The new king of the concrete jungle.

Introducing the 2018 Tiguan. On the outside, powerful lines give it a style all its own. On the inside, thoughtful amenities abound. It’s capable, comfortable, and ready to take on the city. And we back it up with America’s best SUV bumper-to-bumper transferable warranty. A six years, 72,000 miles, whichever occurs first, New Vehicle Limited Warranty. After all, royalty deserves nothing less.
We looked at it from every angle, redesigning from top to bottom. A bold character line runs from front to back converging sharply strongly, while hood contours and a distinct grille deliver a memorable statement up front. On the inside, sharp modern styling creates an environment you’ll never want to leave.

A contemporary look that has no contemporaries.

Available features:
- Leather-wrapped, multi-function heated steering wheel
- Climatronic® dual-zone automatic climate control
- V-Tex leatherette seating surfaces
- Remote start*

-versatile 3rd row

The available panoramic sunroof blends seamlessly into the cabin, letting in plenty of light as well as the outside world. At night, integrated ambient accent lighting adds a distinct mood when interior lighting elements are on.

Available for the 1st and 2nd rows, these seating surfaces feature a unique design and color options like Storm Gray or Saffrano Orange and Black.

LED headlights with Adaptive Front-lighting System (AFS)
These available headlights do more than add a nice touch of style. They can move with your turns to help you see what’s ahead.

Panoramic sunroof with ambient lighting
The available panoramic sunroof blends seamlessly into the cabin, letting in plenty of light as well as the outside world. At night, integrated ambient accent lighting adds a distinct mood when interior lighting elements are on.

Viable 3rd row
It’s refined. But it’s also an SUV. And that means an available 3rd row that can carry some extra friends or, when folded flat, a lot of extra gear.

Versatile cargo space
We’ve given it plenty of cargo room, increasing the cargo capacity of the 5-passenger model by over 30% to 73.5 cubic feet with rear seats folded down.

Climatronic® dual-zone automatic climate control

We looked at it from every angle, redesigning from top to bottom. A bold character line runs from front to back converging sharply strongly, while hood contours and a distinct grille deliver a memorable statement up front. On the inside, sharp modern styling creates an environment you’ll never want to leave.

Climatronic® dual-zone automatic climate control

Please refer to Owner's Manual for further details and important warnings about the keyless ignition feature. Do not leave vehicle unattended with engine running, particularly in enclosed spaces.
Yes, it’s elegant, sophisticated, and packed with comforts. But it’s also quite capable. On a variety of roads and in challenging conditions, you can be confident and comfortable.

Horsepower. Torque. And a higher pulse rate.

The turbocharged engine supplies a lot of fun.

Turbocharged engine

Having eight speeds can mean a smooth shifting experience. In Tiptronic® mode, you can shift manually or take control of your driving experience.

8-speed automatic transmission with Sport mode

You can switch between 4MOTION driving modes just by turning a dial. Depending on the conditions, you can choose from On-Road, Off-Road, Snow, and Off-Road Custom. Both On-Road Mode and Off-Road Mode let you adjust the settings to fit your driving style.

Driving Mode Selector

As conditions change, available 4MOTION distributes power between the front and rear wheels as needed to help optimize traction and stability.

4MOTION® all-wheel drive

*Always ensure that your vehicle is equipped with appropriate tires and equipment and always adjust your speed and driving style to the road, terrain, traffic, and weather conditions. See Owner’s Manual for further details and important limitations.
VW Car-Net App-Connect allows you to connect your compatible smartphone with Apple CarPlay™, Android Auto™, or MirrorLink® to access select apps on the touchscreen display. From streaming music to mobile apps, it can be accessed on the touchscreen.

So much tech. So easy to use.

The Tiguan doesn’t just come with technology; it comes with technology that’s simple, useful, and designed to help improve the driving experience. The available VW Digital Cockpit is customizable, so you can display the information you want to see. You can also create up to four user profiles, each one able to remember things like your radio stations and preferred temperature, among others. If you have the available power driver’s seat with memory, the Tiguan can even memorize your favorite seat position.

The Tiguan can store up to four driver profiles, remembering your personalization preferences for a wide array of different settings and systems. You can customize the available display to better suit your driving needs, so information about navigation or your Driver Assistance features is displayed more prominently.

You shouldn’t get lost trying not to get lost. So the available wide map navigation view adjusts the size of the map, making it even bigger and more prominent.

Always pay careful attention to the road and do not allow distractions to take your focus away from driving safely. Never let your mobile phone take your attention from what is happening on the road and in the car. All features and systems require compatible device, operating system, and mobile apps. See mobile device and app providers for terms and privacy.

The available 12.3” display is a true breakthrough. Instead of the traditional instrument cluster, information can be displayed digitally in high resolution.

So much tech. So easy to use.
The changes in the Tiguan go far beyond great style and desirable amenities. We now offer eight available Driver Assistance* features that can help give you extra confidence on your drive.

More help behind the scenes.

1  | Overhead View Camera (Area View)*

2  | Blind Spot Monitor*

The sensors on the available Blind Spot Monitor are able to help you see what a tight spot or tight corner might be hiding. When you’re changing lanes, the Audible Blind Spot Warning system alerts you if a vehicle is engaged within the blind spot. It can even countersteer to help keep you in the lane.

3  | High Beam Control (Light Assist)*

Available High Beam Control (Light Assist) helps provide better visibility to drivers by turning on your high beams at certain speeds. A camera mounted in the base of the rearview mirror uses visible light sensors to detect the condition of your high beams or when conditions warrant it to turn on or off, helping prevent glare to those behind you.

4  | Adaptive Cruise Control (ACC)*

Available Adaptive Cruise Control (ACC) helps maintain a preset distance from the car in front of you. When activated, if the car in front of you slows down, the system can detect the change and your car will follow suit. The system can apply the brakes until your vehicle comes to a stop. In certain situations, it can start your vehicle if it has been stopped for a set amount of time.

5  | Rear Traffic Alert*

The available Rear Traffic Alert system can help warn you of vehicles appearing behind you as you’re backing up. It can even help brake the vehicle if needed.

6  | Forward Collision Warning and Autonomous Emergency Braking with Pedestrian Monitoring (Front Assist)*

The available Forward Collision Warning system can help monitor traffic and alert you acoustically and visually to a potential front-end collision with the vehicle moving ahead. If it senses that a collision is imminent, Autonomous Emergency Braking (included in Front Assist) can support the driver with increased brake pressure, under certain circumstances, it can apply the brakes automatically. The Pedestrian Monitoring (included in Front Assist) feature can warn of pedestrians crossing in front of the vehicle and, under certain circumstances, it can apply the brakes automatically to help prevent or mitigate the outcome of a collision with a pedestrian if the driver doesn’t respond adequately to the warnings.

7  | Maneuver Braking (included in Park Pilot)*

The available Maneuver Braking (included in Park Pilot) can help you back out of a parking spot. Audible signals and the optical parking system on the display indicate how much space you have behind and, on some vehicles, in front of the vehicle when parking. If you get too close, the system sounds a warning. Maneuver Braking (included in Park Pilot) can apply emergency braking force automatically to help mitigate and, in best case, can prevent collisions with stationary obstacles while you maneuver the vehicle in reverse gear.

8  | Lane Departure Warning (Lane Assist)*

When moving, the available Lane Departure Warning system can help you keep your vehicle in its lane by providing audible and optical warnings if you start to drift out of your lane. The system can help steer the vehicle back onto the center of the lane.
In the event of a collision that deploys the airbags, the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

Intelligent Crash Response System (ICRS)*

To give you as much time as possible to avoid the accident** the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

Seven stability-enhancing systems

From Electronic Brake-pressure Distribution (EBD), which helps maintain appropriate stopping power during a hard braking situation, to Electronic Stability Control (ESC), which can adjust engine throttle and apply corrective forces to the wheels that need them most, your vehicle is equipped with a total of seven stability-enhancing systems.

Automatic Post-Collision Braking System

Not every collision brings a car to a stop. That's why our vehicles include the Automatic Post-Collision Braking System. It can help slow the vehicle down after a collision, helping reduce the chance of additional impacts.

Safety cage

Front and rear crumple zones help absorb crash energy, while a rigid safety cage helps deflect it away from the driver and passengers.

We can’t predict. But we can engineer.

*The Intelligent Crash Response System (ICRS) will only activate in a collision where the airbags deploy or safety belt pretensioners to activate. **Airbags are supplemental restraints only and will not deploy under all crash circumstances. Always use safety belts and install children in the rear, using restraint systems appropriate for their size and age.

While we can’t guarantee you’ll never have trouble on the road, working to help anticipate and avoid problems is at the core of what we do.

Specifications, standard features, options, fabrics, and colors are subject to change without notice. Some features may be unavailable when your vehicle is built. Some vehicles are pictured with options that may be available at extra cost or may not be available on some models. Ask your dealer about the availability of options and verify that the vehicle you select includes the equipment you ordered. Tires are supplied and warranted by their manufacturer. “Volkswagen,” the Volkswagen logo, “Climatronic,” “4MOTION,” and “Tiguan” are registered trademarks of Volkswagen AG. “Bluetooth” is a registered trademark of Bluetooth SIG, Inc. MojoMats® is a registered trademark of Volkswagen Group of America, Inc. Volkswagen navigation depends on the signals from the worldwide Global Positioning Satellite network. The vehicle’s electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The system is designed to provide you with suggested routes to location addresses, destinations, and other points of interest. Changes in street names, construction zones, traffic flow, points of interest, and other road system changes are beyond the control of Volkswagen of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested navigation route. Periodically, the mapping is updated and an update will be required in order to maintain the latest navigation information available to us. Updates will be available for purchase from time to time at additional cost.
