THE POWER TO GO WHERE OTHER FOUR-FOOTED CREATURES FEAR TO TREAD.

Whether sitting on the savanna or refueling at base camp, Land Cruiser always looks poised, lean and muscular, projecting a commanding presence. It’s the natural habitat of the global adventure seeker, and, as Automobile Magazine’s “All-Star Winner for Best Large SUV,” it has few rivals. After all, if you want to explore the far corners of the earth, shouldn’t you have the vehicle that’s already blazed the trail?

The Toyota driver and front passenger air bags are Supplemental Restraint Systems (SRS). The driver and front passenger air bags are designed to inflate in a severe frontal collision. In all other accidents, the air bags will not inflate. To decrease the risk of injury from a deploying air bag, always wear seatbelts and sit upright in the middle of the seat as far back as possible from the air bag modules. Do not put objects in front of an air bag. Do not use rearward-facing child seats in any front passenger seat. The force of a deploying air bag SRS may cause serious injury or death. Please see your Owner’s Manual for further instructions.
