartusa.com you’ll find the whole world of smart at a glance.

The smart configurator allows you to put together the smart fortwo that’s best suited to you. You can also locate your nearest smart center and keep up to date on the latest developments and campaigns at smart.

At www.smartusa.com you can always be sure you are right up to the minute with the latest news on smart and the smart fortwo.

crystal white
silver metallic
depth black
gray metallic
rally red
blue metallic

All colors available on all models. Silver tridion cell and metallic paint colors available as factory installed upgrades.
The chrome package: small details that make a big difference. The highly polished chrome door mirror trim, radiator grille and tailgate trim immediately give your smart fortwo a more elegant appearance.

Fog lamp rings: for that special shine even when the skies are clear. The fog lamp rings round off your smart fortwo’s appearance to perfection in combination with the chrome package.

smart design stickers: black or silver, horizontal or vertical, one or several numbers – when it comes to making your smart even more individual, the choice is yours. Easy to apply, non-fading and car-wash proof.

The smart accessories range: Broadening your smart horizons.

Our extensive range of accessories enables you to make even more of your smart fortwo.

With a host of innovative and practical solutions for the interior, exterior, functional/electrical equipment, audio and telematics, driving dynamics and safety, the possibilities for you and your smart fortwo are virtually boundless. And everything is tailored perfectly to your smart fortwo in terms of design, functionality and quality.

A small selection is presented here. The entire collection can be found in the accessories catalog and at your smart center or visit www.smartusa.com.

European basic rack version shown.
Basic rack: An ideal and safe platform for various rack systems (i.e. bicycle rack, snowboard rack). The rear window can be opened with rack mounted (coupe only). Photo: Basic rack plus bicycle rack; available separately. Rack for second bicycle also available. Dealer installation required. (Bicycle not included.)

All-weather floor mats: Made of rubber. Dirt and water-resistant, anti-slip and very durable.

Luggage compartment management system: The order of the day. The flexible cargo system with slot-in sections enables the luggage compartment to be partitioned as desired. Items can also be secured using an elastic strap and a shopping bag.

Velour floor mats: Dirt and water-resistant, and anti-slip. A perfect fit on both sides of the car.

Net set for luggage compartment: Safely stow loose items. Comprised of 1 net for floor and 1 for side compartment. Dealer installation required.

Ski and snowboard rack: (Requires basic rack.) Available separately, but can be combined (as shown), with space for 2 pairs of skis and a snowboard. On their own, the ski rack holds 2 pairs of skis and the snowboard rack fits 2 snowboards. (Skis and snowboard not included.)

Sunglasses compartment: Ample room for almost all types of glasses – within easy reach of the driver. The compartment has a magnetic closure to prevent glasses from falling out.

Sunglasses compartment cover (retractable, including net bag): Protects your luggage from prying eyes and sunlight. Retractable design for easy use. Simple to remove when transporting larger items.

Bodypanel freshup kit: Freshen up with a fresh look. Unique to smart: Treat your smart fortwo to a new exterior color in no time. The bodypanels are exchanged by your local smart center. (All current standard colors available.)

Bodypanel freshup kit plus: A 2-in-1 solution offers flexibility and safety. Thanks to the safety net with integrated luggage compartment cover, you can always make the most of the luggage compartment. Dealer installation required.

Wheel theft protection: Provides reliable protection against theft of your wheels. The code card facilitates a timely replacement, should you lose the safety key with the set.

Safety plus package: In addition to an emergency jacket, first aid kit and warning triangle, the package also includes a flashlight, ice scraper, replacement lamp box and smart branded umbrella. Everything is cleverly and compactly integrated in the tailgate with no space going to waste. First-aid kit available separately.
To really get to know a car like the smart fortwo, you need to experience it first hand. How about a test drive? Visit your smart center, take a seat and find out all you wish to know about the smart fortwo, the equipment and the extensive accessories program.

Of course, we will also be pleased to answer all your questions on financing, and the extensive range of smart services. Your smart center – we’re there to help you. Simply visit www.smartusa.com to find the smart center nearest you.
