Looking for fun, sporty, or outdoorsy? The Golf family is versatile enough that you can choose all of the above. And no matter which Golf you pick, you’ll always belong to a special group that’s now more special than ever.

The People First Warranty
6 Years/72,000 Miles - Transferable
Bumper-to-Bumper - Limited Warranty

*6 years/72,000 miles (whichever occurs first) New Vehicle Limited Warranty on MY2018 VW vehicles excluding e-Golf. See owner’s literature or dealer for warranty exclusions and limitations.
Since its introduction, the Golf has been synonymous with a great ride. The combination of style, performance, versatility, and just plain fun makes it hard to match. Whether you’re going on a short trip or a road trip, the Golf is up to the task.
The Golf knows how to carry itself, as well as your things. There’s a thoughtfully designed cargo area that helps keep you organized. Not to mention LED taillights, LED Daytime Running Lights (DRL), and the redesigned front grille and bumpers to help you stand out from the crowd. This Golf has what you want to keep up with city life.

**Iconic exterior design**

Introduced over 40 years ago, the design of the Golf, with its distinct C-pillars, has stood the test of time. It’s what happens when you get it right the first time.

**Features**

- LED taillights
- Automatic headlights
- Driver-focused interior
- Adjustable cargo floor
- Leather-wrapped, multi-function steering wheel
- Rain-sensing windshield wipers
- Power tilting/sliding sunroof
- V-Tex leatherette seating surfaces
- Keyless access with push-button start*
- 16” alloy wheels

**Available features**

- LED Daytime Running Lights (DRL)
- LED accent lighting gives your front headlights a sleek look that will be hard to miss.

**Heated front seats**

Who’s turning up the heat? Most likely you and your passengers. With this available feature, you each get three settings to help keep you both comfy when the city gets cold.

*See Owner’s Manual for further details and important warnings about the keyless ignition feature. Do not leave vehicle unattended with the engine running, particularly in enclosed spaces.
You’re really going places. And the Golf has the tools to help make the ride more enjoyable. Access select apps from your compatible smartphone right on your dash. Music, mapping, messaging, and more can be accessed via voice control thanks to Volkswagen Car-Net® App-Connect. * And your world (at least the digital one) looks brighter from the available 8” touchscreen sound system with glass display.

**Technology goes to town.**

Multitasking made fun. Sure, the Golf SportWagen is versatile and a blast to drive. But it can also hold the road with confidence and poise that have to be experienced to be believed. And it comes with a little something extra under the hood—a turbocharged engine. It's the wagon that can really haul.*

The Sportier Utility Vehicle.

*Always obey local speed and traffic laws.

Golf SportWagen SEL shown in Tornado Red
You can't forget the unfettered joy of your first red wagon. So we updated ours with a sporty look, available 4MOTION all-wheel drive, and, let’s just say, a bit more cargo space. Then we added a turbocharged engine under the hood to make sure every drive is a fun one. You won’t be able to wait for your first drive home. The longest way you know.

Just like your little red wagon.
Only horsepowered.

With this available all-wheel drive system in place, your Golf SportWagen can help you navigate a variety of road conditions. When the system senses that the wheels aren’t rotating equally, it can deliver more torque to the wheels with traction for improved grip, handling, and more peace of mind.

Always ensure that your vehicle is equipped with appropriate tires and equipment and always adjust your speed and driving style to the road, weather, traffic, and other conditions. See Owner’s Manual for further details and important limitations.

The Golf Alltrack is the key to unlocking roads that are off the beaten path. Equipped with 4MOTION all-wheel drive, Offroad Mode, and increased ground clearance to accommodate varied road conditions with more confidence, the Golf Alltrack was designed to take the road less graveled. Tread happily.
Looking for fun adventures off the beaten path doesn’t always mean a smooth ride. Fear not, the Golf Alltrack was engineered with 4MOTION all-wheel drive, Offroad Mode, and Hill Descent Control to help provide smooth sailing, even on challenging road surfaces and in inclement weather.

4MOTION all-wheel drive
Available with an automatic or manual transmission, the 4MOTION all-wheel-drive system transfers torque between the front and rear wheels. In normal driving conditions, power is delivered to the front wheels. But when it’s needed, the system can engage the rear axle to help improve traction. Talk about a power move.

Offroad Mode is designed to help you traverse a variety of different roads. It allows you to engage this mode when driving on off-road conditions and helps optimize driving and traction control. The Hill Descent Control will brake for you while going downhill, helping keep your ride at a constant speed.

Drivetrain Selection with Offroad Mode and Hill Descent Control

Rugged bumper design and exterior cladding
With a tough yet refined exterior, the Golf Alltrack is engineered with strong bumpers and exterior cladding, helping stabilize your vehicle in rough conditions and inclement weather. In short, it’s ready for the adventure ahead!

*Always ensure that your vehicle is equipped with appropriate tires and equipment and always adjust your speed and driving style to the road, terrain, traffic, and weather conditions. See Owner’s Manual for further details and important limitations.

You and your Golf make a good team. Whether it’s alerting you to vehicles in your blind spot, monitoring the lane you’re in, or helping you park, the available Driver Assistance features can help. At the end of the day, they can give you more confidence on every drive.

1  Adaptive Cruise Control (ACC)*
   Available Adaptive Cruise Control (ACC) helps maintain a preset distance from the car in front of you. When activated, if the car in front of you speeds up or slows down, the sensors can detect the change and your car follows suit.

2  Parking Steering Assistant (Park Assist)*
   The available Parking Steering Assistant (Park Assist) can determine if a parking spot is big enough for your Volkswagen. Your Golf can steer into spaces in parallel parking or perpendicular. You operate the accelerator, brake, and throttle; it does the rest.

3  Lane Departure Warning (Lane Assist)*
   When moving, the available Lane Departure Warning (Lane Assist) can warn if you start to drift into another lane without using the turn signal. Within the limits of the system, Lane Assist can help keep you in the current lane.

4  Blind Spot Monitor*
   The sensors on the available Blind Spot Monitor are able to help sense what you might miss. When you’re changing lanes, the Active Blind Spot Monitor (available when vehicle is equipped with Lane Assist) on select models can detect when another vehicle is in your blind spot. Within the limits of Lane Assist, it can then countersteer to help keep you in your lane, and in addition to the visual warning in the side mirrors, the steering wheel can vibrate.

5  Maneuver Braking (Included in Park Assist)*
   Available Park Distance Control (Park Pilot) has sensors that can help you back out of or drive into a parking spot. Audible signals and the optical parking system on the display indicate how much space you have behind and, on some vehicles, in front of the vehicle when parking. If you get too close, the system beeps as a warning. Maneuver Braking (included in ParkPilot) can apply emergency braking force automatically to help mitigate and, in best case, prevent collisions with stationary obstacles while you maneuver the vehicle in reverse gear.

6  Forward Collision Warning and Autonomous Emergency Braking (Front Assist)*
   The available Forward Collision Warning (included in Front Assist) system can help monitor traffic and can alert you acoustically and eventually a potential end-end collision with a vehicle moving ahead. If a sense that a collision is imminent, Autonomous Emergency Braking (included in Front Assist) can support the driver with increased brake pressure or, under certain circumstances, it can apply the brakes automatically to help prevent or mitigate the outcome of a collision with a pedestrian if the driver doesn’t respond adequately to the warnings.

7  Available High Beam Control (Light Assist)*
   Available High Beam Control (Light Assist) helps provide better visibility on dark roads by turning on your high beams at certain speeds. A camera mounted at the base of the rearview mirror turns your high beams on when conditions warrant it on dark or poorly lit roads. It then turns them off again if another car approaches or drives in front of you.

8  Forward Collision Warning and Autonomous Emergency Braking (Front Assist)*
   The available Forward Collision Warning (included in Front Assist) system can help monitor traffic and can alert you acoustically and eventually a potential end-end collision with a vehicle moving ahead. If a sense that a collision is imminent, Autonomous Emergency Braking (included in Front Assist) can support the driver with increased brake pressure or, under certain circumstances, it can apply the brakes automatically to help prevent or mitigate the outcome of a collision with a pedestrian if the driver doesn’t respond adequately to the warnings.

*Driver Assistance features are not a substitute for attentive driving. Please see Owner’s Manual for further details and important limitations.
Accidents seem to happen when you least expect them. That’s why we start with a protective safety cage construction that provides rigidity with strategically placed front and rear crumple zones. Plus, with active and passive safety features, it’s easy to see what matters to us.

A lot goes in before you do.

Safety cage
Front and rear crumple zones help absorb crash energy, while a rigid safety cage helps deflect it away from the driver and passengers.

Seven stability-enhancing systems
From Electronic Brake-pressure Distribution (EBD), which helps maintain appropriate stopping power during a hard braking situation, to Electronic Stability Control (ESC), which can adjust engine throttle and apply corrective forces to the wheels that need them, your vehicle is equipped with a total of seven stability-enhancing systems.

Intelligent Crash Response System (ICRS)*
In the event of a collision that deploys the airbags,** the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

Automatic Post-Collision Braking System
Not every collision brings a car to a stop. That’s why our vehicles include the Automatic Post-Collision Braking System. It can help slow the vehicle down after a collision, helping reduce the chance of additional impacts.

*The Intelligent Crash Response System (ICRS) will only activate in a collision where the airbags deploy or safety belt pretensioners are used. Not all collisions cause airbags to deploy or safety belt pretensioners to activate. **Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.
