Volkswagen Car-Net Security & Service**

With your 3-month trial and then paid subscription, you can enjoy a host of available features that help you locate your last parked location, check if the doors are locked, call for help in an emergency, and even get vehicle health and diagnostic reports.

Volkswagen Car-Net App-Connect*

VW Car-Net App-Connect lets you link your compatible smartphone with Apple CarPlay™, Android Auto™, or MirrorLink® to use select apps on the touchscreen display of your Volkswagen. From streaming music to mobile maps, it can be accessed on the touchscreen.

Keyless access with push-button start‡‡

The key fob does the job. Leave it in your pocket. You can unlock the door of your Golf as you grip the door handle. Then once you’re inside, with the press of the brake and the push of the start button, your engine starts and you are ready to go.

We’ve made high tech a no-brainer.

It just keeps getting smarter. Technology is simple, intuitive, and seamless in the Golf. Now you can access select apps from your compatible smartphone right on your dash. Music, mapping, messaging, and more can be accessed via voice control thanks to Volkswagen Car-Net® App-Connect. * All in all, it creates an experience as effortless as it is advanced.

The Sportier Utility Vehicle.

Multitasking made fun. Sure, the Golf SportWagen is versatile, and it’s still a blast to drive. But it can also hold the road with clarity and poise that have to be experienced to be believed. And it comes with a little something extra under the hood — a turbocharged engine. It’s the wagon that really hauls.*

*Always obey local speed and traffic laws.
4MOTION all-wheel drive

With this powerful all-wheel-drive system in place, your Golf SportWagen can help you navigate a variety of road conditions. When the system senses that one or more wheels aren’t rotating equally, it can deliver more torque to the wheels with traction for improved grip, handling, and more peace of mind.

You can’t forget the unfettered joy of your first red wagon. So we updated ours with a sporty look, available 4MOTION all-wheel drive, and a rear spoiler. Then we added a turbocharged engine under the hood to make sure every drive is a fun one. You won’t be able to wait for your first drive home. The longest way you know.

Just like your little red wagon. Only horsepowered.

No matter how impressive your reflexes are, the Golf can react faster. Whether it's watching your blind spot, the lane you're in, or helping you park, the available Driver Assistance features quickly help keep you out of trouble. At the end of the day, knowing it has your back gives you more confidence on every drive.

Years of engineering with split-second benefits.

1. Lane Departure Warning/Lane Assist*
   When changing lanes, the Lane Departure Warning/Lane Assist can sense if you start to drift into another lane without using the turn signal and help steer to help keep you in the correct lane.* (Available on Golf R)

2. Forward Collision Warning and Autonomous Emergency Braking (Front Assist)*
   The Forward Collision Warning system (included in Front Assist) has a sensor in the front to help monitor traffic and can alert you to a potential collision. If the vehicle ahead suddenly slows or stops, Front Assist automatically applies the brakes.* (Available on Golf, Golf GTI, Golf R, Golf SportWagen)

3. Adaptive Cruise Control (ACC)*
   The Adaptive Cruise Control helps maintain a relative distance from the car in front of you. If the car in front of you speeds up or slows down, the sensors detect the change and your car follows suit.* (Available on Golf GTI, Golf R, Golf SportWagen)

4. Blind Spot Monitor*
   The sensors on the Blind Spot Monitor feature are able to sense what you might miss. When driving, if you attempt to change lanes, the Blind Spot Monitor can help alert you when other cars may be in your blind spot.* (Available on Golf, Golf GTI, Golf R, Golf SportWagen)

5. Rear Traffic Alert*
   The Rear Traffic Alert comes in handy when you're backing up. It has sensors that can warn you of vehicles entering your path while in reverse and even brake for you if needed.* (Available on Golf, Golf GTI, Golf R, Golf SportWagen)

6. Park Distance Control (Park Pilot)*
   The Park Distance Control has sensors that help you back out of or drive into a parking spot. Audible signals and an optical parking system on the display indicate how much space you have behind and in front of you when parking. If you get too close, an alert sounds as a warning. The display provides additional support for the driver by showing the position of obstacles.* (Available on Golf R)

*Driver Assistance features are not a substitute for attentive driving. See Owner’s Manual for further details and important limitations.
Accidents seem to happen when you least expect them. That’s why we do everything we can to prepare for them in the engineering process. It starts with protective safety cage construction that provides rigidity with strategically placed front and rear crumple zones. Plus, with active and passive safety features, it’s easy to see what matters to us.

**2016 IIHS “Top Safety Pick+” based on good ratings in the moderate overlap front, small overlap front, side, roof impact, and front crash prevention.** Government 5-Star Safety Ratings are part of the National Highway Traffic Safety Administration’s (NHTSA’s) New Car Assessment Program (www.SaferCar.gov).† The Intelligent Crash Response System (ICRS) will only activate in the event of a collision that deploys the airbags.†† Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.

‡ The features discussed are designed to help mitigate the effects of certain collisions and are not a substitute for attentive driving. Please see Owner’s Manual for further details, and important limitations. ‡‡ 25 city/36 highway mpg (2017 Golf 1.8T). Your mileage will vary and depends on several factors, including your driving habits and vehicle condition.

Automatic Post-Collision Braking System

Not every collision brings a car to stop. That’s why our vehicles include the Automatic Post-Collision Braking System. It can help bring your car to a stop after a collision, helping reduce the chance of additional impacts.

Seven stability-enhancing systems

From Electronic Brake-pressure Distribution (EBD), which helps maintain appropriate stopping power during a hard-braking situation, to Electronic Stability Control (ESC), which can adjust engine throttle and apply corrective forces to the wheels that need them most, there are in total seven stability-enhancing systems at your service.

Intelligent Crash Response System (ICRS)

In the event of a collision that deploys the airbags, the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

Tire Pressure Monitoring System (TPMS)

Monitoring and maintaining proper air pressure in your tires helps with efficiency‡‡ and safety. The TPMS helps alert you to a loss of tire pressure so you can know when to add air.

**NHTSA 5-Star Safety Rating**

The 2016 Golf, Golf GTI, Golf R, and Golf SportWagen have all earned a 5-star overall safety rating from the National Highway Traffic Safety Administration’s New Car Assessment Program (www.SaferCar.gov). **That’s four models that get a high-five for high performance.**

IIHS Top Safety Pick+ Rating

The IIHS has determined the 2016 Golf 4-door, Golf GTI 4-door, and Golf SportWagen worthy of a Top Safety Pick+ rating when equipped with the available Forward Assistant Feature of Front Assist. This has as positively thrilled us.

We can’t predict. But we can engineer.

*Note: For further details, and important limitations. ‡‡Airbags are supplemental restraints only and will not deploy under all circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their age and size. Child-safety rear door locks do not apply to vehicles equipped with power windows. The crash-activated fuel cutoff system will automatically shut off the fuel supply to the engine if sensors detect a collision with the vehicle's front end. Safety systems are designed to work with your safety belts and are not a substitute for safe driving. In addition, the Airbag Supplemental Restraint System may not function properly in all collisions.**
